OPPORTUNITIES FOR JULY 2015

Pilot Research Grants
National Multiple Sclerosis Society

Description:
The National Multiple Sclerosis Society invites applications for its pilot research grants. These support high-risk and novel ideas that may serve to stop multiple sclerosis progression, restore function and improve quality of life and prevent multiple sclerosis. Applications are open to investigators at established research institutions who have completed their postdoctoral training. Funding is not granted for postdoctoral fellows or graduate students. The principal investigator need not be a US citizen. Grants are worth up to US$40,000 in direct costs for a period of one year. US-based grantee institutions may add an additional amount of up to 10 per cent to the requested sum for indirect costs.

Closing date: 01 Jul 15
Deadline information:
Deadlines on: 7 January 2015, 1 April 2015, 1 July 2015, 7 October 2015.
Posted date: 13 Oct 14

Award type: Directed grants for individual investigators, Innovation grants
Website:
http://www.nationalmssociety.org/For-Professionals/Researchers/Society-Funding/Pilot-Research-Grants

Application form:
http://www.mssocietyapplyonline.org/

Eligibility profile
Country of applicant institution: Any

Disciplines
Multiple Sclerosis, Primary Care, Patient Care & Education, Counseling & Therapy, Public Health, Health Services & Primary Care, Life Expectancy & Quality of Life, Medical Effectiveness & Patient Outcomes, General Practice

Contact Details
Email: claude.schofield@nmss.org

Grant Awards
Association for Professionals in Infection Control and Epidemiology Research Foundation

Description:
The Association for Professionals in Infection Control and Epidemiology Research Foundation invites applications for its grant awards. These grants support research projects under the following two programs:
• general research program. Grants are available to support a pilot study, a small project, or development and testing of an
instrument. Applications should be directed toward the area of infection control and applied epidemiology;
• Steris focused research program. Grants are available for studies designed to demonstrate and quantify the value, and improve the practice of, infection prevention and control and applied epidemiology in all health care delivery settings.
Grants are normally awarded for a one year period and range between $5,000 and $10,000.

Closing date: 01 Jul 15
Deadline information: Deadlines on: 1 July 2015, 1 December 2015, and repeated annually.
Posted date: 19 May 11
Award type: Directed grants for individual investigators, Directed grants to institutions, research groups etc
Award amount max: $10,000

SIGMA THETA TAU INTERNATIONAL/ATI EDUCATIONAL ASSESSMENT NURSING RESEARCH GRANT
Sigma Theta Tau International

Description:
Sigma Theta Tau International and the ATI Nursing Education invite applications for their educational assessment nursing research grant. This supports research that encourages the use of standardised assessments and curriculum support materials in a nursing programme. Possible research areas include:
• use of online simulation to promote development clinical reasoning skills;
• innovative instruction and assessment techniques to facilitate the development of soft skills;
• innovative instructional strategies to facilitate the transition to nursing practice.

Applicants must be registered nurses and hold a master’s or doctoral degree or be enrolled in a doctoral programme. Applications from novice researchers who have received no other national research funds are encouraged. One grant worth up to US$6,000 is available.

Closing date: 01 Jul 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.
Posted date: 31 Jul 13
Award type: Young investigator awards, Directed grants for individual investigators
Award amount max: $6,000
Award budget total: $6,000

SIGMA THETA TAU INTERNATIONAL/HILL-ROM ENVIRONMENT OF ELDER CARE NURSING RESEARCH GRANT
Sigma Theta Tau International

Description:
The Sigma Theta Tau International and the Hill-Rom Company invite applications for their environment of elder care nursing research grant. This aims to advance the science of nursing through research focused on critical aspects of elder care including clear lungs, no falls, safe skin, patient comfort and ease of use.
Applicants must be registered nurses and either hold a master's degree or be enrolled in a doctoral programme. Novice researchers who have received no other national research funds are encouraged to apply. Preference will be given to the society members.
The grant is worth up to US$9,000.

Closing date: 01 Jul 15 (Forecast)
Deadline information: Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.
Posted date: 30 Sep 13
Award type: Directed grants for individual investigators
Award amount max: $9,000

Description:
The Sigma Theta Tau International invites applications for the Joan K Stout research grant. This advances ongoing evidence-based study by nurse researchers on the impact of the practice of simulation education in schools of nursing and clinical care settings. Applicants must be registered nurses with current licenses, and they must hold master’s degrees or be enrolled in a doctoral programme.

One grant worth up to US$5,000 is available. The project period is one year.

Closing date: 01 Jul 15
Deadline information: This call is repeated once a year.

Description:
The Foundation for Prader-Willi Research invites applications for its research grants. These support innovative research that advances the understanding of Prader-Willi syndrome. The foundation is especially interested in projects that lead to the development of new treatments to alleviate the symptoms associated with PWS. Priority will be given to research on the following areas:

• molecular basis of the PWS phenotype;
• regulation of appetite and energy homeostasis in individuals with PWS, development and evaluation of therapeutic interventions to regulate appetite and satiety in PWS;
• aetiology of medical, behavioural and psychiatric complications in PWS, development and evaluation of therapeutic interventions;
• development of novel therapeutic interventions using in vitro and in vivo models of PWS.

RESEARCH GRANTS
Foundation for Prader-Willi Research
Principal investigators must have a primary faculty appointment at the level of instructor or higher.

Grants are worth up to US$100,000 for one year, with the possibility of a second year renewal. Indirect costs of up to eight per cent are allowed.

Closing date: 01 Jul 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated 2 times a year.

PROJECT GRANTS
Conservation, Food and Health Foundation

Description:
The Conservation, Food and Health Foundation invites applications for its project grants. These support non-profit, non-governmental organizations to build capacity within the developing countries in the fields of conservation, food and health. Funding is available to projects that:
• demonstrate strong local leadership;
• promote professional development in the conservation, agricultural, and health sciences;
• develop the capacity of local organizations;
• address a particular problem in the field.
Projects that address underfunded issues and geographic areas may be given preference. Research, training and technical assistance projects that feature collaborative partnerships embedded in strong networks and focus on prevention rather than remediation are favoured.

