Issue 24: Volume 1a

GRANTS FROM EXTERNAL DONORS

(QUARTER: JANUARY – MARCH, 2016)

A Compilation by the
Research Services Unit
Office of Research, Innovation and Development (ORID)

December 2015
### OPPORTUNITIES FOR JANUARY 2016

#### PROJECT GRANTS

- PROVOST’S GRANT FOR LIBRARY RESEARCH .......................................................... 20
- GRANTS .................................................................................................................. 21

#### SMALL RESEARCH GRANTS

- PDF/PARKINSON STUDY GROUP MENTORED CLINICAL RESEARCH AWARD ...... 22

#### WYN WHEELER RESEARCH GRANT

- RESEARCH GRANTS .................................................................................................. 19

#### PROVOST’S GRANT FOR LIBRARY RESEARCH

- RESEARCH GRANTS .................................................................................................. 19

#### PROVOST’S GRANT FOR LIBRARY RESEARCH

- PROVOST’S GRANT FOR LIBRARY RESEARCH .......................................................... 20

#### GRANTS

- PDF/PARKINSON STUDY GROUP MENTORED CLINICAL RESEARCH AWARD ...... 22

#### FOOD AND BUSINESS GLOBAL CHALLENGES PROGRAMME INTEGRATED PROJECTS

- NEONATAL RESUSCITATION PROGRAMME – RESEARCH GRANT ...................... 25
- NEONATAL RESUSCITATION PROGRAMME – EMERGING INVESTIGATOR AWARD ..... 26

#### COLLABORATIVE AWARDS IN SCIENCE

- SECURITY AND RULE OF LAW APPLIED RESEARCH FUND: CALL FOR APPLIED RESEARCH ON THE INFLUENCE OF TRANSNATIONAL CHALLENGES IN FRAGILE AND CONFLICT-AFFECTED SETTINGS ........................................................................... 28

#### STUDENT RESEARCH GRANTS

- INNOVATIONAL RESEARCH INCENTIVES SCHEME VENI AWARDS .................. 29

#### SECURITY AND RULE OF LAW APPLIED RESEARCH FUND: CALL FOR APPLIED RESEARCH ON THE INFLUENCE OF TRANSNATIONAL CHALLENGES IN FRAGILE AND CONFLICT-AFFECTED SETTINGS

- SECURITY AND RULE OF LAW APPLIED RESEARCH FUND: CALL FOR APPLIED RESEARCH ON THE INFLUENCE OF TRANSNATIONAL CHALLENGES IN FRAGILE AND CONFLICT-AFFECTED SETTINGS ........................................................................... 28

#### INNOVATIONAL RESEARCH INCENTIVES SCHEME VENI AWARDS

- STUDENT RESEARCH GRANTS .................................................................................. 29

#### RESEARCH IN SUSTAINABLE SOLID WASTE MANAGEMENT

- SMALL GRANTS ......................................................................................................... 32

#### SMALL GRANTS

- MAJOR GRANTS ........................................................................................................ 32

#### PHD GRANT FUND

- PHD GRANT FUND .................................................................................................... 33

#### GRADUATE PROGRAMME

- RADIOLOGY EDUCATION RESEARCH DEVELOPMENT GRANT......................... 35

#### YOUNG SCIENTISTS SUMMER PROGRAMME

- EDUCATION SCHOLAR GRANT ................................................................................. 36

#### POSTDOCTORAL POSITIONS IN THEORETICAL CONDENSED MATTER AND STATISTICAL PHYSICS

- POSTDOCTORAL POSITIONS IN THEORETICAL CONDENSED MATTER AND STATISTICAL PHYSICS ................................................................................................................................. 37

Description:
The Conservation, Food and Health Foundation invites applications for its project grants. These support non-profit, non-governmental organisations to build capacity within the developing countries in the fields of conservation, food and health. Funding is available to projects that:

- demonstrate strong local leadership;
- promote professional development in the conservation, agricultural, and health sciences;
- develop the capacity of local organisations;
- address a particular problem in the field.

Projects that address underfunded issues and geographic areas may be given preference. Research, training and technical assistance projects that feature collaborative partnerships embedded in strong networks and focus on prevention rather than remediation are favoured.

Ordinarily the programme supports non-profit, non-governmental organisations, but public organisations which can prove they are non-governmental may apply. Preference is given to organisations located in developing countries or developed country organisations whose activities are of direct or immediate benefit to developing countries.

The average award amount is US$17,000 and grants rarely exceed US$25,000.

Closing date: 01 Jan 16

Deadline information: Concept notes due first working day of January and July annually.
Posted date: 04 Oct 13
Award type: Directed grants to institutions, research groups etc

RESEARCH GRANTS
Foundation for Prader-Willi Research

Description:
The Foundation for Prader-Willi Research invites applications for its research grants. These support innovative research that advances the understanding of Prader-Willi syndrome. The foundation is especially interested in projects that lead to the development of new treatments to alleviate the symptoms associated with PWS. Priority will be given to research on the following areas:

- molecular basis of the PWS phenotype;
- regulation of appetite and energy homeostasis in individuals with PWS, development and evaluation of therapeutic interventions to regulate appetite and satiety in PWS;
- aetiology of medical, behavioural and psychiatric complications in PWS, development and evaluation of therapeutic interventions;
- development of novel therapeutic interventions using in vitro and in vivo models of PWS.

Principal investigators must have a primary faculty appointment at the level of instructor or higher.

Grants are worth up to US$100,000 for one year, with the possibility of a second year
renewal. Indirect costs of up to eight per cent are allowed.

**Closing date: 01 Jan 16 (Forecast)**

**Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated 2 times a year.**

**ROVOST’S GRANT FOR LIBRARY RESEARCH**

*Wake Forest University*

**Description:**

The Z Smith Reynolds Library at Wake Forest University invites applications for its provost’s grants for library research. These support scholarly use of the special collections divisions at the library. The grants provide support for travel and living expenses for scholars. The library’s special collections include:

- rare books;
- manuscripts;
- university archives;
- the North Carolina Baptist historical collection.

Grants are available to scholars at the graduate or postgraduate level and to independent scholars researching works for publication. Applicants must reside more than 60 miles away from the university and must be conducting research directly related to materials in the library’s special collections and archives. Preference will be given to projects which represent a significant scholarly contribution to their fields and to projects with a high probability of eventual publication or other public dissemination. The research residency must take place between 1 July 2014 and 30 June 2015.

Awards range from US$500 to US$2,500, depending on the nature of the research project and the distance travelled.

**Closing date: 01 Jan 16 (Forecast)**

**Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.**

2012-13 Proposals
PD/PARKINSON STUDY GROUP MENTORED CLINICAL RESEARCH AWARD
Parkinson’s Disease Foundation

Description:
The Parkinson’s Disease Foundation and the Parkinson Study Group invite applications for their mentored clinical research award. This supports new investigators in patient-oriented research in Parkinson’s disease or other Parkinsonian disorders under the mentorship of an experienced investigator. The aim is to provide funding for an investigator who has the potential to become an independent researcher.

Applicants must be clinicians and scientists within five years of completing formal training. Either the applicant or the mentor must be a member of Parkinson’s Study Group.

One award of US$50,000 is available for a one-year project. Only direct costs will be funded.

Closing date: 02 Jan 16 (Forecast)

PROJECT GRANTS
Association of Anaesthetists of Great Britain and Ireland

Description:
The International Relations Committee of the Association of Anaesthetists of Great Britain and Ireland invite applications for its project grants. These primarily support projects in the developing world that demonstrate sustainability. Projects can involve an individual or a team over a period of weeks or months, either as part of an existing scheme delivered by another organisation or as part of the establishment of a new programme.

Applications are considered from charitable and non-governmental organisations, as well as individual anaesthetists.

RESEARCH GRANTS
Leakey Foundation

Description:
The Leakey Foundation invites applications for its research grants. These support advanced doctoral students and established scientists undertaking research related specifically to human origins.

To be eligible, applicants must be affiliated with an academic or research institution and must have advanced to doctoral candidacy before the application deadline. There are no citizenship restrictions, but all application materials must be submitted in English.

Grants to doctoral students are in the US$3,000 to US$15,000 range; however, larger grants, especially for postdoctoral students and senior scientists, may be funded up to US$22,000. Funding is available to cover costs related to subsistence, expendable supplies, travel, fees, personnel and special analysis.

FOOD AND BUSINESS GLOBAL CHALLENGES PROGRAMME INTEGRATED PROJECTS

The Netherlands Organisation for Scientific Research’s Division of Science for Global Development (NWO WOTRO) invites proposals for integrated projects under its food and business global challenges programme. This aims to encourage scientific research and innovation projects on food security and related private sector development that contribute to long-term access to affordable, safe and nutritious food for vulnerable and resource-poor populations in low- and middle-income countries (LMICs). The two priority areas for research and innovation projects in this round are the following:

- sustainable food systems;
- urbanisation and challenges for food and nutrition security.

Applications can be submitted by consortia of at least three different partners, The main applicant should be a senior researcher with a PhD degree employed by a Dutch research institute. Other consortium members should be at least one senior researcher from an LMIC research organisation and a representative of another private or public organisation from the LMIC. Additional partners, such as Dutch private partners or partners from other LMICs or high income countries, are encouraged.

Grants are worth up to €600,000 per project with a duration of four years. Partners are required to provide co-funding of at least 20 per cent of the total project budget, either in-kind or cash. Reimbursable costs include personnel costs, research and innovation costs, capacity development and knowledge sharing costs, and overhead.
Closing date: 05 Jan 16  
Deadline information: Applications may be submitted between 12 noon CET, 23 November 2015 and 12 noon CET, 5 January 2016.  
Posted date: 07 Oct 15  
Award type: Hosting conferences, Travel for research purposes, Directed grants to institutions, research groups etc, Equipment and materials, Innovation grants, Academic-Industry links, Development (Africa/Caribbean), Networking/collaboration

NEONATAL RESUSCITATION PROGRAMME – RESEARCH GRANT
Canadian Paediatric Society – Société Canadienne de Pédiatrie

Description:
The Canadian Paediatric Society invites nominations for its research grant under its neonatal resuscitation programme. This supports research on neonatal resuscitation, and may be used to generate pilot data in order to develop the basis for an application for independent research support through conventional granting mechanisms. Studies may include basic science, clinical, epidemiological or educational research. Preference is given to research in the following priority areas:

- post-resuscitation neonatal stabilisation;
- quality assurance and neonatal resuscitation;
- resuscitation physiology;
- resuscitation education.

Applicants must be health care professionals from a Canadian or US institution, and may include established investigators with 10 or more years’ experience since their primary appointment. Applications involving primary investigators from outside Canada or the US must demonstrate a substantive role of the Canadian or US investigator in the research process.
The grant is worth CA$25,000 for one year and may be used to cover supplies, minor equipment, salaries for support personnel, and local travel. A non-funded extension of one year may be requested.

Closing date: 05 Jan 16
Deadline information: This call is repeated once a year.

EONATAL RESUSCITATION PROGRAMME – EMERGING INVESTIGATOR AWARD
Canadian Paediatric Society – Société Canadienne de Pédiatrie

Description:
The Canadian Paediatric Society invites nominations for its emerging investigator award under its neonatal resuscitation programme. This supports research on neonatal resuscitation, and may be used to generate pilot data in order to develop the basis for an application for independent research support through conventional granting mechanisms. Studies may include basic science, clinical, epidemiological or educational research. Preference is given to research in the following priority areas:

- post-resuscitation neonatal stabilisation;
- quality assurance and neonatal resuscitation;
- resuscitation physiology;
- resuscitation education.

Applicants must be health care professionals from a Canadian or US institution who have completed their primary professional degree or diploma within the last five years. Applications involving primary investigators from outside Canada or the US must demonstrate a substantive role of the Canadian or US investigator in the research process.

The grant is worth CA$5,000 for one year and may be used to cover supplies, minor equipment, salaries for support personnel, and local travel. A non-funded extension of one year may be requested.

Closing date: 05 Jan 16
Deadline information: This call is repeated once a year.
Collaborative Awards in Science
Wellcome Trust

Description:
The Wellcome Trust invites applications for its collaborative awards in science. These support groups of independent researchers pursuing problems across the areas of science, humanities and social science and innovation.

Teams should normally consist of no more than six applicants. Interdisciplinary research collaborations between basic scientists or medical and veterinary clinicians, and non-biologists, such as mathematicians, physicists, chemists, engineers and social scientists, are encouraged.

Awards are normally worth up to £4 million over a period of up to five years. Funding may be used to cover research expenses, travel and subsistence, overseas allowances, research management and support costs. A provision for public engagement costs may also be awarded.

Closing date: 05 Jan 16

Deadline information: Preliminary applications due by 5 January; full applications due by 13 April 2016.

S
curity and rule of law applied research fund: call for applied research on the influence of transnational challenges in fragile and conflict-affected settings

Netherlands Organisation for Scientific Research – Nederlandse Organisatie voor Wetenschappelijk Onderzoek

Description:
The Netherlands Organisation for Scientific Research’s Division of Science for Global Development (NWO WOTRO) invites applications for its call for applied research on the influence of transnational challenges in fragile and conflict-affected settings, under its security and rule of law applied research fund. This aims to strengthen the evidence-base of policies or programming for security and rule of law in FCAS addressing the influence of transnational flows on stability in these settings.

Targeted FCAS are: Afghanistan, Burundi, Central African Republic, Chad, Cote d’Ivoire, Democratic Republic of the Congo, East Timor, Egypt, Ethiopia, Indonesia, Iraq, Jordan, Kenya, Lebanon, Liberia, Libya, Mali, Niger, Nigeria, Palestinian Territories, Rwanda, Sierra Leone, Somalia, South Sudan, Syria, Tunisia, Uganda, Ukraine, Yemen. However, a regional focus, comparative research and research into the role of and relation with developed countries in these transnational flows is encouraged.

A research project must be carried out by practitioners and researchers from various disciplines and backgrounds and is directed by a consortium. The consortium must consist of at least one research organisation and one practitioner organisation. The practitioner organisation must be involved in the design or implementation of policies for security and rule of law reform programmes in FCAS and whose knowledge demand is addressed by the consortium. The consortium may be extended with other organisations. The main applicants must hold a senior position within his or her organisation.

Grants are worth up to €100,000 per project over six months. The total budget for this call is €1 million. Applications must be written in English.

Closing date: 05 Jan 16
Deadline information: Applications may be submitted between 12 noon CET, 23 November 2015 and 2pm CET, 5 January 2016.
Posted date: 02 Nov 15

STUDENT RESEARCH GRANTS
American Society for Laser Medicine and Surgery

Description:
The American Society for Laser Medicine and Surgery invites applications for its student research grants.

These support research projects that foster the development and use of lasers and other related technologies in medical and surgical applications.

Applicants must be undergraduate or graduate students, or employed by an organisation in a student capacity. Up to four grants, worth a maximum of US$5,000 each, are available.

Closing date: 06 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Applications due by 11.59pm CT. This call is repeated once a year.

Innovational Research Incentives Scheme Veni Awards
Netherlands Organisation for Scientific Research – Nederlandse Organisatie voor Wetenschappelijk Onderzoek

Description:
The Netherlands Organisation for Scientific Research (NWO), in collaboration with the Netherlands Organisation for Health Research and Development (ZonMW) and Technology Foundation STW, invites proposals for its innovation research incentives scheme Veni awards. The objective of this scheme is to promote innovation in the field of academic research. The awards are aimed at researchers at the start of their academic career to conduct independent research and develop their own innovative lines of research that can be structurally embedded within a research institution.

Eligible candidates must have completed their doctorates within the last three years and have already demonstrated a striking talent for doing scientific research. The project to be funded should be carried out at one of the approved Dutch universities, the Royal Netherlands Academy of Arts and Sciences (KNAW) and NWO research institutes, the Netherlands Cancer Institute (NKI), the Max Planck Institute for Psycholinguistics or Naturalis. Women are especially encouraged to apply.

The annual budget for Veni, Vidi and Vici awards together is €150 million. Veni grants are worth up to €250,000 each over a three-year period. All applications must be submitted in English.

Closing date: 06 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect.
Applications due by 2.59pm CET. This call is repeated once a year.
Posted date: 31 Oct 14
Award type: Travel for research purposes, Directed grants for individual investigators, Grants - undirected, Innovation grants

Research in Sustainable Solid Waste Management
Environmental Research and Education Foundation

Description:
The Environmental Research and Education Foundation invites applications for its research funding in sustainable solid waste management. Funding supports projects related to sustainable waste management practices in the following areas:

- waste minimisation;
- recycling;
- waste conversion to energy, biofuels, chemicals or other useful products including waste-to-energy, anaerobic digestion, composting, and other thermal or biological conversion technologies;
- strategies to promote diversion to higher and better uses such as organics diversion, market analysis, optimised material management and logistics;
- landfilling.

Proposals are accepted from outside the US and from non-academic institutions provided the principal investigators are well-qualified to conduct the research. While postdoctoral investigators may be listed on a proposal, they may not be listed as a principal investigator. Graduate students are not eligible to submit a proposal.

Previously grants have ranged from US$15,000 to over US$500,000 with the average grant amount being US$160,000.

Closing date: 08 Jan 16
Deadline information: Proposals accepted 10 days prior to, and up to 5pm ET on, closing date. Deadlines on: 8 January 2016, 15 July 2016, and repeated annually.
Posted date: 20 Oct 14
Award type: Directed grants for individual investigators, Directed grants to institutions, research groups etc
Award budget total: -

MALL GRANTS
Parkes Foundation

Description:
The Parkes Foundation invites applications for its small grants. These support the study into biosocial sciences, with emphasis on human biosocial projects. The foundation supports studies in the areas of reproduction, demography, fertility, human health including HIV/AIDS, conservation and human genetics.

Grants are directed particularly towards helping graduate research students meet their field work costs, but others may apply. Undergraduate projects are not supported.

Grants do not usually exceed £600.

Closing date: 09 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.
Posted date: 04 Dec 14

MAJOR GRANTS
Bibliographical Society

Description:
The Bibliographical Society invites applications for its major grants. These support bibliographical research, including book history, textual transmission, publishing, printing, bookbinding, book ownership and book collecting.

Applicants may be of any nationality and need not be members of the society.
A number of grants worth up to £2,000 each are offered.

Closing date: 09 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

HD GRANT FUND
Parkes Foundation

Description:
The Parkes Foundation invites applications for its PhD grant fund. This supports a registered PhD student in conducting substantive field work in the areas of reproduction, demography or fertility.

Students in receipt of a research council grant or equivalent are not eligible to apply.

One grant of up to £3,000 is available.

Closing date: 09 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

GRADUATE PROGRAMME
Paris School of Neuroscience

Description:
The Paris School of Neuroscience invites applications for its neuroscience graduate programme. This four-year programme is open to international students primarily trained outside France, and leads to a PhD in neuroscience.

All applicants are required to hold a diploma that is obtained outside France in any relevant field related to neuroscience. The diploma must be equivalent to at least the French Master one or two degree.

Closing date: 10 Jan 16
Deadline information: Applications invited between 2 November 2015 and 10 January 2016. This call is repeated once a year.
Posted date: 19 Oct 15

RADIOLOGY EDUCATION RESEARCH DEVELOPMENT GRANT
Radiological Society of North America

Description:
The Radiological Society of North America, Association of University Radiologists, Association of Program Directors in Radiology and Society of Chairmen of Academic Radiology Departments invite applications for their radiology education research development grant. This encourages innovation and improvement in health sciences education by providing research opportunities to individuals in pursuit of advancing the science of radiology education. All areas of radiology education research are eligible for support including the following:

- development of new educational programmes or the improvement of existing programmes;
- pilot studies with respect to methods of teaching,
- evaluation of educational techniques, materials, or programmes;
- improving methods of student, teacher, course, or programme evaluation;
- expanding knowledge of how to provide effective education in the radiologic sciences.

Each applicant must be a member of at least one of the sponsoring organisations, hold a primary appointment in a radiology department and not be an agent of any for-profit, commercial company in the radiologic sciences.

The grant is worth up to US$10,000 for one year.

Closing date: 10 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect.
Applications due by 12 midnight. This call is repeated once a year.

**YOUNG SCIENTISTS SUMMER PROGRAMME**

*International Institute for Applied Systems Analysis*

**Description:**
The International Institute for Applied Systems Analysis invites applications for its young scientists summer programme. This offers research opportunities to talented, young researchers whose interests correspond with IIASA’s ongoing research on issues of global, environmental, economic and social change.

Applicants should be advanced graduates about two years from receiving a PhD. They may be from any country, but preference is given to applicants who are resident in countries in which IIASA has a national member organisation.

**Closing date: 11 Jan 16**

**Deadline information:** Applications due by 12 midnight CET. This call is repeated once a year.

**Posted date: 26 Oct 15**

**Award type:** Young investigator awards, Financial aid for postgraduate students, Directed grants for individual investigators, Networking/collaboration

**Award amount max:** -

**Award amount min:** -

**Award budget total:** -

**EDUCATION SCHOLAR GRANT**

*Radiological Society of North America*

**Description:**
The Radiological Society of North America invites applications for its education scholar grant. This supports education-related activities in any area of radiologic sciences. Projects may include, but are not limited to:

- advanced training in the discipline of education;
- development, dissemination and evaluation of printed or electronic education materials;
• research of teaching methods and evaluation processes;
• education in emerging nations;
• medical student, resident, fellow, continuing medical education participant, allied health professional student education.

Applications are accepted from individuals throughout the world, provided that they are society members and not agents for any for-profit, commercial company in the radiologic sciences.

The grant is worth up to US$75,000 for a period of one year. In exceptional cases, grants for two years may be considered.

Closing date: 11 Jan 16
Deadline information: This call is repeated once a year.
Posted date: 20 Jul 15

POSTDOCTORAL POSITIONS IN THEORETICAL CONDENSED MATTER AND STATISTICAL PHYSICS
Abdus Salam International Centre for Theoretical Physics

Description:
The Abdus Salam International Centre for Theoretical Physics invites applications for its postdoctoral positions in theoretical condensed matter and statistical physics. A limited number of positions are available in the section’s current research areas, which include:

• disordered and strongly correlated systems;
• electronic structure and computer simulations;
• statistical mechanics and applications.

Applicants must be no older than 35 years old at the time of application and they should have obtained their PhD after 2010. Appointments will be made for two years with the possibility of renewal for another year.

Closing date: 11 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

H 2020-MSCA-ITN-2016 MARIE SKLODOWSKA-CURIE INNOVATIVE TRAINING NETWORKS
Horizon 2020: Excellent Science

Description:
The European Commission Horizon 2020: Excellent Science invites proposals for its H2020-MSCA-ITN-2016 Marie Sklodowska-Curie innovative training networks call. This aims to raise excellence and structure research and doctoral training, extending the traditional academic research training setting, incorporating the elements of open science and equipping researchers with the right combination of research-related and transferable competencies. Applications may be submitted for the following network types:

- MSCA-ITN-2016-EID European industrial doctorates;
- MSCA-ITN-2016-EJD European joint doctorates;
- MSCA-ITN-2016-ETN European training networks.

ETNs and EJDs must be composed of at least three beneficiaries located in three different EU member states or associated countries, including Switzerland. All three legal entities must be independent of each other. EIDs must be composed of at least two independent beneficiaries located in two different member states or associated countries. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Researchers in EIDs must spend at least 50 per cent of their time in the non-academic sector. The living allowance annual reference rate for early stage researchers is €37,320. The allowances are subject to country correction. The total indicative budget for this call is €370 million.

Ref: OJ C6776.
Closing date: 12 Jan 16

**2020-JTI-IMI2-2016-06 IMI2 SIXTH CALL FOR PROPOSALS**

*Innovative Medicines Initiative Joint Undertaking*

**Description:**  
The Innovative Medicines Initiative Joint Undertaking invites applications for its sixth call for proposals. This supports prospective, pre-competitive pharmaceutical research and development projects. Proposals may address the following topics:

- IMI2-2016-06-01 development of quantitative system toxicology approaches to improve the understanding of the safety of new medicines;  
- IMI2-2015-06-02 establishing impact of respiratory syncytial virus infection, resultant disease and public health approach to reducing the consequences;  
- IMI2-2015-06-03 real world outcomes across the Alzheimer’s disease spectrum (ROADS) to better care;  
- IMI2-2016-06-04 development of an outcomes-focused data platform to empower policy makers and clinicians to optimise care for patients with haematologic malignancies.  

Topics three and four are both part of the IMI2 Big Data for Better Outcomes programme.

Proposals must take the form of research and innovation actions. Research and innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia. The initiative should seek to involve a broader range of partners, including mid-sized companies from different sectors such as biomedical imaging, medical information technology, diagnostic or animal health industries.

The indicative duration for projects under topics 1, 2 and 4 is 60 months, and 24 months for topic 3 projects. The indicative contribution from industry consortia is €46.5 million, and the IMIJJU budget is €46.5m.
Closing date: 12 Jan 16  
Deadline information: Stage one submissions due by 5pm Brussels time, 12 January; stage two submissions due by 5pm Brussels time, 14 June 2016.

PHD STUDENTSHIPS  
Fisheries Society of the British Isles

Description:  
The Fisheries Society of the British Isles invites applications for its PhD studentships. These support postgraduate study that leads to a PhD in any field relevant to fish biology, and fisheries science and conservation.

Members of the society may apply. Applicants must have the agreement of a supervisor based at a university or research institute in the UK or Republic of Ireland. Applicants may be from any country, but should note that fees paid to the university will not exceed the amount charged to EU citizens. Therefore, applicants outside of EU must demonstrate that they have additional funding for the duration of the studentship.

Studentships are based on the NERC stipend rate plus a £1,000 supplement, and include a contribution of £1,500 per year towards consumables.

Closing date: 13 Jan 16 (Forecast)

Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

INDUSTRIAL PARTNERSHIP AWARDS
Biotechnology and Biological Sciences Research Council

Description:
The Biotechnology and Biological Sciences Research Council invites applications for its industrial partnership awards. These support science-led research projects that address any topic within the council’s remit, and where industrial partners contribute in cash funding.

Applications should be made to the following committees according to the research topic:

- research committee A evaluates proposals related to animal disease, health and welfare;
- research committee B evaluates proposals related to plants, microbes, food and sustainability;
- research committee C evaluates proposals related to genes, development, and science, technology, engineering and mathematics approaches to biology;
- research committee D evaluates proposals related to molecules, cells and industrial biotechnology.

Principal applicants must be resident in the UK and hold an academic staff appointment, at the lecturer level or equivalent, at a higher education institution, research council institute or a BBSRC approved research organisation. Company partners should be registered in the UK or have a UK research and development or manufacturing site. Where a suitable company cannot be found in the UK, an overseas company may be used.

Industrial partners must contribute in cash at least 10 per cent of the full economic cost of projects. Awards are tenable for up to five years.

Closing date: 13 Jan 16
Deadline information: Applications due by 4pm.

COMING SOON: INVENTION FOR INNOVATION (I4I) PRODUCT DEVELOPMENT AWARDS
Department of Health including NIHR

Description:
The Department of Health’s National Institute for Health Research will shortly be inviting applications for its invention for innovation (i4i) product development awards. The closing date for stage 1 applications is 13 January 2016 and further call details will be announced on 11 November 2015. The following information is subject to change.

These awards support research and development of medical devices, active implantable devices and in vitro diagnostic devices in any area of existing or emerging clinical need.

Projects may be in the early or late stages of research and development, including the clinical development of laboratory-validated technologies or interventions. They should have progressed beyond basic research and have demonstrated proof-of-concept. The expected output is an advanced or clinically validated prototype medical device, technology or intervention. Proposals should address the following themes:

- trauma and critical care, including resuscitation, stabilisation, transfusion, anaesthetics and anaesthetic devices, diagnosis and monitoring, neurotrauma, burns, sepsis, physical and mental rehabilitation occurring during critical care, and pain management;
- oncology diagnostics, including innovative developments in imaging of the body, novel approaches for more effective endoscopy and biopsy examinations, molecular diagnostic tests, and approaches that lead to more effective treatment selection, efficacy monitoring and outcome determination.

Projects must be collaborative and include significant contributions from at least two partners from academia, industry or the NHS. The lead applicant must be based in England or Wales. Collaborators may be based outside England or Wales, but are not eligible to receive any funding. The involvement of small and medium-sized enterprises or early-stage companies is particularly encouraged.

Awards cover between 80 and 100 per cent of eligible project costs, depending on the type of organisation, over a maximum period of three years.

Closing date: 13 Jan 16
Deadline information: Stage 1 proposals due by 1pm, 13 January 2016; invited stage 2 proposals due by 1pm, 20 April 2016.
Posted date: 21 Jul 15

COMING SOON: INVENTION FOR INNOVATION (I4I) CHALLENGE AWARDS

Department of Health including NIHR

Description:
The Department of Health’s National Institute for Health Research will shortly be inviting applications for its invention for innovation (I4I) challenge awards. The closing date for stage 1 applications is 13 January 2016 and further call details will be announced on 11 November 2015. The following information is subject to change. ***

These awards support the clinical development of laboratory-validated technologies or interventions, requiring minimal preclinical development.

Projects must be based on a working prototype or proven concept with a strong evidence base. Minor or incremental changes to technologies in current clinical use are outside the remit of the awards. The expected output is a disruptive technology with the potential to offer improved outcomes for NHS patients. Proposals should address the following themes:

- trauma and critical care, including resuscitation, stabilisation, transfusion, anaesthetics and anaesthetic devices, diagnosis and monitoring, neurotrauma, burns, sepsis, physical and mental rehabilitation occurring during critical care, and pain management;
- oncology diagnostics, including innovative developments in imaging of the body, novel approaches for more effective endoscopy and biopsy examinations, molecular diagnostic tests, and approaches that lead to more effective treatment selection,
efficacy monitoring and outcome determination.

Projects must be collaborative and include significant contributions from at least two partners from academia, industry or the NHS. The lead organisation must be an NHS organisation or service provider based in England. Collaborators may be based outside England, but are not eligible to receive any funding. The involvement of small and medium-sized enterprises or early-stage companies is particularly encouraged.

Awards cover between 80 and 100 per cent of eligible project costs, depending on the type of the organisation, over a maximum period of three years.

Closing date: 13 Jan 16

S
TAND-ALONE LINK
Biotechnology and Biological Sciences Research Council

Description:
The Biotechnology and Biological Sciences Research Council invites applications for its stand-alone LINK programme. This supports pre-competitive research projects that address any topic within the council’s remit, and where industry contributes funding.

Applications should be made to the following committees according to the research topic:

- research committee A evaluates proposals related to animal disease, health and welfare;
- research committee B evaluates proposals related to plants, microbes, food and sustainability;
- research committee C evaluates proposals related to genes, development, science, technology,
engineering and mathematical approaches to biology;
• research committee D evaluates proposals related to molecules, cells and industrial biotechnology.

Applying teams must include at least one company, with preference given to small and medium-sized enterprises, and one science-based partner. Principal applicants must be resident in the UK and hold an academic staff appointment, at the lecturer level or equivalent, at a higher education institution, research council institute or a BBSRC approved research organisation. Company partners should be registered in the UK or have a UK research and development or manufacturing site. Where a suitable company cannot be found in the UK, an overseas company may be used.

Industry partners must contribute in cash at least 50 per cent of the full economic cost of projects. Funding is available for up to five years.

Closing date: 13 Jan 16
Deadline information: Applications due by 4pm.

WILLIS A REID JR STUDENT RESEARCH FUND
American Society of Parasitologists

Description:
The American Society of Parasitologists invites applications for the Willis A Reid Jr student research fund. This provides support for students undertaking research in the field of parasitology. Applicants must be graduate level members of the society who are affiliated with institutions, or major professors who have limited or no grant money to support student research. Both professors and students must be members of the society at the time of the application. One award worth US$500 is available for an undergraduate student and one worth US$1,000 for a graduate student.

Closing date: 14 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the
approximate deadline we expect. This call is repeated once a year.

RESEARCH GRANTS 
Savoy Foundation – Fondation Savoy 

Description:
The Savoy Foundation invites applications for its research grants. These support clinicians or established scientists working on epilepsy and related subjects. Grants support the following activities:

- launching of a project, including operating costs in the expectation of funds already requested from government agencies;
- pre-research, namely preliminary studies in preparation of a more substantial request to be addressed to another agency;
- pursuit or completion of a project following the interruption or the termination of a grant;
- contribution to the funding of a research project of particular interest in the field of epilepsy;
- contribution to the funding of a scientific activity, such as a publication or meeting, related to the field of epilepsy.

Applications are open to Canadian investigators for research conducted in Canada or abroad, or foreign nationals for projects conducted in Canada.

Grants are worth up to CA$25,000 each and are not renewable.

Closing date: 15 Jan 16
Deadline information: This call is repeated once a year.
Posted date: 16 Jan 15
Award type: General operating support, Hosting conferences, Travel to conferences, meetings etc., Directed grants for individual investigators, Publish, edit, translate, disseminate

YAMAGIWA-YOSHIDA MEMORIAL INTERNATIONAL STUDY GRANTS
Union for International Cancer Control

Description:
The Union for International Cancer Control invites applications for the Yamagiwa-Yoshida memorial international study grants. These enable cancer investigators from any country to carry out bilateral research projects abroad that exploit complementary materials or skills, including training in advanced experimental research methods and techniques. Basic, translational or applied cancer research is eligible, and prevention-oriented projects are especially encouraged. Applicants may be investigators, clinicians, epidemiologists or public health professionals currently engaged in cancer research. They must have obtained a PhD degree or equivalent at least two years prior the application deadline, and have recent publications in international peer-reviewed literature.

Between 14 and 16 grants, with an average value of US$10,000 each, are available on a yearly basis and support a maximum study period of three months.

Closing date: 15 Jan 16

RESEARCH SEED GRANT
Radiological Society of North America

Description:
The Radiological Society of North America Research & Education Foundation invites applications for its research seed grant. This enables investigators to define objectives and test hypotheses in preparation of major grant applications in any area of radiologic sciences. Projects with a focus on advancing imaging science, developing or evaluating medical imaging technology, or making innovative use of imaging science to answer important biologic or clinical questions are encouraged.

Applicants must be society members and radiological investigators of any level. They must hold a full-time faculty position in a department of radiology, radiation oncology, or nuclear medicine within an educational institution, and have completed advanced training and be certified by the radiology board of their country.

Funding of up to US$40,000 is available for a one-year project to support its preliminary or pilot phase.

EWALDT-KING STUDENT RESEARCH AWARD
Cooper Ornithological Society

Description:
The Cooper Ornithological Society invites applications for the Mewaldt-King student research awards. These $1,000 awards are designated to support research that relates to the conservation of birds. Research may be in any area of ornithology, but studies that involve demographics, breeding biology or disease ecology may be particularly relevant, especially if the species is endangered, threatened or otherwise of management concern. Studies of species from threatened ecosystems or with reference to large-scale conservation issues such as climate or landscape change are also of particular interest.

Only graduate students accepted to or enrolled in a master's or doctoral program are eligible for the award.

Closing date: 15 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

Eeva Knight Research Grant
International Reading Association

Description:
The International Reading Association invites applications for the Elva Knight research grant. This supports promising research that addresses significant questions for the discipline of reading or literacy research and practice. Studies may be carried out using any research method or approach as long as the focus of the project is on research in reading, writing or literacy; or on teacher preparation for reading or writing instruction.

Applicants and co-applicants must be current members of the association.

The grant is worth up to US$5,000 for one year. Funding may be used to cover costs associated with personnel, travel, materials, computers, office expenses or clerical support.

Closing date: 15 Jan 16
Deadline information: Applications due by 4pm EST. This call is repeated once a year.

IBNER LIBRARY RESIDENT SCHOLAR PROGRAMME
Smithsonian Institution

Description:
The Smithsonian Institution’s Libraries invites applications for the Dibner Library resident scholar programme. This supports scholars working on a topic related to the history of science and technology who can make substantial use of collections in the Dibner Library. The collections include materials in the following fields:

- mathematics;
- astronomy;
- classical natural philosophy;
- theoretical physics to up to the early 20th century;
- experimental physics, with a focus on electricity and magnetism;
- engineering technology;
- scientific apparatus and instruments.

Doctoral students and postdoctoral scholars may apply. International scholars are also welcome to apply provided that they are fluent in English. In addition, they should
have an understanding of Latin or other foreign language. Scholars must be in residence at the Smithsonian during the award period.

Stipends are worth US$3,500 per month for up to six months. Residencies must take place between 1 September 2016 and 31 August 2017.

Closing date: 15 Jan 16
Deadline information: This call is repeated once a year.

**AIRD SOCIETY RESIDENT SCHOLAR PROGRAMME**
Smithsonian Institution

**Description:**
The Smithsonian Institution’s Libraries invites applications for the Baird Society resident scholar programme. This supports research studies that focus on the special collections of the Smithsonian Institution’s libraries. Research studies should relate to the following collections:

- 19th and early 20th century World’s Fair printed materials;
- manufacturers’ commercial trade catalogues in the National Museum of American History Library, used to study American industrialisation, mass production and commercialism;
- natural history rare books in the Cullman Library, including pre-1840 works on topics such as botany, zoology, travel and exploration;
- museum and collecting, geology and anthropology;
- air and space history in the National Air and Space Museum Library’s Ramsey Room for the study of ballooning, rocketry and aviation from the late 18th to early 20th centuries;
- James Smithson’s library in the Cullman Library;
- European and American decorative arts, architecture and design in the Cooper-Hewitt National Design Museum Library’s Bradley Room, which span from the 18th to the 20th century;
- history of art and artists, exhibition catalogues, catalogues raisonnés, serials and dissertations concentrated in the area of American art, history,
biography and nearly 100,000 vertical files filled with artists’ ephemera.

Doctoral students and postdoctoral scholars may apply. International applicants are welcome to apply provided they are fluent in English. Depending on the research, applicants should also have an understanding of Latin or other foreign language. Scholars must be in residence at the Smithsonian during the award period.

Stipends are worth US$3,500 per month for up to six months. Residencies must take place between 1 September 2016 and 31 August 2017. The collections are located in Washington, DC and New York City, NY.

Closing date: 15 Jan 16

AX PLANCK RESEARCH AWARDS
Alexander von Humboldt Stiftung – Alexander von Humboldt Foundation

Description:
The Alexander von Humboldt Foundation and the Max Planck Society invite nominations for the Max Planck research awards. These recognise excellent scientists and scholars who are expected to continue producing outstanding academic achievements in international collaboration. The 2016 award will be conferred in the area of life sciences, in the field of organismal biology, with a particular focus on sensing the environment.

Nominations must be initiated in Germany, and may be submitted by rectors or presidents of universities, presidents of selected research organisations, previous award recipients, DFG review board members in closely related disciplines and scientific members of Humboldt selection committees. Nominees may be of any nationality. One award will be presented to a researcher working in Germany and one to a researcher working abroad. Nominations of qualified female scientists are particularly welcome.