Ordinarily the programme supports non-profit, non-governmental organizations, but public organizations which can prove they are non-governmental may apply. Preference is given to organizations located in developing countries or developed country organizations whose activities are of direct or immediate benefit to developing countries.

The average award amount is US$17,000 and grants rarely exceed US$25,000.

Closing date: 01 Jul 15
Deadline information: Concept notes due first working day of January and July annually.
Posted date: 04 Oct 13

EFFICACY AND MECHANISM EVALUATION PROGRAMME – RESEARCHER-LED WORKSTREAM
Department of Health including NIHR

Description:
The Department of Health’s National Institute for Health Research invites outline applications for its researcher-led workstream under the efficacy and mechanism evaluation programme. This supports research into interventions based in or used by the NHS and its partners, including clinical trials and evaluative studies of novel and repurposed interventions. They may include any method used to promote health, prevent and treat disease, and improve rehabilitation or long-term care. Technologies are not confined to new drugs but may include procedures, devices, tests, settings of care, screening programmes and any intervention used in the treatment, prevention or diagnosis of disease. Support is given for studies in patients which seek to:
•evaluate clinical efficacy of interventions where there is already evidence to support the use of the intervention in humans;
•add significantly to our understanding of biological or behavioural processes;
•explore new scientific principles;
•include the development or testing of new methodologies.
Researchers based at higher education institutions, research institutes and independent research organizations in the UK may apply. Collaborative proposals should demonstrate a multidisciplinary team with appropriate skills and experience, including an appropriately experienced statistician on the study team. Co-applicants may be based outside the UK, and if necessary, research may be conducted overseas.
There is no fixed limit on project duration. All funding should be clearly justified, but there is no upper limit.
Ref: 15/48.

Closing date: 01 Jul 15
Deadline information: Outline applications due by 1pm. This call is repeated 3 times a year.
Posted date: 05 Mar 15
Award type: Clinical trials, Directed grants for individual investigators, Directed grants to institutions, research groups etc, Networking/collaboration

MALL CAT ACTION FUND
Panthera

Description:
Panthera invites letters of intent for its small cat action fund. This supports in situ conservation and research activities on the following small cat species:
• caracal;
• bay cat;
• Asian golden cat;
• jungle cat;
• sand cat;
• black-footed cat;
• jaguarundi;
• ocelot;
• little spotted cat;
• margay;
• serval;
• Canada lynx;
• Eurasian lynx;
• Spanish lynx;
• bobcat;
• pampas cat;
• Geoffroy's ca;
• kodkod;
• Andean mountain cat;
• Pallas’s cat;
• leopard cat;
• flat-headed cat;
• rusty-spotted cat;
• fishing cat;
• African golden cat;
• marbled cat.
Applications from large first world universities will only be considered when applicants are from developing countries.
Funding of up to US$15,000 is available for projects lasting one year. Preference will be given to requests specifically for field conservation and research activities, including equipment, transportation and local salaries.

Closing date: 01 Jul 15
Deadline information: Letters of interest are welcomed between 1 January and 1 February, and between 1 June and 1 July annually; invited applications due by 1 April and 1 October annually. Deadlines on: 1 February 2015, 1 July 2015.
Posted date: 27 Jun 14
Award type: Travel for research purposes, Directed grants for individual investigators, Directed grants to institutions, research groups etc, Equipment and materials
Award amount max: $15,000

IZ CLAIBORNE ART ORTENBERG JAGUAR RESEARCH GRANT
Panthera

Description:
Panthera, in collaboration with Liz Claiborne Art Ortenberg Foundation, invites letters of intent for the Liz Claiborne Art Ortenberg jaguar research grant. This supports in situ conservation research and projects on jaguars at sites within jaguar conservation units and other areas identified as significant. Projects that are directly related to corridor validation and conflict mitigation will be prioritised. Applications are accepted from individuals and institutions, but institutions must identify one project leader to submit the proposal. Proposals are accepted from all qualified candidates, however projects led by country nationals or in-country non-governmental organizations are given priority. Grants of up to US$12,000 are available for projects lasting for one year. However, multi-year projects are encouraged. Preference will be given to requests for support for field conservation and research activities including equipment, transportation and salaries.

Closing date: 01 Jul 15
Deadline information: Letters of interest are welcomed between 1 January and 1 February, and between 1 June and 1 July annually; invited applications due by 1 April and 1 October annually. Deadlines on: 1 February 2015, 1 July 2015.

GRANTS FOR RESEARCH AND INNOVATION
Nuffield Foundation

Description:
The Nuffield Foundation invites applications for its grants for research and innovation.

These support research, practical experiments or development work in the following areas:
• children and families - helps to ensure that the legal and institutional framework is best
adapted to meet the needs of children and families;
• education – supports innovative research and development in specific priority areas;
• law in society – promotes access to and understanding of the civil justice system;
• open door – for projects that improve social wellbeing and meet trustees’ wider interests but lie outside other programme areas, including poverty and disadvantage, financial circumstances of older people and evidence for policy.
The foundation does not usually fund organizations outside the UK or projects that take place outside the UK. Collaboration with partners in European or Commonwealth countries is permitted. Grants normally range from £10,000 to £250,000, although the majority are worth between £50,000 and £150,000. Funding usually supports projects for a duration of under four years.

Closing date: 02 Jul 15
Deadline information: Outline applications are due by 5.30pm 1 November 2014, 5 March and 2 July 2015. Full applications are due by 5.30pm, 12 January, 7 May and 3 September 2015.
Posted date: 28 Aug 14
Award type: Travel for research purposes, Directed grants to institutions, research groups etc, Publish, edit, translate, disseminate, Equipment and materials, Innovation grants

Award amount max: £250,000
Award amount min: £10,000

QUALITY OF LIFE RESEARCH GRANTS
Canadian Cancer Society – Société Canadienne du Cancer

Description:
The Canadian Cancer Society invites applications for its quality of life research grants. These support quality of life cancer research that has the potential to make a significant impact on the burden of disease in patients, survivors and caregivers.