Funding is worth €750,000 over three to five years, to enable investigators to conduct research of their own choosing.
QUATERNARY RESEARCH FUND
Quaternary Research Association

Description:
The Quaternary Research Association invites applications to its quaternary research fund. Funding is available to foster research in any area of quaternary studies. Funding may be used for any purpose deemed suitable by the awards panel, such as for field expenses or to hire equipment.

All members of the association of at least one year’s standing, irrespective of age and status, may apply.

Grants are typically worth up to £1,000.

Description:  
The American Arachnological Society invites applications for its arachnological research fund. This provides research support for work relating to any aspect of the behaviour, ecology, physiology, evolution or systematics of any of the arachnid groups. Awards may be used for field work, museum research including travel, expendable supplies, identification of specimens, or for preparation of figures and drawings for publication.

Research grants are awarded only to student and regular members of the society. Sponsored memberships are available for applicants from developing nations and must be obtained to be eligible for a grant. Grants are not available for researchers or students from US embargoed countries, but sponsored memberships can be provided.

Awards are normally worth between US$250 and US$350.

Closing date: 15 Jan 16 (Forecast)  
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

INCENT ROTH FUND FOR SYSTEMATIC RESEARCH
American Arachnological Society

Description:
The American Arachnological Society invites applications for its Vincent Roth Fund for systematic research. The purpose of the fund is to provide research support for work dealing with the systematics of any of the arachnid group (excluding Acari). Awards may be used for field work, museum research (including travel), expendable supplies, identification of specimens, or for preparation of figures and drawings for publication.

Individual awards will normally range between $250 and $350. These awards are open to all students and faculty who receive less than $500 per year of research funding from their home institutions. However, preference will be given to graduate students.

Research grants are awarded only to student and regular members of the AAS and to students of current regular members of the society. The competition is open to US and non-US citizens, and to biologists at US and non-US institutions.

Closing date: 15 Jan 16 (Forecast)

NEW RESEARCH WORKERS’ AWARDS
Quaternary Research Association

Description:
The Quaternary Research Association invites applications for its new research workers’ awards. These are aimed at younger researchers studying for higher degrees in quaternary science and typically support such activities as field expeditions, geological surveys, coring activities, laboratory visits, purchase of field equipment and laboratory analyses.

Postgraduates who have been members of the association for at least six months are eligible to apply. Applicants must not hold a doctoral degree or tenured academic position. Preference will be given to those who have no source of fieldwork funding or whose access to such funds is limited.

Awards are normally worth up to £1,000.

RESIDENT RESEARCH GRANT

American Academy of Facial Plastic and Reconstructive Surgery Foundation

Description:
The American Academy of Facial Plastic and Reconstructive Surgery Foundation invites applicants for its resident research grant program. The aim of this program is to stimulate research in projects that are well-conceived and scientifically valid in the field of facial plastic and reconstructive surgery. Applicants must be residents who are AAFPRS members. Residents at any level may apply even if the research work will be done during their fellowship year. All applicants are required to have sponsorship and oversight of the department chair or by an AAFPRS member as mentor.

Up to two grants of $5,000 each may be awarded.

Closing date: 15 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

RESEARCH PUBLICATION GRANT
Design History Society

Description:
The Design History Society invites applications for its research publication grant. This assists researchers engaged in design history with the publication of their research in research-based outputs such as peer reviewed journal articles or books published by a university press or museum institution.

Scholars located anywhere in the world, whether independently or in the employ of an institution, are eligible to apply. Only members of the society may apply. Student submissions are not eligible.

The grant may be used to cover the following:

- the costs of reproduction and permission clearance to use copyright images in publications;
- production subvention costs issued by the publisher;
- payment to individuals for proof-reading or indexing publications.
A total of £3,000 is available annually, which can be divided amongst several applications. Grants are worth up to a maximum of £1,000 each.

**Closing date: 15 Jan 16**
**Deadline information:** Applications due by midnight GMT, 15 January 2016. This call is repeated once a year.

**LEGACY SCHOLARSHIP**
*Embroiderers’ Guild of America*

**Description:**
The Embroiderers’ Guild of America invites applicants for its legacy scholarship programme. The aim of these scholarships is to fund the study of embroidery and the preservation of the heritage of the art of embroidery.

The study of embroidery includes:
- researching embroidery pieces in private or museum collections;
- researching embroidery from published or unpublished material such as diaries;
- taking classes in embroidery techniques and history or classes in colour or design theory.

Applicants must be EGA members. The maximum funding available for the programme is US$1,500, which will allow up to four scholarships to be awarded.

**ATTRACT PROGRAMME**

*National Research Fund Luxembourg*

**Description:**
The National Research Fund Luxembourg invites applications for its ATTRACT programme. This enables Luxembourgish research institutions to expand their competencies in strategic research areas by attracting young researchers with high potential to Luxembourg. It offers candidates, especially with expertise in science and technology, the opportunity to set up their own research team within a public sector research institution willing to host them. Research programmes will be integrated into one of the host institutions’ focus research area, as well as offer the researcher the opportunity to develop their research career.

Candidates must not yet be established in Luxembourg and be able to show a minimum of two and a maximum of eight years of postdoctoral professional experience. Applications must be submitted jointly by the candidate and the host institution.

Grants run for five years and are worth up to €1.5 million each for starting investigators and €2m each for consolidating investigators. The total budget for the programme for 2014 to 2017 is €10m.

**Closing date:** 15 Jan 16

**Deadline information:** Pre-proposals due by 2pm CET, 15 January; full proposals due by 2pm CET, 1 April 2016.

**Posted date:** 21 Jul 15

**Award type:** Directed grants for individual investigators, Directed grants to institutions, research groups etc

NURSING, HEALTH SCIENCES AND ALLIED HEALTH RESEARCH GRANT
International Society for Heart and Lung Transplantation

Description:
The International Society for Heart and Lung Transplantation invites applications for its nursing, health sciences and allied health research grant. This encourages qualified nurses, social scientists and other healthcare professionals to conduct research related to the areas of end-stage heart and lung disease and transplantation.

The grant may be awarded for new or ongoing research that must begin between 1 April and 31 December of the award year. The results must, within three years of the initial date of funding, be submitted as a manuscript to the Journal of Heart and Lung Transplantation, as an abstract for the ISHLT annual meeting, or as a report for publication in either the Journal of Heart and Lung Transplantation or the Society News newsletter.

The primary investigator must be a non-physician member of the society and the Council on Nursing, Health Science and Allied Health. At least a bachelor’s degree and either direct clinical or research experience in nursing or social sciences are also required.

At least one grant, worth up to US$12,000 for one year, is awarded.

Closing date: 15 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

**Description:**
The African Leadership Institute invites applications for the Archbishop Tutu fellowship. Grants aim is to introduce young achievers who are likely to become leaders to key principles, requirements and challenges of leadership and to provide a platform for them across the African continent. This five month part-time programme is run in partnership with Oxford University and African institutions. The programme combines theory and case studies with experiential learning, mentoring and tutoring, practical application and experience, and peer interaction and review. The focus is African leadership in a global context. The programme involves two nine-day workshops. The first workshop will be held in South Africa held from 24 April to 1 May 2010, while the second workshop will be held at Oxford University and in London at the beginning of September. The candidate’s costs of travel, accommodation and tuition at the workshops will be covered.

Candidates must be aged between 25 and 39 and be currently living in Africa, temporarily placed abroad by their employer or completing further education abroad. They should be committed to living in Africa and to actively contributing to its long term success. Only nominated candidates will be considered for admission.

**Closing date:** 15 Jan 16 (Forecast)

ORENTZ CENTER WORKSHOPS
Lorentz Center

Description:
The Lorentz Center, with funding from the Netherlands Organisation for Scientific Research (NWO), invites applications for support to host the Lorentz Center international workshops. These encourage ground breaking innovative research and focus on stimulating new collaborations and interactions between scientists from different countries and fields. Workshops are often in the domain of the sciences, but interaction with and broadening towards the humanities is encouraged.

Two Lorentz workshop facilities offer space for groups of up to 55 participants. Workshops typically last four or five days.

Academic researchers in any country and from any scientific or scholarly discipline are eligible to apply.

The number of lectures is limited to ensure time for interaction and discussion.

A budget of €700,000 per year is contributed by NWO.

Closing date: 15 Jan 16
Deadline information: Applications due by 11.59pm.
Posted date: 21 Oct 15

RESEARCH PROPOSALS
International Continental Scientific Drilling Program

Description:
The International Continental Scientific Drilling Program invites proposals from international scientific teams for its research projects. These support projects in which drilling is required to achieve critical research goals on challenging themes of global geoscientific and socioeconomic relevance, including active faulting, earthquake processes, heat and mass transport, global cycles, environmental change and the hidden biosphere.
Applications are open to ICDP member countries, or countries considering membership. Proposals may be assembled by individuals or groups of scientists from single or groups of countries.

Funding provides operational support and allocates co-funding for drilling-related costs only.

Closing date: 15 Jan 16
Deadline information: This call is repeated once a year.

African Peacebuilding Network Research Grants
Social Science Research Council

Description:
The Social Science Research Council invites applications for its African peacebuilding network grants. These support independent African research and analysis on peacebuilding in or near countries and regions affected by violent conflict in Africa. Research may address such issues as:

- root causes of conflict, conflict prevention and transformation;
- state and non-state armed actors, extremism and emerging trajectories of conflict;
- post-conflict elections, democratisation, and governance
- the relationship between peacebuilding and state building, including state-society relations and state reconstruction;
- transitional justice, reconciliation and peace
- economic and financial dimensions of conflict, peacekeeping and peace support operations;
- UN-AU-REC peace support operations;
- digital media, technology and peace;
- regional economic communities and peace-building;
- gender and peace-building;
- transnational crime and violent conflict;
- cultural dimensions of peace.
African researchers, policy analysts, and practitioners working on conflict and peacebuilding issues at universities and research institutions or regional governmental and non-governmental organisations in Africa are eligible to apply. Academic applicants must hold a faculty or research position at an African university or research organisation and have a PhD obtained after January 2000. Policy analysts and practitioners must be based in Africa at a regional or subregional institution, a government agency or a NGO, media, or civil society organisation and have at least a master’s degree obtained before January 2011, with no less than five years of research and work experience. Women are strongly encouraged to apply.

Up to 15 individual grants, worth up to US$15,000 each, will be awarded to support six months of research.

Closing date: 15 Jan 16
Deadline information: Applications due by 5pm EST.

Description:
Citizens United for Research in Epilepsy invites proposals for its CURE sudden unexpected death from epilepsy award. This supports novel research projects that address the goals of understanding and eliminating sudden unexpected death from epilepsy. Preference will be given to translational research projects and to research into biomarkers of SUDEP. Applications are welcome from both established and early career investigators world wide. Collaborative projects that introduce investigators and expertise from fields outside of epilepsy are encouraged. All materials must be submitted in English.

The award is worth up to US$250,000 for two year. Indirect costs are not supported.

Closing date: 15 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Letters of intent due by 15 January; invited full applications due by 27 February 2015. This call is repeated once a year.
Description:
The International Society for Heart and Lung Transplantation invites applications for its transplant registry early career award. This supports research by candidates who have attained fellowships or junior faculty level appointments.

Membership of the society is required from either the applicant or their chief of staff or project director. Research must begin between 1 April and 1 December of the award year. The results must be submitted either as a manuscript to the Journal of Heart and Lung Transplantation or as an abstract for the ISHLT annual meeting within two years of the initial date of funding.

Up to three awards, each of which is worth up to US$5,000 for one year, are available. A one-year complimentary membership of the society is also awarded.

Closing date: 15 Jan 16 (Forecast)

ARGARET HENRY DABNEY PENICK RESIDENT SCHOLAR PROGRAMME
Smithsonian Institution

Description:
The Smithsonian Institution’s Libraries invites applications for the Margaret Henry Dabney Penick resident scholar programme. This supports scholarly research into the legacy of Patrick Henry and his political circle, the early political history of Virginia, the history of the American revolution, founding-era ideas and policy making as well as science, technology and culture in colonial America and the early national period.

Applicants must hold a PhD by 1 September 2016. Senior scholars are particularly encouraged to apply. International applicants may apply provided that they are fluent in English. Scholars must be in residence at the Smithsonian during the award period. Fellows are expected to give a public lecture during their tenure, submit a research report and show progress towards a publishable manuscript.

The stipend is worth US$45,000 over nine months and may be used for any research-related purpose, including travel. Residencies must take place between 1 September 2016 and 31 August 2017.

Closing date: 15 Jan 16

Deadline information: This call is repeated once a year.

TART-UP GRANTS
AO Foundation

Description:
The AO Foundation invites applications for its start-up grants. These support innovative projects focused on the healing of musculoskeletal tissues, the understanding of normal healing, disturbed healing, implant technology and IT solutions to enhance clinical techniques. These grants encourage:

- young investigators who are within five years of the completion of their MD, DVM or PhD, or within five years of initiation of their first assistant professor position at an academic institution;
- experienced researchers submitting novel high-risk projects.

The AO foundation will fund approximately six proposals. The grants are worth up to CHF60,000 per year for a maximum duration of two years. Additionally, project specific travel expenses with a maximum amount of CHF1,500 for one conference a year will be covered.

Closing date: 15 Jan 16

Deadline information: Applications due by 5pm CET. This call is repeated 2 times a year.

EORGE E BURCH FELLOWSHIP IN THEORETIC MEDICINE AND AFFILIATED THEORETIC SCIENCE
Smithsonian Institution

Description:
The Smithsonian Institution invites nominations for the George E Burch fellowship in theoretic medicine and affiliated theoretic science. This supports a postdoctoral scholar with in-residence work on a medicine-related project. The fellow may work in any discipline, but the creative effort should be related to at least one of the following areas:

- medicine;
- biology;
- physics;
- chemistry;
- fields in the social science and humanities that apply to health and medicine.
- Postdoctoral scholars whose interests lie within the areas listed above may be nominated. The recipient must be in residence at the Smithsonian Institution. Nominations are accepted from members of the Smithsonian research staff.

The fellowship is worth US$60,000, plus allowances for research, travel relocation and health insurance which may vary.

Closing date: 15 Jan 16
Deadline information: Nominations due by 15 January; full applications due by 15 February 2016. This call is repeated once a year.

POSTDOCTORAL FELLOWSHIP PROGRAMME
Danish Diabetes Academy

Description:
The Danish Diabetes Academy invites applications for its postdoctoral fellowship programme. This supports postdoctoral projects in the field of diabetes and metabolism related to type 1 diabetes, type 2 diabetes, diabetes in pregnancy, diabetic complications or diabetes technology. Candidates with a PhD degree or PhD thesis accepted for defence in health science or basic science and technology may apply. Acceptance of scientific collaboration with at least one scientific member of the Danish Diabetes Academy must be documented. Candidates can apply for a first postdoc period or a second postdoc period with the first postdoc period lasting up to three years.

Six fellowships are available, each worth DKK600,000 per year for a period of up to three years.

GEORG FORSTER RESEARCH AWARD
Alexander von Humboldt Stiftung – Alexander von Humboldt Foundation

Description:
The Alexander von Humboldt Foundation invites nominations for the Georg Forster research award. This is granted in recognition of a researcher’s entire academic record to date.

Academics whose fundamental discoveries, new theories and insights have had a significant impact on their own discipline and beyond and who are expected to continue developing research based solutions to the specific challenges facing transition and developing countries are eligible to be nominated.

Established German scientists or former Humboldt Foundation award winners based abroad may nominate candidates for the award. Nominees must be nationals of developing or transitional countries and have been working in one of these countries for the past five years. Self-nomination is not permitted.

The award is worth €60,000 and the winner will also be invited to Germany for approximately six to 12 months to conduct a research project of their own choice in collaboration with a specialist colleague. Additional funding of up to €25,000 may be awarded to enable participation in scientific conferences, procuring additional material resources and involving junior researchers.

Up to six awards are available.

Closing date: 15 Jan 16
Deadline information: This call is repeated once a year.

PARTNERSHIPS FOR ENHANCED ENGAGEMENT IN RESEARCH (PEER) – REGIONAL AND PRIORITY FOCUS AREA CALL: SERVIR PRIORITY COUNTRIES - ENVIRONMENTAL MANAGEMENT AND CLIMATE CHANGE RESILIENCE
Agency for International Development (USAID)

Description:
The United States Agency for International Development (USAID), in partnership with NASA, invites pre-proposals for its regional and priority focus area call: SERVIR priority countries - environmental management and climate change resilience, under its partnerships for enhanced engagement in research science programme. This supports developing countries use the information
provided by Earth observing satellites, and geospatial technologies, for managing climate risks and land use. Innovative proposals may use geospatial data and tools to investigate climate change impacts and adaptation, and ways to reduce emissions from land use in the following areas: disasters, water resources, agriculture, food security, health, land cover and forests.

Applicants must be from a PEER eligible country and be based at an academic institution, non-profit organisation, or government managed research laboratory, centre or institute. Developing country researchers are required to partner with a US government-funded researcher. Collaboration involving multiple developing countries is encouraged. Researchers from non-eligible countries may participate in projects using their own resources, but are not permitted to serve as principal investigator.

Single institution awards are worth between US$40,000 and US$80,000 per year for one to three years. Larger projects involving multiple institutions may receive between US$80,000 and US$100,000 per year for up to three years.

Closing date: 15 Jan 16
Deadline information: Pre-proposals due by 15 January; invited full proposals due by 15 April 2016.
Posted date: 09 Oct 15
Award type: Directed grants to institutions, research groups etc, Development (Africa/Caribbean), Networking/collaboration

SEED AWARDS IN HUMANITIES AND SOCIAL SCIENCE
Wellcome Trust

Description:
The Wellcome Trust invites applications for its seed awards in humanities and social science. These enable researchers to develop a novel idea to a position where they could compete for a larger award from the trust or another funder.
Research may fall under any field of humanities and social science that enriches the understanding of human and animal health. Eligible activities include pilot and scoping studies, planning sessions and meetings of collaborative networks.

Applicants may be individuals or groups who are at any career stage. They must be based in the UK, Republic of Ireland or a low-to-middle-income country, and apply through an institution in these countries. Collaborators elsewhere in the world are also allowed.

Applications from individuals and institutions that have never received trust funding are encouraged. Current holders of trust awards may apply, provided that they have less than two years of their current funding remaining.

Awards typically range from £25,000 to £50,000 over six to 12 months, however proposals outside this time frame may be considered. Funding may be used towards research expenses, research leave or teaching buy-out, employment of a researcher or consultant, the costs of convening a meeting or seminar, or supporting dissemination activities for research funded on the grant.

Closing date: 15 Jan 16
Posted date: 27 Oct 15
Award type: Hosting conferences, Directed grants for individual investigators, Directed grants to institutions, research groups etc, Publish, edit, translate, disseminate, Networking/collaboration

PARTNERSHIPS FOR ENHANCED ENGAGEMENT IN RESEARCH (PEER) CALL – HEALTH IMPLEMENTATION SCIENCE
Agency for International Development (USAID)

Description:
The Agency for International Development (USAID) invites pre-proposals for its partnerships for enhanced engagement in research (PEER) call on health implementation science. This programme enables scientists from selected developing countries to conduct implementation science projects in the fields of tuberculosis, maternal and child health, and family planning.

Each proposal must be submitted by a national of a PEER-eligible country, based at an academic institution, non-profit organisation or government-managed research laboratory, centre or institute in a PEER-eligible country. Researchers from non-eligible countries may participate using their own resources, but may not serve as principal investigators. Each applicants must partner with a US government-supported researcher from one of nine US agencies. Proposals involving multidisciplinary teams, multi-country collaboration or engagement with policy and development actors and stakeholders are desired, but not required. All projects must strengthen engagement with junior researchers and students. The PEER programme does not support biomedical clinical trials.

Single-institution awards are expected to range from US$40,000 to US$80,000 per year, while multiple institution awards are anticipated to fall between US$80,000 and $100,000 per year. Awards last for one to three years.

ESCEO FELLOWSHIPS  
European Society on Clinical and Economic Aspects of Osteoporosis and Osteoarthritis

Description:
The European Society for Clinical and Economic Aspects of Osteoporosis and Osteoarthritis invites applications for its ESCEO fellowships. These are given to young investigators for their future contributions to the field of bone and mineral research.

To be eligible, applicants must be the first or presenting author of the submitted abstract for proposed research and be less than 40 years of age. Students and trainees who have not yet obtained their doctoral degree are also eligible.
Two fellowships of US$12,500 each will be distributed at the WCO-IOF-ESCEO annual meeting.

Closing date: 15 Jan 16
Deadline information:
Posted date: 03 Aug 15
Award type: Young investigator awards, Directed grants for individual investigators
Award amount max: $12,500
Award amount min: -
Award budget total: -

PARTNERSHIPS FOR ENHANCED ENGAGEMENT IN RESEARCH (PEER) – COUNTRY-SPECIFIC CALL: SOUTH AFRICA – MULTIPLE RESEARCH FIELDS
Agency for International Development (USAID)

Description:
The United States Agency for International Development (USAID), in partnership with the South Africa Department of Science and Technology, invites pre-proposals for its country-specific call: South Africa – multiple research fields. This supports South African research projects in the areas of water supply, sanitation and hygiene (WASH); and low emissions development (LED)/green growth.

Applications are invited from researchers based at an academic institution, non-profit organisation or government-managed research laboratory, centre or institute in South Africa. Applicants in government ministries who conduct research are also eligible. Applicants must be citizens or permanent residents of a PEER-eligible country. Applicants must partner with a US government supported researcher from one of the following agencies:

- Agricultural Research Service;
- National Aeronautics and Space Administration;
- National Institute of Food and Agriculture;
- National Institutes of Health;
- National Oceanic and Atmospheric Administration;
- National Science Foundation;
- Smithsonian Institution;
- United States Forest Service;
- United States Geological Survey.

Proposals that include a PI or co-PI from a historically disadvantaged institution in South Africa and proposals partnering a South African research institution with a co-PI from a research institution in the Southern African Development Community are strongly encouraged.

Single institution awards are worth between US$40,000 and US$80,000 per year for one to three years. A few larger and more complex projects involving multiple institutions or multiple countries may receive between US$80,000 and US$100,000 per year for up to three years.

Closing date: 15 Jan 16
ARTNERSHIPS FOR ENHANCED ENGAGEMENT IN RESEARCH (PEER) REGIONAL AND PRIORITY FOCUS AREA CALL: PLANET NI PRIORITY COUNTRIES – RENEWABLE ENERGY AND MICROGRIDS

Agency for International Development (USAID)

Description:
The Agency for International Development (USAID) and the Global Development Lab invite pre-proposals for its partnerships for enhanced engagement in research (PEER) regional and priority focus area call on Planet NI priority countries – renewable energy and microgrids. This supports projects that use National Investments technologies to increase power generation from renewable energy sources, improve energy efficiency and system reliability, and enhance energy storage and overall grid integration.

Each proposal must be submitted by a national of a PEER-eligible country, based at an academic institution, non-profit organisation or government-managed research laboratory, centre or institute in a PEER-eligible country. Researchers from non-eligible countries may participate using their own resources, but may not serve as principal investigators. Each applicants must partner with a US government-supported researcher from one of nine US agencies. Proposals involving multidisciplinary teams, multi-country collaboration or engagement with policy and development actors and stakeholders are desired, but not required. All projects must strengthen engagement with junior researchers and students. The PEER programme does not support biomedical clinical trials.

Single-institution awards are expected to range from US$40,000 to US$80,000 per year, while multiple institution awards are anticipated to fall between US$80,000 and
Partnerships for Enhanced Engagement in Research (PEER) Call – Multiple Research Fields
Agency for International Development (USAID)

Description:
The Agency for International Development (USAID) invites pre-proposals for its partnerships for enhanced engagement in research (PEER) call for multiple research fields. This programme enables scientists from selected developing countries to conduct research of direct relevance to USAID’s development objectives.

Each proposal must be submitted by a national of a PEER-eligible country, based at an academic institution, non-profit organisation or government-managed research laboratory, centre or institute in a PEER-eligible country. Researchers from non-eligible countries may participate using their own resources, but may not serve as principal investigators. Each applicants must partner with a US government-supported researcher from one of nine US agencies. Proposals involving multidisciplinary teams, multi-country collaboration or engagement with policy and development actors and stakeholders are desired, but not required. All projects must strengthen engagement with junior researchers and students. The PEER programme does not support biomedical clinical trials.

Single-institution awards are expected to range from US$40,000 to US$80,000 per year, while multiple institution awards are anticipated to fall between US$80,000 and $100,000 per year. Awards last for one to three years.

PARTNERSHIPS FOR ENHANCED ENGAGEMENT IN RESEARCH (PEER) CALL: MIDDLE EAST - INFECTIOUS DISEASE IN THE MIDDLE EAST
Agency for International Development (USAID)

Description:
The Agency for International Development (USAID) invites pre-proposals for its partnerships for enhanced engagement in research (PEER) call for Middle East - infectious disease in the Middle East. This supports projects related to improving infectious disease prevention, detection, and response in the Middle East region. Proposals that address displaced populations such as refugees from the ongoing conflicts in Syria and Iraq are of particular interest.

Each proposal must be submitted by a national of Egypt, Jordan, Lebanon, Morocco or Tunisia, based at an academic institution, non-profit organisation or government-managed research laboratory, centre or institute in one of these countries. Proposals linking research from multiple institutions across the region are strongly encouraged. Women are strongly encouraged to apply. Researchers from non-eligible countries may participate using their own resources, but may not serve as principal investigators. Each applicants must partner with a US government-supported researcher from one of the following agencies:

- Agricultural Research Service;
- National Aeronautics and Space Administration;
- National Institute of Food and Agriculture;
- National Institutes of Health;
- National Oceanic and Atmospheric Administration;
- National Science Foundation;

FRICAN PEACEBUILDING NETWORK COLLABORATIVE WORKING GROUP
RESEARCH GRANTS
Social Science Research Council

Description:
The Social Science Research Council invites letters of interest for its African peacebuilding network collaborative working group grants. These support collaborative research projects intended to inform policy and practice on conflict and peacebuilding in Africa. The following research and analysis areas are supported:

- local peacebuilding cultures, mechanisms, and practices;
- inequality, poverty and conflict;
- UN-AU-African regional economic communities cooperation on peace and security issues;
- African governance architecture and African peace and security architecture;
- women, peace, and security;
- transnationalisation, youth radicalisation and violence.

Applications are invited from scholars or practitioners based in Africa, with the lead investigator based at or affiliated with an African university. The competition is open to
Joint researcher-practitioner teams of five to six members made up of Africans based at or affiliated with universities or regional organisations, government agencies, NGOs, media or civil society organisations on the continent. The lead investigator must have a PhD, junior lecturers and practitioners must hold a master’s degree with at least two years of work experience.

Up to two project grants, worth up to US$60,000 each over 18 months, are available.

Closing date: 15 Jan 16
Deadline information: Applications due by 5pm EST.
Posted date: 29 Oct 15
Award type: Directed grants to institutions, research groups etc, Networking/collaboration
Award amount max: $60,000

MRCG/HRB JOINT FUNDING SCHEME – RISK REDUCTION FOR CHRONIC CONDITIONS
Irish Cancer Society

Description:
The Irish Cancer Society, the Alzheimer Society of Ireland, Diabetes Ireland and the Irish Heart Foundation invite applications for the Medical Research Charities Group/Health Research Board joint funding scheme – risk reduction for chronic conditions. This scheme supports a project that will apply existing research around risk reduction to the Irish population to identify and implement a successful evidence-based means of reducing people’s risk of dementia, diabetes, cancer, heart disease and stroke through behavioural and lifestyle changes.

Principal investigators must hold a post as an independent investigator or be a contract researcher in a research institution recognised as an independent investigator, or be an individual recognised as a contract researcher by the research institution upon receipt of the award. PIs must also have demonstrated research independence through securing at least one peer-reviewed independent research grant, be an author of at least three publications of original research in peer-reviewed research journals and have the capacity and authority to supervise postgraduate and postdoctoral researchers. Applicants may collaborate, where appropriate, with partner organisations.

Funding is worth up to €300,000 per project, lasting 12 to 36 months.

Closing date: 15 Jan 16
Deadline information: Applications due by 3pm GMT.
Posted date: 02 Nov 15

AYMOND AND ROSALEE WEISS RESEARCH ENDEWORTM
American College of Sports Medicine

Description:
The American College of Sports Medicine invites applications for grants under the Raymond and Rosalee Weiss research endowment programme. These grants aim to advance research into the physical, mental and emotional health benefits of physical activity and sports. Under this programme, one project will be funded for applied rather than basic research, with the intent of applying the results to programmes involving physical activity and sports. Particular importance is placed on the psychological and emotional benefits of physical activity under this funding programme, and proposals focusing on these areas will be given priority.

Applicants must have graduate student status during the term of the grant and must be current members of ACSM at the time of submitting an application to be funded.

Grants are open to all ACSM members, including international members. However, the NASA initiative is open to US residents only.

One award of US$1,500 is available.

Closing date: 16 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect.
Applications due by 5pm ET. This call is repeated once a year.

GODFREY HEWITT MOBILITY AWARD
European Society for Evolutionary Biology

Description:
The European Society for Evolutionary Biology invites applications for the Godfrey Hewitt mobility award. This enables PhD or postdoctoral students to conduct fieldwork or research at a facility they have not previously visited.

Applicants must be ESEB members within six years of the start date of their PhD. Preference will be given to those who are unlikely to be able to fund the proposed work by other means.

The award is worth up to €2,000.

Closing date: 16 Jan 16 (Forecast)

ELLOWSHIPS AT THE CENTER FOR INTERNATIONAL SECURITY AND COOPERATION

Stanford University

Description:
Stanford University invites applications for its fellowships at the Center for International Security and Cooperation. These enable applicants from academia and the world of public policy, or mid-career professionals in the law, the military, government or international organisations to engage in research and writing, participate in seminars and collaborate with faculty and researchers. The following fellowships are available:

- the social sciences or humanities international security fellowship, which enables fellows to focus on a variety of security topics;
- natural sciences or engineering international security fellowship, which enables fellows with backgrounds in the natural sciences and engineering to pursue research projects on the intersection of hard science, policy-making and international security, and to hone their science communication skills;
- cybersecurity and international security fellowship, which supports research on privacy, governmental restrictions, the future of the internet, the use of information technologies by organised crime groups and individual hackers or the effectiveness of cybersecurity protections implemented by different nations;
- law and international security fellowship, which supports lawyers, law students and social scientists wishing to conduct research projects at the intersection of law and international security;
- the MacArthur Foundation nuclear security fellowship, which promotes training and policy-relevant scholarship in nuclear weapons policy in a changing global context, nuclear terrorism and transnational flows of materials and knowledge, and nuclear energy and nonproliferation challenges;
- the Stanton nuclear security fellowship, which aids engineers, scientists and social scientists in the development of the next generation of thought leaders in nuclear security by supporting research that will advance policy-relevant understanding of nuclear-related issues;
- the William J Perry fellowship in international security, which enables fellows to conduct policy-relevant research and writing on international security and cooperation issues.

Fellowships include stipends, previously worth between US$25,000 and US$27,000 for predoctoral fellows and between US$48,000 and US$65,000 for postdoctoral fellows, over a nine to 11-month period. In addition, CISAC may provide personal medical coverage.

Closing date: 16 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Applications are due by 11.59 PST. This call is repeated once a year.

C O L L A B O R A T I V E A W A R D S I N H U M A N I T I E S A N D S O C I A L S C I E N C E  
Wellcome Trust

Description:
The Wellcome Trust invites applications for  
its collaborative awards in society and ethics.  
These enable teams to tackle major health-  
related questions in the humanities and social  
sciences. Eligible activities may include  
coordination and integration activities,  
network building and carrying out large-scale  
interdisciplinary research.

Teams should normally consist of two to six  
principal applicants, each of whom has a track  
record of collaboration. Interdisciplinary  
research collaborations within the humanities  
and social sciences or with clinical or basic  
biomedical scientists are encouraged.  
Collaborations may be international, and may  
exist within a department, across a university  
or spanning a number of institutions.

Awards are normally worth up to £2 million  
over a period of up to five years, with most in  
the range of £1m to £1.5m. Funding may be  
used to cover research expenses, travel and  
subsistence, collaborative activity, capacity-  
building initiatives and research leave,  
symposia and dissemination activities,  
research management and support costs, and  
public engagement costs.

Closing date: 17 Jan 16 (Forecast)  
Deadline information: !!! Call has not yet  
been announced by funder, but this is the  
approximate deadline we expect.  
Preliminary applications due by 17 July, full  
applications due by 25 September 2015. This  
call is repeated 2 times a year.  
Posted date: 20 Jan 15  
Award type: Travel to conferences, meetings  
etc., Travel for research purposes, Directed  
grants to institutions, research groups etc,  
Publish, edit, translate, disseminate,  
Networking/collaboration  
Award amount max: £2,000,000  
Award amount min: -  
Award budget total: -
Support for Ongoing Clinical Research Projects in Thalassaemia
Cooley’s Anemia Foundation

Description:
Cooley’s Anemia Foundation invites applications for support for ongoing clinical research projects in thalassaemia. This supports investigators with their ongoing clinical projects to address one or more of the following areas impacting patients with thalassaemia:

- cardiac issues and iron overload;
- fertility, pregnancy and family planning;
- quality of life, psychosocial impact or burden of disease.

Investigators must interact directly with patients or patient-related data and basic research must be related to a direct clinical focus. Small-scale pilot studies, observational trials or ancillary support for ongoing interventional studies may be considered.

Junior and senior faculty may apply but fellows and trainees are ineligible. The research may not be conducted at a for-profit laboratory.

The award is worth US$40,000 for one year, with a possibility for a one-year renewal. Administrative cost is limited to 10 per cent of the granted amount.

Closing date: 18 Jan 16 (Forecast)
Deadline information: If call has not yet been announced by funder, but this is the approximate deadline we expect. Letters of intent due by 18 January; applications due by 3 February 2014. This call is repeated once a year.

Posted date: 03 Dec 13

2020-EUJ-2016 EU-JAPAN CALL
Horizon 2020: Industrial Leadership

Description:
The European Commission Horizon 2020: Industrial Leadership invites proposals, under the leadership in enabling and industrial technologies work programme, for its H2020-EUJ-2016 EU-Japan call. Proposals may address the following topics:

- EUJ-1-2016 5G, next generation communication networks;
- EUJ-2-2016 internet of things, cloud and big data platforms in social application contexts;
- EUJ-3-2016 experimental testbeds on information-centric networking.

Proposals must take the form of research and innovation actions. These require participation by at least three legal entities, each established in a different EU member state or associated country.

The indicative total budget for all three topics is €7 million. Each successful proposal is expected to receive up to €1.5m, depending on the topic, although proposals for other amounts will also be considered. Projects will not exceed three years in duration.

Ref: OJ C6776.

Closing date: 19 Jan 16
Deadline information: Proposals invited between 20 October 2015 and 5pm Brussels time, 19 January 2016.
Posted date: 14 Oct 15
Award type: Technology innovation/development, Directed grants to institutions, research groups etc, Innovation grants, Networking/collaboration

2020-INNOSUP-2016 FOR A BETTER INNOVATION SUPPORT TO SMES – TOPIC 6
Horizon 2020: Industrial Leadership

Description:
The European Commission Horizon 2020: Industrial Leadership, under the Innovation in SMEs work programme, invites proposals for its H2020-INNOSUP-2016 for a better innovation support to SMEs call.

Proposals must address the topic INNOSUP-06-2016 capacity building for national contact
points for SMEs and access to risk finance under H2020.

Proposals must take the form of coordination and support actions. These require at least one legal entity established in a member state or associated country. Applicants should be national contact points in the areas of innovation in SMEs and access to risk finance. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Only one proposal under this topic will be funded, for an initial duration of 30 months. The total indicative budget for this call is €2 million.

Ref: OJ C6776.

Closing date: 19 Jan 16
Deadline information: Proposals due by 5pm Brussels time.

**Horizon 2020: Industrial Leadership**

**Description:**
The European Commission Horizon 2020: Industrial Leadership invites proposals, under the leadership in enabling and industrial technologies work programme, for its H2020-ICT-2016 information and communication technologies call. Proposals may address the following topics:

Proposals must take the form of coordination and support actions or research and innovation actions. Coordination and support actions require at least one legal entity established in a member state or associated country. Research and innovation actions require participation by at least three legal entities, each established in a different member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.
The indicative budget for this call is €2.8 million. Each successful proposal is expected to receive between €500,000 and €2m, although proposals for other amounts will also be considered.

Ref: OJ C6776.

Closing date: 19 Jan 16
Deadline information: Proposals invited between 20 October 2015 and 5pm Brussels time, 19 January 2016.
Posted date: 14 Oct 15
Award type: Directed grants to institutions, research groups etc, Innovation grants, Networking/collaboration
Award amount max: -
Award amount min: -
Award budget total: €2,800,000

Eligibility profile

EARLY-CAREER RESEARCH GRANTS
International Association for the Study of Pain

Description:
The International Association for the Study of Pain invites applications for its early-career research grants. These support a researcher in the early-career stage of pain investigations. The grants are available internationally and are not related to any particular discipline. At the time of application, candidates should be IASP members, be carrying out independent research and be within six years of having received their final degree. Applications must be submitted in English. Ten grants worth US$20,000 each will be awarded.

Closing date: 20 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.
Posted date: 30 Jul 12
Award type: Directed grants for individual investigators
Award amount max: $20,000
Award amount min: -
Award budget total: -

440 AWARDS
Mind & Life Institute

Description:
The Mind & Life Institute invites applications for its 1440 awards. These promote research that evaluates whether and how contemplative practice can promote inner wellbeing and healthy relationships, as well as the development of new methods to assess these outcomes. The awards are geared towards the investigation of real-world outcomes of contemplative practice.

Applications are accepted from any academic researchers, although the institute seeks to specifically promote the careers and development of young investigators such as graduate students and postdoctoral fellows.

The award period is two years and it is worth up to US$15,000. However, if the applicant can obtain matching funding from other sources, or has a clearly stated need for additional funding based on methodology,
the institute may consider an increase of budget up to US$25,000.

Closing date: 20 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Applications are invited between 20 December 2013 and 20 January 2014. This call is repeated once a year.

INNOVATIONS IN INFLAMMATORY BOWEL DISEASE RESEARCH
Crohn’s and Colitis Foundation of Canada – Fondation Canadienne des Maladies Inflammatoires de l’Intestin

Description:
The Crohn’s and Colitis Foundation of Canada invites applications for its innovations in inflammatory bowel disease research funding. This supports innovative projects that refine hypotheses or produce preliminary data that will help seed larger projects and have the potential to improve diagnosis, therapy and prevention of IBD.

The principal investigator may be a postdoctoral fellow or an individual with a faculty or equivalent appointment at the applicant institution, which must be a non-profit, charitable institution in Canada or abroad. Membership of the foundation’s IBD Research Institute is required.

Grants are worth up to CA$50,000 for a maximum period of one year.