Projects should explore psychosocial, survivorship, supportive care and end-of-life issues, research gaps, needs and opportunities, or models of follow-up care. Research that has the potential for practical applications is of a particular interest. Principal investigators must be based in, or formally affiliated with, an eligible Canadian
university, research institute or healthcare agency. Investigators with a firm offer of a research position at such institutions may also apply. Projects may also include co-principal investigators who are not required to have a formal affiliation with the same institution but must be based in Canada, and additional authors who may be students, postdoctoral fellows, research associates, lay contributors and investigators based outside of Canada. Grants are worth up to CA$300,000 over two or three years. Up to four awards may be available.

Closing date: 02 Jul 15
Deadline information: Letters of intent due by 5pm Eastern Standard Time, 2 July; invited full applications due by 1 November annually.
Posted date: 23 Mar 15
Award type: Clinical trials, Directed grants for individual investigators, Directed grants to institutions, research groups etc, Equipment and materials, Networking/collaboration

Award amount max: $300,000
Award budget total: $1,200,000

CHILD DEVELOPMENT GRANTS
Waterloo Foundation

Description:
The Waterloo Foundation invites applications for its child development grants. This call focuses on factors that sufferers of co-occurring neurodevelopmental conditions can influence, such as sleep and diet. In 2014, the foundation will not support projects focusing on developmental trauma, developmental coordination disorder and ADHD. Autism spectrum disorder may be part of the project but not the primary focus of it. Applications should focus on two or more of the conditions in the foundation’s strategy.
Applicants should be based at universities. Up to £50,000 is available for the direct costs of a research project. The foundation might support studentships, but generally does so as a match-funding. A maximum of 5 per cent can be used for conference attendance.

Closing date: 04 Jul 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Applications due by 5pm. This call is repeated once a year.
Posted date: 05 Mar 14
Award type: Studentship allocations, Travel to conferences, meetings etc., Directed grants for individual investigators, Directed grants to institutions, research groups etc
Award amount max: £50,000
SOCIAL SCIENCE RESEARCH GRANTS
World Anti-Doping Agency – Agence Mondiale Antidopage

Description:
The World Anti-Doping Agency invites applications for its social science research grants. These support research in the social sciences to inform more efficient doping prevention strategies. The topics for the 2015 call are:
• developing intervention models based on up-to-date research findings;
• the perception of legitimacy of anti-doping rules and organizations and its effect on athletes’ attitudes and buy-in to anti-doping programs;
• understanding deterrence measures for the athlete entourage.
Applications are open to organizations of all types, including universities, colleges, small businesses, for-profit and not-for-profit organizations.
The average budgets for previously funded projects were US$20,000 for one-year grants, US$30,000 for two-year grants and US$65,000 for three-year grants.

Closing date: 10 Jul 15 (Forecast)

Deadline information: Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

RESEARCH GRANTS
National Ataxia Foundation

Description:
The National Ataxia Foundation invites applications for its research grants. The grants fund new and innovative studies related to the cause, pathogenesis or treatment of hereditary or sporadic ataxia. Grants are offered primarily as seed monies to assist investigators in the early or pilot phase of their studies and as additional support for ongoing investigations. Grants are for one year and it is anticipated that the average funds granted will be around $15,000, although funding may be considered for up to $30,000 for projects deserving special consideration.

Closing date: 15 Jul 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Deadline: letters of intent July 15; full application August 15, annually.
Posted date: 12 May 11

GENERAL RESEARCH GRANTS
Friedreich’s Ataxia Research Alliance

Description:
Friedreich’s Ataxia Research Alliance invites applications for its research grants. Qualified investigators may submit letter of intent for projects that target FARA’s research priorities. A subtype of the general research grant is available for postdoctoral trainees and PhD students. The guidelines for general grants should be followed, but the only budget item should be the salary, benefit and tuition support for the trainee or student. Funding is worth up to US$150,000 per year for one or two years. Salaries may be requested for all those contributing to the research project.

Closing date: 15 Jul 15
Deadline information: Letters of intent due 1 February and 1 July annually; invited full applications due 1 April and 15 September annually.
Posted date: 14 Nov 13

**PROJECT GRANTS**

*Kay Kendall Leukaemia Fund*

**Description:**
The Kay Kendall Leukaemia Fund invites proposals for its programme and project grants. These support research on aspects of leukaemia and related haematological malignancies. Requests for support for basic science programmes may be considered. Clinical trials will not be supported. Proposals involving practical application to the prevention, diagnosis or therapy of leukaemia and related diseases are particularly encouraged. Both UK and non-UK based organizations are eligible to apply for project or programme awards where the work to be funded is based primarily within the UK. Applications are particularly encouraged from individuals within five years of their first independent group leader position. Awards are available for up to three years.

Closing date: 15 Jul 15
Deadline information: Deadlines on: 15 July 2015, 28 February 2016, and repeated annually.

PRACTICAL MONITORING TOOLS FOR THE BIOLOGICAL PROCESSES IN BIOFILTRATION PROJECT
Water Research Foundation

Description:
The Water Research Foundation, under its focus area programme, invites proposals for its practical monitoring tools for the biological processes in biofiltration project. This aims to provide information on practical, field-tested monitoring tools that can be used for drinking Water biofiltration, and to assist drinking water utilities in selecting monitoring tools and developing holistic monitoring strategies for operating, maintaining, controlling and optimizing drinking water biofiltration. It also aims to advise drinking water biofiltration facility operators on using monitoring tools for day-to-day operation, sampling, maintenance, trouble shooting and investigating potential problems.

Technically qualified US based or non-US based applicants, including educational institutions, research organizations, federal or state agencies, local municipalities, consultants or other for-profit entities may apply.

The funding available for this project is in the range of US$225,000 and US$275,000. A minimum 25 per cent of the total project value must be contributed by the applicant either in cost-share, applicant in-kind or third-party in-kind.

Ref: RFP 4620.

Closing date: 15 Jul 15

Deadline information: Applications due by 5pm MT.