Closing date: 20 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

H2020-ART-2016 AUTOMATED ROAD TRANSPORT – TWO STAGE
Horizon 2020: Societal Challenges

Description:
The European Commission Horizon 2020: Societal Challenges, under the smart, green and integrated transport work programme, invites proposals for its H2020-ART-2016 call on automated road transport – two stage. Proposals may address the following topic:

- ART-02-2016 automation pilots for passenger cars;
- ART-04-2016 safety and end-user acceptance aspects of road automation in the transition period;
- ART-05-2016 road infrastructure to support the transition to automation and the coexistence of conventional and automated vehicles on the same network.

Proposals must take the form of research and innovation actions or innovation actions depending on the topic addressed. Research and innovation actions and innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each successful proposal is expected to receive between €2 million and €36m although proposals for other amounts will also be considered. The total indicative budget for this call is €61m.

Ref: OJ C6776.

Closing date: 20 Jan 16
Deadline information: First stage proposals due by 5pm Brussels time, 20 January 2016; second stage proposals due by 5pm Brussels time, 29 September 2016.

2020-MG-2016 MOBILITY FOR GROWTH – TWO STAGE
Horizon 2020: Societal Challenges

Description:
The European Commission Horizon 2020: Societal Challenges, under the smart, green and integrated transport work programme, invites proposals for its H2020-MG-2016 call on mobility for growth – two stage. Proposals may address the following topics:

- MG-1.1-2016 reducing energy consumption and environmental impact of aviation;
- MG-1.4-2016 breakthrough innovation;
- MG-2.2-2016 development, production and use of high performance and lightweight materials for vessels and equipment;
- MG-2.3-2016 new and improved transport concepts in waterborne transport;
- MG-3.3-2016 safer waterborne transport and maritime operations;
- MG-3.4-2016 transport infrastructure innovation to increase the transport system safety at modal and intermodal level;
- MG-3.5-2016 behavioural aspects for safer transport;
- MG-4.5-2016 new ways of supporting development and implementation of neighbourhood-level transport innovations;
- MG-5.1-2016 networked and efficient logistics clusters;
- MG-6.1-2016 innovative concepts, systems and services towards mobility as a service;
- MG-6.2-2016 large-scale demonstrations of cooperative ITS.

Proposals must take the form of research and innovation actions or innovation actions, depending on the topic addressed. Research and innovation actions and innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each successful proposal is expected to receive between €2 million and €13m although proposals for other amounts will also be considered. The indicative budget for this call is €174m.

2020-EE-2016 ENERGY EFFICIENCY – TOPICS 3, 4, 5, 7, 8, 10 AND 17

Horizon 2020: Societal Challenges

Description:
The European Commission Horizon 2020: Societal Challenges, under the secure, clean and efficient energy work programme, invites proposals for its H2020-EE-2016 energy efficiency call. Proposals may address the following topics:

- heating and cooling, including EE-3-2016 standardised installation packages integrating renewable and energy efficiency solutions for heating, cooling and hot water preparation, EE-4-2016 new heating and cooling solutions using low grade sources of thermal energy, and EE-5-2016 models and tools for heating and cooling mapping and planning;
- engaging consumers towards sustainable energy, including EE-7-2016 behavioural change toward energy efficiency through ICT, and EE-8-2016 socio-economic research on consumer’s behaviour related to energy efficiency;
- buildings, including EE-10-2016 supporting accelerated and cost-effective deep renovation of buildings through public private partnership;
- industry, services and products, including EE-17-2016 valorisation of waste heat in industrial systems.

Proposals must take the form of innovation actions or research and innovation actions. Innovation actions and research and innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each successful proposal is expected to receive between €1 million and €5m although proposals for other amounts will also be considered. The total indicative budget for this call is €50m.

2020-FOF-2016 FACTORIES OF THE FUTURE – TOPICS 1- 5
Horizon 2020: Societal Challenges

Description:
The European Commission Horizon 2020: Societal Challenges under the cross-cutting activities programme invite proposals for its H2020-FoF-2016 factories of the future call. All topics are part of the H2020-IND-CE-2016 industry in the circular economy call.

Proposals may address the following topics:
• FoF-01-2016 novel hybrid approaches for additive and subtractive manufacturing machines;
• FoF-02-2016 machinery and robot systems in dynamic shop floor environments using novel embedded cognitive functions;
• FoF-03-2016 zero-defect strategies at system level for multi-stage manufacturing in production lines;
• FoF-04-2016 continuous adaptation of work environments with changing levels of automation in evolving production systems;
• FoF-05-2016 support for the further development of additive manufacturing technologies in Europe.

Proposals must take the form of research and innovation actions, innovation actions or coordination and support actions, depending on the topic. Research and innovation actions and innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country. Coordination and support actions require at least one legal entity established in a member state or associated country.

All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.
The indicative budget for this call is €77 million.

ETHICS AND REGULATORY CAPACITIES
European and Developing Countries Clinical Trials Partnership

Description:
The European and Developing Countries Clinical Trials Partnership invites applications for its ethics and regulatory capacities call. This aims to support sub-Saharan African countries to establish and develop robust national medicines regulatory systems and capacities for ethical review of clinical research and use of medicinal products and technologies for use in humans.

Applications must include at least one legal entity hosting national ethics committees or national regulatory authorities in sub-Saharan African countries.

The total budget is worth €1.5 million. Five to ten grants worth up to €300,000 each are available.

Closing date: 21 Jan 16
Deadline information: Applications due by 5pm CET.
Posted date: 16 Oct 15

2020-EEB-2016 ENERGY EFFICIENT BUILDINGS – TOPICS 1, 2, 3 AND 4

Horizon 2020: Industrial Leadership

Description:
The European Commission Horizon 2020: industrial leadership invites proposals, under the leadership in enabling and industrial technologies – nanotechnologies, advanced materials, advanced manufacturing and processing, and biotechnology work programme, for its H2020-EEB-2016 energy efficient buildings call. Proposals may address the following topics:

- EEB-01-2016 highly efficient insulation materials with improved properties;
- EEB-02-2016 performance indicators and monitoring techniques for energy-efficiency and environmental quality at building and district level;
- EEB-03-2016 integration of advanced technologies for heating and cooling at building and district level;
- EEB-04-2016 new technologies and strategies for the development of prefabricated elements through the reuse and recycling of construction materials and structures.

Proposals must take the form of research and innovation actions, innovation actions or coordination and support actions, depending on the topic addressed. Research and innovation actions and innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country and independent of each other. Coordination and support actions require at least one legal entity established in a member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each proposal may receive between €500,000 and €7 million, although proposals for other amounts may be considered. The indicative budget is worth €49m.

2020-SPIRE-2016 SUSTAINABLE PROCESS INDUSTRIES
Horizon 2020: Societal Challenges

Description:
The European Commission Horizon 2020: industrial leadership, invites proposals, under the leadership in enabling and industrial technologies - nanotechnologies, advanced materials, advanced manufacturing and processing, and biotechnology work programme, for its H2020-SPIRE-2016 sustainable process industries call.

Proposals may address the following topics:

- SPIRE-01-2016 systematic approaches for resource-efficient water management systems in process industries;
- SPIRE-02-2016 plant-wide monitoring and control of data-intensive processes;
- SPIRE-03-2016 industrial technologies for the valorisation of European bio-resources into high added value process streams;
- SPIRE-04-2016 industrial furnace design addressing energy efficiency in new and existing furnaces;
- SPIRE-05-2016 potential use of carbon dioxide or carbon monoxide and non-conventional fossil natural resources in Europe as feedstock for the process industry;
- SPIRE-06-2016 business models for flexible and delocalised approaches for intensified processing.

Proposals must take the form of research and innovation actions, innovation actions or coordination and support actions depending on the topic addressed. Research and innovation actions and innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country. Coordination and support actions require at least one legal entity established in a member state or associated country.

All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each successful proposal is expected to receive between €250,000 and €7 million although proposals for other amounts will also be considered. The total indicative budget for this call is €72m.

IMPLEMENTATION RESEARCH FOR IMPROVED ADOLESCENT HEALTH IN LOW AND MIDDLE INCOME COUNTRIES CALL

Medical Research Council

Description:
The Medical Research Council and the Department for International Development invite applications for their call on implementation research for improved adolescent health in low and middle income countries. This aims to generate the research evidence needed to effect real and practical changes to improve adolescent health. Proposals should identify clearly the health issues and risk factors to be addressed and describe the pathway for how the proposed approach can be incorporated into systems to reach scale and lead to improved health outcomes. Intervenional strategies can be broad, interdisciplinary and multi-faceted, addressing, for instance:

- implementation research on intervention strategies which can form part of a life-course approach;
- research to prevent sexually transmitted infections in adolescents and research to implement care for HIV positive adolescents;
- population health research which includes consideration of wider determinants of adolescent health including interpersonal, community and environmental factors, lifestyles and socioeconomic impacts on health and inequalities of health and interventions to address them.

PIs based at organisations either in the UK or in low, lower-middle and upper-middle income countries may apply. The total budget for this call is £3 million.

Closing date: 21 Jan 16
Deadline information: Applications may be submitted between 5 November 2015 and 4pm GMT, 21 January 2016.
Posted date: 19 Oct 15

North American Native Fishes Association

Description:
The North American Native Fishes Association invites applications for its conservation research grant. This supports research relating to the conservation of North America's indigenous fish fauna, especially those that are imperiled.

Applications are open to academia, conservation groups and independent researchers, including home aquarists. Applicants must be association members in good standing.

The grant is worth up to US$1,000. The association may award multiple awards in one year for amounts less than or equal to US$1,000.

Closing date: 22 Jan 16
Deadline information: Proposals are due by the Friday after Martin Luther King day each year. This call is repeated once a year.
Posted date: 12 Mar 15

Award type: Directed grants for individual investigators, Directed grants to institutions, research groups etc
Award amount max: $1,000

RESEARCH FELLOWSHIPS IN HUMANITIES AND SOCIAL SCIENCE

Wellcome Trust

Description:
The Wellcome Trust invites applications for its research fellowships in society and ethics. These enable individuals who are not yet established in academic posts to undertake a period of postdoctoral research in any area of human and animal health. Applicants must be postdoctoral scholars who have been awarded their PhD but who are not in a tenured or otherwise long-term established post. Fellowships must be held at an institution in the UK, Republic of Ireland or a low- or middle-income country. Each applicant must have a sponsor who is an established member of the department in which the award is to be held.

Fellowships provide research expenses, appropriate employers’ contributions and a salary, tenable for up to three years.

Closing date: 22 Jan 16
Deadline information: Preliminary applications due by 22 January; full applications due by 30 March 2016. This call is repeated 2 times a year.
Posted date: 09 Oct 15

INVESTIGATOR AWARDS IN HUMANITIES AND SOCIAL SCIENCES

Wellcome Trust

Description:
The Wellcome Trust invites applications for its investigator awards in humanities and social sciences. These aim to provide flexible support at a level and length to enable humanities and social science research to explore any aspect of human and animal health.
Applicants must be based in the UK, Republic of Ireland or a low or middle-income country, and should have an established academic post at an eligible higher education or research institution. Applicants who have an established academic post guaranteed by the time they take up the award are also eligible to apply. The trust welcomes joint applications from two researchers working together.

Awards are in the range of £100,000 to £200,000 per year each over a maximum period of five years. They may be used to cover research expenses; travel, subsistence and funding for collaborative activities; capacity-building and public engagement initiatives, and research leave; and research, symposia and dissemination activities.

Closing date: 22 Jan 16
Deadline information: Preliminary applications due by 22 January; full applications due by 30 March 2016.
Posted date: 10 Aug 15
Award type: Hosting conferences, Travel to conferences, meetings etc., Travel for research purposes, Directed grants for individual investigators, Directed grants to institutions, research groups etc, Publish, edit, translate, disseminate, Innovation grants, Networking/collaboration
Award amount max: £1,000,000
Award amount min: £100,000

RESEARCH AWARDS FOR HEALTH PROFESSIONALS
Wellcome Trust

Description:
The Wellcome Trust invites applications for its research fellowships for health professionals. This scheme is intended for practising health professionals who wish to carry out research in any area within the remit of human and animal health either full time or part time, while maintaining their work commitments. This scheme can be used to enrol for a PhD for those who have little or no humanities or social science experience. It can also be used to undertake postdoctoral research.

Research fellowships must be held at a UK, Irish, or low- or middle-income country institution. Candidates should have completed general professional training and will still be working in their professional capacity at the preliminary application deadline. Candidates should be sponsored by someone, typically in a senior position, who has a contract of employment with an academic institution or, in the case of an NHS employee, an honorary academic appointment. The sponsor must also have tenure beyond the duration of the fellowship, and be in a position to guarantee space and facilities.

Fellowships are tenable for up to three years and are usually worth up to £250,000. They provide fellows with a salary plus employer contributions, essential research expenses and travel to conferences, seminars and other scholarly meetings. If enrolling for a PhD, a clinical salary will be provided, together with PhD registration fees, research expenses and a contribution to travel and general training costs.

Closing date: 22 Jan 16

Deadline information: Preliminary applications due by 22 January; full applications due by 30 March 2016. This call is repeated 2 times a year.

Posted date: 16 Oct 15

ONCOLOGY INNOVATION GRANT
Merck Serono

Description:
Merck Serono invites applications for its oncology innovation grant. This supports innovative research projects that have the potential to advance the implementation of personalised treatment for solid tumours. Following areas are of particular interest: access to personalised care for patients, innovative research with clinical relevance and benefits for patients, solid tumour malignancies.

Researchers from around the world may apply for the grant. Applicants may have to have preliminary data with positive outcomes to be eligible to apply.

A total grant of up to €1 million is available for one or more selected projects.

Closing date: 22 Jan 16
Deadline information:
Posted date: 12 Oct 15

Award type: Directed grants for individual investigators, Directed grants to institutions, research groups etc, Innovation grants
Award amount max: €1,000,000

JOINT CALL ON BIOBASED ECONOMY PROJECTS
ERA-Net Bioenergy

Description:
ERA-Net Bioenergy invites pre-proposals for its joint call on biobased economy projects focusing energy use. This supports collaborative research, development and innovation projects on novel bioenergy concepts. Proposals must address the economic, environmental and social sustainability of different bioenergy value chains and focus on added value of energetic uses such as heating, cooling, electricity, transport biofuels.

Proposals must include partners from at least two of the following participating countries: Austria, Poland, Sweden, Switzerland and the Netherlands. Third country partners may participate if they secure their own funding. Projects should contribute to increasing the economic competitiveness and of bioenergy concepts and it is strongly recommended that one or more industrial partners participate in the consortium. Large companies, small and medium sized enterprises, research organisations and stakeholder associations
may apply in transnational consortia, depending on national funding conditions.

Research will be funded from national sources and subject to national funding rules. The maximum project duration will be three years with an expected start date in early 2017.

Closing date: 22 Jan 16
Deadline information: Pre-proposals due by 1pm CET, 22 January 2016; full proposals due by 1pm CET, 30 May 2016.

YOUNG INVESTIGATOR AWARD
Children’s Tumor Foundation

Description:
The Children’s Tumor Foundation invites applications for its young investigator award. This supports young scientists early in their careers in order to bring them into the neurofibromatosis field and establish them as independent investigators. The main function of the award is to act as a seeding mechanism for researchers to enable them to secure larger grants from other agencies.

Applicants must either be postdoctoral fellows within seven years of completing their first doctoral degree or graduate students pursuing their doctoral degree. All researchers should be affiliated with the laboratory of a senior researcher who will act as a research sponsor, offering a training environment conducive for the growth and education of the researcher. Only one application per laboratory will be funded.

The award provides a salary between US$32,000 and US$54,000 per year for two years. Fringe or indirect costs of up to 10 per cent may also be requested, along with up to US$5,000 to support attendance at NF-related meetings or training courses.

Closing date: 24 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Pre-applications due by 24 January; invited full applications due by 25 February 2014. This call is repeated once a year.
A compilation of the Research Services of the Office of Research, Innovation & Development (ORID)

RACHEL TANUR PRIZE FOR VISUAL SOCIOLOGY
Social Science Research Council

Description:
The Social Science Research Council, in collaboration with the Mark Family Fund, invites applications for the Rachel Tanur prize for visual sociology. This encourages students to incorporate visual analysis in their study and understanding of social phenomena.

Applications may be submitted by undergraduate and graduate students worldwide majoring in any social science. Applicants must be currently enrolled or have received their degrees no earlier than the end of the term finishing before July 2016.

Three prizes, worth US$500, US$1,500 and US$2,500, will be presented at the International Sociology Association Forum of Sociology in July 2016 in Vienna, Austria.

Closing date: 25 Jan 16
Deadline information: This call is repeated every 2 years.
Posted date: 14 Sep 15
Award type: Prizes, Directed grants for individual investigators
Award amount max: $2,500

**2020-MG-2016 MOBILITY FOR GROWTH – SINGLE STAGE**
*Horizon 2020: Societal Challenges*

**Description:**
The European Commission Horizon 2020: Societal Challenges, under the smart, green and integrated transport work programme, invites proposals for its H2020-MG-2016 call on mobility for growth – single stage. Proposals may address the following topics:

- MG-1.5-2016 identification of gaps, barriers and needs in the aviation research;
- MG-3.1-2016 addressing aviation safety challenges;
- MG-3.6-2016 Euro-African initiative on road safety and traffic management;
- MG-4.4-2016 facilitating public procurement of innovative sustainable transport and mobility solutions in urban areas;
- MG-5.3-2016 promoting the deployment of green transport, towards eco-labels for logistics;
- MG-6.3-2016 roadmap, new business models, awareness raising, support and incentives for the roll-out of intelligent transport systems;
- MG-8.1-2016 research, technology development and market trends for the European transport manufacturing industries;
- MG-8.3-2016 assessing future requirements for skills and jobs across transport modes and systems;
- MG-8.6-2016 innovation awards for students and researchers in the context of the transport research arena conference in 2018.

Proposals must take the form of research and innovation actions or coordination and support actions, depending on the topic addressed. Research and innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country. Coordination and support actions require participation by at least one legal entity established in a member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each successful proposal is expected to receive between €400,000 and €9 million although proposals for other amounts will also be considered. The total indicative budget for this call is €36,1m.

H2020-ART-2016 AUTOMATED ROAD TRANSPORT – SINGLE STAGE
Horizon 2020: Societal Challenges

Description:
The European Commission Horizon 2020: Societal Challenges, under the smart, green and integrated transport work programme, invites proposals for its H2020-ART-2016 call on automated road transport – single stage. Proposals may address the following topic:

- ART-06-2016 coordination of activities in support of road automation.

Proposals must take the form of coordination and support actions. Coordination and support actions require participation by at least one legal entity established in a member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each successful proposal is expected to receive between €500,000 and €3 million although proposals for other amounts will also be considered. The total indicative budget for this call is €3m.

2020-GV-2016 EUROPEAN GREEN VEHICLES INITIATIVE

Horizon 2020: Societal Challenges

Description:
The European Commission Horizon 2020: Societal Challenges, under the smart, green and integrated transport work programme, invites proposals for its H2020-GV-2016 call on the European green vehicles initiative. Proposals may address the following topics:

- GV-02-2016 technologies for low emission light duty powertrains;
- GV-03-2016 system and cost optimised hybridisation of road vehicles;
- GV-11-2016 stimulating European research and development for the implementation of future road transport technologies;
- GV-12-2016 ERA-NET Co-fund on electromobility.

Proposals must take the form of research and innovation actions, coordination and support actions, innovation actions or ERA-NET cofund actions, depending on the topic addressed. Research and innovation actions, innovation actions and ERA-NET cofund actions require participation by at least three legal entities, each established in a different EU member state or associated country. Coordination and support actions require participation by at least one legal entity established in an member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each successful proposal is expected to receive between €2 million and €10m although proposals for other amounts will also be considered. The total indicative budget for this call is €78.5m.

Award amount max: £360,000

MAJOR PROJECT GRANTS
Alzheimer’s Research UK

Description:
Alzheimer’s Research UK invites applications for its major project grants. These fund high-quality research projects on Alzheimer’s disease and related dementias.

The lead applicant and point of contact must be based in a UK academic or research institution, but the application may include researchers or institutions outside the UK. The lead applicant or co-applicant must hold a tenure or tenure-track appointment.

Grants are worth up to £1 million each for a maximum period of five years, to cover salaries, equipment, and animal and running costs.

Closing date: 27 Jan 16
Posted date: 26 Aug 15
Award type: Directed grants for individual investigators, Directed grants to institutions,
**INTERDISCIPLINARY RESEARCH GRANT**

*Alzheimer’s Research UK*

**Description:**
Alzheimer’s Research UK invites applications for its interdisciplinary research grant. This encourages researchers from other fields into dementia research who have expertise and ideas which could benefit the field.

Lead applicants must be researchers who have not previously received funding for dementia research. However, one or more co-applicants must be researchers with a track record in the dementia field. Lead applicants must be based at a UK research or academic institution, however the application may include researchers or institutions outside the UK. In addition, the lead applicant must have a contract with the institution covering the duration of the grant. The lead or co-applicant must hold a tenure or tenure-track appointment.

The grant is worth up to £250,000 for up to three years to cover salaries, equipment, and animal and running costs.

**Closing date: 27 Jan 16**

**Deadline information:**

NIH: National Eye Institute

Description:
The National Eye Institute invites applications for its collaborative clinical vision research project grant (U10). This U10 funding opportunity announcement supports investigator-initiated clinical vision research projects, including multi-centre clinical trials and other complex or high-risk clinical vision research studies.

This funding opportunity announcement will use the U10 grant mechanism, and run in parallel with FOAs of similar scientific scope, PAR-14-097, PAR-14-098, PAR-14-099 and PAR-14-100, each of which invites applications under the UG1 cooperative clinical research – cooperative agreements mechanism.

US and foreign public and private non-profit organisations and for-profit organisations may apply.

Application budgets are not limited, but must reflect the actual needs of the project. The maximum project period is five years.

Ref: PAR-14-096 (replaces PAR-10-207).

Closing date: 25 Jan 16
Deadline information: Applications due by 5pm proposer’s local time, every 25 January, 25 May and 25 September until 8 May 2017.

NATIONAL COOPERATIVE REPROGRAMMED CELL RESEARCH GROUPS TO STUDY MENTAL ILLNESS (U19)
NIH: National Institute of Mental Health

Description:
The National Institute of Mental Health invites applications for its national cooperative reprogrammed cell research groups to study mental illness (U19) grants. This U19 funding opportunity announcement aims to create multidisciplinary research groups, in partnership with academia and industry, to use patient-derived reprogrammed cells to develop validated platforms for identifying novel targets and developing new therapeutics or diagnostic tools to reduce the burden of mental illness. The collaborations will lie at the interface between basic academic research and proprietary industrial research and involve cooperation between groups that might otherwise be competitors, with a focus on optimising tools and measures needed for successful translational research.

Application budgets are not limited, but must reflect the actual needs of the project. The maximum project period is five years. Applications may be submitted by foreign or domestic for-profit and non-profit organisations and public and private organisations.

NIH: National Eye Institute

Description:
The National Eye Institute invites applications for its clinical vision research: chair’s grant (UG1). This UG1 funding opportunity announcement supports the scientific
rationale, study aims and significance of the research project.

This funding opportunity announcement will use the UG1 grant mechanism, and run in parallel with FOAs of similar scientific scope, PAR-14-096, which invites applications under the U10 mechanism, and PAR-14-097, PAR-14-099 and PAR-14-100, each of which invites applications under the UG1 mechanism.

US and foreign public and private non-profit organisations and for-profit organisations may apply.

Application budgets are not limited, but must reflect the actual needs of the project. The maximum project period is five years.

Ref: PAR-14-098.

Closing date: 25 Jan 16
Posted date: 13 Feb 14
Award type: Research centres, Clinical trials, Directed grants to institutions, research groups etc

Clinical Vision Research: Clinical Centre Grant (UG1)
NIH: National Eye Institute

Description:
The National Eye Institute invites applications for its clinical vision research: clinical centre grant (UG1). This UG1 funding opportunity announcement supports the organisation and operations of the clinical centre responsible for recruitment and retention of study participants and implementation of the study protocol.

This funding opportunity announcement will use the UG1 grant mechanism, and run in parallel with FOAs of similar scientific scope, PAR-14-096, which invites applications under the U10 mechanism, and PAR-14-097, PAR-14-098 and PAR-14-100, each of which invites applications under the UG1 mechanism.

US and foreign public and private non-profit organisations and for-profit organisations may apply.
Application budgets are not limited, but must reflect the actual needs of the project. The maximum project period is five years.

Ref: PAR-14-099.

Closing date: 25 Jan 16  
Deadline information: Applications due by 5pm proposer’s local time, every 25 January, 25 May and 25 September until 8 May 2017.  
Posted date: 13 Feb 14  
Award type: Research centres, Clinical trials, Directed grants to institutions, research groups etc

ENOMIC RESOURCE GRANTS FOR COMMUNITY RESOURCE PROJECTS (U41)

NIH: National Human Genome Research Institute

Description:
The National Human Genome Research Institute invites application genomic resource grants for community resource projects (U41). This U41 funding announcement supports the development and distribution of genomic resources that will be available to and valuable for the broad research community, using cost-effective approaches. The research projects should have the following characteristics:

- they fill a demonstrable need and have a wide impact, well beyond the field of genomics itself;
- they are comprehensive in scope, covering the entire genome or all genes of an organism;
- they make data or materials broadly available to all researchers in a user-friendly manner;
- they use established, state-of-the-art, cost-efficient and robust production methods to generate and distribute high-quality products of lasting value;
- they are unique and do not duplicate resources that are otherwise available.

Eligible applicants include domestic and foreign for-profit or non-profit organisations and public or private institutions. The number of awards is contingent upon NIH appropriations and the submission of a sufficient number of meritorious applications. Application budgets are not limited, but should reflect the needs of the proposed project over a maximum period of five years.

EDCTP-TDR CLINICAL RESEARCH AND DEVELOPMENT FELLOWSHIPS  
World Health Organization

Description:  
The World Health Organization, together with the European and Developing Countries Clinical Trials Partnership invites applications for EDCTP-TDR clinical research and development fellowships. These enable researchers and key members of clinical trial research teams from low- and middle-income countries to acquire specialist skills in clinical research and development through placements in pharmaceutical companies and product development partnerships. Fellows employed by a research institution in any LMICs are placed in pharmaceutical companies and product development partnerships either in or outside Europe. Additionally fellows employed by a sub-Saharan African legal entity are placed in European-based pharmaceutical companies to train and develop specific clinical research skills of relevance to poverty-related diseases.

Junior to mid-career researchers or clinical staff who have been employed by a legal entity in a LMIC for the last 12 months may apply. Applicants must have received their first degree within 15 years of applying. For TDR applicants must be nationals or citizens, and resident in a LMIC. Applicants must be committed to returning to their home organisation for a minimum of two years after completion of the fellowship.

Placements can last from six months up to 24 months. The total budget for this call is €3 million and will cover 100 per cent of eligible costs.

Closing date: 28 Jan 16
Deadline information: Stage one proposals due between 5pm, 22 October 2015 and 5pm, 28 January 2016; stage two training plans due between 14 June and 21 July 2016.
Posted date: 16 Oct 15
Award type: Early-Career fellowships, Directed grants for individual investigators, Academic-Industry links, Development (Africa/Caribbean), Mid-Career fellowships
Award amount max: -

SUMMER STUDENT PROGRAMME FOR NON-MEMBER STATES
CERN (European Organisation for Nuclear Research)

Description:
The European Organisation for Nuclear Research invites applications for its summer student programme for non-member states. This aims to give students within the field of physics, computing and engineering, a chance to visit CERN, join the day to day work with the experimental teams, attend lectures, workshops and discussions with experts in their field.

Applicants must have completed at least three years of study at university level. They should have a good knowledge of English and may not have worked at CERN previously.

The scholarships last for eight weeks and includes a stipend to cover accommodation and meals. A limited number of travel scholarships will also be available.

Ref: SUM-NMS-2015.

Closing date: 28 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect.

Applications are due by 00:00 CET. This call is repeated once a year.

TRANSONATIONAL CALL FOR PROPOSALS
ERA-Net EuroTransBio

Description:
ERA-Net EuroTransBio invites proposals for its transnational call. This aims to enhance the competitive capacity of Europe’s biotechnology industry by supporting research intensive SMEs and their strategic partnerships. Funding is intended for innovative near to the market research and development and innovation projects in all fields of modern biotechnology. Consortia must include at least two SMEs from different participating countries or regions. Other members may include large companies, research groups and organisations that belong to the respective countries. The coordinator of each consortium must be an SME from an ETB member country or region participating in the call:

- Austria;
- Flanders, Belgium;
- Wallonia, Belgium;
- Finland;
- Alsace, France;
- Germany;
- Italy;
- Russia;

Non-EuroTransBio countries may participate with their own funding. National or regional eligibility criteria will apply.

Closing date: 29 Jan 16
Deadline information: Proposals due by 3pm CET.

UN TRUST FUND TO END VIOLENCE AGAINST WOMEN

United Nations Entity for Gender Equality and the Empowerment of Women

Description:
The United Nations Entity for Gender Equality and the Empowerment of Women invites concept notes for the UN Trust Fund to end violence against women. This supports initiatives that close the gap on the implementation of national and local laws, policies and actions against women and address violence against women and young girls. The fund favours projects which adopt the following approaches in pursuit of their goals:

- **human rights-based and gender-responsive approaches**, this includes addressing inequitable gender norms and power disparities as the root cause of violence against women and girls, and as a violation of human rights and an impediment to development;
- **holistic and multi-sectoral responses** that address women’s inter-related rights and needs in terms of prevention and response to violence against women and girls, including safety and protection, access to health, legal, property and inheritance rights, and economic security and rights;
- **focus on priority groups living in poverty and otherwise especially excluded or disadvantaged**, ensuring responsiveness to diversity by tailoring interventions to particular population groups;

Civil society organisations and networks, including non-governmental organisations, governmental authorities and research or evaluation institutions specialising in gender equality are eligible to apply. UN country teams are also eligible where requested by the government and in partnership with women’s groups. Partnerships between government and civil society organisations are encouraged. Concept notes should be submitted in English, French or Spanish.

Larger organisations may apply for grants ranging between US$300,000 and US$1 million over two to three years. Grants for smaller organisations are worth a minimum of US$50,000.

**Closing date: 29 Jan 16 (Forecast)**

**Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect.**
Applications due by 11.59pm EST. This call is repeated once a year.

**OUR PLANET, OUR HEALTH AWARDS**

*Wellcome Trust*

**Description:**
The Wellcome Trust invites applications for its our planet, our health awards. These support high-quality, transdisciplinary programmes of research that investigate novel aspects of, and build evidence for, how complex changes in our environment affect our health. Supported proposals will consider the interplay between different environments, drive collaborative research and ultimately lead to outputs with a significant impact on our health. Programmes may take the form of predictive modelling, developing innovative products or processes, policy development or evaluating specific interventions. Research programmes should have used a range of relevant disciplines and research methodologies.

Participating organisations may be located in any country, and the lead applicant may be employed in any sector. Proposals from a broad range of disciplines and that involve cross-sector collaborations are encouraged.

Awards are worth up to £2 million per year for up to five years and may cover salary costs for research staff, consumables and small equipment costs, travel costs for conferences and research meetings, office support and communication cost.

**Closing date:** 29 Jan 16  
**Deadline information:** Preliminary applications due by 5pm GMT, 29 January; full proposals due by August 2016.

**Posted date:** 21 Sep 15  
**Award type:** Travel to conferences, meetings etc., Travel for research purposes, Directed grants for individual investigators, Equipment and materials, Networking/collaboration

XPLORATORY RESEARCH GRANTS
Centre for Economic Policy Research

Description:
The Centre for Economic Policy Research and the Department for International Development, through their private enterprise development in low-income countries initiative, invite applications for their exploratory research grants. These enable researchers to explore new approaches to the study of firms in low-income countries and develop new or existing sources of data on these firms. Research may relate to private enterprises of all sizes and should produce results that will be useful for policy-making.

Proposals should address the following themes:

- modelling market frictions in low-income countries using newly available data;
- understanding how constraints interact using micro-founded macro models;
- the dynamics of SMEs – informality and entrepreneurship;
- the role of export-oriented industries in driving growth.
Proposals that address fragile and conflict-affected states, gender, and climate, environment and social compliance are particularly encouraged.

Only individuals, or teams with an individual representative, may apply.

Grants are worth between £10,000 and £35,000 over one year.

Closing date: 30 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Applications due by 5pm BST. This call is repeated 4 times a year.

Research and Development Small Grants
Staff and Educational Development Association

Description:
The Staff and Educational Development Association invites applications for its research and evaluation small grants. These support research and evaluation projects, including action research, in staff and educational development practice with the aim to continue improvement in the quality and understanding of educational development practices in higher education. Applications may consider issues such as teaching qualifications and accreditation, technology-enhancing learning, higher education in further education colleges, or internationalisation.

Successful projects may initiate research into a development activity, involve evaluation of a development activity already implemented, or entail a more conceptual exploration of education development practice, such as empirical research project of a literature review.

Applicants must be members of the association, or staff who works in institutions that hold membership. Applicants do not have to be based in an educational development, or similar, unit. All proposals should involve collaboration wither within or beyond the institution.
Up to five grants, worth £1,000 each, are available in which one is reserved for a developing researcher, namely someone with limited track record in pedagogic research. Grants may be used to pay for time release, administrative support, research equipment, travel, or attendance at a SEDA conference, or other events to disseminate the outcomes.

Closing date: 30 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

0TH ANNIVERSARY CONFERENCE BURSARIES
African Studies Association of the UK

Description:
The African Studies Association of the UK and the Centre of African Studies, funded by the Malaysian Commonwealth Studies Centre and the Smuts Memorial Fund, invite applications for their 50th anniversary conference bursaries. These enable African scholars and postgraduate students to attend the association’s and centre’s 50th anniversary conference, to be held in September 2016. The following bursaries are available:

- one bursary, worth up to £2,000, for an African academic working broadly in the area of technology transfer;
- one bursary, worth up to £2,000, for an African postgraduate student working broadly in the area of technology transfer;
- one bursary, worth up to £2,000, for an African academic working broadly in the area of food security or climate change;
- one bursary, worth up to £2,000, for an African postgraduate student working broadly in the area of food security or climate change;
- two bursaries, worth up to £1,500 each, for keynote speakers from Africa

- two bursaries, worth up to £1,000 each, for junior scholars from Africa working in any research area;
to give lectures within prominent panel streams;

- five bursaries, worth up to £400 each, for African and British postgraduate students working in any research area.

Applicants must be presenting papers at the conference.

Funding covers visa, flights and accommodation expenses.

RESEARCH GRANTS
Horowitz Foundation for Social Policy

Description:
The Horowitz Foundation for Social Policy invites applications for its research grants. Grants are awarded for work in major areas of the social sciences, including anthropology, area studies, economics, political science, psychology, sociology and urban studies, as well as newer areas such as evaluation research. Preference will be given to projects that deal with contemporary issues in the social sciences and issues of policy relevance.

Phd candidates whose projects have received approval from their appropriate department head or university are eligible to apply. There are no citizenship restrictions.

Grants are each worth US$7,500 – US$5,000 is awarded initially and an additional US$2,500 upon completion of project.

Closing date: 31 Jan 16
Deadline information: This call is repeated once a year.

**RESEARCH FUND**
*Prehistoric Society*

**Description:**
The Prehistoric Society invites applications for its research fund. This supports research into prehistoric archaeology in any part of the world. In conjunction with the general fund, the society administers the Bob Smith fund and the Leslie Grinsell award, for projects closest to the research interests of Bob Smith and Leslie Grinsell.

Applications are particularly welcomed from projects showing innovation in the field of prehistory research and from scholars in the earliest stages of their research careers. Preference is given to small-scale projects less likely to attract significant funding from other major sources.

Grants are normally worth between £100 and £1,000.

**Closing date:** 31 Jan 16
**Deadline information:** This call is repeated once a year.

RESEARCH GRANTS
Herb Society of America

Description:
The Herb Society of America invites applications for its research grants. These grants are available to students, professionals, and individuals engaged in research on the horticultural, scientific, and social applications or use of herbs throughout history. The grants are intended to support small, self-contained research projects that can be carried out in a short period of time. Awards are for a one-year period of work. The maximum amount available is $5,000 which may cover compensation for investigators, professional and technical assistance, research supplies and materials, and costs of computer time.

Closing date: 31 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

RESEARCH GRANTS
Foundation for Urban and Regional Studies

Description:
The Foundation for Urban and Regional Studies invites applications for its research grants in urban and regional studies. These promote urban and regional research, and within this field particularly encourage an understanding of the interconnection between social, economic and political processes, and of their broader causes and effects.

Applicants must be within five years of being awarded their doctorate or starting their first
academic position. Only nationals of countries listed in groups B and C of the World Bank classification are eligible. Grants may be held at any university.

Grants are usually worth up to £2,000 each and a limited number of higher-value grants, up to £5,000, may be awarded where this is justified.

Closing date: 31 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

GRANT-IN-AID PROGRAM
International Centre for Diffraction Data

Description:
The International Centre for Diffraction Data invites applications under its grant-in-aid programme awarded for the preparation of reference x-ray powder diffraction data. Preference will be given to proposals for generation of high quality experimental powder diffraction patterns, based on new data for phases which are not now represented in the powder diffraction file, but which are likely to be of considerable interest to present and future PDF users. Special consideration will also be given to classes of substances of high current interest, including new types of materials which have significance in industrial and research applications.

There are two different types of grant:

- pattern-producing grants are intended principally to be supplements to other research projects in which single phase pure compounds are being synthesised and characterised. On occasion, starter or trial grants of a small amount of money may be awarded at any time during the year. Their purpose is to give promising potential grantees the chance to demonstrate that they have the required pattern-producing capability so that they can submit a strong proposal in time for a future deadline;
- pattern-quality-enhancement grants are intended to support projects which advance the quality of the PDF by replacing existing patterns with improved ones.

Closing date: 31 Jan 16
Posted date: 12 Aug 09
Award type: Prototypes and demonstrations, Directed grants for individual investigators, Directed grants to institutions, research groups etc
Award amount max: -
Award amount min: -
Award budget total: -

**SUPPORT FOR SMALL ACADEMIC EXPENSES**

*Royal Economic Society*

**Description:**
The Royal Economic Society invites applications for its support for small academic expenses scheme. This provides financial support to members who require small sums for unexpected expenditures, such as travel expenses in connection with independent research work, the purchase of a piece of software, or expenses for a speaker at a conference being organised by the applicant’s university or institute. Applications are only considered for projects or conferences related to economics.

Preference is given to initiatives that are for the benefit of new entrants to the profession, or to those that cannot ordinarily be funded from other sources, such as existing research grants.

Grants are worth up to £600 each.