UNDERSTANDING THE SOURCE AND FATE OF POLYMER-DERIVED NITROSAMINE PRECURSORS PROJECT
Water Research Foundation

Description:
The Water Research Foundation, under its focus area programme, invites proposals for its understanding the source and fate of polymer-derived nitrosamine precursors project. This aims to develop a strong
understanding of how cationic polymers contribute to N-nitrosodimethylamine formation, and identify measures that a water agency can implement to reduce polymer-derived NDMA formation. Technically qualified US based or non-US based applicants, including educational institutions, research organizations, federal or state agencies, local municipalities, consultants or other for-profit entities may apply. The funding available for this project is in the range of US$325,000 and US$350,000. A minimum 25 per cent of the total project value must be contributed by the applicant either in cost-share, applicant in-kind or third-party in-kind.

Ref: RFP 4622.

Closing date: 15 Jul 15

High Consequence Isolation Valve Placement and Operation for Effective Risk Management of Pipe Failure Project

Water Research Foundation

Description:
The Water Research Foundation, under its focus area programme, invites proposals for its high consequence isolation valve placement and operation for effective risk management of pipe failure project. This focuses on high consequence isolation valves as a component of risk management of high consequence pipe failure and aims to develop a practical guidance manual on risk management and present several business cases using triple bottom line analysis. Technically qualified US based or non-US based applicants, including educational institutions, research organizations, federal or state agencies, local municipalities, consultants or other for-profit entities may apply.
The funding available for this project is in the range of US$215,000 and US$235,000. A minimum 25 per cent of the total project value must be contributed by the applicant either in cost-share, applicant in-kind or third-party in-kind.

Ref: RFP 4624.

Closing date: 15 Jul 15
PERFORMANCE BENCHMARKING OF PUMPS AND PUMPING SYSTEMS FOR DRINKING WATER UTILITIES PROJECT

Water Research Foundation

Description:
The Water Research Foundation, under its focus area programme, invites proposals for its performance benchmarking of pumps and pumping systems for drinking water utilities project. This aims to identify best practices and performance metrics associated with optimal energy efficiency of drinking water utilities’ pumps and pumping systems by using a performance benchmarking approach. Technically qualified US based or non-US based applicants, including educational institutions, research organizations, federal or state agencies, local municipalities, consultants or other for-profit entities may apply.
The funding available for this project is in the range of US$200,000 and US$225,000. A minimum 25 per cent of the total project value must be contributed by the applicant either in cost-share, applicant in-kind or third-party in-kind.

FOOD AND BUSINESS GLOBAL CHALLENGES PROGRAMME INTEGRATED PROJECTS
Netherlands Organization for Scientific Research – Nederlandse Organisatie voor Wetenschappelijk Onderzoek

Description:
The Netherlands Organization for Scientific Research’s Division of Science for Global Development (NWO WOTRO) invites proposals for integrated projects under its food and business global challenges programme. This aims to encourage scientific research and innovation projects that contribute to long-term access to affordable, safe and nutritious food for vulnerable and resource-poor populations in low- and middle-income countries. An IP is a coherent set of interrelated research sub-projects. The two priority areas for research and innovation projects in this round are the following:
• sustainable food systems;
• Urbanization and challenges for food and nutrition society.
Applications can be submitted by consortia of at least three different partners that include a Dutch research organization, an LMIC-based research organization, and at least one other LMIC-based partner. The main applicant should be a senior researcher with a PhD degree employed by a Dutch research institute. Additional partners, such as Dutch private partners or partners from other LMICs or high income countries, are encouraged. Funding is valued up to €600,000 per project with duration of four to five years. Partners are required to provide co-funding of at least 20 per cent of the total project budget, either in-kind or cash. Reimbursable costs include personnel costs, research and innovation costs, capacity development and knowledge sharing costs, and overhead.

Closing date: 16 Jul 15
Deadline information: Preliminary proposals due by 2pm CET.
Posted date: 20 Apr 15
Award type: Hosting conferences, Travel for research purposes, Directed grants to institutions, research groups etc. Equipment and materials, Innovation grants, Academic-Industry links, Development (Africa/Caribbean), Networking/collaboration

CAREER CATALYST RESEARCH GRANTS FOR CLINICAL RESEARCH
Susan G Komen for the Cure

Description:
Susan G Komen for the Cure invites applications for its career catalyst research grants for clinical research. These enable early-career clinician-scientists to undertake hypothesis-driven clinical research that has significant potential to advance the understanding of breast cancer and lead to reductions in breast cancer incidence or mortality. The investigator should interact with human subjects or patients in conjunction with conducting laboratory-based research.
Principal investigators must hold a doctoral degree and faculty appointment, with the requirement that they have not held any faculty appointment, including non-tenure and tenure-track appointments combined, for more than six years. There is no US citizenship requirement. Each grant is worth up to US$150,000 per year for up to three years, and will be awarded to a single principal investigator. Co-principal investigators are not allowed. Funding may be used to cover base salary for the PI, equipment costs, travel costs, publication costs, meeting-related poster printing costs, and reasonable coursework and training expenses. Indirect costs may not exceed 25 per cent of the direct costs.

Closing date: 17 Jul 15 (Forecast)
Deadline information: Call has not yet been announced by funder, but this is the approximate deadline we expect. Required pre-applications due by 1pm EST, 17 July; invited full applications due by 1pm EST, 20 November 2015. This call is repeated once a year.

CAREER CATALYST RESEARCH GRANTS FOR BASIC AND TRANSLATIONAL RESEARCH
Susan G Komen for the Cure

Description:
Susan G Komen for the Cure invites applications for its career catalyst research grants for basic and translational research. These provide support for hypothesis-driven research that has significant potential to advance the understanding of breast cancer and lead to reductions in breast cancer incidence or mortality. A clinical trial or study in conjunction with a clinician is acceptable as a part of the proposed laboratory research focus.
Principal investigators must hold a doctoral degree and faculty appointment, with the requirement that they have not held any faculty appointment, including non-tenure and tenure-track appointments combined, for more than six years. A lead mentor who holds full-time faculty appointment with a non-profit institution or organization anywhere in the world must be identified. The research must be conducted at the lead mentor’s institution.
Each grant is worth up to US$150,000 per year for up to three years, and will be awarded to a single principal investigator. Co-principal investigators are not allowed. Funding may be used to cover base salary for the PI, equipment costs, travel costs, publication costs, meeting-related poster printing costs, and reasonable coursework and training expenses. Indirect costs that do not exceed 25 per cent of the direct costs are allowed.