**Closing date:** 31 Jan 16  
**Deadline information:** Deadlines on: 31 January 2016, 31 May 2016, 30 September 2016, and repeated annually.  
**Posted date:** 01 Jun 15  
**Award type:** Hosting conferences, Travel for research purposes, Equipment and materials

**Award amount max:** £600  
**Award amount min:** -  
**Award budget total:** -

**JOHN LEYERLE-CARA PRIZE FOR DISSERTATION RESEARCH**

*Medieval Academy of America*

**Description:**
The Medieval Academy of America invites applications for the John Leyerle-CARA prize for dissertation research. This enables doctoral researchers in medieval studies to consult materials available in Toronto collections. These include the University of Toronto’s Robarts Library, the collections of the Dictionary of Old English and the Records of Early English Drama projects, and the library of the Pontifical Institute of Mediaeval Studies.

Applicants must be doctoral researchers and members of the academy.
The prize is worth US$1,000.

Closing date: 31 Jan 16
Deadline information: This call is repeated once a year.
Posted date: 21 Jul 15
Award type: Prizes, Access to libraries, Directed grants for individual investigators
Award amount max: $1,000

RESEARCH GRANTS
Feminist Review Trust

Description:
The Feminist Review Trust invites applications for its research grants. These support feminist scholars and activities. Awards may be used to support the following:

- hard-to-fund projects;
- pump priming activities;
- interventionist projects that support feminist values;
- training and development projects;
- one off events;
- dissemination;
- core funding;
- other projects.

The trust is unable to support MA, MSc or PhD students, with the exception of scholars from developing economies in exceptional circumstances.

Grants are worth up to £15,000 each.

Closing date: 31 Jan 16
Posted date: 13 Feb 15

PROJECT GRANTS
International Union for Quaternary Research

Description:
The International Union for Quaternary Research invites applications for its project grants. These support limited-scale activities with very specific aims, objectives and outcomes, which contribute in strategic ways to the wider aims of one or more international focus groups. Normally, projects would be developed by or in consultation with an IFG.

Priority is given to projects that include early-career scientists within eight years of receiving their PhD, or developing-country researchers from countries with low GDP.

Grants are typically worth between €4,000 and €5,000. Projects are expected to run for less than one inter-congress period.

Closing date: 31 Jan 16
Deadline information: This call is repeated once a year.
Posted date: 16 Oct 15

**ASSOCIATESHIP SCHEME GRANTS**

*Abdus Salam International Centre for Theoretical Physics*

**Description:**
The Abdus Salam International Centre for Theoretical Physics invites applications for its associateship scheme grants. These enable scientists from and working in developing countries to visit ICTP. The scheme includes:

- senior associateships, which allow candidates between 45 and 62 years of age to visit the centre;

Awards include travel and a living allowance, and funding is granted over six years. An extension of two years may be granted to individual associateship awardees.

**Closing date:** 31 Jan 16  
**Deadline information:** Applications are invited between 1 October 2015 and 31 January 2016. This call is repeated once a year.

GRANTS
Eurospine

Description:
Eurospine invites applications for its research grants. These support projects advancing knowledge about the spine, its characteristics, injuries, disorders and diseases. Any clinical or non-clinical application for research will be considered, excluding case series and product development. The applicant, or at least one member of the research team, must be a member of Eurospine. Grants will not be given without evidence that relevant ethical approval regarding the protection of human or animal subjects has been given or is pending. Applications must be submitted in English.

Closing date: 31 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Applications due by 12 midnight EST. This call is repeated once a year.

S

TUDY GRANTS
League of Finnish-American Societies - Suomi-Amerikka Yhdistysten Liitto

Description:
The League of Finnish-American Societies invites applications for its study grants. These enable Finnish students to carry out studies or research in the fields of business, technology, humanities or culture at higher education institutions in the US. The following grants are available:

- the SAYL Grant Foundation scholarship, worth US$3,000, supports further studies or research in the fields of art or science;
- the Björn Savén Finnish American scholarship, worth €30,000, is awarded to a 23 to 30 year old researcher or student working in the field of economics, business studies or technology;
- the American-Scandinavian Foundation awards provide varying amounts to support postgraduate students in various fields;
- the Thanks to Scandinavia Foundation scholarship, worth between US$7,000 and US$20,000, supports basic and further education for one to two students with a specific focus on multicultural issues, journalism, pedagogy, history and politics.
The total budget for these grants is €30,000 and approximately US$72,000.

Closing date: 31 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Applications are invited between 1 December 2014 and 31 January 2015. This call is repeated once a year.

**Research Grants**
*Society for Medieval Archaeology*

**Description:**
The Society for Medieval Archaeology invites applications for its research grants. The following funds are available to members:

- the Eric Fletcher Fund, worth up to £500, available to individual members, preferably at an early stage in their careers, for personal archaeological research and assistance to attend relevant conferences or for study tours;
- the Sudreys Fund, worth approximately £500, for travel related to research in the field of Viking studies;
- the medieval archaeology research grant, worth up to £1,000, for members wishing to carry out personal research, but excluding excavation costs, academic fees or costs for hosting conferences.

The society welcomes applications from graduate students but does not normally fund core elements of doctoral research where the costs could have been foreseen at the start. Funding for doctoral students does not normally exceed £500.

Closing date: 31 Jan 16
Deadline information: This call is repeated once a year.
Posted date: 27 Aug 15
Award type: Travel to conferences, meetings etc., Travel for research purposes, Directed grants for individual investigators

ONSERVATION AND RESEARCH GRANTS
Ornithological Society of the Middle East, the Caucasus and Central Asia

Description:
The Ornithological Society of the Middle East, the Caucasus and Central Asia invites applications for its conservation and research grants. These grants support bird conservation and ornithological research projects in the region. Projects should focus on these areas:

- investigating the status of critically endangered, endangered, vulnerable or near-threatened species;
- attempting to further knowledge of existing important bird areas;
- investigating potential new important bird areas or little-known areas;
- conducting ecological studies of little-known species;
- educational programmes.

Priority will be given to projects carried out by, or in collaboration with, nationals from the region. There is no upper limit to the size of grant but most average between £500 and £1,000.

Closing date: 31 Jan 16

STUDENT RESEARCH GRANTS
International Society for Equitation Science

Description:
The International Society for Equitation Science invites applications for its student research grants. These enable students to undertake supervised research projects in the field of equitation science. Projects should address the following priority goals:

• ethical equine training;
• improved equine behaviour and welfare;
• improved understanding of human-equine interaction;
• facilitating equitation science education;
• development of equine research methods and techniques.

Applicants must be student members of the society. Projects must be agreed and recommended by the proposed supervisor who must also be a member of the society, and projects should be run within a department or research group.

Up to four grants, worth £750 each, are available. Projects must be completed within nine months.

INTERNATIONAL FOCUS GROUPS GRANTS
International Union for Quaternary Research

Description:
The International Union for Quaternary Research invites applications for its international focus groups grants. These support non-permanent collaborations that address scientific issues of wide international significance related to quaternary research. A group should provide an umbrella for one or more focused projects that may either be defined by the group itself or can arise from the bottom-up proposals of how to address the group’s key questions.

Priority is given to projects that include early-career scientists within eight years of receiving their PhD, or developing-country researchers from countries with low GDP. Grants are typically worth between €5,000 and €8,000. Projects are expected to run for less than one inter-congress period.

Closing date: 31 Jan 16
Deadline information: This call is repeated once a year.

DOCTORAL PROGRAMME
European University Institute

Description:
The European University Institute invites applications for its doctoral programme. This offers funding for a fully structured doctoral programme with close supervision in writing dissertations. Researchers will acquire teaching, research and other skills in the fields of economics, history and civilisation, law, and political and social sciences.

Applicants must meet the specific requirements set by their national grant
authorities. Candidates from member countries adhering to the EUI convention may apply. An application to the EUI is automatically an application for a national grant except for in Portugal, Slovenia, Spain and the United Kingdom. Candidates from these countries have to apply for a national grant separately. Candidates from countries not included above may be admitted under the EUI special doctoral fellowships programme, for which they will be considered under this programme. The Italian Ministry of Foreign Affairs and International Cooperation supports students from selected Central Asian countries and Tunisia through their grants for foreigners programme.

The PhD programme has a duration of four years. In 2016/17 around 150 funded places are available.

Closing date: 31 Jan 16
Deadline information: Application are invited between 2 November 2015 and 12 midnight CET, 31 January 2016. This call is repeated once a year.

Fryer Library Award
University of Queensland

Description:
The University of Queensland invites applications for the Fryer Library award. This supports research on Australian studies utilising the collections of the University of Queensland’s Fryer Library. Applications are invited in the following areas:

- Australian literature;
- Australian theatre;
- indigenous studies;
- history of architecture;
- art and design;
- Australian history and political culture;
- women’s studies.

The applicants may be scholars from Australia and overseas. Awards will not normally be given to students enrolled in research higher degree programmes. Preference will be given to candidates whose projects make substantial use of the library and result in scholarly publications. It is anticipated that the successful applicant will be based at the St Lucia campus of the
University of Queensland for three to six months.

The award is worth AU$10,000. In addition, desk space, computer access, free copying and full library privileges will be provided for the winner and for up to two researchers receiving honorary awards.

Closing date: 31 Jan 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

WRITING UP GRANTS
Foundation for Urban and Regional Studies

Description:
The Foundation for Urban and Regional Studies invites applications for their writing-up grants. These support doctoral candidates in the field of urban and regional research. Dissertations should contribute to the understanding of the interconnection between social, economic and political processes and of the broader causes and effects of these processes. Research which examines policies critically and focuses on their unintended as well as intended consequences is more likely to be supported than research on managerially defined questions.

Doctoral students within the field of urban and regional studies who are close to submission may apply. By the time of application they must have completed all their field work, commenced their writing up and already know the date when they will submit their dissertation. Applicants usually will be in their third year or later of study.

Grants are worth up to £6,000 for a period of six months. They may cover university fees, accommodation and equipment expenses while writing up.

Closing date: 31 Jan 16
Deadline information: This call is repeated once a year.
Posted date: 31 Jul 15
Award type: Financial aid for postgraduate students, Thesis/Dissertation funding, Directed grants for individual investigators, Equipment and materials
Award amount max: £6,000
Award amount min: -
Award budget total: -
Website: http://www.ijurr.org/foundation-for-urban-and-regional-studies/writing-up-grants/

INVESTIGATOR-INITIATED RESEARCH GRANTS
Alzheimer's Association

Description:
The Alzheimer’s Association is inviting applications for its investigator-initiated research grants. These support research into one of the association's areas of interest or a compelling issue in Alzheimer's research pertinent to the applicant's special interest or expertise. Areas of interest for 2016 include:

- research in diverse populations: closing the gap;
- social and behavioural and cognitive and functional focus: evaluating interventions and translating knowledge into practice;
- biological focus: causes, early detection, treatment, models, prevention and risk factors.

Researchers with full-time staff or faculty appointments are encouraged to apply. Applications are accepted from public, private, domestic and foreign research laboratories, medical centres, hospitals and universities, with the exception of state and federal government-appropriated laboratories and for-profit organisations. State and federal government-appropriated laboratories in the US and abroad, and for-profit organisations, may participate as collaborating scientists with eligible applicant institutions.

Up to 20 awards are anticipated under this call. Each award is limited to US$240,000 for up to three years.

Closing date: 01 Feb 16 (Forecast)

Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

RESEARCH GRANTS

Association for the Study of Animal Behaviour

Description:
The Association for the Study of Animal Behaviour invites applications for its research grants. These support pilot and small-scale projects in all areas of animal behaviour that are unlikely to attract funding from alternative sources. Grants may be made to allow the applicant to travel to conduct collaborative research, or to bring a collaborator to the applicant's institution. Research projects in all areas of animal behaviour will be considered.

Applicants must have a PhD and should have been ASAB members for a minimum of one year. Preference may be given to applicants early in their career and first-time applicants.

Grants are worth up to £7,500 and may cover equipment, research expenses, salaries, travel and subsistence.

Closing date: 01 Feb 16
Deadline information: Deadlines on: 1 February 2016, 1 June 2016, 1 October 2016, and repeated annually.
Posted date: 04 Sep 14
Award type: Travel for research purposes, Directed grants to individual investigators,

SUMMER INTERNSHIP PROGRAM FOR GRADUATE STUDENTS

Educational Testing Service

Description:
The Educational Testing Service invites applications under its summer programme for research for graduate students. Students will participate in research under the guidance of a senior ETS staff member in one of the following areas: measurement theory, validity, natural language, processing and computational linguistics, cognitive psychology, learning theory, linguistics, speech recognition and processing, teaching and classroom research, statistics,
international large scale assessments. The programme is designed to attract applicants from diverse backgrounds, especially traditionally underrepresented groups such as African Americans, Hispanic or Latino Americans, and American Indians, who are conducting research in educational measurement and related fields. Applications are welcome from graduate students who are currently enrolled in a doctoral programme and have completed at least two years of full-time graduate study in a programme emphasising one of the specified areas.

Each graduate intern will receive a US$6,000 stipend for the eight week internship period as well as transportation allowance for relocating to and from the Princeton area and housing for interns commuting more than 50 miles. The stipend may be raised to US$9,000 if the project requires a 12-week internship.

Closing date: 01 Feb 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

GRANTS-IN-AID
University of Wisconsin

Description:
The Friends of the University of Wisconsin-Madison Libraries group invites applications for its grants-in-aid program. These grants support research in the humanities in any field appropriate to the collections. Memorial Library is distinguished in almost every area of scholarship. It holds world-renowned collections of:

- history of science from the middle ages through the enlightenment;
- the largest American collection of avant-garde little magazines;
• a rapidly growing collection of American women writers to 1920;
• Scandinavian and Germanic history and literatures;
• Dutch post-Reformation theology and church history;
• French political pamphlets of the sixteenth and seventeenth centuries.

Generally, applicants must have a PhD or be able to demonstrate a record of solid intellectual accomplishment. Foreign scholars and graduate students who have completed all requirements except the dissertation are also eligible.

Awards are worth $2,000 each and one month in duration. Additional funds of $1,000 are available for those traveling from outside North America.

Closing date: 01 Feb 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

RESEARCH SUPPORT FUND
Viking Society for Northern Research

Description:
The Viking Society for Northern Research invites applications for its research support fund. The purpose of the fund is to assist in the development of the study of the literature, history, language and archaeology of early and medieval Scandinavia.

Applicants should normally be members of the Viking Society. Non-members may be considered in special circumstances.
RESEARCH GRANTS
British Society for Geomorphology

Description:
The British Society for Geomorphology invites applications for its research grants. These support scientific activities and research related to geomorphology. Grants are available for the following purposes:

- to contribute towards specific research costs, such as travel for research and consumables;
- to establish fixed-term working groups to discuss and take forward specific developments or topic areas within geomorphology – groups should address areas in which rapid developments are taking place, or in which key issues are arising which would be aided by increased communication between small communities of interested researchers;
- to set up and maintain long-term geomorphological monitoring;
- to establish working groups to undertake the preliminary work required to develop proposals for research council thematic programmes or responsive-mode grants.

Members of the society may apply.

Grants are worth up to £1,000 each.

Closing date: 01 Feb 16
Deadline information: Deadlines on: 1 February 2016, 30 September 2016, and repeated annually.
Posted date: 01 Oct 15
Award type: Travel to conferences, meetings etc., Travel for research purposes, Directed grants for individual investigators, Directed grants to institutions, research groups etc
Publish, edit, translate, disseminate, Equipment and materials, Networking/collaboration
EVERYDAY TECHNOLOGIES FOR ALZHEIMER CARE RESEARCH GRANTS

Alzheimer’s Association

Description:
The Alzheimer’s Association, in partnership with Intel Corporation, invites applications for its everyday technologies for Alzheimer care research grants. These support proposals on personalised diagnostics, preventive tools and interventions for adults coping with the spectrum of cognitive ageing and neurodegenerative disease, particularly Alzheimer’s disease. The association is interested in groundbreaking studies on emerging information and communication technologies as well as their clinical and social implications. Possible research topics include:

- behavioural assessment for early detection;
- prevention;
- safety monitoring and support for caregivers;
- supporting independent function in daily life;
- social support through face or audio recognition;
- detecting moments and patterns of lucidity;
- privacy and security concerns of Alzheimer’s families.

Investigators who hold full-time staff or faculty appointments may apply. Applications are accepted from public, private, domestic and foreign research laboratories, medical centres, hospitals and universities, with the exception of state and federal government-appropriated laboratories and for-profit organisations. State and federal government-appropriated laboratories in the US and abroad, and for-profit organisations, may participate as collaborating scientists with eligible applicant institutions.

Up to two awards, limited to US$200,000 each for up to three years, are available. Requests in any given year may not exceed US$90,000.

Closing date: 01 Feb 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

Research Assistance Grants
Hawai’i Council for the Humanities

Description:
The Hawai’i Council for the Humanities invites applications for its humanities research assistance grants. These grants are designed to support research on a topic or issue centered in the humanities field. Projects may include:

- an examination of primary sources in archives and libraries;
- travel to collections;
- conducting of oral histories.

Eligible applicants include individuals and non-profit and public institutions serving Hawai’i audiences. Grants are limited to $2,500.

Closing date: 01 Feb 16

GENERAL RESEARCH GRANTS
Friedreich’s Ataxia Research Alliance

Description:
Friedreich’s Ataxia Research Alliance invites applications for its research grants.

Qualified investigators may submit letter of intent for projects that target FARA’s research priorities. A subtype of the general research grant is available for postdoctoral trainees and PhD students. The guidelines for general grants should be followed, but the only budget item should be the salary, benefit and tuition support for the trainee or student.

Funding is worth up to US$150,000 per year for one or two years. Salaries may be requested for all those contributing to the research project.

Closing date: 01 Feb 16
Deadline information: Letters of intent due 1 February and 1 July annually; invited full applications due 1 April and 15 September annually.

PRIMATE RESEARCH GRANTS
Primate Conservation

Description:
Primate Conservation invites applications for its research grants. These provide support for original research that can be used to formulate and to implement conservation plans for the species studied. Priority will be given to projects that study the least known and most endangered species in their natural habitat.

Grants are awarded to graduate students, qualified conservationists and primatologists to support field research into endangered primates. The involvement of citizens from the country in which the primates are found is encouraged.
Funding of approximately US$2,500 is provided on average, with a maximum grant of US$5,000.

PROJECT SUPPORT GRANT
British Society for Neuroendocrinology

Description:
The British Society for Neuroendocrinology invites applications for its project support grants. These provide support for consumables and other research costs to enable postdoctoral scientists or students to carry out neuroendocrine research projects.

The scheme is primarily intended to support PhD studentships, although it will also provide resources for MRes. Applicants must be postdoctoral researchers within 10 years of their doctoral award, or academic or faculty staff applying on behalf of a student.

Each applicant must have been a full member of the society for at least six months. Previous recipients of funding are eligible to apply. Non-UK based members are also eligible to apply. Students must also be members of the society. A total of 12 awards, worth a maximum of £5,000 each, are available every year.

Closing date: 01 Feb 16
Deadline information: Deadlines on: 1 February 2016, 1 May 2016, 1 August 2016, 1 November 2016, and repeated annually.

EARLY-CAREER RESEARCHER GRANTS
British Society for Geomorphology

Description:
The British Society for Geomorphology invites applications for its early-career researcher grants. These support pump-prime geomorphological research undertaken by an early-career researcher.

Each applicant must be a member of staff with an employment contract of 0.2 FTE or greater, who started their academic career within four years of the closing date for applications.

Grants are worth up to £5,000 to support field costs, data and equipment.

Closing date: 01 Feb 16

ENTORED RESEARCH AWARDS
International Anesthesia Research Society

Description:
The International Anesthesia Research Society invites applications from members for its mentored research awards. These support early career investigators with mentored research projects relevant to the broad practice of anaesthesiology and its subspecialties. Any area of investigation from clinical and translational to basic science is eligible.

Principal applicants must be society members who are yet to establish substantial independent research funding or who are initiating a new area of research. They should be within 10 years of completing clinical training or a PhD and have 45 per cent protected non-clinical time. The involvement of a senior mentor is required in the project.

Up to four projects may receive funding worth up to US$150,000 over two years.
Closing date: 01 Feb 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect.
Applications due by 11.59 pm EST. This call is repeated once a year.

CONNECTION GRANTS FOR OTHER OUTREACH ACTIVITIES
Social Sciences and Humanities Research Council of Canada – Conseil de Recherches en Sciences Humaines

Description:
The Social Sciences and Humanities Research Council of Canada invites applications for its connection grants for other outreach activities. These support outreach activities geared toward short-term, targeted knowledge mobilisation initiatives in the field of social sciences and humanities.

Activities must engage the broader public in humanities and social sciences knowledge through one or a combination of the following:

- knowledge dissemination;
- knowledge transfer;
- knowledge brokering;
- knowledge translation;
- knowledge synthesis;
- knowledge exchange;
- networking;
- knowledge co-creation.

Applicants may be individuals, teams or institutions. All applicants should be affiliated with an eligible Canadian postsecondary institution while applying or, in the case of postdoctoral fellows and researchers, should establish an affiliation within three months of the grant start date.

Co-applicants may be included from international or from Canadian postsecondary institutions, non-profit organisations, philanthropic foundations, think tanks, as well as municipal, territorial or provincial governments.
Grants are generally worth up to CA$50,000 over one year; however, higher amounts may be considered. Funding does not cover more than 50 per cent of the eligible costs.

Closing date: 01 Feb 16
Deadline information: Applications due by 12 midnight ET on deadline dates. Deadlines on: 1 February 2016, 1 May 2016, 1 August 2016, 1 November 2016, and repeated annually.

COMING SOON: INSIGHT DEVELOPMENT GRANTS
Social Sciences and Humanities Research Council of Canada – Conseil de Recherches en Sciences Humaines

Description:
The Social Science and Humanities Research Council of Canada will shortly be inviting applications for its insight development grants. The call is expected to close on 1 February 2016. The following information refers to the previous call and is subject to change.

These grants support research in its initial stages, enabling the development of new research questions as well as experimentation with new methods, theoretical approaches or ideas. Projects may include case studies, pilot initiatives, critical analyses of existing research, national and international research collaboration, and the exploration of new ways of producing, structuring and mobilising knowledge within and across disciplines and sectors. They may address the following future challenge areas and their subquestions:

- what new ways of learning, particularly in higher education, will Canadians need in order to thrive in an evolving society and labour market;
- what effects will the quest for energy and natural resources have on the Canadian society and its position on the world stage;
- how are the experiences and aspirations of Aboriginal peoples in Canada essential to building a successful shared future;
- what might the implications of global peak population be for Canada;
• how can emerging technologies be leveraged to benefit Canadians;
• what knowledge will Canada need in order to thrive in an interconnected, evolving global landscape.

Applicants must either be individual emerging or established researchers, or teams of such researchers, consisting of one applicant and at least one co-applicant or collaborator. Emerging scholars should have completed their highest degree no more than five years prior to applying, held a tenured or tenure-track university appointment for less than five years, have held a university appointment but never a tenure-track position, or have had their careers significantly interrupted or delayed for health or family reasons within the past six years. Established scholars should have established a record of research achievement.

Applicants must be affiliated with an eligible Canadian postsecondary institution at the time of application, or formally establish such affiliation within three months of the grant start date. Co-applicants should be researchers whose primary affiliation is with a postsecondary institution anywhere in the world. Collaborators may be any individuals, provided that they will make a significant contribution to the research.

Grants are worth between CA$7,000 and CA$75,000 each over one to two years.

Closing date: 01 Feb 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect.
Applications are expected to close at 8pm ET, 1 February 2016. This call is repeated once a year.

GRANTS TO DANCE PROFESSIONALS
Canada Council for the Arts – Conseil des Arts du Canada

Description:
The Canada Council for the Arts invites applications for its grants to dance professionals. These enable individual Canadian dance professionals to pursue projects involving professional development, research, apprenticeship, mentorship or sabbaticals.
Canadian dance professionals are welcome to apply. Applicants must be Canadian citizens or persons with permanent resident status, but do not have to be living in Canada when applying.

Grants are worth up to CA$10,000 each for apprenticeship and mentorship projects, and up to CA$20,000 each for professional development and research projects.

Closing date: 01 Feb 16
Deadline information: Applications due on 1 February annually. If this deadline falls on a weekend or statutory holiday applications are due on the next business day. This call is repeated once a year.

Posted date: 02 Feb 15
Award type: Personal development, Directed grants for individual investigators
Award amount max: $20,000

PROJECT GRANTS FOR CURATORS AND CRITICS
Canada Council for the Arts – Conseil des Arts du Canada

Description:
The Canada Council for the Arts invites applications for its project grants for curators and critics. These enable visual arts professionals to devote a sustained period of time to documentation, study and writing related to visual arts, and to develop approaches supporting their practice. The submitted programme of work in research and writing must be carried out independently. Eligible activities include the following:

• conducting studio visits, attending exhibitions and meetings with other arts professionals in Canada or abroad;
• writing and preparing manuscripts;
• participating in curatorial residencies at a professional visual arts organisation in Canada or abroad.

Professional Canadian critics and curators are welcome to apply. Applicants must be Canadian citizens or persons with permanent resident status, but do not have to be living in Canada when applying. They must also meet one of the following criteria: after basic training, have curated at least three exhibitions or public presentations of

GROUP STUDY VISITS
Deutscher Akademischer Austauschdienst – German Academic Exchange Service

Description:
The German Academic Exchange Service (DAAD) invites applications for its group study visits to Germany. These aim to provide students with subject related knowledge, facilitate meetings with German students, academics and researchers and give the students a greater understanding of and insight into economic, political and cultural life in Germany. Groups visit at least two German universities where they participate in the academic programme.

University teachers from a foreign university are eligible to apply for study trips for groups of a maximum of 15 students. Individual doctoral candidates may also be funded. Students must be registered at a foreign university and have completed at least one semester.

The grant is worth €50 per student per day towards travel and accommodation for groups from the EU member states, Albania, Australia, Bosnia-Herzegovina, Hong Kong, Iceland, Japan, Canada, Croatia, Liechtenstein, New Zealand, Norway, the Russian Federation, Switzerland, Serbia, South Korea, Taiwan, Turkey, Ukraine and US. For groups from the remaining countries the grant only covers travel within Germany and a meals allowance of €18 per day. For groups from Colombia both flat rate and
organised travel are possible. Study visits may last between seven and 12 days.

Closing date: 01 Feb 16
Deadline information: Applicants are advised to check for special conditions applicable to their home country. Deadlines on: 1 February 2016, 1 May 2016, 1 November 2016, and repeated annually.

FRIEDMAN CHEETAH CONSERVATION GRANTS PROGRAMME
Panthera

Description:
Panthera invites letters of intent for the Friedman cheetah conservation grants programme. This supports in situ conservation projects on cheetahs in Africa. Priority will be given to proposals that include the following research activities:

- surveys of the cheetah’s range – countries of interest include Angola, Ethiopia, Mozambique, South Sudan, Zambia, West Africa and North Africa;
- corridor delineation – identifying and delineating important connections between known cheetah populations, including conducting surveys, and telemetry projects to discern cheetah movements between protected areas;
- applying interventions that mitigate threats to cheetahs including activities which measurably reduce the
persecution of cheetahs by poachers and the illegal cheetah trade.

Individuals and institutions are eligible to apply. Individual applicants must have at least a BSc or equivalent, but preference will be given to graduate students and early career conservationists. The programme is open to all qualified candidates but projects led by country nationals or in country non-governmental organisations are prioritised.

Grants of up to US$15,000 per year are available.

Closing date: 01 Feb 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Letters of interest are welcomed between 1 January and 1 February; invited applications due by 1 April 2015. This call is repeated once a year.
Posted date: 27 Jun 14

**Description:**
Energimyndigheten inbjuder ansökningar om medel ur forsknings- och innovationsprogrammet marin energiomvandling. Programmet bidrar till fortsatt kunskaps- och teknikutveckling inom området marin energi som kan tillgodose branschens och samhällets behov, samt bidra till att marin energi får ökad betydelse i energisystemet.

Forsknings-, utvecklings- och demonstrationsprojekt ska beröra programmets följande huvudområden:

- ytterligare kunskap om miljöpåverkan under etablering, drift och avveckling;
- förbättrad tillförlitlighet och överlevnadsförmåga;
- utveckling av system, delsystem och komponenter för kostnadseffektiv energiomvandling av havsenergi;
- tekniska lösningar för kostnadseffektiva elsystem;
- förbättrade etablerings-, drifts- och underhållsstrategier.

Projekt måste leda till nya kunskap eller nya metoder, alternativt utveckla eller demonstrera ny teknik eller nya processer.

Behöriga att söka är institutioner vid svenska högskolor och universitet, institut samt företag. Internationellt deltagande uppmuntras dock endast svenska organisationer kan få stöd.

**Closing date:** 01 Feb 16
**Deadline information:** Applications due by 12 midnight.

ARTS PROJECT GRANTS FOR ORGANISATIONS  
Australia Council for the Arts

Description:
The Australia Council for the Arts invites applications for its arts project grants for organisations. These support a range of activities that deliver benefits to the arts sector and wider public, including:

- creation of new work;
- arts practice based research;
- creative development;
- professional skills development;
- experimentation;
- collaborations;
- touring;
- festivals;
- productions;
- exhibitions;
- performances;
- publishing;
- recording;
- promotion and marketing;
- market development activity.

Applications are invited from organisations. International organisations can apply for projects that benefit practising Australian artists or their work.

Grants range from AU$10,000 to AU$100,000 over a maximum period of two years.

Closing date: 02 Feb 16

Posted date: 21 Sep 15

Award type: Directed grants to institutions, research groups etc. Publish, edit, translate, disseminate, Networking/collaboration

2020 ERC-2016-COG CONSOLIDATOR GRANTS

Horizon 2020: Excellent Science

Description:
The European Commission Horizon 2020: ERC invites proposals for its ERC-2016-COG call consolidator grants.

These enable principal investigators to consolidate their own independent research team or programme. Applications may be made in any field of research; however, ERC puts particular emphasis on the frontiers of science, scholarship and engineering, and encourages interdisciplinary proposals.

Applicants may be of any age and nationality and based anywhere in the world, although the research must be carried out in a host institution in an EU member state or associated country, including Switzerland. The host may be a public or private institution. It is also required that PI applicants have been awarded their first PhD at least seven and up to 12 years prior to 1 January 2016. They will normally have produced several important publications without the participation of their PhD supervisor. All H2020 funding calls allow the participation in consortia of third country partners who secure their own funding.

The call has a budget of approximately €605 million. Grants are worth up to €2m over five years, with a further €750,000 available for start-up costs, equipment purchases and access to large facilities. Grants may fund up to 100 per cent of the total eligible direct costs, plus a contribution towards indirect costs. Approximately 335 grants are available.

Closing date: 02 Feb 16
Deadline information: Proposals due by 5pm Brussels time.

CAPACITY BUILDING IN THE FIELD OF YOUTH

Education, Audiovisual and Culture Executive Agency

Description:
The Education, Audiovisual and Culture Executive Agency’s Erasmus+ programme invites applications for its capacity building in the field of youth action. This aims to increase the capacity of organisations through the
implementation of transnational capacity-building and mobility activities. Youth capacities projects will:

- foster cooperation and exchanges in the field of youth between programme countries and partner countries;
- improve the quality and recognition of youth work, non-formal learning and volunteering in partner countries and enhance their synergies and complementarities with other education systems, the labour market and society;
- foster the development, testing and launching of schemes and programmes of non-formal learning mobility at regional level;
- promote transnational non-formal learning mobility between programme and partner countries, especially targeting young people with fewer opportunities, with a view to improving participants' level of competences and fostering their active participation in society.

Projects are transnational and must involve a minimum of three participating organisations from three different countries, including at least one programme country and one eligible partner country. Projects activities may vary depending on the participating partner countries. Projects may last between nine months and two years.

Each grant is worth up to €150,000, which can represent up to 80 per cent of the total costs.

ESEARCH GRANTS
National Multiple Sclerosis Society

Description:
The National Multiple Sclerosis Society invites applications for its research grants. These support fundamental and non-clinical or clinical applied studies related to multiple sclerosis including projects in patient management, care and rehabilitation.

Principal investigators may be of any nationality and the sponsoring institution may be in any country permitted by US law. To request support for research in a foreign country applicants are required to exhaust all local resources including governmental granting agencies and other national multiple sclerosis societies before coming to the NMSS of the US.

Grants are awarded for one to five years and may cover salaries, patient costs, permanent equipment, consumable supplies, travel and other expenditures.

CLINICAL STUDIES OF SAFETY AND EFFECTIVENESS OF ORPHAN PRODUCTS RESEARCH PROJECT GRANT (R01)
Food and Drug Administration

Description:
The US Food and Drug Administration, under the Office of Orphan Products Development, invites applications for its clinical studies of safety and effectiveness of orphan products research project grant. This R01 grant aims to support the clinical development of products for use in rare diseases or conditions where no current therapy exists, or where the product to be developed is superior to an existing therapy. Thus, the project should be a clinical study on safety or effectiveness that either
result in, or substantially contribute to, market approval of these products. The level of funding is determined by the level of study in the following way:

- phase one studies may receive up to US$250,000 per year for up to three years, and include studies that are usually conducted in healthy volunteer subjects and are designed to determine the metabolic and pharmacological actions of the product in humans, and the side effects associated with increasing drug doses to obtain data on the product’s safety;
- phase two studies may receive up to US$500,000 per year for up to four years, and include early controlled clinical studies conducted to evaluate the effectiveness of the product for a particular indication in patients with the disease or condition, and determine the common short term side effects and risks associated with it;
- phase three studies may receive up to US$500,000 per year for up to four years, and include studies that generally gather more information about effectiveness and safety that is necessary to evaluate the overall risk-benefit ratio of the product, and provide an acceptable basis for product labelling.

Universities, public, private, for-profit or non-profit institutions throughout the world may apply. When multiple institutions apply, one institution must be designated as the prime institution. Cost-sharing is not required.

Description:
The European Commission Horizon 2020: Industrial Leadership, under the Innovation in SMEs work programme, invites proposals for its H2020-SMEInst-2016-2017 dedicated SME instrument call - phase two. This call supports projects with a European dimension that lead to major changes in how business is done and will assist innovative SMEs to shape new markets, create growth, and achieve high return on investment.

Proposals may address the following topics:

- SMEInst-01-2016-2017 open disruptive innovation scheme;
- SMEInst-02-2016-2017 accelerating the uptake of nanotechnologies advanced materials or advanced manufacturing and processing technologies by SMEs;
- SMEInst-03-2016-2017 dedicated support to biotechnology SMEs closing the gap from lab to market;
- SMEInst-04-2016-2017 engaging SMEs in space research and development;
- SMEInst-05-2016-2017 supporting innovative SMEs in the healthcare biotechnology sector;
- SMEInst-06-2016-2017 accelerating market introduction of ICT solutions for health, wellbeing and ageing well;
- SMEInst-07-2016-2017 stimulating the innovation potential of SMEs for sustainable and competitive agriculture, forestry, agri-food and bio-based sectors;
- SMEInst-08-2016-2017 supporting SMEs efforts for the development to deployment and market replication of innovative solutions for blue growth;
- SMEInst-09-2016-2017 stimulating the innovation potential of SMEs for a low carbon and efficient energy system;
- SMEInst-10-2016-2017 small business innovation research for transport and smart cities mobility;
- SMEInst-11-2016-2017 boosting the potential of small businesses in the areas of climate action, environment, resource efficiency and raw materials;
- SMEInst-12-2016-2017 new business models for inclusive, innovative and reflective societies;
- SMEInst-13-2016-2017 engaging SMEs in security research and development.

Proposals must take the form of SME instrument actions. These require at least one SME. Only applications from for-profit SMEs established in EU member states or associated countries are eligible. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each successful proposal is expected to receive between €500,000 and €2.5 million over 12 to 24 months, although proposals for other amounts will also be considered.

Ref: OJ C6776.

Closing date: 03 Feb 16
Deadline information: Call opens 26 November 2015. Proposals due by 5pm Brussels time, 3 February, 14 April, 15 June, and 13 October 2016, and 18 January, 6 April, 1 June and 18 October 2017.

EW PATHWAYS RESEARCH PROGRAMME AWARDS
Huntington Society of Canada – Société Huntington du Canada

Description:
The Huntington Society of Canada invites applications for its new pathways research programme awards. These support projects by researchers from anywhere in the world that will eventually lead to the next generation of targets for the treatment of Huntington disease. Projects should address any of the following objectives:

• explore early mechanisms of disease in Huntington disease through unbiased analysis of genetically defined tissues or cells with a goal of uncovering or sharing the discovery of new pathways or processes affected in HD;
• elucidate the normal biological functions of the huntingtin protein, with experiments involving either endogenous normal huntingtin or huntingtin protein in a full-length context;
• further the understanding of the impact on HD of increasing numbers of alleles or repeats and the CAG DNA expansion process;
• further the analysis of modifier genes to determine the impact on various aspects of HD.

Applicants should be individuals who hold a full-time faculty appointment in an appropriate discipline at a university, research institute or hospital. Proposals are called internationally.

Each award is worth up to CA$150,000 for one year. Funds may be used to cover personnel costs, supplies, equipment purchases not exceeding CA$5,000 or to cover up to CA$3,000 of travel expenses related to presenting research findings or attending a major conference or symposium.

Closing date: 04 Feb 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

H

2020-CO-CREATION-2016 CO-CREATION FOR GROWTH AND INCLUSION – TOPICS 2, 3, 8 AND 9

Horizon 2020: Societal Challenges

Description:
The European Commission Horizon 2020: Societal Challenges invites proposals, under the Europe in a changing world – inclusive, innovative and reflective societies work programme, for its H2020-CO-CREATION-2016 co-creation for growth and inclusion call. Proposals may address the following topics:

- CO-CREATION-02-2016 user-driven innovation: value creation through design-enabled innovation;
- CO-CREATION-03-2016 piloting demand-side measures fostering optimal knowledge circulation in Europe;
- CO-CREATION-08-2016 better integration of evidence on the impact of research and innovation in policy making;
- CO-CREATION-09-2016 a European map of knowledge co-creation in support of research and innovation for societal challenges.

Proposals must take the form of research and innovation actions, innovation actions or coordination and support actions, depending on the topic addressed. Research and innovation actions and innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country and independent of each other. Coordination and support actions require at least one legal entity established in a member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each proposal may receive between €1 million and €4m, although larger proposals may be considered. The indicative budget this call is €14.5m.

**2020-REV-INEQUAL-2016 REVERSING INEQUALITIES AND PROMOTING FAIRNESS – TOPICS 1 TO 8, 10**

*Horizon 2020: Societal Challenges*

**Description:**
The European Commission Horizon 2020: Societal Challenges invites proposals, under the Europe in a changing world – inclusive, innovative and reflective societies work programme, for its H2020-REV-INEQUAL-2016 reversing inequalities and promoting fairness call. Proposals may address the following topics:

- REV-INEQUAL-01-2016 an empirically informed European theory of justice and fairness;
- REV-INEQUAL-02-2016 contemporary radicalisation trends and their implications for Europe;
- REV-INEQUAL-03-2016 dynamics of inequalities across the life-course;
- REV-INEQUAL-04-2016 intra-EU mobility and its impacts for social and economic systems;
- REV-INEQUAL-05-2016 inequalities in the EU and their consequences for democracy, social cohesion and inclusion;
- REV-INEQUAL-06-2016 tackling inequalities at their roots – new policies for fairness in education from early age;
- REV-INEQUAL-07-2016 spatial justice, social cohesion and territorial inequalities;
- REV-INEQUAL-08-2016 fighting inequalities through policies against tax fraud and tax evasion;
- REV-INEQUAL-10-2016 multi-stakeholder platform for enhancing youth digital opportunities.