GRADUATE TRAINING IN DISPARITIES RESEARCH GRANTS
Susan G Komen for the Cure

Description:
Susan G Komen for the Cure invites applications for its graduate training in disparities research grants. These are intended to establish or sustain a training programme for graduate students who are seeking careers dedicated to understanding and eliminating disparities in breast cancer outcomes across population groups. The programme should empower the students with the skills and knowledge necessary to effectively explore the causes of differential breast cancer outcomes and interventions to reduce and eliminate such disparities.

The principal applicant must have a doctoral degree and a full-time faculty appointment with an accredited institution. A minimum of three trainees, each of which must be enrolled in a master’s or doctoral degree programme, must be identified for the grant.

Each grant is worth up to US$135,000 per year for up to three years. Funding may be used to cover trainee stipends, mentors’ salaries, training materials, travel to annual trainee meeting and other associated training costs. Indirect costs will not be funded.

Closing date: 17 Jul 15 (Forecast)

SECURITY AND RULE OF LAW APPLIED RESEARCH FUND: OPEN CALL FOR EVIDENCE-BASED POLICY ADVICE AND TOOLS
Netherlands Organization for Scientific Research – Nederlandse Organisatie voor Wetenschappelijk Onderzoek

Description:
The Netherlands Organization for Scientific Research’s Division of Science for Global Development (NWO WOTRO) invites proposals for its security and rule of law applied research fund: open call for evidence-based policy advice and tools. This aims to strengthen the evidence-base of policies and practices for security and rule of law approaches in fragile and conflict-affected settings.

Projects should contribute to the following two objectives:
- develop tools that provide new evidence-based insights in the underlying assumptions, feasibility or impact of local, national or international policies;
- unlock the generated knowledge for practitioner organizations involved in policy and practice of security and rule of law in fragile and conflict-affected settings, in such a way that they can easily apply them for redesigning relevant conflict-sensitive and effective reform programmes in those settings.

Project proposals are not restricted to a specific research focus.

Applications are open to consortia consisting of different member organizations from across the globe. A consortium must consist of at least a research organization and a practitioner organization involved in the design or implementation of policies for security and rule of law reform programmes in low- and middle-income countries and regions. Consortia may be extended with other organizations. The main applicant must hold a senior position in the research consortium member organization.

The total available budget is €3 million. Project grants do not exceed €100,000 for a maximum period of six months. Funding may be used towards personnel costs of project staff, research costs and knowledge sharing costs. The organizations employing the applicants must contribute in cash or in kind to cover the total project costs.

Closing date: 17 Jul 15
Deadline information: Proposals due by 2pm CET. Deadlines on: 17 April 2015, 17 July 2015, 6 November 2015.

Award type: Travel for research purposes, Directed grants for individual investigators, Directed grants to institutions, research groups etc. Publish, edit, translate, disseminate, Equipment and materials, Networking/collaboration

VISTAKON GRANTS
American Academy of Optometry

Description:
The American Optometric Foundation invites proposals for two research grants sponsored by Vistakon. The grants are intended to encourage talented researchers to pursue full-time careers in optometry. These grants fund basic or clinical research in the area of soft contact lenses. There will be two one-year awards of US$25,000 each. The award is open to all persons in optometry and vision science.

Closing date: 20 Jul 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.
Posted date: 03 Mar 11
Award type: Directed grants for individual investigators

STANDARD RESEARCH GRANTS
Natural Environment Research Council

Description:
The Natural Environment Research Council invites applications for its standard research grants. This is an open competition for curiosity-motivated basic, strategic or applied research. There are two calls under this programme: standard grants and standard grants for new investigators. Eligibility for the new investigator call is restricted to researchers within three years of becoming eligible for NERC funding as a principal investigator, and who have not received funding as a PI from any source. The PI must reside in the UK and be employed by an eligible UK research organization.

Grants are worth between £65,000 and £800,000 at 100 per cent full economic cost. In exceptional cases applicants may contact NERC to request permission to submit a standard grant proposal that exceeds the maximum funding limit.

Closing date: 21 Jul 15
Deadline information: Applications due by 4pm. This call is repeated 2 times a year.
Posted date: 10 Feb 15

USAID/NIGERIA EDUCATION CRISIS RESPONSE
Agency for International Development (USAID)

Description:
The Agency for International Development invites applications for its USAID/Nigeria education crisis response programme. This aims to expand enrolment in appropriate, protective and relevant educational options...
for the girls, boys and youth affected by violence in north-eastern Nigeria, and ensure that children and youth have continued access to an instructional routine in Adamawa and the states of Bauchi and Gombe. The following problems will be addressed:

- expected large increase in drop-out rates in affected states;
- over-crowding of classrooms and learning spaces due to influx of displaced populations;
- limited access for displaced children;
- shortage of qualified teachers and instructional materials for formal and non-formal education;
- children traumatized by violence and abductions, and families fear of sending their children to school;
- marginalization of girls and children with disabilities;
- rising tensions between host communities and displaced populations.

Any African organization may apply. Funding is worth between US$300,000 and US$15 million for activities lasting up to three years.

Ref: APS-620-14-000001.

TRANSLATIONAL RESEARCH TRAINING IN HAEMATOLOGY
European Hematology Association

Description:
The European Hematology Association and the American Society of Hematology invite applications for their call for translational research training in haematology. This enables early-career scientists to participate in a rigorous year-long education and mentoring programme to prepare them for highly productive careers in haematologic translational research.

Applicants must meet the following eligibility criteria:
- a trainee or junior faculty and hold an MD, PhD, biomedical PhD or pharmacy PharmD and be within 12 years of MD-graduation;

Contact Details

Tel: 234 9461 9300
Email: abujaeduprocurements@usaid.gov
• PhD applicants must have less than eight years of post-doc experience after graduation;
• must be actively employed in a hematology related research environment;
• both the applicants and the applicants’ mentors must be members of EHA or ASH at the time of application.

Travel costs up to €1000 per meeting, and accommodation for both the spring course and the follow-up meetings are arranged and covered by EHA and ASH. EHA and ASH will also cover food costs during the spring course.

Closing date: 30 Jul 15
Deadline information: Letter of intent due by 30 July; full application due by 7 September 2015.

HAFFER GRANTS
Glaucoma Research Foundation

Description:
The Glaucoma Research Foundation invites preliminary applications for its Shaffer grants. These grants support new, high impact clinical, epidemiological and laboratory research. Strategic research goals include:
• to protect and restore the optic nerve;
• to accurately detect glaucoma and monitor its progress;
• to find the genes responsible for glaucoma;
• to understand intraocular pressure and develop better treatments;
• to determine the risk factors for glaucoma damage using systematic outcomes data.
Grants are typically awarded in the amount of US$40,000 for one year, renewable for a second year. Investigators must possess a graduate or postdoctoral degree to apply for support.

Closing date: 31 Jul 15 (Forecast)
Deadline information: Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

INDIVIDUAL RESEARCH GRANTS
American Academy of Religion

Description:
The American Academy of Religion invites applications for its individual research grants. These provide support for important aspects of research, such as travel to archives and libraries, research assistance, field work, and released time. Grant proposals should contribute to scholarship in a field or subfield of religion and should help to advance the understanding of religion or interdisciplinary discussions between religion and other humanistic and social science disciplines. Awards range from $500 to $5,000 each. Applicants must have completed their doctorate, been members of AAR for three years, and must not have received an AAR research award in the last five years.

Closing date: 31 Jul 15 (Forecast)
Deadline information: Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

Research Training Grant
Society for Academic Emergency Medicine

Description:
The Society for Academic Emergency Medicine invites applications for its research training grants. The award aims to:
• provide support to emergency physicians for two years of concentrated training in research methods and concepts;
• enhance the likelihood of the selection of an academic and research career by recipients;
• establish a departmental culture that will continue to support research training independent of the SAEM award;
• encourage further academic development and research involvement of emergency medicine academicians.

The applicant must have an advanced degree and must be a member of SAEM.

The grant provides support of $75,000 per year for two years.

Institutional Research Training Grant
Society for Academic Emergency Medicine

Description:
The Society for Academic Emergency Medicine invites applications for its institutional research training grant. The grant is intended to identify, develop, and fund promising institutions dedicated to providing high quality training to emergency medicine research fellows. Its specific goals are to:
• increase the number of emergency medicine physicians with training in research;
• develop and support programs that can serve as advanced research training sites for emergency medicine graduates who wish to pursue a career that involves research;
• establish a departmental culture in emergency medicine to support advanced research training;
• enhance the academic development and productivity of the specialty of emergency medicine.

Eligible institutions should host or be affiliated with a residency program in emergency medicine. The faculty member overseeing the grant should be a SAEM member and hold an academic appointment in emergency medicine or pediatric emergency medicine within the institution. The research fellow must be a residency graduate from emergency medicine and an active member of SAEM. This award will provide two years of funding at $75,000 per year.

Closing date: 31 Jul 15 (Forecast)

IZ CLAIBORNE ART ORTENBERG JAGUAR RESEARCH GRANT
Panthera

Description:
Panthera, in collaboration with Liz Claiborne Art Ortenberg Foundation, invites letters of intent for the Liz Claiborne Art Ortenberg jaguar research grant. This supports in situ conservation research and projects on jaguars at sites within jaguar conservation units and other areas identified as significant. Projects that are directly related to corridor validation and conflict mitigation will be prioritised.
Applications are accepted from individuals and institutions, but institutions must identify one project leader to submit the proposal. Proposals are accepted from all qualified candidates, however projects led by country nationals or in-country non-governmental organizations are given priority.
Grants of up to US$12,000 are available for projects lasting for one year. However, multi-year projects are encouraged. Preference will be given to requests for support for field conservation and research activities including equipment, transportation and salaries.

GRANTS FOR RESEARCH AND INNOVATION
Nuffield Foundation

Description:
The Nuffield Foundation invites applications for its grants for research and innovation. These support research, practical experiments or development work in the following areas:
• children and families – helps to ensure that the legal and institutional framework is best adapted to meet the needs of children and families;
• education – supports innovative research and development in specific priority areas;
• law in society – promotes access to and understanding of the civil justice system;
• open door – for projects that improve social wellbeing and meet trustees’ wider interests but lie outside other programme areas, including poverty and disadvantage, financial circumstances of older people and evidence for policy.
The foundation does not usually fund organizations outside the UK or projects that take place outside the UK. Collaboration with partners in European or Commonwealth countries is permitted. Grants normally range from £10,000 to £250,000, although the majority are worth between £50,000 and £150,000. Funding usually supports projects for a duration of under four years.

Closing date: 02 Jul 15
Deadline information: Outline applications are due by 5.30pm 1 November 2014, 5 March and 2 July 2015. Full applications are due by 5.30pm, 12 January, 7 May and 3 September 2015.

QUALITY OF LIFE RESEARCH GRANTS
Canadian Cancer Society – Société Canadienne du Cancer

Description:
The Canadian Cancer Society invites applications for its quality of life research grants. These support quality of life cancer research that has the potential to make a significant impact on the burden of disease in patients, survivors and caregivers. Projects should explore psychosocial, survivorship, supportive care and end-of-life issues, research gaps, needs and opportunities, or models of follow-up care. Research that has the potential for practical applications is of a particular interest.
Principal investigators must be based in, or formally affiliated with, an eligible Canadian university, research institute or healthcare agency. Investigators with a firm offer of a research position at such institutions may also apply.
Projects may also include co-principal investigators who are not required to have a formal affiliation with the same institution but must be based in Canada, and additional authors who may be students, postdoctoral fellows, research associates, lay contributors and investigators based outside of Canada.

Grants are worth up to CA$300,000 over two or three years. Up to four awards may be available.