Proposals must take the form of research and innovation, coordination and support actions or ERA-NET-Cofund actions, depending on the topic addressed. Research and innovation actions and ERA-NET-Cofund actions require participation by at least three legal entities, each established in a different EU member
state or associated country and independent of each other.

Coordination and support actions require at least one legal entity established in a member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each proposal may receive between €1 million and €5m, although larger proposals may be considered. The indicative budget for this call is €43.5m.

Ref: OJ C6776.

Horizon 2020: Societal Challenges

Description:
The European Commission Horizon 2020: Societal Challenges invites proposals, under the Europe in a changing world – inclusive, innovative and reflective societies work programme, for its H2020-CULT-COOP-2016 understanding Europe – promoting the European public and cultural space call. Proposals may address the following topics:

- CULT-COOP-08-2016 virtual museums and social platform on European digital heritage, memory, identity and cultural interaction;
- CULT-COOP-11-2016/2017 understanding the transformation of European public administrations.

Proposals must take the form of research and innovation actions or coordination and support actions, depending on the topic addressed. Research and innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country. Coordination and support actions require at least one legal entity established in a member state or associated country. All H2020 funding
calls allow third country partners who secure their own funding to participate in consortia.

Each proposal may receive between €500,000 and €5 million, although larger proposals may be considered. The indicative budget for this call is €19.5m.

H 2020-WIDESPREAD-2016 SUPPORT TO JOINT PROGRAMMING INITIATIVES IN URBAN EUROPE – TOPIC 2

Horizon 2020: Spreading Excellence and Widening Participation

Description:
The European Commission Horizon 2020: Spreading Excellence and Widening Participation invites proposals for its H2020-WIDESPREAD-02-2016 support to joint programming initiatives in urban Europe call. This initiative enhances the knowledge and capacities in order to support urban transition towards sustainability in Europe and beyond. Proposals may address the topic WIDESPREAD-02-2-16 support to JPI urban Europe.

All participants in a proposal must be independent legal entities which finance or manage publicly funded national or regional programmes related to the addressed domains or institutions mandated to represent the country or region in JPI urban Europe activities.

Proposals must take the form of coordination and support actions. Coordination and support actions require participation by at least one legal entity established in an EU member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each successful proposal is expected to receive approximately €1.25 million, although proposals for other amounts will also be considered. The total indicative budget for this call is €1.25m.

H2020-CS2-CPW03-2015-02 CLEAN SKY 2 CALL FOR CORE PARTNERS WAVE 3
Single European Sky ATM Joint Undertaking

Description:
The Single European Sky ATM Joint Undertaking, under Horizon 2020: Societal Challenges, invites applications for its H2020-CS2-CPW03-2015-02 clean sky 2 call for core partners wave 3. Funding supports partnerships addressing the following topics:

- JTI-CS2-2015-CPW03-AIR-01-04 next-generation movables for high-speed aircraft;
- JTI-CS2-2015-CPW03-AIR-02-09 design, manufacture and deliver technology demonstrator of high visibility, crashworthy, low-drag integrated cockpit section for next-generation civil tiltrotor;
- JTI-CS2-2015-CPW03-AIR-02-11 design, manufacture and deliver technology demonstrator of high visibility, crashworthy, low-drag integrated rear fuselage and tail sections for next-generation civil tiltrotor;
- JTI-CS2-2015-CPW03-ENG-01-08 human performance core module and its associated control laws and equipment for the ultra high propulsive efficiency demonstrator;
- JTI-CS2-2015-CPW03-ENG-03-03 very high bypass ratio engine – HP turbine technology;
- JTI-CS2-2015-CPW03-ENG-03-04 demonstration of computational fluid
dynamics capability in the simulation of air-oil flow in complex aero-engine bearing chambers – a systematic approach;

- JTI-CS2-2015-CPW03-ENG-03-05 development of large volume, mass-optimised integrated oil storage systems for large VHBR engines;
- JTI-CS2-2015-CPW03-FRC-01-01 design, development, testing and flight qualification of smart fly-by wire actuators for primary flight control of a civil tiltrotor;
- JTI-CS2-2015-CPW03-FRC-02-03 new generation landing gear for a compound fast rotorcraft;
- JTI-CS2-2015-CPW03-FRC-02-04 LifeRCraft main gear box;
- JTI-CS2-2015-CPW03-FRC-02-05 electrical wiring interconnection system for a compound fast rotorcraft;
- JTI-CS2-2015-CPW03-FRC-02-06 innovative actuators for compound rotorcraft;
- JTI-CS2-2015-CPW03-LPA-01-01 engine mounting system for the conter rotating open rotor flight test demo;
- JTI-CS2-2015-CPW03-LPA-01-09 aircraft configuration studies and demonstration – scaled flight testing and instrumentation;
- JTI-CS2-2015-CPW03-LPA-01-10 aircraft and hybrid propulsion system architecture, integration and verification;
- JTI-CS2-2015-CPW03-SYS-02-03 short total air temperature braking system – optimised tyre design for improved brake cooling;
- JTI-CS2-2015-CPW03-SYS-02-04 high efficient compact electromechanical brake for small aircraft and helicopters with advanced brake disc material;
- JTI-CS2-2015-CPW03-SYS-02-05 high efficient structural landing gear parts based on advanced carbon fibre material systems and highly automated production technologies for helicopter and aircraft;
- JTI-CS2-2015-CPW03-SYS-02-06 high voltage direct current power centre and functions;
- JTI-CS2-2015-CPW03-SYS-02-07 detection and characterisatino of icing conditions contributing to ice protection optimisation;
- JTI-CS2-2015-CPW03-SYS-02-08 electro-thermal wing ice protection system for large aircraft.

Proposals must take the form of innovation actions, which require participation by at least one legal entity established in an EU member state, overseas territory or associated country. Innovation actions may include producing plans or design for new, altered or improved products, prototyping, testing, demonstrating, piloting, large-scale product validation and market replication. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Funding will be provided at a rate of 70 per cent of eligible costs, except for non-profit legal entities, which will be funded at a rate of 100 per cent of eligible costs. The indicative budget for this call is €95.9 million and projects may run for between 3.3 and 7.5 years each.

Closing date: 04 Feb 16
Deadline information: Proposals due by 5pm Brussels time.
Posted date: 23 Oct 15

Award amount max: -
Award amount min: -
Award budget total: €95,900,000
Website:
OCCUPATIONAL SAFETY AND HEALTH RESEARCH (R01)
Centers for Disease Control and Prevention (CDC)

Description:
The Centers for Disease Control and Prevention National Institute for Occupational Safety and Health invites applications for the occupational safety and health research (R01) programme. The purpose of this R01 funding opportunity announcement is to develop an understanding of the risks and conditions associated with occupational diseases and injuries. Research will explore methods for reducing risks and for preventing or minimising exposure to hazardous conditions in the workplace and translate significant scientific findings into prevention practices and products that will effectively reduce work-related illnesses and injuries. This FOA will use the R01 grant mechanism. Applicants may request a budget for direct costs of up to US$400,000 per year for up to four years. Domestic and foreign for-profit and non-profit organisations and public or private institutions are eligible to apply. PAR-13-329 (replaces PAR-10-188).

Closing date: 05 Feb 16
Deadline information: Applications due by 5pm local time of applicant organisation on every 5 February, 5 June and 5 October until 8 May 2018.
Posted date: 04 Mar 13

Award type: Directed grants to institutions, research groups etc

CHLESINGER DISSERTATION GRANTS
Harvard University

Description:
Harvard University’s Radcliffe Institute for Advanced Studies invites applications for the Schlesinger dissertation grants. These are available for scholars whose research requires use of the Schlesinger library’s collections.

Applicants must have advanced to candidacy in a doctoral programme in a relevant field and have an approved dissertation topic. Priority will be given to those whose projects require use of materials available only at the Schlesinger Library. Non-US citizens are eligible but should contact the library regarding visas and other required paperwork prior to applying.

Funding of up to US$3,000 is available to cover travel expenses, up to US$125 per day for living expenses, photocopying and other incidental research expenses.

Closing date: 06 Feb 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

CHLESINGER RESEARCH SUPPORT GRANTS
Harvard University

Description:
Harvard University’s Radcliffe Institute for Advanced Studies invites applications for the Schlesinger research support grants. These are available for scholars whose research requires use of the Schlesinger Library’s collections on the history of women in America.

Applicants must have a doctoral degree or equivalent research and writing experience. Priority will be given to those whose projects require use of materials available only at the Schlesinger Library. Non-US citizens are eligible but should contact the library regarding visas and other required paperwork prior to applying.

Funding of up to US$10,000 is available to cover travel expenses, up to US$125 per day for living expenses, photocopying and other incidental research expenses.

CHLESINGER ORAL HISTORY GRANTS

Harvard University

Description:
Harvard University’s Radcliffe Institute for Advanced Studies invites applications for the Schlesinger oral history grants. These support scholars conducting oral history interviews relevant to the history of women or gender in the US. The interviews must take place in accordance with guidelines of the Oral History Association.

Non-US citizens are eligible but should contact the library regarding visas and other required paperwork prior to applying.

Grants are awarded in amounts up to US$3,000 and may be used to cover travel expenses, up to US$125 per day for living expenses, transcription services and incidental research materials.

MALL GRANTS
Fondation Ensemble

Description:
The Fondation Ensemble invites proposals for its small grants programme. Grants support conservation initiatives in the areas of endangered animal species. Projects must be concrete and improve the livelihoods of the target population, and must take into account the environmental dimension. Projects must also respond to the needs expressed by the local population. Projects with an entrepreneurial approach are favoured. NGOs from any country may apply. Proposals must be submitted in English or French. The foundation will provide up to 50 per cent of the total project cost. Grants range from €3,000 to €15,000 over up to two years.

RESEARCH GRANTS
North American Spine Society

Description:
The North American Spine Society invites applications for its research grants. These support qualified investigators with research projects in the field of spine.

New investigators are encouraged to apply, although any qualified applicant in any speciality is considered. International candidates may apply. Medical residents may be considered provided that they have a mentor or faculty support.

Grants are generally worth up to US$50,000 per year over a period of one to two years. Cost-sharing is encouraged.

Closing date: 08 Feb 16
Deadline information: Letters of proposal due by 12 midnight CST, 8 February; full applications are invited between 21 March and 12 midnight CST, 9 May 2016. This call is repeated once a year.

RESEARCH PROGRAMME GRANTS
Institut Mittag-Leffler

Description:
Institute Mittag-Leffler invites proposals for its research programme grants. These support programmes that enable scientists and postdoctoral students to collaborate in specialised areas of mathematics. Proposals that demonstrate scientific strength and timeliness, and the degree to which the programme would benefit mathematical research and postgraduate training in the Nordic countries, are welcome.

The programme must be led by an organising committee that usually consists of two to three well-established mathematicians. Each committee is expected to include at least one member from a Nordic country.

Programmes may run for a year or be of semester length, however the recommended minimum length of stay is one month.

Closing date: 08 Feb 16
YOUNG INVESTIGATOR GRANTS
North American Spine Society

Description:
The North American Spine Society invites applications for its young investigator grants. These support any spine-related projects conducted by young investigators.

MD applicants must be within five years of completion of training, while PhD applicants must be within five years of their postdoctorate training. There are no age limits for applicants. International candidates may apply. Medical residents may be considered provided that they have a mentor or faculty support.

Grants are generally worth up to US$50,000 per year over a period of one to two years. Cost-sharing is encouraged.

Closing date: 08 Feb 16
Deadline information: Letters of proposal due by 12 midnight CST, 8 February; full applications are invited between 21 March and 12 midnight CST, 9 May 2016. This call is repeated once a year.

NONTRADITIONAL, NONSURGICAL TREATMENT GRANTS
North American Spine Society

Description:
The North American Spine Society invites applications for its nontraditional, nonsurgical treatment grants. These support research of disc-related or neuropathic back pain by nonsurgical techniques. Funds must be used for new, nontraditional methods of nonsurgical treatment of such back and neck pain, and radiculopathy.

If TNF-inhibitors other than etanercept are used in research or treatment funded, comparison studies using perispinal etanercept in at least as many research subjects or patients should be done.

New investigators are encouraged to apply, although any qualified applicant in any speciality may be considered. International candidates may be considered provided that they have a mentor or faculty support.

Grants are generally worth up to US$50,000 per year over a period of one to two years. Cost-sharing is encouraged.

Closing date: 08 Feb 16

MULTIPLE SCLEROSIS INNOVATION GRANT
Merck Serono

Description:
Merck Serono invites applications for its multiple sclerosis innovation grant. This supports promising translational research projects to improve understanding of multiple sclerosis for the ultimate benefit of patients. Potential research topics are as follows:

- pathogenesis;
- response to treatment and prediction of MS subtypes;
- identification of predictive or surrogate markers to allow better clinical decisions using currently
available treatments as well as any potential new treatments;
• innovative patient support programmes;
• mobile health devices or patient-reported outcomes.

Any academic researcher who has preliminary data to support their proposal may apply.

The budget is worth up to €1 million.

Closing date: 08 Feb 16

DEADLINE BROUGHT FORWARD: SEED AWARDS IN SCIENCE
Wellcome Trust

Description:
The Wellcome Trust has brought forward the deadline for its seed awards in science. The previous deadline of 25 February 2016 has now been brought forward to 8 February 2016. All other call information remains unchanged.

These enable researchers to develop a novel idea to a position where it may compete for a larger award from the trust or another source. Funding supports pilot studies, scoping studies, preliminary data gathering, proof-of-principle studies, planning sessions and meetings of collaborative networks.

Applicants must have completed a PhD or equivalent higher degree. They must hold an appointment at an eligible institution in the UK, Republic of Ireland or a low or middle-income country, and must not be based at a core-funded research institute. Applicants must receive a personal salary from their host institution, and not hold a personal award or substantive other funding from any major funder. Applicants from low- or middle-income countries should be carrying out research in the fields of public health and tropical medicine that is of relevance to local, national or global health. This may include laboratory-based molecular analysis of field or clinical samples.

Awards are worth up to £100,000 each over a maximum period of two years. Funding covers direct costs of research, including materials and consumables, equipment,
animals, research assistance, fieldwork and data collection, and travel.

Closing date: 08 Feb 16
Posted date: 02 Nov 15
Award type: Travel to conferences, meetings etc., Travel for research purposes, Directed grants for individual investigators, Directed grants to institutions, research groups etc., Equipment and materials, Innovation grants, Networking/collaboration

JOHN WYMER BURSARY
Lithic Studies Society

Description:
The Lithic Studies Society invites applications for the John Wymer bursary. This funds lithic-related study and may support work that is archaeological, geological or anthropological in nature. The bursary may be used towards excavation expenses, fieldwork, study of collections and participation in a conference or travel.

Applications for the bursary are invited from students, academics, others professionally engaged in lithic study, and those simply pursuing an interest in lithics as a hobby. The bursary is worth £250.

Closing date: 09 Feb 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

EXTENDED DEADLINE: ASTRON/JIVE SUMMER STUDENT PROGRAMME

Netherlands Institute for Radio Astronomy (ASTRON)

Description:
The Netherlands Institute for Radio Astronomy has extended the deadline for its ASTRON/JIVE summer student programme. The deadline has been extended from 2 February to 9 February 2015. All other call information remains unchanged.

This programme gives astronomy students the opportunity to conduct astronomical research under the supervision of ASTRON and JIVE staff members at the Dwingeloo Observatory. Possible topics of study include radio galaxies and quasars, aspects of observational cosmology, continuum and line emission or absorption from normal and starburst galaxies, faint radio sources, pulsars, molecular clouds, and cosmic magnetism.

Graduate as well as advanced undergraduate students may apply. Grants will provide accommodation, a monthly stipend for up to three months and full travel reimbursement.

Closing date: 09 Feb 16 (Forecast)

CAPACITY BUILDING IN THE FIELD OF HIGHER EDUCATION
Education, Audiovisual and Culture Executive Agency

Description:
The Education, Audiovisual and Culture Executive Agency’s Erasmus+ programme invites applications for its capacity building in the field of higher education action. This aims to support the modernisation, accessibility and internationalisation of higher education in partner countries.

Capacity-building projects can be:

- joint projects, aimed at producing outcomes that benefit principally and directly the organisations from eligible partner countries involved in the project;
- structural projects, aimed at producing an impact on higher education systems and promoting reforms at national or regional level in the eligible partner countries.

Projects can be granted a special mobility strand including student mobility, staff mobility, teaching or training period activities. Projects may last between two and three years. An extension of 12 months may be granted in exceptional circumstances.

Any public or private organisation active in the fields of education, training and youth may apply. One eligible partner country and at least three programme countries must be involved in national projects addressing one partner country. At least two eligible partner countries and at least three programme countries must be involved in multi-country projects addressing two or more partner countries.

Funding is worth between €500,000 and €1 million per project. The special mobility strand represents up to 80 per cent of the project funding.

Ref: OJ 2015/C 347/06, EAC/A04/2015.

Closing date: 10 Feb 16
Deadline information: Applications due by 12 noon Brussels time.
Posted date: 22 Oct 15
Award type: Institutional development, Travel to conferences, meetings etc., Directed grants to institutions, research groups etc, Publish, edit, translate, disseminate, Equipment and materials
Award amount max: €1,000,000
Award amount min: €500,000
Award budget total: -

2020-SESAR-2015-2 INDUSTRIAL RESEARCH AND VALIDATION ACTIVITIES
VERY LARGE SCALE DEMONSTRATION WAVE 1
Single European Sky ATM Joint Undertaking

Description:
The Single European Sky ATM Joint Undertaking, under Horizon 2020: Societal Challenges, invites applications for its H2020-SESAR-2015-2 call for industrial research and validation activities very large scale demonstration wave 1. Funding supports research on the following topics:

- SESAR.IR-VLD.Wave1-01-2015 content integration;
- SESAR.IR-VLD.Wave1-02-2015 master plan maintenance;
- SESAR.IR-VLD.Wave1-03-2015 validation and demonstration engineering;
- SESAR.IR-VLD.Wave1-04-2015 increased runway and airport throughput;
- SESAR.IR-VLD.Wave1-05-2015 integrated surface management;
• SESAR.IR-VLD.Wave1-06-2015 airport safety nets;
• SESAR.IR-VLD.Wave1-07-2015 total airport management;
• SESAR.IR-VLD.Wave1-08-2015 remote tower for multiple airports;
• SESAR.IR-VLD.Wave1-09-2015 optimised airspace users operations;
• SESAR.IR-VLD.Wave1-10-2015 advanced airspace management;
• SESAR.IR-VLD.Wave1-11-2015 advanced double cantilever beam;
• SESAR.IR-VLD.Wave1-12-2015 enhanced arrivals and departures;
• SESAR.IR-VLD.Wave1-13-2015 trajectory-based free routing;
• SESAR.IR-VLD.Wave1-14-2015 separation management en route and in terminal manoeuvring areas;
• SESAR.IR-VLD.Wave1-15-2015 enhanced air and ground safety nets;
• SESAR.IR-VLD.Wave1-16-2015 air vehicle systems;
• SESAR.IR-VLD.Wave1-17-2015 communication, navigation and surveillance;
• SESAR.IR-VLD.Wave1-18-2015 common services;
• SESAR.IR-VLD.Wave1-19-2015 controller working position – human machine interface;
• SESAR.IR-VLD.Wave1-20-2015 system-wide information management infrastructures;
• SESAR.IR-VLD.Wave1-21-2015 trajectory management;
• SESAR.IR-VLD.Wave1-22-2015 integrated airport operations, including time-based separation;
• SESAR.IR-VLD.Wave1-23-2015 network collaborative management;
• SESAR.IR-VLD.Wave1-24-2015 flexible airspace management and free route;
• SESAR.IR-VLD.Wave1-25-2015 arrival management extended to en-route airspace;

• SESAR.IR-VLD.Wave1-26-2015 enhanced terminal airspace using required navigation performance-based operations;
• SESAR.IR-VLD.Wave1-27-2015 initial trajectory information sharing;
• SESAR.IR-VLD.Wave1-28-2015 flight information exchange.

Proposals are restricted to SESAR candidate members, but VLD activities allow the possibility of contributions from beyond this group.

Proposals may take the form of coordination and support, research and innovation, or innovation actions. Coordination and support, research and innovation and innovation actions require participation by at least one legal entity established in a member state or associated country.

The total budget for this call is €42 million.

Ref: SESAR2020 IR-VLD WAVE1.

Closing date: 11 Feb 16
Deadline information: Proposals due by 5pm Brussels time.

WORLDWIDE SMALL GRANTS
People’s Trust for Endangered Species

Description:
The People’s Trust for Endangered Species invites applications for its worldwide small grants. These support short-term conservation and research projects aimed at the preservation of endangered species. Grants are expected to enable innovative work and discreet projects.

Scientific researchers and workers in the field of conservation working in either the UK, UK overseas territories or any country not classified by the World Bank as high-income may apply. Grants are awarded for projects of up to two years duration and are worth between £2,000 and £8,000, although most grants will not exceed £5,000.

Closing date: 12 Feb 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.
Posted date: 04 Apr 14
Award type: Directed grants for individual investigators
Award amount max: £8,000
Award amount min: £2,000

WORLDWIDE CONTINUATION GRANTS
People’s Trust for Endangered Species

Description:
The People’s Trust for Endangered Species invites applications for its world wide continuation grants. These support research that is aimed at the preservation of endangered species around the world. Applications are welcomed from scientific researchers and workers in the field of conservation. Applicants should already be working and established in either the UK, UK overseas territories or any country not classified by the World Bank as high-income. For applications for work outside the UK, preference will be given to those from, or projects carried out in, regions or countries that have fewer avenues of funding open to them.

Grants are worth between £3,000 and £10,000 per year for a maximum duration of two years.

Closing date: 12 Feb 16
Deadline information: Applications due by 5pm. This call is repeated once a year.
Posted date: 23 Sep 15

CONSERVATION INSIGHT GRANTS
People’s Trust for Endangered Species

Description:
People’s Trust for Endangered Species invites applications for its conservation insight grants. These support projects focusing on endangered species. Funds are awarded for work that seeks to achieve one of the following objectives:

- find the critical scientific evidence that will facilitate the conservation of a species;
- provide the answer to a key conservation question, which will
enable conservationists to undertake critical conservation action;

- undertake the implementation of a key local action which will result in a significantly positive impact for an endangered species;
- gather evidence needed to undertake necessary mitigation work;
- use scientific evidence to get changes made to local, national or international policy;
- devise and test a new methodology for monitoring a species or group of species.

Priority is given to applications for conservation and research work on species classified as endangered, critically endangered and extinct in the wild by the International Union for Conservation of Nature. The trust is no longer accepting applications on bird species.

Applications are welcomed from scientific researchers and those working in the field of practical conservation, and the project leader should be based either within a non-governmental organisation or a university research department. Applications are only accepted from candidates who are already working and established in either the UK, UK overseas territories or any country not classified by the World Bank as high-income. Priority is given to native project leaders working in their own countries, and to applicants who have a proven, successful history working on the species or in that region.

Grants are worth between £3,000 and £10,000 per year for up to two years.

GRAND CHALLENGE AWARDS
Cancer Research UK

Description:
Cancer Research UK invites expressions of interest for its grand challenge awards. These support a multinational, interdisciplinary effort to tackle significant problems in cancer research. Projects may address the following grand challenges:

- develop vaccines to prevent non-viral cancers;
- eradicate Epstein-Barr virus-induced cancers from the world;
- discover how unusual patterns of mutation are induced by different cancer-causing events;
- distinguish between lethal cancers that need treating, and non-lethal cancers that don’t;
- find a way of mapping tumours at the molecular and cellular level;
- develop innovative approaches to target the cancer super-controller MYC;
- deliver biologically active macromolecules to any and all cells in the body.

Applications are invited from teams working across a breadth of disciplines including biomedical sciences, software development and technology, engineering and physical sciences, behavioural, health, population and social sciences. Teams are expected to comprise a principal and up to seven co-investigators, and must include a patient advocate.

The principal and co-investigators must be based at an higher research degree awarding institution – such as a university – a research institution, or a company, of good standing, appropriately accredited or registered in the country in which it is based. Teams must have a strong UK component and at least 25 per cent of the grant should be spent in the UK. Commercial collaborations are encouraged.

Awards are worth up to £20 million each over a maximum period of five years, and may be used to cover research costs, salaries, equipment and licensing costs, and payment model and phasing costs.

CHESTER ZOO STUDENTSHIP GRANTS
Chester Zoo

Description:
Chester Zoo invites applications for its studentship grants. These support master’s projects that promote the conservation of biodiversity and provide a capacity building opportunity for student scientists. Projects must relate to in-situ conservation of biodiversity in the UK or overseas.

Worldwide master’s degree students are eligible to apply.

Grants are worth up to £1000.

Closing date: 13 Feb 16 (Forecast)

PROJECT SUPPORT PROGRAMME
Society for the Study of Addiction

Description:
The Society for the Study of Addiction invites applications for its project support programme. This aims to add to and promote the scientific understanding of addiction and related problems. The objective is to support projects in the following areas:

• dissemination of existing research findings;

• bringing together groups of experts or papers, or collating existing material for the purpose of disseminating;

• convening a group to review work in a particular area, or on a particular drug or phenomenon in a geographic location, in order to produce material for dissemination.

GRADUATE RESEARCH GRANTS
Organization for Autism Research

Description:
The Organization for Autism Research invites applications for its graduate research grants. These support graduate and postgraduate research studies in disciplines related to assessment, intervention and support of learners with autism spectrum disorder and their families. Research in the following areas is promoted:

- the analysis, evaluation or comparison of assessment models, treatment models or service systems;
- applied aspects of early intervention or school-based education, behavioural or communication intervention;
- adult issues such as continuing education, employment, housing models and later intervention;
- issues related to family support, social and community integration, and assessment and intervention with challenging behaviour.

The total budget is US$25,000. Up to 15 awards, worth US$2,000 each for doctoral or postdoctoral candidates and US$1,000 each for master’s candidates, are available.

Closing date: 14 Feb 16 (Forecast)
Deadline information: ! Call has not yet been announced by funder, but this is the approximate deadline we expect.
Applications due by 11.59pm EST. This call is repeated once a year.
EPMEYER RESEARCH GRANTS PROGRAMME
International Education Research Foundation

Description:
The International Education Research Foundation invites applications for the Sepmeyer research grants. The aim of this programme is to fund research on world education systems and the integration of individuals educated outside of the US into the US educational environment and work force. Projects which address the following criteria are encouraged to apply under this programme:

• supporting research for the evaluation of foreign academic credentials;
• promoting the integration of students, scholars, and professionals holding non-US academic credentials into the US;
• facilitating the publication and dissemination of the results of the research;
• encouraging the exchange of information about educational systems.

Grants are worth up to US$1,000.

Closing date: 15 Feb 16
Deadline information: Deadlines on: 15 February 2016, 15 August 2016, and repeated annually.
Posted date: 01 Feb 08

Research Grants

World Anti-Doping Agency – Agence Mondiale Antidopage

Description:
The World Anti-Doping Agency invites applications for its research grants. These support scientific projects on anti-doping that involve the development or optimisation of analytical tools for the detection and quantification of doping substances or methods, as well as the pharmacology of prohibited substances and drug cocktails. Projects should align with one of the following categories:

- detection of doping substances and methods – methodologies in analytical chemistry;
- detection of doping substances and methods – affinity-binding and biochemical methodologies;
- pharmacological studies on doping substances and methods;
- the Athlete’s Biological Passport, and in particular research addressing the discovery and validation of new discriminant markers, and the evaluation of confounding factors;
- detection of doping substances and methods – molecular biology, omics, and miscellaneous methodologies.

THEODORE ROOSEVELT MEMORIAL GRANT
American Museum of Natural History

Description:
The American Museum of Natural History invites applications for the Theodore Roosevelt memorial grant. This supports research on North American fauna in any phase of wildlife conservation or natural history, excluding ornithology and ichthyology. Research may be conducted at the AMNH or in the field.

The grant, generally worth between US$500 and US$3,500, is meant to act as seed money for a new researcher.

ACOBS RESEARCH FUND GRANTS

Description:
The Jacobs Research Fund invites applications for its grants. The program funds projects involving fieldwork with living peoples that result in publication or other dissemination of information about the fieldwork. Priority is given to research on endangered cultures and languages, and to research on the Pacific Northwest. Grants are given for work on problems in language, social organization, political organization, religion, mythology, music, other arts, psychology and folk science. The grants categories are:

- individual grants that are worth up to $3,000 and support research projects administered by a single investigator on a focused problem;
- group grants that are worth up to $6,000 and support work by two or more researchers who will be cooperating on the same or similar projects;
- Kinkade grants that are worth up to $9,000 and support projects requiring an intense period of fieldwork, such as research leading to a major work such as a dictionary or collection of texts. They are appropriate for experienced researchers, such as PhD students working on dissertations, faculty members with sabbatical or other periods of course release and emeritus professors seeking to complete major research.

Closing date: 15 Feb 16 (Forecast)
Deadline information: ! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

GRANTS-IN-AID
Bermuda Institute of Ocean Sciences

Description:
The Bermuda Institute of Ocean Sciences invites applications for its grants-in-aid. These aim to help defray the costs of BIOS in-house charges. The grants are intended as starter funds to help with costs, such as laboratory fees, boat rental or similar, on projects that will lead to continued research at BIOS. Grants will not cover salary, personal expenses, supplies or travel costs. Applicants should provide part of their funding from other sources.

Grants are worth between US$300 and US$3,000.

Closing date: 15 Feb 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

GRANTS
3R Research Foundation Switzerland

Description:
The 3R Research Foundation Switzerland invites applications for its grants. These support projects that aim to reduce the impact on animals used in animal experimentation, reduce the number of animals needed for a specific research topic, or that replace specific experiments using animals.

Researchers in Switzerland are eligible to apply. Applications from researchers working outside Switzerland are only accepted in exceptional circumstances, and they must
show that they have links with an institution or a researcher in Switzerland.

Grants are worth between CHF50,000 and CHF250,000 for projects lasting one to three years. The call budget for 2016 is worth CHF500,000.

**Closing date:** 15 Feb 16  
**Deadline information:** This call is repeated once a year.  
**Posted date:** 10 Jul 15  
**Award type:** Directed grants for individual investigators, Directed grants to institutions, research groups etc

### MAA DISSERTATION GRANTS  
**Medieval Academy of America**

**Description:**  
The Medieval Academy of America invites applications for its dissertation grants. These support PhD dissertations on medieval topics and may be used to cover the cost of travel to relevant collections as well as the cost of photographs, photocopies, microfilms and other materials.

Applications are open to all graduate students whose primary research focuses on an aspect of medieval studies, however if the thesis deals with late-medieval Britain, applicants should apply for a Schallek award. Applicants must have received approval from their dissertation committee for their projects by the application date. They should also be members of the Medieval Academy as of 15 January of the year in which they apply.

**Grants are worth US$2,000.**

**Closing date:** 15 Feb 16 (Forecast)  
**Deadline information:** !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

ASP DEVELOPING COUNTRIES PROJECT: INITIATIVE FOR IMPROVING PAIN EDUCATION AWARD

*International Association for the Study of Pain*

**Description:**
The International Association for the Study of Pain invites applications for the developing countries project: initiative for improving pain education award.

Grants improve the scope and availability of essential education for pain clinicians of all disciplines, taking into account specific local needs, and will support one-year educational projects designed to meet needs within a developing country.

Each project should be an educational course, written educational material for general distribution, or a distance-learning course. It is desirable that the project is multidisciplinary. The principal organiser must be based in a developing country and must have been a member of IASP for at least one year. Applicants should be non-profit institutions, associations or organisations. Projects should begin within three months of the date of submitting the application.

IASP will award 10 grants, each worth up to US$10,000.

Closing date: 15 Feb 16 (Forecast)

Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

Posted date: 31 Oct 13

Award type: Directed grants to institutions, research groups etc, Development (Africa/Caribbean)

Award amount max: $10,000

Award amount min: -

Award budget total: $100,000

Eligibility profile

Country of applicant institution: Afghanistan, Albania, Armenia, Angola, Argentina, American Samoa, Azerbaijan, Bosnia and Herzegovina, Bangladesh, Burkina Faso, Bulgaria, Burundi, Benin, Bolivia, Brazil, Bhutan, Botswana, Belarus, Belize, Congo, the Democratic Republic of the, Central African Republic, Congo, China, Colombia, Costa Rica, Serbia, Cuba, Cape Verde, Djibouti, Dominica, Dominican Republic, Algeria, Ecuador, Egypt, Eritrea, Ethiopia, Fiji, Gabon, Grenada, Georgia, Ghana, Gambia, Guinea, Guatemala, Guinea-Bissau, Guyana, Honduras, Haiti, Hungary, Indonesia, India, Iraq, Iran, Islamic Republic of, Jamaica, Jordan, Kenya, Kyrgyzstan, Cambodia, Kiribati, Comoros, Korea, Democratic People's Republic of, Kazakhstan, Lao People's Democratic Republic, Lebanon, Saint Lucia, Liberia, Lesotho, Libya, Madagascar, Marshall Islands, Macedonia, the former Yugoslav Republic of, Mali, Myanmar, Mauritius, Maldives, Malawi, Mexico, Malaysia, Mozambique, Namibia, Niger, Nepal, Panama, Peru, Palau, Romania, Rwanda, Seychelles, Sierra Leone, Somalia, Suriname, El Salvador, Chad, Togo, Thailand, Turkmenistan, Tunisia, Tonga, Turkey, Tuvalu, Tanzania, United Republic of, Uganda, Saint Vincent and the Grenadines, Venezuela, South Africa, Zimbabwe, Lower-Middle-Income countries, Kosovo, South Sudan, Montenegro

Disciplines

Education; Chronic Pain; Primary Care; International Health; Health & Safety; Education & Instruction; Allied Health Professions; Clinical Medicine; Medical Education; Traumatology, Accidents & Injury; Pain Management; Public Health, Health Services & Primary Care

COMING SOON: JOINT TRANSNATIONAL CALL FOR PROPOSALS

ERA-Net EuroNanoMed 2

Description:

ERA-Net EuroNanoMed II will shortly be inviting proposals for its joint transnational call. The opening of the call is scheduled for the end of November 2015 with an expected closing date of mid-February 2016. The following details are subject to change.

This aims to support translational research projects that combine innovative approaches in the field of nanomedicine and to encourage and enable transnational collaboration between public and private research groups. Proposals may address multidisciplinary and translational research and must cover at least one of the following areas:

- regenerative medicine;
- diagnostics;
- targeted delivery systems.

Each proposal must involve a minimum of three research groups from three different countries including at least two eligible research groups from the programme’s participating countries. Not more than two eligible research groups from the same country participating in the call will be
accepted. The maximum number of participants in a project consortium is seven. Each application should include partners from at least two of three of the following categories: academia, clinical or public health, private sector. Proposals must comply with national funding regulation. Active participation of medical doctors and SMEs is strongly encouraged.

Closing date: 15 Feb 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect.

**CTP-IAEA SANDWICH TRAINING EDUCATIONAL PROGRAMME**

*Abdus Salam International Centre for Theoretical Physics*

**Description:**
The Abdus Salam International Centre for Theoretical Physics, in partnership with the International Atomic Energy Agency, invites applications for its sandwich training educational programme. This programme offers fellowship opportunities to PhD students from developing IAEA countries in the fields of physics and mathematics. The programme supports research in the following fields:

- atomic and nuclear physics;
- nuclear, isotope and laser techniques applied to human health, agriculture, biotechnology and biophotonics, water resources and environmental studies;
- synchrotron radiation and applications;
- medical radiation physics;
- condensed matter and statistical physics;
- high energy physics;
- mathematics;
- earth system physics;
- applied physics, including micro- and nanoelectronics, fluid dynamics and dense plasma source physics.

Students from developing countries who are enrolled in a PhD programme at their home university may apply. Women scientists are particularly encouraged to apply.
Fellows will spend at least three months at the host institute during the first year. Fellowships are renewable for up to two additional successive years. Fellowships include a monthly stipend of €1,400 during each stay at the host institute, as well as travel expenses and medical insurance.

Closing date: 15 Feb 16
Deadline information: Deadlines on: 15 February 2016, 15 August 2016, and repeated annually.

RESEARCH STARTER GRANTS
American Society of Pharmacognosy

Description:
The American Society of Pharmacognosy invites applications for its research starter grants. These are small research grants for active members to undertake research in the field of pharmacognosy.

Applicants must be active members of the society in the first eight years after earning their PhD and in the first five years of their first independent career position. Applicants must include a letter from a departmental chair or institutional representative confirming institutional support.

Grants are worth US$2,000 to US$5,000.

Closing date: 15 Feb 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

VAN TIENHOVEN GRANT
Van Tienhoven Foundation for International Nature Protection

Description:
The Van Tienhoven Foundation for International Nature Protection invites applications for the Van Tienhoven grant. This aims to promote the protection and conservation of ecosystems and their flora and fauna, wherever they are threatened outside the Netherlands. Only projects outside the Netherlands will be considered for funding, unless they apply to migrating animals.

Only one application per person or organisation will be taken into consideration during each meeting. Applications by the same person or organisation are restricted to a maximum of three in total. Projects which are
part of a study leading to any academic title will not be considered.

Projects may be granted up to €20,000 each.

Closing date: 15 Feb 16
Deadline information: Deadlines on: 15 February 2016, 15 August 2016, and repeated annually.

PARTNERSHIP GRANTS
Social Sciences and Humanities Research Council of Canada – Conseil de Recherches en Sciences Humaines

Description:
The Social Sciences and Humanities Research Council of Canada invites letters of intent for its partnership grants.

These grants enable new or existing partnerships to advance research, research training or knowledge mobilisation in the social sciences and humanities through mutual cooperation and sharing of intellectual leadership. Projects should respond to the objectives of the council’s insight, connection or talent programmes, or a combination thereof. However, proposals exclusively for partnered research training initiatives are to respond exclusively to the objectives of the talent programme.

Applications must be submitted by project directors on behalf of their partners. The director must be affiliated with a Canadian postsecondary institution or non-profit organisation. At least one partner must be a Canadian postsecondary institution. Students may be project directors on a partnership grant, if they have met their course requirements before the grants is awarded, establish a formal affiliation with an eligible institution within five months of the grant being awarded and maintain that affiliation for the duration of the grant period.

Co-applicants may be individuals from Canadian postsecondary institutions, non-profit organisations, philanthropic foundations, think tanks and municipal, territorial or provincial governments, or international postsecondary institutions. Individuals from the private sector or federal government may only participate as collaborators.