Closing date: 02 Jul 15
Deadline information: Letters of intent due by 5pm Eastern Standard Time, 2 July; invited full applications due by 1 November annually.
Posted date: 23 Mar 15

SOCIAL SCIENCE RESEARCH GRANTS
World Anti-Doping Agency – Agence Mondiale Antidopage

Description:
The World Anti-Doping Agency invites applications for its social science research grants. These support research in the social sciences to inform more efficient doping prevention strategies. The topics for the 2015 call are:
• developing intervention models based on up-to-date research findings;
• the perception of legitimacy of anti-doping rules and organizations and its effect on athletes’ attitudes and buy-in to anti-doping programs;
• understanding deterrence measures for the athlete entourage.
Applications are open to organizations of all types, including universities, colleges, small businesses, for-profit and not-for-profit organizations.
The average budgets for previously funded projects were US$20,000 for one-year grants, US$30,000 for two-year grants and US$65,000 for three-year grants.

Closing date: 10 Jul 15 (Forecast)

RESEARCH GRANTS
Leakey Foundation

Description:
The Leakey Foundation invites applications for its research grants. These support advanced doctoral students and established scientists undertaking research related specifically to human origins.
To be eligible, applicants must be affiliated with an academic or research institution and must have advanced to doctoral candidacy before the application deadline. There are no citizenship restrictions, but all application materials must be submitted in English. Grants to doctoral students are in the US$3,000 to US$15,000 range; however, larger grants, especially for postdoctoral students and senior scientists, may be funded up to US$22,000. Funding is available to cover costs related to subsistence, expendable supplies, travel, fees, personnel and special analysis.

Research in Sustainable Solid Waste Management
Environmental Research and Education Foundation

Description:
The Environmental Research and Education Foundation invites applications for its research funding in sustainable solid waste management. Funding supports projects
related to sustainable waste management practices in the following areas:
• waste minimisation;
• recycling;
• waste conversion to energy, biofuels, chemicals or other useful products including waste-to-energy, anaerobic digestion, composting, and other thermal or biological conversion technologies;
• strategies to promote diversion to higher and better uses such as organics diversion, market analysis, optimised material management and logistics;
• landfiling.
Proposals are accepted from outside the US and from non-academic institutions provided the principal investigators are well-qualified to conduct the research. While postdoctoral investigators may be listed on a proposal, they may not be listed as a principal investigator. Graduate students are not eligible to submit a proposal. Previously grants have ranged from US$15,000 to over US$500,000 with the average grant amount being US$160,000.

Closing date: 15 Jul 15
Deadline information: Proposals accepted 10 days prior to, and up to 5pm ET on, closing date. Deadlines on: 15 July 2015, 8 January 2016, and repeated annually.

Description:  
The JPI A Healthy Diet for a Healthy Life invites proposals for its joint action call – food processing for health. This aims to support multidisciplinary transnational research consortia using innovative and scientific approaches to investigate the preservation or the enhancement of health promoting properties of food as a result of food processing. The following fields may be addressed:  
• food processing for matrix stability and controlled digestibility, bioavailability, bioaccessibility and bioactivity of food compounds;  
• food structures for appropriate bioavailability of nutrients and bioactives;  
• optimise food processing for quality and safety.  
This can relate to products aimed at particular life stages or consumer groups, and may include investigation of fate in the human body and employ model foods.  

Applicants may be research groups working in universities, non-university public research institutes, hospitals and other health care settings. Participation of private parties and commercial companies is encouraged. Each consortium must involve partners from at least three different countries of the funding organizations participating in the call. Each consortium must involve a minimum of three and a maximum of eight partners. No more than two scientific partners from the same country are allowed to join the consortium excluding additional industrial partners. Research groups and industrial partners from countries that do not participate in the call may participate in projects if they are able to secure their own funding. However, the majority of research groups in a consortium and the coordinator must be from countries participating in the call and the total of number of partners and collaborators in the
consortium must not exceed 12. All applicants must comply with the national eligibility regulations. Projects can be funded for up to three years.

**Closing date:** 15 Jul 15  
**Deadline information:** Proposals due by 4pm CET.  
**Posted date:** 02 Apr 15  
**Award type:** Research calls for business, Directed grants to institutions, research groups etc, Academic-Industry links, Networking/collaboration

**PRACTICAL MONITORING TOOLS FOR THE BIOLOGICAL PROCESSES IN BIOFILTRATION PROJECT**  
*Water Research Foundation*

**Description:**  
The Water Research Foundation, under its focus area programme, invites proposals for its practical monitoring tools for the biological processes in biofiltration project. This aims to provide information on practical, field-tested monitoring tools that can be used for drinking water biofiltration, and to assist drinking water utilities in selecting monitoring tools and developing holistic monitoring strategies for operating, maintaining, controlling and optimising drinking water biofiltration. It also aims to advise drinking water biofiltration facility operators on using monitoring tools for day-to-day operation, sampling, maintenance, trouble shooting and investigating potential problems.  
Technically qualified US based or non-US based applicants, including educational institutions, research organizations, federal or state agencies, local municipalities, consultants or other for-profit entities may apply.  
The funding available for this project is in the range of US$225,000 and US$275,000. A minimum 25 per cent of the total project value must be contributed by the applicant either in cost-share, applicant in-kind or third-party in-kind.  
Ref: RFP 4620.

**Closing date:** 15 Jul 15  
**Deadline information:** Applications due by 5pm MT.  
**Posted date:** 14 Apr 15  
**Award type:** Research calls for business, Directed grants for individual investigators, Directed grants to institutions, research groups etc  
**Award amount max:** $275,000  
**Award amount min:** $225,000
UNDERSTANDING THE SOURCE AND FATE OF POLYMER- DERIVED NITROSAMINE PRECURSORS PROJECT

Water Research Foundation

Description:
The Water Research Foundation, under its focus area programme, invites proposals for its understanding the source and fate of polymer-derived nitrosamine precursors project. This aims to develop a strong understanding of how cationic polymers contribute to N-nitrosodimethylamine formation, and identify measures that a water agency can implement to reduce polymer-derived NDMA formation. Technically qualified US based or non-US based applicants, including educational institutions, research organizations, federal or state agencies, local municipalities, consultants or other for-profit entities may apply. The funding available for this project is in the range of US$325,000 and US$350,000. A minimum 25 per cent of the total project value must be contributed by the applicant either in cost-share, applicant in-kind or third-party in-kind.