Applicants successful at the letters of intent stage receive up to CA$20,000 to help in the preparation of an invited formal application. Successful formal applications receive up to CA$500,000 per year for four to seven years, up to a total of CA$2.5 million.

Closing date: 15 Feb 16
Deadline information: Applications due by 8pm ET. This call is repeated once a year.

2020-LCE-2016 COMPETITIVE LOW-CARBON ENERGY CALL – TOPICS 7, 8, 23, 24, 25, 31 AND 36

Horizon 2020: Societal Challenges

Description:
The European Commission Horizon 2020: Societal Challenges, under the secure, clean and efficient energy work programme, invites proposals for its H2020-LCE-2016 competitive low-carbon energy call. Proposals may address the following topics:

- developing the next generation of renewable energy technologies, including LCE-7-2016 developing the next generation technologies of renewable electricity and heating or cooling, and LCE-8-2016 development of next generation biofuel technologies;
- fostering international cooperation in the area of renewable energy, including LCE-23-2016 international cooperation with Mexico on geothermal energy;
- enabling the decarbonisation of the use of fossil fuels during the transition to a low-carbon economy, including LCE-24-2016 international cooperation with South Korea on new generation high-efficiency capture processes, and LCE-25-2016 utilisation of captured CO2 as feedstock for the process industry;
- social, economic and human aspects of the energy system, including LCE-31-2016 social sciences and humanities support for the energy union;
- cross-cutting issues, including LCE-36-2016 support to the energy stakeholders to contribute to the SET-plan.

Proposals must take the form of research and innovation actions or coordination and support actions, depending on the topic. Research and innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country. Coordination and support actions require participation by at least one legal entity established in a member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia. Each successful proposal is expected to receive between €600,000 and €10 million although proposals for other amounts will also be considered. The total indicative budget for this call is €120.7m.

Ref: OJ C6776.

Closing date: 16 Feb 16
Deadline information: Proposals are invited between 27 October 2015 and 5pm Brussels time, 16 February 2016.

H2020-SC1-PM-HCO-2016 PERSONALISED MEDICINE AND HEALTH COORDINATION – TOPICS HCO10 TO HCO16, PM12, PM13 and PM18
Horizon 2020: Societal Challenges

Description:
The European Commission Horizon 2020: Societal Challenges invites proposals, under the health, demographic change and wellbeing work programme, for its H2020-SC1-PM-HCO-2016 personalised medicine and health coordination activities call. Proposals may address the following topics:

- coordination activities, including SC1-HCO-10-2016 support for Europe’s leading health ICT SMEs, SC1-HCO-11-2016 coordinated action to support the recognition of silver economy opportunities arising from demographic change, SC1-HCO-12-2016 digital health literacy, SC1-HCO-13-2016 healthcare workforce IT skills, SC1-HCO-14-2016 EU-US interoperability roadmap, SC1-HCO-15-2016 EU-eHealth interoperability conformity assessment and SC1-HCO-16-2016 standardisation needs in the field of ICT for active and healthy ageing;
- active ageing and self-management of health, including SC1-PM-12-2016 pre-commercial procurement eHealth innovation in empowering the hospitalised patient and SC1-PM-13-2016 public procurement of innovative solutions for deployment and scaling up of ICT solutions for active and healthy ageing;
- methods and data, including SC1-PM-18-2016 big data supporting public health policies.

Proposals must take the form of PCP or PPI co-fund actions, research and innovation actions or coordination and support actions. Programme co-fund actions and research and innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country and independent from each other. Furthermore, programme co-fund actions require at least two independent legal entities which are public procurers from two different member states or associated countries. Coordination and support actions require participation by at least one legal entity established in a member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia. Any US
legal entity may apply for funding for specific topics only.

Each proposal may receive between €500,000 and €5 million, although proposals for other amounts will also be considered. The indicative budget is €48m.

Proposals must take the form of research and innovation actions, which require participation by at least three legal entities, each established in a different EU member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each proposal is expected to receive between €2 million and €6m, depending on the topic, although proposals for other amounts are also considered.

Ref: OJ C6776.

Closing date: 16 Feb 16
Deadline information: Proposals due by 5pm Brussels time.

**HOLLIS BROWNSTEIN NEW INVESTIGATOR RESEARCH GRANTS**

**Leukemia Research Foundation**

**Description:**
The Leukemia Research Foundation invites applications for the Hollis Brownstein new investigator research grants. These aim to fuel creative ideas and help launch the careers of scientists who may further the understanding of leukaemia and lymphoma for years to come. The goal is to allow innovative scientists to act on their ideas and try new procedures and experiments that will
hopefully lead to significant breakthroughs. Preference will be given to proposals focusing on leukaemia, lymphoma, myelodysplastic syndrome and multiple myeloma.

Applicants must be new investigators from independent laboratories within seven years of their first independent position. There are no nationality requirements and projects may be undertaken outside the US.

Funding of up to US$100,000 for one year is available.

Closing date: 17 Feb 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect.
Applications are due by 11.59pm CST. This call is repeated once a year.
Posted date: 02 Dec 14
Award type: Directed grants for individual investigators, Innovation grants
Award amount max: $100,000

The scheme is open to a range of people, including artists, scientists, curators, film-makers, writers, producers, directors, academics, science communicators, teachers, arts workers and education officers. Projects must involve the creation of new artistic work which aims to engage a UK or Republic of Ireland audience, and have biomedical scientific input either through a scientist taking on an advisory role or through direct collaboration. This expert may have a background in ethics, science or history, but they must be an expert in the area of biomedical science. Applicants must be based in the UK or RoI and the activity must take place in the UK or RoI, although other

ARTS AWARDS – LARGE PROJECTS
Wellcome Trust

Description:
The Wellcome Trust invites applications for its art awards for large projects. These support the creation of new artistic work that critically engages artists and audiences with biomedical science.

Awards are made primarily to applicants with a track record with the Wellcome Trust or Wellcome Collection; however, special cases can be made for teams that can provide evidence of an excellent track record and a particular project idea where the initial research and development of the project has already taken place.
members of the project team can be based overseas. Eligible candidates can only apply through an organisation.

Awards range between £40,000 and £150,000 for a maximum period of three years to cover research and development, production, and in some cases, touring costs.

**Closing date:** 17 Feb 16  
**Deadline information:** Applications due by 5pm. This call is repeated once a year.

**NITA BORG MEMORIAL SCHOLARSHIP – EUROPE, THE MIDDLE EAST AND AFRICA**  
**Google**

**Description:**  
Google invites applications for the Anita Borg scholarship for students in Europe, the Middle East and Africa. These encourage women to excel in computing and technology and become active role models and leaders in the field.

Applicants must be females currently enrolled as a full-time students in a master’s or PhD programme at a university in Europe, the Middle East or Africa for the 2014-15 academic year. They should be at least 18 years of age, studying computer science, computer engineering, informatics or a closely related field, and maintain a strong academic record.

The scholarship provides 40 applicants with €7,000 for tuition, fees, books, supplies or equipment.

**Closing date:** 17 Feb 16 (Forecast)  
**Deadline information:** Call has not yet been announced by funder, but this is the approximate deadline we expect. Applications due by 5pm GMT. This call is repeated once a year.

H

2020-SFS-2016 SUSTAINABLE FOOD SECURITY – RESILIENT AND RESOURCE-EFFICIENT VALUE CHAINS, TOPICS 9, 12, 19, 24, 25, AND 41
Horizon 2020: Societal Challenges

Description:
The European Commission Horizon 2020: Societal Challenges, under its food security, sustainable agriculture and forestry, marine and maritime and inland water research and the bioeconomy programme, invites proposals for its H2020-SFS-2016 call on sustainable food security – resilient and resource-efficient value chains call. Proposals may address the following topics:

- more resilient and resource-efficient value chains, including SFS-09-2016 spotlight on critical outbreak of pests: the case of Xylella fastidiosa, SFS-12-2016 support for international research on animal health, SFS-19-2016 ERANET COFUND: public partnerships in the bioeconomy, SFS-24-2016 reinforcing international cooperation on sustainable aquaculture production with countries from South-East Asia and SFS-25-2016 support action to a common agricultural and wider bioeconomy research agenda;
- support to the implementation of the EU-Africa partnership on food and nutrition security and sustainable agriculture, including SFS-41-2016 EU-Africa research and innovation partnership on food and nutrition security and sustainable agriculture.

Proposals must take the form of coordination and support actions, research and innovation actions or ERA-NET co-fund actions, depending on the topic. Research and innovation actions and ERA-NET co-fund actions require participation by at least three legal entities, each established in a different EU member state or associated country. Coordination and support actions require participation by at least one legal entity established in a member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.
Each successful proposal is expected to receive between €1 million and €10m although proposals for other amounts will also be considered. The total indicative budget for this call is €49m.

Ref: OJ C6776.

Closing date: 17 Feb 16
Deadline information: Proposals accepted between 27 October 2015 and 5pm Brussels time, 17 February 2016.
Posted date: 15 Oct 15
Award type: Directed grants to institutions, research groups etc, Innovation grants, Networking/collaboration
Award amount max: -
Award amount min: -
Award budget total: €49,000,000

Eligibility profile

Country of applicant institution: EU (European Union), EU Associated Countries, EU All International Cooperation Partner countries (ICPC), Overseas Countries and Territories
Country of applicant institution: Any

Disciplines

Animal Parasites & Pathogens; Agricultural Weeds, Pests & Diseases; Aquaculture; Agricultural Economics; Food Security; Sustainable Agriculture

2020-BG-2016 CALL FOR BLUE GROWTH – DEMONSTRATING AN OCEAN OF OPPORTUNITIES, SINGLE STAGE - TOPIC 1 TO 3, 5, 9, 10 AND 13

Horizon 2020: Societal Challenges

Description:
The European Commission Horizon 2020: Societal Challenges invites proposals, under the food security, sustainable agriculture and forestry, marine and maritime and inland water research and the bioeconomy work programme, for its H2020-BG-2016 call for blue growth – demonstrating an ocean of opportunities. Proposals may address the following topics:

• boosting innovation for emerging blue growth activities, including BG-01-2016 large-scale algae biomass integrated biorefineries, BG-02-2016 high value-added specialised vessel concepts enabling more efficient servicing of emerging coastal and offshore activities, BG-03-2016 multi-use of the oceans marine space, offshore and near-shore - compatibility, regulations, environmental and legal issues, and BG-05-2016 ERA-NET Co-fund on marine technologies;
• the Arctic dimension, including BG-09-2016 an integrated Arctic observing system; BG-10-2016 impact of Arctic changes on the weather and climate of the Northern hemisphere;
• valorising the Mediterranean Sea Basin, including BG-13-2016 support to the BLUEMED initiative – coordination of marine and maritime research and innovation activities in the Mediterranean.

Proposals must take the form of research and innovation actions, innovation actions, coordination and support actions or ERA-
NET Co-fund actions, depending on the topic. Research and innovation, ERA-NET Co-fund and innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country.

Coordination and support actions require at least one legal entity established in a member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each proposal is expected to receive up to €15 million, although proposals for other amounts are also considered. The indicative budget for this call is €74m.

Ref: OJ C6776.

Closing date: 17 Feb 16
Deadline information: Proposals are invited between 27 October 2015 and 5pm Brussels time, 17 February 2016.
Posted date: 16 Oct 15
Award type: Directed grants to institutions, research groups etc, Innovation grants, Networking/collaboration
Award amount max: -
Award amount min: -
Award budget total: €74,000,000

Eligibility profile
Country of applicant institution: EU (European Union), EU Associated Countries, EU All International Cooperation Partner countries (ICPC), Overseas Countries and Territories
Country of applicant institution: Any

Disciplines
Climate & Atmospheric Models; Marine Engineering; Climate Change & Global Warming; Ecological Impacts of Climate Change; Climate Engineering; Oceanography; Surveying & Mapping; Cold, Arctic & Antarctic Regions

Horizon 2020: Societal Challenges

Description:
The European Commission Horizon 2020: Societal Challenges, under the food security, sustainable agriculture and forestry, marine and maritime and inland water research and the bioeconomy work programme, invites proposals for the H2020-RUR-2016 call for rural renaissance – fostering innovation and business opportunities. Proposals may address the following topics:

- new value chains and business models, including RUR-08-2016 demonstration of integrated logistics centres for food and non-food applications;
- innovation and skill development, including RUR-10-2016 thematic networks compiling knowledge ready for practice and RUR-11-2016 on-farm demonstrations – deepening farmer-to-farmer learning mechanisms.

2020-RUR-2016 CALL FOR RURAL RENAISSANCE: FOSTERING INNOVATION AND BUSINESS OPPORTUNITIES - TOPICS 8, 10 AND 11
Proposals must take the form of innovation actions or coordination and support actions, depending on the topic. Innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country. To maximise the impact of this innovation action, at least two demonstrations of logistics centres in different member states or associated countries should be performed.

Coordination and support actions require at least one legal entity established in a member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each proposal is expected to receive up to €6 million, although proposals for other amounts will also be considered. The total indicative budget for this call is €24m.

H 2020-BB-2016 BIO-BASED INNOVATION FOR SUSTAINABLE GOODS AND SERVICES – SUPPORTING THE DEVELOPMENT OF A EUROPEAN BIOECONOMY, SINGLE STAGE – TOPICS 4 AND 6

Horizon 2020: Societal Challenges

Description:
The European Commission Horizon 2020: Societal Challenges invites proposals, under the food security, sustainable agriculture and forestry, marine and maritime and inland water research and the bioeconomy work programme, for its H2020-BB-2016 bio-based innovation for sustainable goods and services – supporting the development of a European bioeconomy. Proposals may address the following topics:

- securing sustainable biomass supply for bio-based goods and services, including BB-04-2016 intelligent solutions and tools in forest production systems, fostering sustainable supply of quality wood for growing bioeconomy;
- building the bio-based markets of the future – mobilising stakeholders engagement, including BB-06-2016 the regional dimension of bio-based industries.
Proposals must take the form of innovation actions or coordination and support actions, depending on the topic. Innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country.

Coordination and support actions require at least one legal entity established in a member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each proposal is expected to receive up to €2 million, although proposals for other amounts are also considered. The indicative budget for this call is €7 million.

Ref: OJ C6776.

Closing date: 17 Feb 16
Deadline information: Proposals are invited between 27 October 2015 and 5pm Brussels time, 17 February 2016.

Horizon 2020: Societal Challenges

Description:
The European Commission Horizon 2020: Societal Challenges, under its food security, sustainable agriculture and forestry, marine and maritime and inland water research and the bioeconomy programme, invites proposals for its H2020-SFS-2016 sustainable food security – resilient and resource-efficient value chains call. Proposals may address the following topics:

- more resilient and resource efficient value chains, including SFS-01-2016 solutions to multiple and combined stresses in crop production, SFS-02-2016 teaming up for good – exploiting the benefits of species diversity in cropping systems, SFS-03-2016 testing and breeding for sustainability and resilience in crops, SFS-06-2016 weeding – strategies, tools and technologies for sustainable weed management, SFS-07-2016 organic breeding – increasing the competitiveness of the organic breeding and farming sectors, SFS-11-2016 challenges for disease management – perennial crops in the tropics and sub-tropics, SFS-14-2016 understanding host-pathogen-environment interactions, SFS-15-2016...
breeding livestock for resilience and efficiency, SFS-21-2016 advancing basic biological knowledge and improving management tools for commercially important fish and other seafood species, and SFS-23-2016 improving technical performance of the Mediterranean aquaculture;

- environment-smart and climate-smart primary production, including SFS-26-2016 legumes - transition paths to sustainable legume-based farming systems and agri-feed and food chains, and SFS-31-2016 farming for tomorrow - developing an enabling environment for resilient and sustainable agricultural system;

- a competitive food industry, including SFS-33-2016 understanding food value chain and network dynamics;

- healthy and safe foods and diets for all, including SFS-37-2016 the impact of consumer practices in food safety - risks and mitigation strategies, and SFS-38-2016 impulsivity and compulsivity and the link to nutrition, lifestyle and the socio-economic environment;

- support to the implementation of the EU-Africa partnership on food and nutrition security and sustainable agriculture, including SFS-42-2016 promoting food and nutrition security and sustainable agriculture in Africa - the role of innovation;

- implementation of the EU-China FAB flagship initiative, including SFS-44-2016 a joint plant breeding programme to decrease dependency of the EU and China on protein imports, and SFS-45-2016 increase overall transparency of processed agri-food products.

Proposals must take the form of research and innovation actions. Research and innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each successful proposal is expected to receive up to €12 million, although proposals for other amounts will also be considered. The total indicative budget for this call is €141.5m.

Ref: OJ C6776

Closing date: 17 Feb 16
Deadline information: Call opens on 27 October 2015. First stage applications due 5pm Brussels time, 17 February; second stage applications due 13 September 2016.
Posted date: 15 Oct 15

**H2020-RUR-2016 CALL FOR RURAL RENAISSANCE: FOSTERING INNOVATION AND BUSINESS OPPORTUNITIES – TOPICS 1, 4, 6, 7 AND 14, TWO STAGES**

*Horizon 2020: Societal Challenges*

Description:
The European Commission Horizon 2020: Societal Challenges, under the food security, sustainable agriculture and forestry, marine and maritime and inland water research and the bioeconomy work programme, invites proposals for its H2020-RUR-2016 call for rural renaissance: fostering innovation and business opportunities. Proposals may address the following topics:

- new approaches towards policies and governance, including RUR-01-2016 consolidated policy framework and governance models for synergies in rural-urban linkages, and RUR-04-2016 water farms – improving farming and its impact on the supply of drinking water;
- new value chains and business models, including RUR-06-2016 crop diversification systems for the delivery of food, feed, industrial products and ecosystems services – from farm benefits to value-chain organisation, and RUR-07-2016 resource-efficient and profitable industrial crops on marginal land;
• innovation and skill development, including RUR-14-2016 advisor’s role in the functioning of AKIS and advisory policies boosting innovation in sustainable agriculture.

Proposals must take the form of research and innovation actions. These require participation by at least three legal entities, each established in a different EU member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each proposal is expected to receive up to €10 million, although proposals for other amounts will also be considered. The total indicative budget for this call is €42m.

EUROSTARS PROGRAMME
EUREKA

Description:
EUREKA invites applications for the Eurostars programme.

This funds collaborative innovation research and innovation projects that will be rapidly commercialised. It encourages the development of new products, processes and services by offering support and funding to help innovation. Projects can address any technological area for any market, but must have a civilian purpose.

Any type of organisation can be part of a Eurostars project consortium, but the consortia leader must be an R&D-performing small or medium-sized enterprise from a Eurostars country. Consortia must include at least two participants from two different Eurostars countries.

Eurostars countries participating in this call include Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Hungary, Iceland, Ireland, Israel, Italy, Greece, Portugal, Latvia, Lithuania, Luxembourg, Malta, the
A Eurostars project should have a maximum duration of three years. Within two years of project completion, the product of the research should be ready for launch onto the market. At least 50 per cent of the project’s core activity should be carried out by SMEs. Funding for Eurostars participants is provided on a country by country basis. The average project includes three to four participants from two to three countries over a duration of 29 months with a project budget of €1.4 million.

Closing date: 18 Feb 16

Description:
The European and Developing Countries Clinical Trials Partnership invites applications for support for the establishment of regional networks. This aims to support regional networking in sub-Saharan Africa and with Europe in order to build and strengthen regional, national, institutional and individual capacities to conduct clinical trials.

Networks should include the following objectives:

- to strengthen collaboration and optimise the use of resources and infrastructures within the network;
- to offer training and mentorship aimed at promoting professional development and scientific leadership in clinical trials;
to strengthen South-South and North-South collaborations between researchers and institutions with a specific focus on supporting less established institutions in building capacity for conducting high quality clinical research;

- to encourage and promote networking and dialogue between researchers, communities and policy makers to maximise the impact of clinical research in Africa.

Funding is available for up to four regional consortia of research institutions. Each consortium will comprise at least six institutions from at least three different sub-Saharan African countries and at least two institutions from two different eligible European countries. Funding available for each network is worth up to €3 million for up to 36 months. The total budget for this call is €12 million.

Closing date: 18 Feb 16
Deadline information: Applications accepted between 5 November 2015 and 5pm CET, 18 February 2016.
Posted date: 19 Oct 15
Award type: Personal development, Directed grants to institutions, research groups etc, Academic-Industry links, Networking/collaboration

WILLIAM C EZELL FELLOWSHIPS
American Academy of Optometry

Description:
The American Optometric Foundation invites applications for the William C Ezell fellowships. These encourage talented people to pursue full-time careers in optometric research and education. The fellowships are awarded to graduate students who are entering or continuing a full-time programme.
of study and training in research that leads to a master's or PhD degree in vision science. Applicants must be a member of the AAO.

Funding is worth US$8,000 over one year. Each student also receives travel grants to the annual meetings of the American Academy of Optometry and the Association for Research in Vision and Ophthalmology, which are US$750 each. Reapplication can lead to funding for an additional year. However, only under exceptional circumstances will recipients be funded for a third year.

Closing date: 19 Feb 16
Deadline information: This call is repeated once a year.
Posted date: 31 Jul 15
Award type: Predoctoral fellowships, Travel to conferences, meetings etc., Directed grants for individual investigators
Award amount max: $8,750
Award amount min: -

INTERNATIONAL ENGAGEMENT AWARDS
Wellcome Trust

Description:
The Wellcome Trust invites expressions of interest for its international engagement awards. These support innovative public or community engagement projects that explore biomedical research or health in Africa and Asia. Projects should aim to do the following:

- stimulate dialogue about biomedical research and its impact on the public;
- promote innovative partnerships between community organisations, the cultural sector, and scientists or researchers;
- strengthen capacity to conduct future public or community engagement with biomedical research and health.

Applicants may be biomedical and health researchers, non-governmental organisations, educators, artists, theatre practitioners, and cultural and community organisations. Projects must be led by or in collaboration with biomedical scientists or health researchers. Non-scientist led projects must have a biomedical scientific input through a work partnership with an expert in the area, and scientist-led projects are encouraged to collaborate with partners in civil society and the creative industries. Activities must take place in a low- or middle-income country.
within sub-Saharan Africa, south-east Asia or south Asia.

Each award is worth up to £30,000 for up to three years.

AUSTRALIAN TROPICAL MEDICINE COMMERCIALISATION GRANTS

Australian Department of Industry and Science

Description:
The Australian Department of Industry and Science invites applications for its Australian tropical medicine commercialisation grants. These help Australian businesses and public sector research organisations to develop pathways to commercialise Australian tropical medical research in partnership with international organisations. The purpose is to help build connections between Australian research institutes and the global health sector, including international pharmaceutical companies and philanthropic organisations to improve Australia’s position with foreign investors that are investing in new treatments for tropical diseases.

Companies incorporated in Australia or publicly funded research organisations may apply. Collaborative partnerships established between Australian and multinational entities including arrangements such as a sponsored research agreement, licensing agreement, joint venture or other commercial partnership. Collaborative partnerships should enable a route to market for Australian tropical medicine research.

The total budget is AU$7.1 million. Grants are worth at least AU$15,000 and will cover up to 50 per cent of eligible expenditure.

Closing date: 19 Feb 16
Deadline information: Applications are open between 25 November 2015 and 5pm AEST, 19 February 2016.

Posted date: 09 Nov 15

EMELSON CENTER ARCHIVAL INTERNSHIPS
Smithsonian Institution

Description:
The Museum of American History, under the Smithsonian Institution, invites applications for the Lemelson Center archival internships. These enable graduate students to understand, identify and manage the historical records of American invention and innovation by giving access to the museum’s historical collections in the history of technology and 20th century material culture. The internship will provide hands-on experience with archival collections that document invention and innovation as well as creating encoded archival description finding aids to collections documenting invention and innovation.

Applicants must be enrolled in a graduate degree programme and have completed graduate course work in archival, library, information management, American history, American studies, museum studies, public history or another area that relates to the history of invention and innovation in American society. Recent graduates may also apply.

Each internship lasts for 10 weeks and includes a US$6000 stipend. One internship is available each summer.

Closing date: 22 Feb 16
Deadline information:
Posted date: 16 Sep 15
Award type: Student awards, Access to libraries, Directed grants for individual investigators
Award amount max: $6,000

NARSAD YOUNG INVESTIGATOR GRANT
Brain & Behavior Research Foundation

Description:
The Brain and Behavior Research Foundation invites applications for the NARSAD young investigator grant. This supports young scientists who are conducting neurobiological research, in order to enable them to extend their research fellowship training or to begin careers as independent research faculty.

The aim is to facilitate innovative research opportunities and support basic, translational or clinical investigators. All research must be relevant to the understanding, treatment and prevention of serious psychiatric disorders such as schizophrenia, bipolar, mood and anxiety disorders, or early onset brain and behaviour disorders.

Applicants must have a doctoral degree and be employed in research training, or be in a faculty or independent research position. Postdoctoral fellows, instructors and assistant professors are eligible to apply. Applicants must have an onsite mentor or senior collaborator who is an established investigator.

One and two-year grants of up to US$35,000 per year are available.

Closing date: 24 Feb 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect.
Applications due by 11.59pm ET. This call is repeated once a year.

Posted date: 27 Jan 15
Award type: Early-Career fellowships, Young investigator awards, Directed grants for individual investigators, Equipment and materials, Innovation grants
Award amount max: $70,000

Description:
The European Commission Horizon 2020: Industrial Leadership, under the Innovation in SMEs work programme, invites proposals for its H2020-SMEInst-2016-2017 dedicated SME instrument call – phase one. This call supports projects with a European dimension that lead to major changes in how business is done and will assist innovative SMEs to shape new markets, create growth, and achieve high return on investment.

Proposals may address the following topics:

- SMEInst-01-2016-2017 open disruptive innovation scheme;
- SMEInst-02-2016-2017 accelerating the uptake of nanotechnologies advanced materials or advanced manufacturing and processing technologies by SMEs;
- SMEInst-03-2016-2017 dedicated support to biotechnology SMEs closing the gap from lab to market;
- SMEInst-04-2016-2017 engaging SMEs in space research and development;
- SMEInst-05-2016-2017 supporting innovative SMEs in the healthcare biotechnology sector;
- SMEInst-06-2016-2017 accelerating market introduction of ICT solutions for health, wellbeing and ageing well;
- SMEInst-07-2016-2017 stimulating the innovation potential of SMEs for sustainable and competitive agriculture, forestry, agri-food and bio-based sectors;
- SMEInst-08-2016-2017 supporting SMEs efforts for the development to deployment and market replication of innovative solutions for blue growth;
- SMEInst-09-2016-2017 stimulating the innovation potential of SMEs for a low carbon and efficient energy system;
- SMEInst-10-2016-2017 small business innovation research for transport and smart cities mobility;
- SMEInst-11-2016-2017 boosting the potential of small businesses in the areas of climate action, environment, resource efficiency and raw materials;
- SMEInst-12-2016-2017 new business models for inclusive, innovative and reflective societies;
- SMEInst-13-2016-2017 engaging SMEs in security research and development.

Proposals must take the form of SME instrument actions. These require at least one SME. Only applications from for-profit SMEs established in EU member states or associated countries are eligible. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each successful proposal is expected to receive a lump sum of €50,000 over six months.

STIPENDIUM TILL VETENSKAPLIG HISTORISK FORSKNING

Uppsala universitet – Uppsala University

Description:
Uppsala universitet inbjuder ansökningar om stipendium ur Ellen Fries stiftelse. Stipendiet stöder en svensk kvinna för vetenskaplig historisk forskning vid svenskt eller utländskt universitet, arkiv eller bibliotek.

Behöriga att söka är kvinnor som antingen avlagt filosofie kandidat- eller licentiatexamen, i båda fallen med överbetyg i historia, eller som genom utgivande av något historiskt arbete visat sin duglighet för vetenskaplig historisk forskning. Prioritet ges till kandidater som har studerat eller studerar vid Uppsala universitet.

Stipendiet omfattar SEK65,000.

Closing date: 25 Feb 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Applications due by 5pm. This call is repeated once a year.

EAN MONNET MODULES
Education, Audiovisual and Culture Executive Agency

Description:
The Education, Audiovisual and Culture Executive Agency’s Erasmus+ programme invites proposals for the Jean Monnet modules call. This supports modules or courses in the field of European Union studies at higher education institutions. Each module has a minimum duration of 40 teaching hours per academic year. Modules may concentrate on one particular discipline in European studies or be multidisciplinary in approach and therefore call upon the academic input of several professors and experts.

Applications are open to HEIs established in any country of the world, however HEIs from programme countries must hold a valid Erasmus charter for higher education.

Each grant is worth up to €30,000, which can represent up to 75 per cent of the total cost of the Jean Monnet modules.

Ref: OJ 2015/C 347/06, EAC/A04/2015.

Closing date: 25 Feb 16

Deadline information: Applications due by 12 noon Brussels time.

J EAN MONNET CENTRES OF EXCELLENCE
Education, Audiovisual and Culture Executive Agency

Description:
The Education, Audiovisual and Culture
Executive Agency, under its Erasmus+
programme, invites applications for its Jean
Monnet centres of excellence call. This
supports centres that are a focal point of
competence and knowledge on European
Union subjects. A centre will gather expertise
and competencies of high-level experts and
develop synergies between the various
disciplines and resources in European studies,
as well as creating joint transnational
activities and structural links with academic
institutions in other countries.

Applications are open to higher education
institutions established in any country of the
world, however HEIs from programme
countries must hold a valid Erasmus charter
for higher education.

Each grant is worth up to €100,000 over three
years. Funding covers a maximum of 80 per
cent of eligible costs.

JEAN MONNET SUPPORT TO ASSOCIATIONS
Education, Audiovisual and Culture Executive Agency

Description:
The Education, Audiovisual and Culture Executive Agency, under its Erasmus+ programme, invites applications for the Jean Monnet support to associations. This supports associations that have as their explicit purpose to contribute to the study of the European integration process.

Any association of professors and researchers specialising in EU studies, located in any country of the world, may apply. Associations should be interdisciplinary. They should be representative of the academic community in European Union studies at regional, national or supranational level.

Each grant is worth up to €50,000 over three years. Funding covers a maximum of 80 per cent of eligible costs.

Ref: OJ 2015/C 347/06, EAC/ A04/2015.

Closing date: 25 Feb 16
Deadline information: Applications due by 12 noon Brussels time.

JEAN MONNET NETWORKS
Education, Audiovisual and Culture Executive Agency

Description:
The Education, Audiovisual and Culture Executive Agency, under its Erasmus+ programme, invites applications for the Jean Monnet network call. This supports the creation and development of consortia of international research groups in the area of European Union studies. Grants will contribute gathering of information, exchanging practices, building knowledge and promoting European integration across the world. The action will also support the enhancement of existing networks by supporting specific activities, notably the participation of young researchers in EU-related themes.

Applications are open to higher education institutions or other organisations active in the European integration area, established in

Jean Monnet Projects
Education, Audiovisual and Culture Executive Agency

Description:
The Education, Audiovisual and Culture Executive Agency, under its Erasmus+ programme, invites applications for the Jean Monnet projects call. This supports innovation, cross-fertilisation and the spread of European Union content. Three types of projects are supported:

• innovation projects explore new angles and different methodologies in view of making European Union subjects more attractive and adapted to various target populations.
• cross-fertilisation projects promote discussion and reflection on European Union issues and enhance knowledge about the Union and its processes in order to boost EU knowledge in specific contexts.
• spread content projects mainly consist of information and dissemination activities.

Applications are open to higher education institutions or other organisations active in the European Union subject area established in any country in the world. HEIs located in programme countries are required to hold a valid Erasmus charter for higher education.

Each grant is worth up to €60,000 for projects that last between 12 and 24 months. Funding covers a maximum of 75 per cent of total costs.

Ref: OJ 2015/C 347/06, EAC/A04/2015.

Closing date: 25 Feb 16
Deadline information: Applications due by 12 noon Brussels time.
INVESTIGATOR AWARDS IN BIOMEDICAL SCIENCE

Wellcome Trust

Description:
The Wellcome Trust invites applications for its investigator awards in biomedical science. These enable researchers at any career level to address important research questions relevant to human and animal health and disease.

Applicants based in the UK, Republic of Ireland or a low or middle-income country must have an established academic post at an eligible higher education or research institution. Applicants based in a low or middle-income country in sub-Saharan Africa, south east Asia or south Asia, with the exception of India, are eligible to apply if they fulfil these criteria and are working within the trust's science funding remit. In addition, applicants based in low- or middle-income countries other than the territories mentioned previously are only eligible to apply if they are researchers carrying out work in the fields of public health and tropical medicine. Joint applications from two researchers are also welcomed.

Awards are worth a maximum of £3 million for up to seven years. They may cover research expenses, including research assistance, animals, equipment, fieldwork costs and funding for collaborative activities, travel and subsistence, and overseas allowances. Joint applications are eligible.

Closing date: 26 Feb 16
Deadline information:

CONSERVATION GRANTS
Primate Society of Great Britain

Description:
The Primate Society of Great Britain’s conservation working party invites applications for its conservation grants. These support research of benefit to primate conservation and primate conservation education. More specifically, the grants assist with:

• projects that address known threats to primate populations or known constraints on population recovery;
• projects that shift incentives in support of conservation, such as training, education and awareness raising, compensation schemes and policy influence;
• surveys that will direct conservation effort to important locations;
• conservation education relevant to primates;
• other research of direct benefit to primate conservation.

Applicants must be members of the society or citizens of non-human primate habitat countries. Grants do not typically exceed £1,000.

Closing date: 28 Feb 16
Deadline information: This call is repeated once a year.

PROJECT GRANTS
Kay Kendall Leukaemia Fund

Description:
The Kay Kendall Leukaemia Fund invites proposals for its programme and project grants. These support research on aspects of leukaemia and related haematological malignancies. Requests for support for basic science programmes may be considered. Clinical trials will not be supported. Proposals involving practical application to the prevention, diagnosis or therapy of leukaemia and related diseases are particularly encouraged.

Both UK and non-UK based organisations are eligible to apply for project or programme awards where the work to be funded is based primarily within the UK. Applications are particularly encouraged from individuals within five years of their first independent group leader position.

Awards are available for up to three years.

Closing date: 28 Feb 16
Deadline information: Deadlines on: 28 February 2016, 15 July 2016, and repeated annually.

RESEARCH GRANTS
International Essential Tremor Foundation

Description:
The International Essential Tremor Foundation invites applications for its research grants programme. The aim of this programme is to fund research projects that address the nosology, etiology, pathogenesis, treatment or other topics relevant to essential tremor. The foundation aims to support proposals that are innovative and give promise of receiving more substantial support from other funding sources if sufficient preliminary information is acquired. Two grants are available. In general, IETF research grants will not exceed US$25,000 for a given year. Grants are awarded initially for one year, but may be renewed for a second year.

Closing date: 28 Feb 16 (Forecast)

RETREATS AT THE BERGMAN ESTATE ON FÄRÖ
Stiftelsen Bergmangårdarna på Fårö - The Bergman Estate on Fårö

Description:
The Bergman Estate on Fårö invites applications for visits to its retreat estate. This enables candidates to conduct research in an environment intended to nurture contemplative and creative work in any discipline. The Bergman Estate is to be an international arena and particularly welcomes applicants who wish to cast a non-Western view across the Baltic Sea.

Artists, scholars and journalists from around the world, as well as people dedicated to democracy and freedom of speech issues, may apply.

Applicants must be able to document professional accomplishments and output, provide a description of the project they intend to work with on Fårö, the size of their party, and the intended length of their stay. Additionally, applicants must specify how they intend to reimburse the community in the form of a cultural event. This event may also be outlined in consultation with the Artistic Director. Day care can be provided to parents of small children. Applicants with special needs can apply for travel grants. Group applicants are advised to focus on the beginning and end of the season, that is November and March.

Free accommodation for a work period of no less than three weeks and at the most three months is offered.

Closing date: 28 Feb 16

PHOSAGRO/UNESCO/IUPAC RESEARCH GRANTS IN GREEN CHEMISTRY
UNESCO

Description:
PhosAgro, the United Nations Educational, Scientific and Cultural Organization and the International Union for Pure and Applied Chemistry, invite applications for its research grants under their partnership in green
chemistry. These grants enable young scientists to carry out innovative, scientific and collaborative research projects in green chemistry that advance scientific knowledge. Project proposals must adhere to the 12 principles of green chemistry.

Young scientists aged 35 or less may apply. Eligible candidates must hold a PhD or equivalent in chemistry or an interdisciplinary allied area. Applicants must have at least three publications in recognised scientific journals and have submitted no more than one project proposal under this call. No more than one candidate per home institute will be awarded a grant.

Grants are worth up to US$30,000 each. Funding may be used for travel and living expenses related to the research project, the purchase or rental of research equipment, the preparation and publication of information materials and reports on the project, and communication and organisational expenses. The grant should be taken up within five months.

Applications may be submitted in English or in French.

Closing date: 28 Feb 16
Deadline information: This call is repeated once a year.

INSTITUTIONAL GRANTS
Tinker Foundation

Description:
The Tinker Foundation invites applications for its institutional grants. These aim to support the creation of effective policy changes to improve the lives of Latin Americans.

Proposals should address one of the following areas of interest:

- democratic governance;
- education;
- sustainable resource management;
• US policy toward Latin America;
• Antarctica science and policy.

The organisational entity needs to hold a 501(c)3 charitable status or its equivalent if based outside the United States. Projects should have a strong public policy component, offer innovative solutions to problems facing these regions, and incorporate new mechanisms for addressing these programmatic areas. Collaboration between organisations in the United States and Latin America is encouraged, and funding preference is given to those institutions actively engaged with external stakeholders in addressing an issue of concern.

Closing date: 01 Mar 16
Deadline information: Letters of inquiry should be sent at least four weeks in advance of the deadline. Deadlines on: 1 March 2016, 15 September 2016, and repeated annually.

HILLIPS FUND FOR NATIVE AMERICAN RESEARCH
American Philosophical Society

Description:
The American Philosophical Society invites applications for its Phillips fund. This provides grants for research in Native American linguistics, ethnohistory and the history of studies of Native Americans in the continental United States and Canada. The grants are intended for costs as travel, tapes, films and consultants’ fees but not for the purchase of books or permanent equipment.

Younger scholars holding a PhD are preferred. Applications are also accepted from graduate students for research on master’s theses or doctoral dissertations.

Foreign applicants are eligible to apply given that the research is carried out in the US.

Grants are worth up to US$3,500 for a period of one year.

Closing date: 01 Mar 16
Deadline information:
Posted date: 31 Jul 15
Award type: Thesis/Dissertation funding, Travel for research purposes, Directed grants for individual investigators, Equipment and materials
Award amount max: $3,500

RESEARCH GRANTS
American Alpine Club

Description:
The American Alpine Club invites applications for its research grants. The program provides resources to assist scientific research within the scope of the AAC's charter. The AAC is concerned with the scientific exploration and study of high mountain elevations and of the regions lying within or about the Arctic and Antarctic circles.

Applications are considered in terms of their scientific or technical quality and contribution to scientific endeavor germane to mountain regions. Grants are in the range of $200 to $1,000.

Closing date: 01 Mar 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

RESEARCH GRANTS
American Massage Therapy Association Foundation

Description:
The Massage Therapy Foundation invites applications for its research grants. These awards support high quality, independent research which contributes significantly and directly to the basic knowledge of massage therapy or its application, including applied research investigating massage therapy as a health or mental health treatment or prevention modality.

The research grant is available to investigators who have experience in a relevant field of research, and are presently associated with or have secured the cooperation of a university, independent research organisation, or other institution qualified and willing to function as a sponsoring organisation for the purpose of this project. Newer investigators without prior research experience must document support from an experienced investigator willing to act as a collaborator. Grants are not awarded to individuals.

The normal award for 12 months is worth between US$1,000 and US$30,000.

Closing date: 01 Mar 16
Deadline information: Applications due by 12 midnight CST.
Posted date: 25 Jan 12

Award type: Directed grants to institutions, research groups etc

RESEARCH AWARDS
Waltham Foundation

Description:
The Waltham Foundation invites proposals for its research awards. These support projects on the nutrition, health, behaviour and welfare of companion animals around the world.

Applicants must work at a university or research institute that provides basic research facilities and who will publish their research in scientific journals. All projects must comply with Waltham’s ethical guiding principles: the research must not inflict suffering or result in the euthanasia of the animals involved. All clinical studies must have informed owner consent. Proposals for non-research activities, for the development of a drug or vaccine, for research into non-pet species, for research that causes suffering or results in euthanasia of the animals involved, or for studies whose subjects have artificially induced clinical conditions, will not be considered for funding.

Grants have a maximum value of US$20,000 for projects with a duration of two years. Applications must be submitted in English.

Closing date: 01 Mar 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

ILOT GRANTS
Breast Cancer Now

Description:
Breast Cancer Now invites applications for its pilot grants. These enable established scientists to investigate and develop new ideas in the field of breast cancer research. Projects should aim to address the following priority areas:

- breast cancer biology;
- genetics;
- secondary breast cancer;
- early and effective diagnosis;
- improving treatment;
- living with and beyond breast cancer;
- risk and prevention.

Principal investigators should be permanent salaried members of institutes in the UK or Ireland. Collaborative applications from within the two countries are welcome, although the contracted grant will be with the PI's institution. Co-applicants may be included in applications, and they may be based elsewhere.

Grants are worth up to £25,000 for up to one year. Eligible expenses include salary, laboratory materials, small pieces of equipment and research-related travel.

Closing date: 01 Mar 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated 2 times a year.

Description:
The Royal Numismatic Society invites applications for its research grants. These support numismatic research, and are available to fellows and non-fellows alike from the following funds:

- the Martin Price fund for Ancient Greek numismatics, for which one or more grants are available for travel and research costs, and for which preference may be given to candidates under 30 years of age;
- the Nicholas Lowick memorial fund for the promotion of oriental numismatic research, for which one or more grants are available for travel and research costs;
- the Neil Kreitman Central Asian numismatic endowment for the promotion of Central Asian numismatic research, funded from the interest accrued from a capital fund of £25,000;
- classical numismatic group Roman and Byzantine fund for the promotion of Roman and Byzantine numismatic research in its broadest sense;
- the RNS Marshall memorial fund for educational purposes in numismatics, which enables young scholars to purchase books.

Candidates for the Martin Price fund may be based anywhere in the world, and may be of any nationality.

Grants are usually less than £1,000, but larger awards may be considered.

SKOLL AWARDS FOR SOCIAL ENTREPRENEURSHIP
Skoll Foundation

Description:
The Skoll Foundation invites applications for its awards for social entrepreneurship. The awards include a core support grant to an organization, to be paid over three years, and a noncash award to the social entrepreneur representing the organization, presented at the Skoll World Forum on Social Entrepreneurship every spring. Applicants should have a tested and proven social innovation that addresses an issue of critical importance and is positioned for large-scale impact, in order to be considered for the awards.

The foundation focuses on the following issue areas:
- economic and social equity;
- environmental sustainability;
- health;
- institutional responsibility;
- peace and security;
- tolerance, justice and human rights.

While the awards do not have an absolute budget threshold for eligibility, organizations with annual revenues below $2.5 million that have activities primarily in the developed countries and below $1M that have activities primarily in developing countries tend to be at a disadvantage in the selection process. The selection process prioritizes organizations based on readiness to expand impact significantly and/or scale up solutions and favors organizations within these budget thresholds.

Closing date: 01 Mar 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

RESEARCH GRANT DEVELOPMENT AWARDS
Foundation for the Sociology of Health and Illness

Description:
The Foundation for the Sociology of Health and Illness invites applications for its research grant development awards. These provide pump-priming funds for the development of high-quality, innovative and multidisciplinary research in medical sociology or sociology of health and illness. Awards enable groups of individuals to work together in order to develop a research grant application and to submit it to a major national or international funding body within three months of the end of the award.

The scheme is open to groups comprising at least four researchers, based in at least three different institutions, and at least two of whom have a track record as active researchers in the sociology of health and illness. The lead applicant must be based in a UK university or research institution and be an active researcher in the sociology of health and illness. Other applicants may be based outside the UK.

Awards are worth up to £6,000 each.

**RICHARD PLASCHKA GRANT**  
*Austrian Exchange Service*

**Description:**  
The Austrian Exchange Service (OEAD) invites proposals for the Richard Plaschka grant. These enable university history lecturers whose main focus is Austrian history to carry out specialist studies in libraries, archives or at research institutions over a maximum of 18 months. Researchers may
work as visiting researchers at university departments. Recipients should emphasise cross-border collaboration in their scientific activities.

Follow-up funding is also available for recipients who have completed at least 12 scholarship months, covering:

- a yearly invitation to a professionally relevant symposium;
- a yearly endowment for the purchase of specialist literature on the occasion of the symposium;
- a one-month research grant every three years;
- subscription to a journal on history topics;
- a habilitation grant;
- a publication allowance.

Closing date: 01 Mar 16
Deadline information: Deadlines on: 1 March 2016, 15 September 2016, and repeated annually.
Posted date: 05 Mar 15
Award type: Travel to conferences, meetings etc., Travel for research purposes, Directed grants for individual investigators, Publish, edit, translate, disseminate, Equipment and materials, Networking/collaboration

ABBATICIAL LEAVE PROGRAMME
European Society for Paediatric Endocrinology

Description:
The European Society for Paediatric Endocrinology invites applications for its sabbatical leave programme. This enables society members to carry out research in another institution, and thereby provides opportunities for scientific renewal, new research development and the establishment of collaborative links.

Members of the society may apply.

Closing date: 01 Mar 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.
Posted date: 02 Mar 15
Award type: Personal development, Travel for research purposes, Directed grants for individual investigators, Networking/collaboration

Working Groups Grants
Québec Centre for Biodiversity Science – Centre de la Science de la Biodiversité du Québec

Description:
The Québec Centre for Biodiversity Science invites applications for its working groups grants. These support new lines of collaborative research among members and their partners related to biodiversity science. Groups should involve researchers from at least two of the three QCBS axes: discovering biodiversity, biodiversity changes and ecosystem services, and management and adaptation to biodiversity change. Grants support the following activities:

- novel research themes, not previously possible, and requiring the input of additional expertise, as well as the establishment of new collaboration;
- collaboration between researchers with complementary training and expertise, to make the whole group more competitive at the national and international levels;
- improving training environment quality for highly qualified personnel in biodiversity science, and the development of innovative research opportunities able to attract promising students.

Principal investigators must be QCBS members and each working group should involve several members and non-members from Québec, Canada and other countries. Researchers are encouraged to invite partners from government, local administrations, the private sector and non-governmental organisations.

Grants are worth between CA$5,000 and CA$10,000 per year per working group for a period of up to two years.

Closing date: 01 Mar 16
Deadline information: This call is repeated once a year.
Posted date: 02 Mar 15

ROCKHOUSE CANADA PRIZE FOR INTERDISCIPLINARY RESEARCH IN SCIENCE AND ENGINEERING
Natural Sciences and Engineering Research Council of Canada – Conseil de Recherches en Sciences Naturelles et en Génie du Canada

Description:
The Natural Sciences and Engineering Research Council of Canada invites nominations for the Brockhouse Canada prize for interdisciplinary research in science and engineering. This recognises Canadian teams of researchers for producing collaborative and interdisciplinary achievements of international significance in the natural sciences and engineering in the last six years.

Nominations may be submitted by Canadian citizens or permanent residents. Self-nominations are ineligible.

Nominees should be research teams with at least two members who are independent researchers, one of which holds an NSERC grant. The team can be part of an international effort, however the majority of the members must be employed at a Canadian university or public or private organisation.

The prize includes a team research grant of up to CA$250,000, to be used for direct costs of university-based research or the enhancement of research facilities.

Closing date: 01 Mar 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

JOHN C POLANYI AWARD
Natural Sciences and Engineering Research Council of Canada – Conseil de Recherches en Sciences Naturelles et en Génie du Canada

Description:
The Natural Sciences and Engineering Research Council of Canada invites nominations for the John C Polanyi award. This recognises a researcher or a team of researchers whose work has led to a recent Canadian advance in a field of the natural sciences or engineering.

Nominations may be submitted by Canadian citizens or permanent residents. Self-nominations are ineligible.

Nominees may be at any stage in their career. At least one nominee should hold an NSERC grant and the research should have been supported by NSERC. In the case of a team nomination, members may be from academia, government or industry provided that the majority of team members are employed at a Canadian university or public or private organisation.

The award includes a research grant of up to CA$250,000.

RESEARCH GRANTS
University of Alberta

Description:
The University of Alberta’s Canadian Institute of Ukrainian Studies invites applications for its research grants. These support publishable projects in Ukrainian and Ukrainian-Canadian studies in the humanities and social sciences. The grants may also support the development or preparation of specialised...
material for teaching purposes at the postsecondary level of education, such as textbooks, anthologies, readers, instruction manuals, bibliographies, collections of documentary or primary source materials and inventories of archival materials intended for use in postsecondary education.

Applications are open to scholars on the faculty of a university or other postsecondary institution in Canada or elsewhere, or by a private scholar. Grants support direct costs and may not be used for overhead costs or salaries.

**Closing date:** 01 Mar 16 (Forecast)
**Deadline information:** Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

**QUARRY LIFE AWARD**

*HeidelbergCement*

**Description:**
HeidelbergCement invites applications for the quarry life award. This aims to promote biodiversity in quarries and add ecological and educational value to a mining environment.

Project proposals should be developed around one of the following topics:

- habitat and species research;
- biodiversity management;
- education and raising awareness;
- beyond quarry borders;
- student class project.

Young graduates, students or scientific researchers in countries with participating quarries are eligible to apply.
National awards range from €1,500 to €5,000. International awards of €10,000 are given in five different categories and one grand prize of €30,000 will be given to the best overall project.

Closing date: 01 Mar 16
Deadline information: Applications due by 9am CET. This call is repeated once a year.

BORIGINAL PEOPLES MUSIC – PROJECT GRANTS
Canada Council for the Arts – Conseil des Arts du Canada

Description:
The Canada Council for the Arts invites applications for its Aboriginal peoples music project grants. These support the creation of original work and the development of professional skills of Aboriginal music artists, as well as the strengthening of organisations dedicated to Aboriginal music, including activities that restore, preserve, invigorate and raise the profile of Aboriginal music and musicians.

Professional Aboriginal musicians or music organisations led by professional Aboriginal musicians are eligible to apply. Applicants must be Canadian citizens or persons with permanent resident status, but do not have to be living in Canada at the time of application.

Grants are worth up to CA$20,000 each.

Closing date: 01 Mar 16
Deadline information: Applications due on 1 March annually. If this deadline falls on a weekend or statutory holiday, applications are due the next business day. This call is repeated once a year.

FINÉ CRAFT - GRANTS TO ARTISTS AND CURATORS
Canada Council for the Arts – Conseil des Arts du Canada

Description:
The Canada Council for the Arts invites applications for grants under its fine craft programme. These enable fine craft artists and curators to conduct a period of independent research, to create and produce artworks for public exhibitions, or to develop prototypes.

Professional artists and curators are welcome to apply. Applicants must be Canadian citizens or persons with permanent resident status, but do not have to be living in Canada at the time of application.

Grants are worth up to CA$20,000 each. They may be used for a period of independent research and creation of a body of work, the development of prototypes, participation in artists’ residencies and specialised professional development activities, as well as production of work for confirmed public exhibitions in Canada or abroad, in a professional visual arts context.

Closing date: 01 Mar 16
Deadline information: Applications due on 1 March annually. If this deadline falls on a weekend or statutory holiday, applications are due the next business day. This call is repeated once a year.

NEW MEDIA RESIDENCIES
Canada Council for the Arts – Conseil des Arts du Canada

Description:
The Canada Council for the Arts invites applications under its new media residencies programme. This enables organisations to host an artist or a group of up to three artists working on projects related to new media. The programme has two components: research residencies and production residencies.

Host organisations may include research facilities, technology centres, media laboratories, postsecondary educational institutions, private companies or science museums. They may be located in Canada or elsewhere. Guest artists must be Canadian citizens or have permanent resident status at the time of the application deadline, but do not have to be living in Canada when the host organisation submits the application.

Grants are worth up to CA$30,000 each for research residencies and up to CA$60,000 each for production residencies. There is no minimum duration for the proposed residency but residencies of three months or more are encouraged.

Closing date: 01 Mar 16

JEAN A CHALMERS FUND FOR THE CRAFTS
Canada Council for the Arts – Conseil des Arts du Canada

Description:
The Canada Council for the Arts invites applications under the Jean A Chalmers fund for the crafts. Grants enable non-profit Canadian visual arts organisations and fine crafts professionals to undertake projects that contribute to the advancement and understanding of the fine crafts in Canada. Partial funding is available for one-time projects that fall under one of the following components:

- research and policy development assistance, for projects investigating or documenting historical or contemporary developments in the fine crafts, as well as issues that arise from the practice of the art form;
- special project assistance, for conferences, seminars, symposiums, lecture series and artists’ workshops designed to advance knowledge about and understanding of crafts in Canada;
- pre-publication assistance, for pre-printing costs of publications on the fine crafts.

All three components are open to incorporated, non-profit Canadian visual arts and fine craft organisations, including art museums, public art galleries, exhibition centres, artist-run centres, university art departments, art colleges, fine crafts colleges, service organisations and professional associations with a commitment to the professional fine crafts communities in Canada. The research and development assistance component is also open to individual fine craft professionals who are Canadian citizens or persons with permanent resident status, but who do not have to be living in Canada when applying. Grants generally vary between CA$5,000 and CA$7,000, however there are no minimum or maximum amounts that may be requested.

Closing date: 01 Mar 16
Deadline information: Applications due on 1 March annually. If a deadline falls on a weekend or statutory holiday, applications are due the next business day. This call is repeated once a year.

GERMAN-CANADIAN STUDIES RESEARCH GRANT
University of Winnipeg

Description:
The University of Winnipeg invites applications for the German-Canadian studies research grant. This supports the best project proposal on any aspect in the field of German-Canadian studies. The aim is to foster research
into the past and present experiences of German-speaking immigrants and their descendents in Canada, as well as into history and nature of relations and exchanges between Germany and Canada.

Applications are open to academic researchers at the faculty or student level, private researchers, and collaborative projects, including projects at K-12 school levels. There are no citizenship or residency requirements.

The grant is worth CA$2,500 and is non-renewable.

Closing date: 01 Mar 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

HIDDEN EARTH CAVE SCIENCE BURSARIES
British Cave Research Association

Description:
The British Cave Research Association invites applications for its Hidden Earth cave science bursaries. These support research into cave science by investigators studying for an undergraduate or taught master’s degree.

Each applicant must be a member of a caving club.

Each bursary is worth around £500, and exceptionally up to £750. Bursaries assist with dissertation research costs.
GLOBAL INNOVATION PROGRAMMES TO HELP THE HUMANITARIAN COMMUNITY BETTER RESPOND TO REFUGEES OUTSIDE OF CAMPS

Department of State

Description:
The Department of State invites concept notes for its global innovation programmes to help the humanitarian community better respond to refugees outside of camps. These programmes support the development of new approaches and tools to strengthen humanitarian response to urban and other non-camp refugees. Applicants must develop and pilot new tools and models of assistance that will enable the humanitarian community to address the challenges unique to urban and non-camp settings.

Any African organisation may apply.

Up to US$1 million is available for programmes lasting 12 or 24 months.

Ref: PRM-PRMOAPGL-16-001.

Closing date: 01 Mar 16
Deadline information: Concept notes due by 12 noon EDT/EST. Deadlines on: 1 September 2015, 1 March 2016.

**IFE – A FRESH SCIENTIFIC APPROACH TO THE BASIC PRINCIPLES OF LIFE**
_VolkswagenStiftung – Volkswagen Foundation_

**Description:**
The Volkswagen Foundation invites applications for its funding scheme Life – a fresh scientific approach to the basic principles of life. This call supports projects that contribute to comprehending fundamental principles of life by working with systems resembling those of living ones or by exploring chemical and physical cellular processes. Funding can be made available for projects that link up most recent research from the interface between the natural and life sciences with the attempt to answer fundamental questions on life itself. This call also addresses methodic developments that may contribute to answering this question. Amongst others, the foundation will consider approaches from systems biology, synthetic biology, cell biology, xenobiology, artificial intelligence or robotics and similar research areas. The main focus of the proposals should be to connect excellent research in the natural and life sciences with the aim to reveal fundamental characteristics of life.

Individual researchers as well as integrative joint projects with up to five cooperation partners are eligible for funding. At least one of the applicants must be employed at a scientific institution in Germany.

Projects may request up to €1.5 million over a period of up to five years.

Closing date: 01 Mar 16  
Deadline information:  
Posted date: 20 Aug 15

2020-FETFLAG-2016 TACKLING GRAND INTERDISCIPLINARY SCIENCE AND TECHNOLOGY CHALLENGES
Horizon 2020: Excellent Science

Description:
The European Commission Horizon 2020: Excellent Science, under the future and emerging technologies programme, invites proposals for its H2020-FETFLAG-2016 tackling grand interdisciplinary science and technology challenges call. This flagship call aims to realise transformational impacts on science and technology and substantial benefits for European competitiveness and society. Proposals must address the topic FETFLAG-01-2016 partnering environment for FET flagships.

This work programme aims to advance the graphene and human brain project flagships launched in 2013, as well as other actions launched under previous work programmes.

Proposals should address a single of the two following subtopics:

- ERA-NET cofund action;
- coordination and support action.

Projects must take the form of coordination and support actions or ERA-NET cofund actions. Coordination and support actions require at least one legal entity established in an EU member state or associated country. ERA-NET cofund actions require participation by at least three legal entities, each established in a different EU member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Under Excellent Science, Switzerland may participate as an associated country.
The total indicative budget for this call is €9 million.
Ref: OJ C6776.

Closing date: 01 Mar 16
Deadline information: Proposals invited between 10 November 2015 and 5pm Brussels time, 1 March 2016.
Posted date: 16 Oct 15
Award type: Technology innovation/development, Directed grants to institutions, research groups etc, Innovation grants, Networking/collaboration
Award amount max: -
Award amount min: -
Award budget total: €9,000,000

INTERNATIONALISATION IN THE HUMANITIES
Netherlands Organisation for Scientific Research – Nederlandse Organisatie voor Wetenschappelijk Onderzoek

Description:
The Netherlands Organisation for Scientific Research’s Division of Humanities (NWO GW) invites applications for its internationalisation in the humanities programme. This encourages international collaboration between research groups, research schools, research institutes and research departments. The collaboration must be related to a single coherent project.

Senior researchers in the humanities employed at Dutch universities or institutes recognised by NWO can apply. These include Royal Netherlands Academy of Arts and Sciences (KNAW) institutes, and the Max Planck Institute for Psycholinguistics in Nijmegen. The applicant must hold a PhD or equivalent qualification, and must have a tenured or a temporary position during the assessment of the application and for the duration of the project. Researchers not employed by a research institute recognised by NWO can be part of the network but cannot act as applicant. The application must be submitted by a Dutch research group that wants to work with at least two foreign research groups. A second Dutch research group may be involved in the project.

The total budget available for this round is €300,000 and the total project budget is at least €25,000 and at most €75,000, for a maximum duration of three years. NWO will pay a maximum of 75 per cent of the project budget, with a maximum of €50,000. At least 25 per cent must be contributed by at least two international partners.

Applications must be submitted in English.

Closing date: 02 Mar 16 (Forecast)
Deadline information: ! Call has not yet been announced by funder, but this is the approximate deadline we expect.
Applications due by 2pm. This call is repeated once a year.
Posted date: 27 Nov 14
Award type: Hosting visits, Hosting conferences, Travel to conferences, meetings etc., Travel for research purposes, Directed grants for individual investigators, Directed grants to institutions, research groups etc, Networking/collaboration

QUALITY OF LIFE GRANTS PROGRAM
Christopher and Dana Reeve Foundation

Description:
The Christopher and Dana Reeve Foundation is expected to offer quality of life grants for research that develops treatments and cures for paralysis caused by spinal cord injury and other central nervous system disorders. Quality of life grants offer support to non-profit organizations that address the needs of persons living with paralysis (particularly spinal cord injury), their families and caregivers. Funding is awarded in 13 categories, including: accessibility, advocacy, arts, assistive technology, children, counseling, education, employment, health promotion, independent living, practical service, sports and recreation, and therapeutic riding. Except for the health promotion category, the primary focus of the grants is paralysis caused by spinal cord injury. Funding is awarded for up to $25,000 for each grant. Grants will only be awarded to non-profit organizations. Applications are accepted from organizations based outside of the US, although priority is given to those with an international scope.

Closing date: 03 Mar 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated 2 times a year.

ANET LEVY FUND
American Musicological Society

Description:
The American Musicological Society invites applications from members for the Janet Levy fund. Awards cover travel and research costs for independent scholars who hold a PhD or demonstrate equivalency in their scholarly record, and who are not employed as a full-time faculty member in an institution of higher learning. Awards may support: travel to conferences, archives and libraries; research expenses; costs related to the reproduction of manuscripts and archival documents; specialised research materials.

Each award is worth between US$500 and US$2,000.

2020-EO-2016 EARTH OBSERVATION
Horizon 2020: Industrial Leadership

Description:
The European Commission Horizon 2020: Industrial leadership invites proposals, under the leadership in enabling and industrial technologies - space work programme, for its H2020-EO-2016 earth observation call. Proposals may address the following topics:

- EO-1-2016 downstream applications;
- EO-2-2016 downstream services for public authorities;
- EO-3-2016 evolution of Copernicus services.

Proposals must take the form of research and innovation actions, innovation actions or pre-
commercial procurement co-fund actions depending on the topic. Research and innovation actions and innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country. Pre-commercial procurement actions additionally require participation from a minimum of two independent legal entities which are public procurers from two different member states or associated countries.

All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each successful proposal is expected to receive between €1 million and €2m although proposals for other amounts will also be considered. The total indicative budget for this call is €21.85m.

Ref: OJ C6776.

Closing date: 03 Mar 16
Deadline information: Proposals invited between 10 November 2015 and 5pm Brussels time, 3 March 2016.

**2020-COMPET-2016 COMPETITIVENESS OF THE EUROPEAN SPACE SECTOR: TECHNOLOGY AND SCIENCE**

*Horizon 2020: Industrial Leadership*

**Description:**
The European Commission Horizon 2020: Industrial leadership invites proposals, under the leadership in enabling and industrial technologies – space work programme, for its H2020-COMPET-2016 competitiveness of the European space sector call. Proposals may address the following topics:

- COMPET-1-2016 technologies for European non-dependence and competitiveness;
- COMPET-2-2016 maturing satellite communication technologies
- COMPET-3-2016-a strategic research cluster – in-space electrical propulsion and station keeping – incremental technologies;
- COMPET-3-2016-b strategic research cluster – in-space electrical propulsion and station keeping – disruptive technologies;
• COMPET-4-2016 strategic research cluster – space robotics technologies;
• COMPET-5-2016 scientific instrumentation.

Proposals must take the form of research and innovation actions or innovation actions, depending on the topic addressed. Research and innovation actions and innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each successful proposal is expected to receive between €1 million and €11m although proposals for other amounts will also be considered. The overall indicative budget for all topics in this call is €65.85 million.

Ref: OJ C6776.

Closing date: 03 Mar 16
Deadline information: Proposals invited between 10 November 2015 and 5pm Brussels time, 3 March 2016.

Captive Care Grants
Primate Society of Great Britain

Description:
The Primate Society of Great Britain’s Captive Care Working Party invites applications for its captive care grants. These assist research of benefit to primate welfare in captivity and education projects about captive primate welfare.

Applicants must be society members.

Grants do not typically exceed £1,000 and tend to be in the range of £500 to £750.

Closing date: 04 Mar 16
Deadline information: This call is repeated once a year.
Posted date: 02 Oct 15

BATTERY FUND PROGRAMME
Energimyndigheten – Swedish Energy Agency

Description:
The Swedish Energy Agency invites applications for its battery fund programme. This aims to contribute to a sustainable usage of all battery types and energy efficiency of road vehicles through a better battery system for increased electrification.

Projects within the following areas are encouraged:

- building a scientific basis to reach targets for collecting and recycling batteries;
- improved battery systems, optimal use of cells and improved simplification potential on a system-level that are utilised for various power, energy and life performance vehicle applications;
- questions regarding optimal usage of large cells;
- power density, and materials stable at high C values.

Principal investigators may be based at universities, institutes and companies that focus on the areas concerned in Sweden. Research projects that have a clear connection to businesses are prioritised in order to facilitate dissemination and further development of the research results. International co-operation is encouraged for collaborative projects such as with China, Japan, South Korea, Germany and the US.

The programme is worth SEK50 million, and is tenable for seven years, ending on 1 March 2020.

RESEARCH AWARDS
Society for Theatre Research

Description:
The Society for Theatre Research invites applications for its research awards. These support research projects related to the history and practice of the British theatre.

Awards may help with the completion of work in progress, professional training in research techniques to assist established projects, and help with the costs of publishing completed work.

Private scholars, theatre professionals, academic staff and students, who are of any nationality, may apply.

Awards are worth between £200 and £1,000.

CADEMIC RESEARCH GRANTS
French Institute – Institut Français

Description:
The French Institute’s Canadian Research Centre for French Speakers in Minority Situations invites applications for its academic research grants. These support projects that increase understanding of the francophone experience in minority situations. Priority is given to projects addressing the following issues:

- innovative reflection on issues of cultural diversity and immigration;
- alternative community development strategies;
- issues facing young francophone Canadian adults in minority situations;
- the perception of official bilingualism in Canada.

Preference is given to start-up projects that are part of a larger research programme, and that aim to apply for larger grant schemes, as well as projects that are likely to result in publication in an academic journal or periodical.

Any worldwide individual researcher formally affiliated with an accredited university institution may apply. Emeritus professors are also eligible. Teams of researchers are eligible, providing at least half the team are university-affiliated. Preference is given to research and publications written in French.

Grants are worth up to CA$5,000 each over a maximum of two years, and may be used to cover travel, research assistant salaries, phone calls, photocopies, equipment rental and dissemination and translation costs.

Closing date: 06 Mar 16 (Forecast)

GRADUATE STUDENT RESEARCH GRANTS
French Institute – Institut Français

Description:
The French Institute’s Canadian Research Centre for French Speakers in Minority Situations invites applications for its graduate student research grants. These support thesis and dissertation projects that increase understanding of the francophone experience in minority situations. Priority is given to projects addressing the following issues:

- innovative reflection on issues of cultural diversity and immigration;
- alternative community development strategies;
- issues facing young francophone Canadian adults in minority situations;
- the perception of official bilingualism in Canada.

Applicants must be enrolled, or intending to enrol, in a master’s or doctoral programme at an accredited university institution worldwide. Preference is given to research and publications written in French.

Up to two grants, each worth up to CA$2,500, are available over a maximum of two years to cover travel, phone calls, photocopies, equipment rental and dissemination and translation costs.

COMMUNITY-BASED RESEARCH GRANTS
French Institute – Institut Français

Description:
The French Institute’s Canadian Research Centre for French Speakers in Minority Situations invites applications for its community-based research grants. These aim to expand research capability in Francophone communities by supporting projects that improve understanding of the francophone experience in minority situations, supporting research undertaken by community researchers, and by encouraging university researchers to develop partnerships with community organisations. Priority is given to projects addressing the following issues:

- innovative reflection on issues of cultural diversity and immigration;
- alternative community development strategies;
- issues facing young francophone Canadian adults in minority situations;
- the perception of official bilingualism in Canada.

Multidisciplinary projects are encouraged. Applicants must be members of the network of associations with a research interest that promotes its community’s development. Preference is given to research and publications written in French.

Grants are worth up to CA$5,000 each, over a maximum of two years to cover travel, salaries for research assistants, phone calls, photocopiers, equipment rental and dissemination and translation costs.

2020-CIRC-2016 INDUSTRY 2020 IN THE CIRCULAR ECONOMY – SINGLE STAGE
Horizon 2020: Societal Challenges

Description:
The European Commission Horizon 2020: Societal Challenges, under the cross-cutting activities programme, invites proposals for its H2020-CIRC-2016 industry 2020 in the circular economy – single stage call.

Proposals may address the following topics:

- CIRC-03-2016 new models and economic incentives for circular economy business;
- CIRC-04-2016 unlocking the potential of urban organic waste.

Proposal must take the form of research and innovation actions or coordination and support actions, depending on the topic. Research and innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country. Coordination and support actions require participation by at
least one legal entity established in a member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each award is generally worth between €1 and €3 million but other amounts may also be considered. The indicative budget of this call is €7.5 million.

Ref: C6776.

Sustainable Development & Resource Use; Waste Recycling, Reduction & Recovery

### Description:

The European Commission Horizon 2020: Societal Challenges, under the climate action, environment, resource efficiency and raw materials work programme, invites proposals for its H2020-SC5-2016 greening the economy – single stage. Proposals may address the following topics:

- climate services, including SC5-3-2016 climate services market research and SC5-5-2016 a 1.5 million year look into the past for improving climate predictions;
- towards a low-carbon Europe, including SC5-6-2016-2017 pathways towards the decarbonisation and resilience of the European economy in the timeframe 2030-2050 and beyond;
- nature-based solutions for territorial resilience, including SC5-9-2016 operationalising insurance value of ecosystems and SC5-10-2016 multi-stakeholder dialogue platform to promote innovation with nature to address societal changes;
- water, including SC5-11-2016 supporting international cooperation activities on water;
and SC5-17-2016 ERA-NET cofund on raw materials;
- earth observation, including SC5-20-2016 European data hub of the GEOSS information system;
- support to policy and preparing for innovation procurement, including SC5-23-2016-2017 cultural heritage as a driver for sustainable growth, SC5-25-2016 macro-economic and societal benefits from creating new markets in a circular economy, SC5-27-2016 preparing for pre-commercial procurement or public procurement of innovative solutions in support of climate action, environment, resource efficiency and raw materials and SC5-28-2016 transformations to sustainability.

Proposals must take the form of research and innovation actions, innovation actions, coordination and support actions or ERA-net co-fund, depending on the topic. Research and innovation actions, innovation actions and ERA-net co-fund actions require participation by at least three legal entities, each established in a different EU member state or associated country. Coordination and support actions require participation by at least one legal entity established in a member state or associated country. For SC5-16-2016 the proposal must include at least two participants from international partner countries, in addition to the minimum number of participants set out in the general annexes. International co-operation is required with the US and Japan in the field of material flow analysis. Where appropriate, synergies with the relevant EU member states initiatives are to be explored and fostered.

All H2020 funding calls allow third country partners who secure their own funding to participate in consortia. Each successful proposal is expected to receive between €50,000 and €10 million. The indicative budget for this call is €82.55 million.

**Closing date:** 08 Mar 16
Deadline information: First stage applications are invited between 10 November 2015 and 5pm, Brussels time, 8 March; second stage proposals due by 6 September 2016.

**Award amount max:** -
**Award amount min:** -
**Award budget total:** €58,000,000
Description:
The European Commission Horizon 2020: Societal Challenges, under the cross-cutting activities programme, invites proposals for its H2020-CIRC-2016 industry 2020 in the circular economy – two stage call.

Proposals may address the following topics:

- CIRC-1-2016 systemic, eco-innovative approaches for the circular economy – large-scale demonstration projects;
- CIRC-2-2016 water in the context of the circular economy.

Proposals must take the form of innovation actions. These require participation by at least three legal entities, each established in a different EU member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each award is generally worth between €6 and €10 million but other amounts may also be considered. The indicative budget for this call is €80 million.

Ref: C6776.

Closing date: 08 Mar 16

Deadline information: First stage proposals invited between 10 November 2015 and 5pm Brussels time, 8 March 2016; second stage proposals due by 5pm Brussels time, 6 September 2016.

Posted date: 15 Oct 15

Award type: Directed grants to institutions, research groups etc
Award amount max: -
Award amount min: -
Award budget total: €80,000,000

Eligibility profile

Country of applicant institution: EU (European Union), EU Associated Countries, EU All International Cooperation Partner countries (ICPC), Overseas Countries and Territories
Country of applicant institution: Any

Disciplines

Waste Recycling, Reduction & Recovery; Wastewater Treatment; Sustainable Development & Resource Use
Proposals must take the form of innovation actions. These require participation by at least three legal entities, each established in a different EU member state or associated country. Consortia should involve competent local, city and regional authorities, community groups, enterprises, academics and local communities in a clear structure with well-defined roles and responsibilities for all involved parties.

Each project must involve at least two front-runner cities and three follower cities from different EU member states or associated countries. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each proposal may receive at least €10 million. The indicative budget for this call is €40m.

Ref: OJ C6776.

**2020-SCC-2016 SMART AND SUSTAINABLE CITIES – TOPICS 3 AND 4**

*Horizon 2020: Societal Challenges*

**Description:**
The European Commission Horizon 2020: Societal Challenges invites proposals, under the cross-cutting activities work programme, for its H2020-SCC-2016 smart and sustainable cities call. Proposals may address the following topics:

- sustainable cities through nature-based solutions, including SCC-03-2016 new governance, business, financing models and economic impact assessment tools for sustainable cities with nature-based solutions and SSC-04-2016 sustainable urbanisation.

Proposals must take the form of research and innovation actions or ERA-NET cofund actions, depending on the topic. Research and innovation actions and ERA-NET cofund actions require participation by at least three legal entities, each established in a different EU member state or associated country.
EU member state or associated country and independent from each other. Participants in ERA-NET cofund actions must be research funders, meaning legal entities owning or managing public research and innovation programmes.

Participation of legal entities from international countries or regions, in particular with countries participating in the Belmont Forum, is encouraged, as are other joint activities including additional joint calls without EU co-funding.

Participant countries which are not eligible for funding may request a Union contribution for the coordination of costs of additional activities. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each proposal may receive between €5 million and €7.5m, although larger projects may be considered. The indicative budget for this call is €20 million.

**RESEARCH SEED FUNDING GRANT**  
*American Association of Physicists in Medicine*

**Description:**
The American Association of Physicists in Medicine, under the Education and Research Fund, invites applications for its research seed funding grant. This enables association members to develop investigator-initiated concepts in medical physics. The project should hopefully lead to longer-term project funding from another source.

Applicants must be members of the AAPM, have received a PhD degree within the previous five years and must not have received previous grants superior to US$50,000 as a principal investigator.

Two grants of US$25,000 are available for a one-year period.

**Closing date:** 10 Mar 16 (Forecast)
**Deadline information:** !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.
**Posted date:** 23 Oct 13

**Award type:** Directed grants for individual investigators

ESEARCH GRANTS

British Ecological Society

Description:
The British Ecological Society invites applications for its research grants. These support innovative ecological research and pump-priming projects, and help early-career ecologists to establish an independent research career. Two levels of funding are available:

- small project grants, worth up to £5,000 each;
- Early-career ecologists grants, worth up to £20,000 each, for investigators who obtained their PhD or DPhil within the last five years, or have submitted a thesis for examination prior to the closing date for applications.

There are no restrictions on nationality but all applicants must be current members of the society. Applications for projects based outside the UK should demonstrate liaison with collaborating organisations, local environmental agencies, non-governmental organisations or communities.

Funding may be used for the employment of casual and short-term assistance, the purchase of small items of equipment, consumables or recurrent costs, and reasonable travel costs.

Closing date: 11 Mar 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect.

Applications due by 5pm BST. This call is repeated 2 times a year.
Posted date: 07 Jul 15

OUTREACH GRANTS
British Ecological Society

Description:
The British Ecological Society invites applications for its outreach grants. These encourage individuals and organisations to promote ecological science to a wider audience through the organisation of public engagement events in ecology. Grants support projects that:

- increase public understanding of, and engagement with, ecology;
- stimulate discussion about ecology and its implications for society;
- inspire and enthuse people of all ages about the science of ecology, especially those not previously interested;
- develop skills in communicating the science of ecology.

Individuals and organisations, including society members, researchers, schools, museums, libraries and community groups, may apply. Objectives must be aimed at a non-academic audience and provide a clear demonstration of direct interaction with the public.
Grants are worth up to £2,000 each.

Closing date: 11 Mar 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect.
Applications due by 5pm BST.

JINOMOTO INNOVATION ALLIANCE PROGRAMME GRANTS
Ajinomoto

Description:
Ajinomoto invites proposals for the Ajinomoto innovation alliance programme grants. These support a wide range of research related to nutritional and food sciences, including:
• application of amino acids;
• metabolic engineering, bioinformatics and synthetic biology for bio-based materials;
• biopharmaceutical manufacturing technology;
• animal, plant and fishery nutrition;
• nutritional needs, gustatory preference and activity of the aged;
• improvement of malnutrition in developing countries;
• mechanism of food palatability;
• measurement of food palatability;
• psychological and ethnological approaches to food choice;
• technology related to food texture and mouth feel;
• sports science and nutrition;
• clinical OMICS and biomarkers for cancer diagnostics, personalised medicine and personalised nutrition;
• materials for regenerative medicine;
• next generation materials for electronic industry and functional chemicals.

Applications are invited from research institutions, academia, companies and other organisations exploring the fields of medicine, veterinary science, pharmacology, physiology, biology, nutritional science, botany and chemistry. Applications must be submitted in English. Grants are worth up to US$100,000 in direct costs per year for a maximum project period of two years.

Closing date: 11 Mar 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

Research Fellow
Society for Pediatric Radiology Research and Education Foundation

Description:
The Society for Pediatric Radiology Research and Education Foundation invites applications for its research fellow program. The aim of this program is to provide young investigators not yet professionally established in the radiologic sciences with an opportunity to gain further insight into scientific investigation and to develop competence in research techniques and methods. The grant can be used to fund protected time for a one or two-year fellowship, or as a transition-to-faculty award to buy additional time within the first five years of faculty appointment.

Applications are welcome from individuals who hold a full-time position in an educational institution. Applicants must be in a department of diagnostic radiology, radiation oncology or nuclear medicine and have completed all advanced training. The award is limited to members in fellowship or the first five years of their first faculty appointment.

The award provides $30,000 salary support for one year.

Closing date: 14 Mar 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

GRANTS-IN-AID OF RESEARCH  
Sigma Xi, The Scientific Research Society

Description:  
Sigma Xi is inviting applications under its grants-in-aid of research programme. The programme awards grants of US$1,000 or less to students to support scientific investigation in any field. Designated funds from the National Academy of Sciences allow for grants of up to US$5,000 for astronomy research and US$2,500 for vision related research. Students can use the funding to pay for travel expenses to and from a research site, or for purchase of non-standard laboratory equipment necessary to complete a specific research project. Only undergraduate and graduate students currently enrolled in degree seeking programs may apply. International students and non-US citizens are encouraged to apply.

Closing date: 15 Mar 16 (Forecast)

EPIDERMOLYSIS BULLOSA RESEARCH GRANTS
DEBRA International

Description:
The Dystrophic Epidermolysis Bullosa Research Association invites applications for its research grants. These support proposals that lie within DEBRA’s current research priorities, which are:

- biology and genetics of all forms of EB, as better understanding can lead to new approaches to treat EB;
- development of therapies, including possible gene, cell, drug or protein therapies;
- wound healing and skin cancer in EB;
- clinical care research to improve management of EB through symptom relief.

DEBRA welcomes proposals for co-funding with other organisations, including government, academia, industry or other charities.

Funding is granted for projects lasting between six months and three years with a maximum of €80,000 per year. However, funding in excess of these amounts may be allowed, if considered by DEBRA to be adequately justified in the grant application and subject to funding availability.

Closing date: 15 Mar 16

Deadline information:
Posted date: 24 Aug 15

ERNER-GRAY FUND FOR MARINE RESEARCH
American Museum of Natural History

Description:
The American Museum of Natural History invites applications for the Lerner-Gray fund for marine research. This supports individuals who are starting their careers in marine zoology.
The proposal must deal with systematics, evolution, ecology or field-oriented behavioural studies of marine animals; however, research in botany, biochemistry or ornithology is not supported. Research should be conducted at the AMNH or in the field.

Each grant, generally worth between US$500 and US$2,500, is meant to act as seed money for a new researcher.

Closing date: 15 Mar 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect.
Applications due by 11:59pm EST. This call is repeated once a year.

**STUDENT RESEARCH GRANTS**
*Clay Minerals Society*

**Description:**
The Clay Minerals Society invites applications for its student research grants. These support research in clay science and technology.

Postgraduate students of clay science or technology may apply. There are no restrictions with regard to nationality, gender, age or CMS membership.

Grants are worth a maximum of US$3,000 and may be used for travel costs, room and board associated with research-related field work or for the costs of equipment, supplies, and analyses required to complete the research. Grant recipients automatically receive a one-year student membership in the CMS which will begin January of the year following receipt of the grant.

Closing date: 15 Mar 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the
Grants from External Donors (January – March, 2016)

**TARGETED RESEARCH AREAS GRANTS**

American Society for Theatre Research

**Description:**
The American Society for Theatre Research invites applications for its targeted research areas grants. The purpose is to support specific projects by scholars working in areas that are currently underrepresented by ASTR. Such areas include: pre-1900 research, and Asian, African, Latin American and Middle Eastern theatre, dance and performance. Translations of important theatre documents will also be considered.

Independent, tenured or untenured scholars who are currently members of ASTR and hold a terminal degree, or graduate students who are applying in support of a project that is not directly related to their dissertation are eligible.

Up to US$3,000 per year may be awarded to support one or more grants.

**Closing date: 15 Mar 16 (Forecast)**

**Deadline information:** Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

Society for Pediatric Radiology Research and Education Foundation

Description:
The Society for Pediatric Radiology Research and Education Foundation invites applications for its seed grants. The aim of these grants is to assist investigators in defining objectives and testing hypotheses before they apply for major grants from corporations, foundations or government agencies. Any area of pediatric radiology-related research is eligible.

Applications are welcome from SPR members who hold a full-time faculty position in an educational institution at the time the award commences. Applicants must be in a department of diagnostic radiology, radiation oncology or nuclear medicine and have completed all advanced training. The grants provide up to $10,000 for a one-year funding period.

Closing date: 15 Mar 16
Deadline information: Deadlines on: 15 March 2016, 15 October 2016, and repeated annually.

ANGLO-AUSTRALIAN TELESCOPE OBSERVING TIME
Australian Astronomical Observatory

Description:
The Australian Astronomical Observatory invites applications for observing time on the Anglo-Australian Telescope. This scheme allows for observing time on the telescope, providing access to and use of the facilities and instruments at the observatory. The following instruments are available for the 2016A round:

- AAOmega and 2dF MOS;
- AAOmega and KOALA IFU;
- HERMES and 2dF MOS;
- IRIS2;
- UCLES, including CYCLOPS2;
- SAMI.

AAO and the National Optical Astronomy Observatory’s division Cerro Tololo Inter-American Observatory have initiated a time-swap arrangement, to allow their respective communities access to a broader range of facilities. In semester 2016A there will be five nights available to the Australian community to apply for CTIO time.

Proposals must require more than six hours of observing time. If projects require fewer than six hours of observing time, they can be performed in service time. Applicants must add on a 33 per cent allowance for bad weather to the total estimated time. No special consideration is given to proposals involving PhD students, except when attempting to schedule proposals near the cut-off, when some priority may be given.

For each run involving Australian-based observers, the AAO will normally pay one astronomer and one student a fixed amount for travel to the telescope or to Coonabarabran or Sydney accommodation costs for the length of the run plus one night.

Closing date: 15 Mar 16 (Forecast)
Deadline information: If Call has not yet been announced by funder, but this is the approximate deadline we expect. Proposals due by 5pm AEDT.
Posted date: 17 Aug 15

OUTREACH FUND
European Society for Evolutionary Biology

Description:
The European Society for Evolutionary Biology invites applications for grants under its outreach fund. These aim to promote evolution-related activities to improve public knowledge about evolution globally.

Applications for funding will be accepted for educational initiatives that promote evolution, translation of evolutionary material intended for a general audience, public outreach seminars, public exhibitions etcetera.

Grants are worth between €1,000 and €1,500 per project, however exceptions can be made if a strong argument is provided for additional funds.

Closing date: 15 Mar 16
Deadline information: Deadlines on: 15 March 2016, 15 September 2016, and repeated annually.
Posted date: 05 May 15

Standard Grants
International Visegrad Fund

Description:
The International Visegrad Fund invites applications for its standard grants. These support projects in the following fields: cultural cooperation, scientific exchange and research, education; youth exchange, cross-border cooperation and promotion of tourism.

Any organisation or natural person in the world may apply, though projects must include entities from at least three, and preferably four, V4 countries (Czech Republic, Hungary, Poland and Slovakia). Cross-border projects may involve a minimum of two different V4 countries. Most recipients are non-governmental organisations, municipalities, schools or other public institutions.
The annual budget for this is €2.2 million. Funding is worth a minimum of €6,001 per project, and will cover a maximum of 80 per cent of eligible costs. The average grant is worth between €10,000 and €15,000 over a maximum of one year.

Closing date: 15 Mar 16
Deadline information: Applications due by 11.59am CET. Deadlines on: 15 March 2016, 15 September 2016, and repeated annually.
Posted date: 02 Apr 15
Award type: Directed grants for individual investigators, Directed grants to institutions, research groups etc, Networking/collaboration
Award amount max: -
Award amount min: €6,001
Award budget total: €2,200,000

DOCTORAL EXCHANGE GRANTS
Zeno Karl Schindler Foundation

Description:
The Zeno Karl Schindler Foundation invites applications for its doctoral exchange grants. These support collaborative inter-university doctoral research in engineering, environmental sciences, medieval disciplines, including medieval studies, and digital humanities. The aim is to encourage research collaboration between two universities, the home university of the doctoral candidate and a hosting university of which one of the two preferably situated in Switzerland.

The grant is worth a stipend of CHF2,500 per month, economy-class return airfare from the home to the hosting university and research expenditures for the duration of the stay at the hosting university. Funding is available for four to 12 months.

Closing date: 15 Mar 16
Deadline information: Deadlines on: 15 March 2016, 15 September 2016, and repeated annually.

ASP DEVELOPED-DEVELOPING COUNTRIES COLLABORATIVE RESEARCH GRANTS
International Association for the Study of Pain

Description:
The International Association for the Study of Pain invites applications for its developed-developing countries collaborative research grants. These are given to laboratories located in different countries, one of which must be a developed country and one of which must be a developing country to support international and interdisciplinary collaborations in pain research. Collaborations between basic science and clinical research groups will receive priority. The principal investigators in charge of the overall projects in both countries must be members of IASP of at least one year’s standing. Funds will be administered for the project by the institution of the principal investigator. Two grants of up to US$15,000 are available, to cover travel and accommodation costs.

Closing date: 15 Mar 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.
Posted date: 08 Feb 13
Award type: Travel for research purposes, Directed grants to institutions, research groups etc

AFRICAN STUDIES CENTRE–INTERNATIONAL INSTITUTE FOR ASIAN STUDIES
JOINT FELLOWSHIP PROGRAMME
International Institute for Asian Studies

Description:
The International Institute for Asian Studies, in collaboration with the African Studies Centre, invites applications for the ASC–IIAS joint fellowship programme. This supports researchers specialising in Asian-African interactions. The programme aims to attract researchers whose work is informed by current theoretical debates in the social sciences and humanities over global connectivities. Researchers must be able to engage with shifting paradigms in area studies beyond the methods traditionally used in the Western.

Candidate must have a PhD.

The fellowship includes a monthly grant towards living and housing costs for a maximum period of six months.

Closing date: 15 Mar 16
Deadline information: This call is repeated 2 times a year.

Posted date: 19 Jun 15

CLINICAL RESEARCH PROPOSALS
ResMed Foundation

Description:
The ResMed Foundation invites proposals for its clinical research grants. These support novel research, and physician and public awareness of sleep-disordered breathing, with a primary focus on positive airway pressure therapies and ventilation treatments. Other areas of interest include: cardiovascular disease; metabolic syndrome, diabetes; morbid obesity,. hypertension, coronary artery disease, heart failure; atrial fibrillation; occupational health and safety; asthma; anaesthesiology; chronic obstructive pulmonary disease; pregnancy and preeclampsia.

Each recipient must have tax-exempt status in their country, and must be a not-for-profit organisation and a legitimate research institution.
Grants are typically limited to US$250,000.

Closing date: 15 Mar 16
Deadline information: Deadlines on: 15 March 2016, 15 September 2016, and repeated annually.

NETWORK COOPERATION GRANT
Alzheimer’s Research UK

Description:
Alzheimer’s Research UK invites applications for its network cooperation grant. This supports projects or schemes that further cooperation and collaboration between at least two of the organisation’s network centres. The work should address the causes, cures, prevention, diagnoses and treatments of Alzheimer’s disease and related dementias. The lead applicant and point of contact must be a member of an ARUK network, with each application including at least one more network centre as a co-applicant. Applications may include researchers or institutions outside the UK. If the lead applicant does not hold a fixed-term or tenure appointment for the duration of the grant, the application must include a co-applicant who does.

The grant is worth up to £100,000 over a maximum period of two years. Funds may be used to cover staff salaries, equipment, animals, running costs, or any combinations of these.

PILOT PROJECT GRANTS
Alzheimer's Research UK

Description:
Alzheimer's Research UK invites applications for its pilot project grants. These fund small, innovative research projects and pilot studies that, if successful, can lead to a major project or programme application to ARUK or other funding body. The work should address the causes, cures, prevention, diagnoses and treatments of Alzheimer’s disease and related dementias.

The lead applicant and point of contact must be based in a UK academic or research institution, however the application may include researchers or institutions outside the UK. If the lead applicant does not hold a fixed-term or tenure appointment for the duration of the grant, the application must include a co-applicant who does.

Grants are worth up to £50,000 each over a maximum period of two years. Funding may be used to cover staff salaries, equipment, animals, running costs or any combination of these.

VINNMER MARIE CURIE INCOMING – CALL FOR PROPOSALS
Vinno Verket för Innovationssystem – Swedish Governmental Agency for Innovation Systems

Description:
The Swedish Governmental Agency for Innovation Systems (Vinnova) and the H2020 Marie Curie actions invite applications for its VINNMER Marie Curie incoming call, under the Mobility for Growth programme. This aims to support experienced researchers through mobility and international collaborations for career development. The overall objectives of the programme are as follows:

- intersectorial mobility – promoting mobility between the private and public sectors;
- translational mobility – promoting researcher mobility and developing attractive careers;
- qualified future leaders in research and innovation – advancing training and skills demand through enhanced human resource management in highly competitive environments;
- equal opportunities – advocating and promoting better work, life and gender balance through flexible working arrangements under full employment contracts;
- supporting mobility as a merit – a mobile career should be a strong future merit in all sectors conducting R&I.

Experienced researchers of all nationalities who have at least four years of research experience may apply. For highly experienced researchers, with more than ten years research experience, collaboration is optional. The Swedish-based organisation is the applicant and formal recipient of the grant but the researcher should be the project leader for the research project and the main author of the application.

The total programme budget is worth up to SEK120 million and includes a co-financing budget from applicants ranging in size from SEK100m to SEK150m and EU funding via Marie Curie actions of EUR10m. Applicants may apply for 50 per cent of salary costs. The budget for each call will depend on the quality of the proposals and the overall programme budget.

Closing date: 16 Mar 16

NETWORK ACCELERATE SCHEME
Alzheimer’s Research UK

Description:
Alzheimer’s Research UK invites applications for its network accelerate scheme. This provides funds for research resources or tools that could be of benefit to biomedical dementia research in the ARUK network and beyond. This could include the generation and validation of reagents, the maintenance or creation of research resources or scientific networking beyond what could normally be covered by network centre grants.

The lead applicant must be an ARUK network member, and the application must include at least two network centres. It can also include researchers or institutions outside the UK. The lead applicant or a co-applicant must hold a fixed-term or tenure contract throughout the proposed duration of the grant.

Funding is worth up to £250,000 per network and covers staff salaries, equipment, animals, running costs, or any combinations of these.

EXTENDED DEADLINE: NORDIC CENTRES OF EXCELLENCE – ADVANCING THE BIOECONOMY TRANSITION IN THE NORDIC REGION
Nordforsk

Description:
Nordforsk has extended the closing date for its call on Nordic centres of excellence: advancing the bioeconomy transition in the Nordic region. The previous deadline of 3 February has been extended to 16 March 2016. All other call details remain the same. ***

This call aims to produce new knowledge on how to foster and advance the transition to a bioeconomy-based society in the Nordic
countries by integrating research, innovation and entrepreneurship in the private and public sectors. The programme aims to fund activities that are cross-sectoral and interdisciplinary, and that involve the private and public sector and other stakeholders.

Only consortia are eligible to apply. The consortium must involve partner institutions from at least three of the funding countries, which include Finland, Iceland, Norway and Sweden. Partner institutions from Denmark, including the Faroe Islands and Greenland, may participate. Partner institutions from outside the Nordic region must fund their own participation. The host institution must be a research institution based in one of the funding countries, and the project leader of the consortium must be a senior researchers at the host institution.

The total budget for the programme is NOK90 million and aims to fund three Nordic centres of excellence. Each centre may receive up to NOK30m over five years. Funding may be used for salaries, administration, travel expenses, PhD and postdocs, and communication and dissemination. The consortium is expected to contribute significant own financing.

Closing date: 16 Mar 16
Deadline information: Phase one proposals due by 2pm CET, 16 March; invited phase two full proposals due by 2pm CEST, 7 September 2016.

H2020-INNOSUP-2016-2017 FOR A BETTER INNOVATION SUPPORT TO SMES – TOPIC 5
Horizon 2020: Industrial Leadership

Description:
The European Commission Horizon 2020: Industrial Leadership, under the Innovation in SMEs work programme, invites proposals for its H2020-INNOSUP-2016-2017 for a better innovation support to SMEs call.
Proposals must address the topic INNOSUP-05-2016-2017 peer learning of innovation agencies.

The proposed activities will provide incentives in the form of small lump sum grants to national and regional innovation agencies for engaging in peer learning on all topics relevant for design and delivery of innovation support programmes for SMEs.

Proposals must take the form of coordination and support actions. These require participation by at least one legal entity established in a member state or associated country. Only entities entrusted by national or regional governments to develop or implement innovation support programmes for SMEs are eligible to apply. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

Each successful proposal is expected to receive between €15,000 and €50,000 although proposals for other amounts will also be considered. The total indicative budget for this call is €1 million.

Research Project Grants
Cancer Council South Australia

Description:
The Cancer Council South Australia and the Government of South Australia invite applications for their research project grants. These support studies into cancer across the research spectrum, including biomedical, clinical, health-services and population-health research.

Research must be carried out in South Australia with the chief investigator affiliated with an administering institution located in South Australia. International collaboration is encouraged as well as applications from public health researchers.

Grants are worth up to AU$100,000 for one year.
PUBLIC ENGAGEMENT GRANT
Society for Applied Microbiology

Description:
The Society for Applied Microbiology invites applications for its public engagement grant. This supports events where aspects of microbiology are promoted to the general public and other relevant stakeholders.

Applications are open to members and non-members of the society. Members should have no funding from any additional source. In addition, expert public engagement specialists or science communicators are eligible to apply.

The grant is worth up to £3,000.

Closing date: 18 Mar 16 (Forecast)

IHR DOCTORAL FELLOWSHIPS – SCoufloudi, Thornley, Royal Historical Society

Institute of Historical Research

Description:
The Institute of Historical Research invites applications for its IHR doctoral fellowships – Scoufloudi, Thornley, Royal Historical Society. These fellowships are awarded to doctoral students engaged in the completion of a PhD in history. The following fellowships are available:

- up to two Royal Historical Society fellowships, worth £15,726 each, open to candidates without regard to nationality or academic affiliation;
- up to four Scoufloudi Foundation fellowships, including three full year fellowships worth £15,726 each and one half year fellowship worth £7,863, open to UK citizens or to candidates with a degree from a UK university;
- one Isobel Thornley Bequest fellowship, worth £12,500, open to candidates regardless of nationality but only to those registered for a PhD at the University of London.

Applicants should have completed at least three years of full-time or four years of part-time research on their doctoral programme at the beginning of the session for which the awards are made.

Fellowships are tenable for up to one year.

Closing date: 20 Mar 16 (Forecast)

EXTENSION GRANT
Alzheimer’s Research UK

Description:
Alzheimer’s Research UK invites applications for its extension grant. This enables holders of the organisation’s major grants to receive additional funding for advances in knowledge or available technology that were not predicted in the initial application, but that could significantly enhance the overall outcome of the project.

The lead applicant and point of contact must be based in a UK academic or research institution, however the application may include researchers or institutions outside the UK. The lead applicant should have a fixed term or tenure contract for the proposed duration of the grant.

Only one extension grant will be permitted per Alzheimer’s Research UK major grant.

The grant is worth up to £100,000 for up to one year.

Funding covers staff salaries, equipment, animals, running costs, or any combinations of these.

Closing date: 20 Mar 16 (Forecast)

TRANSLATIONAL RESEARCH INITIATIVE FOR HEARING GRANT
Action on Hearing Loss

Description:
Action on Hearing Loss invites expressions of interest for its translational research initiative for hearing grant. This aims to help strengthen the translation of fundamental research towards patient benefit. The grant supports research with a strong commercial potential that is likely to attract follow-on funding at the conclusion of the project, and studies that facilitate and enable the progression of promising basic research towards testing in clinical trials. Proposals are accepted in the following areas:

- small molecule, gene or cell-based approaches for the treatment of hearing loss or tinnitus, including studies that enable lead optimisation or candidate selection, mechanism of action studies, pharmacokinetic and pharmacodynamic studies, and safety and toxicology studies;
- research that addresses at least one of the following challenge topics, namely validation of therapeutic targets for the treatment of hearing loss or tinnitus, studies to strengthen confidence that a target or therapeutic approach may be applicable to human
hearing loss or tinnitus, and preclinical model validation;
• identification or validation of methods or outcomes that could be used for patient selection and stratification for clinical trials, or robust measurement of treatment responses in clinical trials.

Applicants can be from any country and may be from academic institutions or small or medium enterprises. Grants are worth up to £100,000 each per year over three years.

Closing date: 22 Mar 16 (Forecast)
Deadline information: !!! Call has not yet been announced by funder, but this is the approximate deadline we expect.
Expressions of interest due by 5pm GMT. This call is repeated once a year.

ANNUAL COMPETITION CALL
Institution of Occupational Safety and Health

Description:
The Institution of Occupational Safety and Health invites proposals for its annual competition call. This supports high quality research that will provide an evidence base for effective occupational safety and health. The following topics are of particular interest:

• OSH practitioner demonstrations, which engage OSH practitioners as part of their field work and build practical high quality links between research and practice;
• non-UK projects, where the study topic is not UK based, or where the needs of practitioners across the globe are considered;
• evidence-based research on health and safety performance on major construction projects;
• evidence-based research on health and safety risks associated with healthcare provision in the NHS;
• transitional arrangements during organisational change;

A

RESEARCH GRANTS

Action for A-T

Description:
Action for A-T invites applications for its research grants. These fund scientific research that leads to a greater understanding of ataxia telangiectasia and which may slow down, halt or reverse its progression, with the ultimate goal of realising a cure. Research should result in one of the following outcomes:

- advance the understanding of the underlying mechanisms that lead to A-T;
- identify interventions which will stop or slow down the progression of A-T;
- find ways to repair the damage done by A-T;
- develop treatments that relieve and ultimately cure symptoms caused by A-T.

The principal applicant must be in a tenured position at the host university, which must be an established research institution in the UK or overseas. Priority is given to UK-based projects.

Grants are worth up to £100,000 each over a maximum period of three years. Funding may cover any combination of salaries, equipment and consumables provided all costs are justified within the application.

Closing date: 28 Mar 16
Deadline information: Applications are invited between 7 December 2015 and 28 March 2016. This call is repeated once a year.
Posted date: 11 Aug 15
Award type: Directed grants for individual investigators, Directed grants to institutions, research groups etc

FRICA WORKSHOP
American Political Science Association

Description:
The American Political Science Association, in partnership with the University of Botswana, invites applications for participation in its Africa workshop. This workshop on local communities and the state in Africa, with a focus on field research methods, will be held from 15 to 27 July 2012 at the University of Botswana in Gaborone. The workshop will conceptualise and study:

- interactions between local communities and the state that go beyond a narrow geographical concentration on a particular community;
- linkages that connect local, national and transnational actors.

University and college faculty in the social sciences residing in Africa, who have completed their PhD and are in the early stages of their academic career may apply. A limited number of places are also available for advanced US PhD students. Applicants must be actively engaged in an empirical research project in political science or an area of inquiry related to politics. Applicants must be working on a manuscript, paper, book chapter or article for publication. Applicants must be professionally fluent in English. The organisers will cover the costs of participation, including travel, lodging, meals and workshop materials, for up to 26 applicants.

Closing date: 30 Mar 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

SUPPORT OF PROJECTS
Fritz Thyssen Stiftung – Fritz Thyssen Foundation

Description:
The Fritz Thyssen Foundation invites applications for grants in support of projects. These encourage research in the humanities, social science and biomedicine fields. Applications are open within the following areas of support:

- history, language and culture;
- the interdisciplinary field ‘image and imagery’;
- state, economy and society;
- the interdisciplinary field ‘international relations’;
- medicine and the natural sciences.

Interdisciplinary projects are also welcomed.

Applications may be submitted from a university or other non-profit research institution. Applicants must have completed a doctoral or post doctoral degree. Young academics can apply for their own post within the framework of a project. The applicant must be actively involved in the research work plan for the project.

Grants cover personnel costs, travel expenses and one-time expenditures for equipment and materials for a period of up to three years.

Closing date: 30 Mar 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated 2 times a year.

COMING SOON: ICYS RESEARCHER POSITIONS
National Institute for Materials Science

Description:
The National Institute for Materials Science invites nominations for its researcher positions at the International Centre for Young Scientists. The next round is scheduled from 1 March to 30 March 2015. The following information is subject to change.

These positions enable young scientists to pursue innovative research on broad aspects of materials science using the most advanced facilities in NIMS. Researchers may be located at several stations, including the ICYS sites in Sengen and Namiki, ICYS-MANA, ICYS-ESICMM or ICYS-GREEN.

Applicants must have obtained a PhD degree within the last ten years. Proficiency in English is required, as all management and scientific discussions will be conducted in English.

The earliest start date is 1 September 2015 and the latest start date is 1 March 2016. Funding is worth between ¥5.03 million and ¥5.35m per year for a period of up to three years. A research grant of ¥2m per year will also be supplied.

Closing date: 30 Mar 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated 2 times a year.
Posted date: 20 Feb 15

**2020-INFRADEV-2016-2017 DEVELOPMENT AND LONG TERM SUSTAINABILITY OF NEW PAN-EUROPEAN RESEARCH INFRASTRUCTURES, TOPIC 3**  
*Horizon 2020: Excellent Science*

**Description:**
The European Commission Horizon 2020: Excellent Science, under its European research infrastructures programmes, invites proposals for its H2020-INFRADEV-2016-2017 development and long term sustainability of new pan-european research infrastructures call. Proposals may address the following topic: INFRADEV-3-2016-2017 individual support to ESFRI projects and other world-class research infrastructures.

Projects must take the form of coordination and support actions. Coordination and support actions require participation by at least one legal entity established in a member state or associated country. Under Excellent Science, Switzerland may participate as an associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia.

The indicative budget for this call is €30 million in 2016 and €40m in 2017. Each successful proposal is expected to receive between €2 and €4m, although proposals for other amounts will also be considered.

Ref: OJ C6776.

**Closing date:** 30 Mar 16  
**Deadline information:** Proposals invited between 8 December 2015 and 5pm Brussels time, 30 March 2016.  
**Posted date:** 15 Oct 15  
**Award type:** Directed grants to institutions, research groups etc, Innovation grants, Networking/collaboration  
**Award budget total:** €70,000,000

**2020-INFRAIA-2016-2017 INTEGRATING AND OPENING RESEARCH INFRASTRUCTURES OF EUROPEAN INTEREST – TOPIC 1**  
*Horizon 2020: Excellent Science*

**Description:**
The European Commission Horizon 2020: Excellent Science, under the European research infrastructures programmes, invites proposals for its H2020-INFRAIA-2016-2017 integrating and opening research infrastructures of European interest call. Proposals may address the following topic:
• INFRAIA-1-2016-2017 integrating activities for advanced communities.

Projects must take the form of research and innovation actions. Research and innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country. Under these topics, legal entities established in Australia, Brazil, Canada, China, India, Japan, Russia, Mexico and USA, which provide access to their research infrastructures to researchers from EU and AC, are eligible for funding from the Union. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia. Under Excellent Science, Switzerland may participate as an associated country.

The indicative budget for this call is €160 million. €88m is available for 2016 and €72m is available for 2017. Each successful proposal is expected to receive up to €10m, although proposals for other amounts will also be considered.

Ref: OJ C6776.

Closing date: 30 Mar 16
Deadline information: Proposals invited between 10 November 2015 and 5pm Brussels time, 30 March 2016.

H2020-INFRAINNOV-2016 FOSTERING THE INNOVATION POTENTIAL OF RESEARCH INFRASTRUCTURES – TOPIC 2
Horizon 2020: Excellent Science

Description:
The European Commission Horizon 2020: Excellent Science, under its European research infrastructures programmes, invites proposals for its H2020-INFRAINNOV-2016-2017 fostering the innovation potential of research infrastructures call.

Proposals may address the following topic: INFRAINNOV-2-2016 support to technological infrastructures.
Projects must take the form of coordination and support actions. Coordination and support actions require participation by at least one legal entity established in a member state or associated country. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia. Under Excellent Science, Switzerland may participate as an associated country.

The indicative budget for this call is €10 million. Each successful proposal is expected to receive up to €2m, although proposals for other amounts will also be considered.

**2020-INFRASUPP-2016 SUPPORT TO POLICY AND INTERNATIONAL COOPERATION, TOPIC 1 & 3**

*Horizon 2020: Excellent Science*

**Description:**

The European Commission Horizon 2020: Excellent Science, under its European research infrastructures programmes, invites proposals for its H2020-INFRASUPP-2016-2017 support to policy and international cooperation call. Proposals may address the following topics:

- INFRASUPP-01-2016 policy and international cooperation measures for research infrastructures;
- INFRASUPP-03-2016 support to policies and international cooperation for e-infrastructures.

Projects must take the form of coordination and support or research and innovation actions. Coordination and support actions require participation by at least one legal entity established in a member state or associated country. Research and innovation action requires at least three legal entities. Each of the three must be established in a different EU Member State or Horizon 2020
associated country and must be independent of each other. All H2020 funding calls allow third country partners who secure their own funding to participate in consortia. Under Excellent Science, Switzerland may participate as an associated country.

The indicative budget for this call is €15.5 million. Each successful proposal is expected to receive between €1.5m and €2m, although proposals for other amounts will also be considered.

UGGLES-GATES FUND FOR BIOLOGICAL ANTHROPOLOGY
Royal Anthropological Institute of Great Britain and Ireland

Description:
The Royal Anthropological Institute invites
applications for the Ruggles-Gates fund for
biological anthropology. This supports
research in biological anthropology with focus
on human population biology, human
genetics, human ethology and
palaeoanthropology.

There are no restrictions on age, sex, religion,
ethnic origin or nationality. Preference will be
given to those proposing to do fieldwork
outside the UK. Individuals already in
possession of a doctorate are not eligible.

Grants are worth up to £1,000.

Closing date: 31 Mar 16
Deadline information: This call is repeated
once a year.
Posted date: 28 Aug 15
Award type: Directed grants for individual
investigators

International Association for the Study of Pain

Description:
The International Association for the Study of Pain invites proposals for its collaborative research grants. The purpose of these grants is to support multidisciplinary collaborative research in pain research between two or more research groups located in different countries. Priority will be given to collaborations between basic science and clinical research groups.

The principal investigator in charge of the overall project must be a member of IASP of at least one year’s standing. The maximum grant awarded will be worth US$15,000. The grants will cover travel and accommodation costs to support collaborative research by two or more research groups located in different countries. All applications must be submitted in English.

Closing date: 31 Mar 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

Antarctic Science

Description:
Antarctic Science invites applications for its career development bursaries. These support career development of promising young scientists who are working in any field of Antarctic science. Bursaries seek to broaden the scope of an existing research project, especially for postdoctoral studies, through funding extra field or laboratory work, purchasing or contributing towards the cost of a key piece of equipment, or funding international collaboration.
Applicants should normally be enrolled in a PhD programme or employed as an early-career researcher.

Awards are worth up to £5,000 each.

Closing date: 31 Mar 16
Deadline information: Applications due by 12 midnight GMT. This call is repeated once a year.
Posted date: 08 Jun 15
Award type: Travel for research purposes, Directed grants for individual investigators, Directed grants to institutions, research groups etc, Equipment and materials, Networking/collaboration

PHD INTERNSHIPS
World Institute for Development Economics Research of the United Nations University

Description:
The World Institute for Development Economics Research of the United Nations University invites applications for its PhD internships. These offer registered doctoral students an opportunity to utilise the resources and facilities at UNU-WIDER for their PhD dissertation or thesis research, and to work with researchers in areas related to developing economies. Internships typically last from two to three months and take place in UNU-WIDER’s facilities in Helsinki, Finland. PhD interns prepare one or more research papers and present a seminar on their research findings. They may also have the opportunity to publish their research in UNU-WIDER’s working paper series.

Applicants must be enrolled in a PhD programme and have shown ability to conduct research on developing economies. Candidates working in other social sciences may apply, but should keep in mind that UNU-WIDER is an economics-focused institute. Fluent oral and written English skills are required. Preference is given to applicants who are living or working in developing countries, and who are at later stages of their PhD.

Internships include a travel grant, medical insurance and a monthly stipend of €1,600 to cover living expenses in Helsinki.

Closing date: 31 Mar 16
Deadline information: Applications are invited between 1 March and 11.59pm EET, 31 March, and 1 September and 11.59pm EET, 30 September annually. Deadlines on:

GRANTS FOR TARGETS

Bayer

Description:
Bayer invites applications for its grants for targets initiative. The initiative aims to encourage research on novel targets and disease-related biomarkers in the fields of oncology, gynecology, cardiology, hematology and ophthalmology.

The following different types of grants, depending on the specifics of the target and its development phase will be awarded:

- support grants worth between €5,000 and €10,000 will be awarded to advance research on targets that are at a very early stage of discovery;
- focus grants worth between €10,000 and €125,000 will be awarded for more mature ideas, such as addressing specific aspects of a target as a first step towards transferring it to the drug discovery process.

Researchers from universities, other academic research institutes and start-up companies from all over the world are welcome to apply.

Closing date: 31 Mar 16
Deadline information: Deadlines on: 31 March 2016, 31 August 2016, and repeated annually.
Posted date: 29 Aug 14

IANA AITCHISON FUND
Scottish Rock Garden Club

Description:
The Scottish Rock Garden Club invites applications for grants from the Diana Aitchison fund. This supports young people who are looking to make a career in horticulture and to further their knowledge of alpine and rock garden plants and their cultivation.

Priority will be given to applications that either have a UK element, including applications from UK students or students attending establishments in the UK, or come from students following courses lasting one or more years. However, applications for placement periods, single events or short courses will also be considered.

Grants typically range from £300 to £2,000. Eligible expenses include course fees and materials, living expenses, and outlay in respect of placements at establishments of gardening excellence, such as botanic gardens, colleges or nurseries in the UK or overseas.

Closing date: 31 Mar 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

RESEARCH GRANTS
French Space Agency – Centre National d’Études Spatiales

Description:
The French Space Agency (CNES) invites applications for its research grants. These support scientists working in engineering sciences or sciences using space assets, such as orbital and space transport systems, universe sciences, Earth sciences or material sciences. Two programmes are available through this scheme:

- doctoral grants to prepare a university PhD in a research laboratory in France;
- postdoctoral grants for a research job at CNES or at a laboratory in France.

PhD grants are open to graduates with a master’s degree or equivalent. Postdoctoral grants are open to applicants who hold a PhD degree, and who have not already benefited from the CNES PhD grant.

PhD grants are tenable for one year, are renewable twice, and must be co-financed by a partner. Postdoctoral grants are tenable for one year and are renewable once, with a monthly stipend of €2,331.

Closing date: 31 Mar 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

COMING SOON: TRANSNATIONAL CALL

ERA-Net IraSME

Description:
ERA-Net IraSME will shortly be inviting applications for its transnational call. The opening of the call is scheduled for November 2015 and the closing date will be 31 March 2016. The following details are taken from the previous call and are subject to change.

This targets research, technology, development and innovation projects between research and technology organisations and small and medium-sized enterprises. All projects must have significant technical risks. The outcome of the project must be concrete and demonstrate real market potential.

Each proposal must consist of at least two SMEs from two different countries or regions. A minimum of 50 per cent of the work in the complete projects have to be performed by companies. Partners from other countries than the ones included in this call may participate as long as they can secure their own funding. All applicants must comply with national eligibility criteria.

The duration of the projects can be between one and three years. Start date of projects should be approximately 6 months after call deadline.

Closing date: 31 Mar 16
Deadline information:

Posted date: 27 Oct 15
Award type: Prototypes and demonstrations, Technology innovation/development, Research calls for business, Directed grants to institutions, research groups etc, Innovation grants, Academic-Industry links, Networking/collaboration

EDUCATIONAL RESOURCE DEVELOPMENT GRANTS
Society for Radiological Protection

Description:
The Society for Radiological Protection invites applications for its educational resource development grants. These support the development of educational resources in the field of radiological protection.

The developed educational resources must relate to part of or a full academic course leading to a qualifying recognised qualification in the UK or overseas within the geographical remit of the society within the International Radiation Protection Association with a clear component in the broad area of radiological protection.

Grants typically range from a few £100s up to £3,000, though higher amounts may be considered on merit.

Closing date: 31 Mar 16
Deadline information: Deadlines on: 31 March 2016, 30 September 2016, and repeated annually.

APPLIED RESEARCH GRANTS
Organization for Autism Research

Description:
The Organization for Autism Research invites applications for its applied research grants. These support studies that expand knowledge related to autism intervention and treatment, produce practical and objective results, and provide outcomes that enhance quality of life for persons with autism and their families. Research should address the following areas:
• the analysis, evaluation or comparison of current models of assessment, intervention or systems of service delivery including policy analysis;
• applied aspects of educational, behavioural or social and communicative intervention;
• effective intervention across the lifespan for individuals considered to be severely impacted by autism;
• adult issues such as continuing education, employment, residential supports, sexuality instruction, quality of life determinants and later intervention;
• issues related to family support, social and community integration, assessment and intervention with challenging behaviour, and the use of technology in support of learners with autistic spectrum disorders.

The estimated budget of US$240,000 will fund eight grants, each of which supports a period of one to two years.

Closing date: 31 Mar 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Pre-proposals due by 11.59pm EST, 31 March; invited full proposals are accepted between 26 May and 31 July 2014. This call is repeated once a year.

EED GENDER EQUALITY AWARDS
SEED Initiative

Description:
The SEED Initiative invites applications for the SEED gender equality awards. These support locally led, start-up social and environmental enterprises that promote
women’s empowerment. Organisations should:

- demonstrate entrepreneurship and innovation;
- deliver economic, social and environmental benefits;
- show the intention and potential to become financially sustainable;
- demonstrate partnership between different stakeholder groups;
- be locally driven and led;
- show the potential for scale up or significant replication;
- be in the early stage of implementation;
- be in a country with a developing or emerging economy;
- be run or owned by a woman.

In 2015, two awards are available, one of them for an enterprise in Kenya.

Awards are worth US$5,000 to cover the enterprise’s most pressing needs. Gender equality winners will also receive support from an international law firm specialised in advising women entrepreneurs.

Closing date: 31 Mar 16 (Forecast)  
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect.

Applications due by 11.59pm CET. This call is repeated once a year.

TAIWAN INTERNATIONAL GRADUATE PROGRAMME
Academia Sinica

Description:
Academia Sinica invites applications for its Taiwan international graduate programme. This offers interdisciplinary PhD programmes in 10 fields that span the natural and physical sciences, as well as computational linguistics. Currently, the following 12 PhD programmes are offered:

- chemical biology and molecular biophysics in drug discovery and biotechnology;
- molecular science and technology;
- molecular and biological agricultural science;
- molecular and cell biology;
- bioinformatics;
- nano science and technology;
- molecular medicine;
- earth system science;
- biodiversity;
- interdisciplinary neuroscience;
- social networks and human-centred computing;
- sustainable chemical science and technology.

Applicants must have earned a Bachelor’s degree or a Master’s degree by the time they apply. However, molecular and cell biology applicants are required to have a Master’s degree. Applicants are also required to have a good standard of English proficiency.

Stipends are worth US$13,600 per year each. Support will be extended to two more years for those students who perform well academically.

Closing date: 31 Mar 16 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.