HIGH CONSEQUENCE ISOLATION VALVE PLACEMENT AND OPERATION FOR EFFECTIVE RISK MANAGEMENT OF PIPE FAILURE PROJECT

Water Research Foundation

Description:
The Water Research Foundation, under its focus area programme, invites proposals for its high consequence isolation valve placement and operation for effective risk management of pipe failure project. This focuses on high consequence isolation valves as a component of risk management of high consequence pipe failure and aims to develop a practical guidance manual on risk management and present several business cases using triple bottom line analysis.

Technically qualified US based or non-US based applicants, including educational institutions, research organizations, federal or state agencies, local municipalities, consultants or other for-profit entities may apply. The funding available for this project is in the range of US$215,000 and US$235,000. A minimum 25 per cent of the total project value must be contributed by the applicant either in cost-share, applicant in-kind or third-party in-kind.

PERFORMANCE BENCHMARKING OF PUMPS AND PUMPING SYSTEMS FOR DRINKING WATER UTILITIES PROJECT

Water Research Foundation

Description:
The Water Research Foundation, under its focus area programme, invites proposals for its performance benchmarking of pumps and pumping systems for drinking water utilities project. This aims to identify best practices and performance metrics associated with optimal energy efficiency of drinking water utilities’ pumps and pumping systems by using a performance benchmarking approach. Technically qualified US based or non-US based applicants, including educational institutions, research organizations, federal or state agencies, local municipalities,
consultants or other for-profit entities may apply. The funding available for this project is in the range of US$200,000 and US$225,000. A minimum 25 per cent of the total project value must be contributed by the applicant either in cost-share, applicant in-kind or third-party in-kind.

RESEARCH GRANTS
International Education Association of Australia

Description:
The International Education Association of Australia, under the Tony Adams Fund, invites applications for its research grants. These are for academic or administrative staff working in international education to pursue professional development activity, research or doctoral studies within the field of international education.
Grants are open to individuals from Australia and overseas in the following categories:
• professional development, open to academic, professional or administrative staff working in the field of international education who wish to pursue further professional development in internationalisation of education;
• research in international education, available to those undertaking research projects or doctoral studies in internationalisation of education.
Grants for professional development are worth up to AU$2,000 while grants for research are worth up to AU$3,000. Grants of AU$1,500 per year are also available for doctoral study for up to three years.

Closing date: 31 Jul 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.
Posted date: 21 May 14
Award type: Personal development, Financial aid for postgraduate students, Directed grants for individual investigators

RANT-IN-AID PROGRAM
International Centre for Diffraction Data

Description:
The International Centre for Diffraction Data invites applications under its grant-in-aid programme awarded for the preparation of reference x-ray powder diffraction data. Preference will be given to proposals for generation of high quality experimental powder diffraction patterns, based on new data for phases which are not now represented in the powder diffraction file, but which are likely to be of considerable interest to present and future PDF users. Special consideration will also be given to classes of substances of high current interest, including new types of materials which have significance in industrial and research applications. There are two different types of grant:

• pattern-producing grants are intended principally to be supplements to other research projects in which single phase pure compounds are being synthesised and characterised. On occasion, starter or trial grants of a small amount of money may be awarded at any time during the year. Their purpose is to give promising potential grantees the chance to demonstrate that they have the required pattern-producing capability so that they can submit a strong proposal in time for a future deadline;

• pattern-quality-enhancement grants are intended to support projects which advance the quality of the PDF by replacing existing patterns with improved ones.

IRD PROTECTION PROJECT GRANTS
Club 300’s Fågelskyddsfond – Club 300 Foundation for Bird Protection

Description:
The Club 300 Foundation for Bird Protection invites applications for its project grants. These support conservation and research projects related to bird protection all over the world. The focus is on projects related to highly threatened or poorly known species. Only projects concerned with birds listed as critically endangered, endangered, extinct in the wild or data deficient on the International Union for Conservation of Nature’s Red List of threatened species, are eligible for funding. Projects that have received or currently receive funding from Club300 are excepted from the above rule. Applications may be written in English or Swedish. Grants are worth up to US$5,000 each.

Closing date: 31 Jul 15

STUDENT RESEARCH GRANTS
International Society for Equitation Science

Description:
The International Society for Equitation Science invites applications for its student research grants. These enable students to undertake supervised research projects in the field of equitation science. Projects should address the following priority goals:
- ethical equine training;
- improved equine behaviour and welfare;
- improved understanding of human-equine interaction;
- facilitating equitation science education;
- development of equine research methods and techniques.

Applicants must be student members of the society. Projects must be agreed and recommended by the proposed supervisor who must also be a member of the society, and projects should be run within a department or research group. Up to four grants, worth £750 each, are available. Projects must be completed within nine months.

Closing date: 31 Jul 15
Posted date: 14 Nov 14
Award type: Student awards, Financial aid for postgraduate students, Directed grants for individual investigators
Award amount max: £750
Award budget total: £3,000

NETWORKING PROJECT GRANTS
European Society for Paediatric Gastroenterology, Hepatology and Nutrition

Description:
The European Society for Paediatric Gastroenterology, Hepatology and Nutrition invites proposals for its networking project grants. These enable members to undertake research activities and networking, such as interactive educational events and clinical networks at centres of international excellence. Proposals relevant to the society’s activities, such as the validation of guidelines, or clinical networks for testing treatment regimes or disease management, are prioritised.
Applications must meet the following eligibility criteria:
• the main applicant must be a member of the society;
• projects must involve a collaboration with more than one country;
• collaborations between two or more society members in different centres is encouraged;
• non-society members may participate in the proposed event or network, but only in collaboration with society members.

Three grants, worth up to €25,000 each, are available for projects lasting a maximum of two years.

Closing date: 31 Jul 15
Deadline information: This call is repeated once a year.

EDUCATIONAL SUPPORT FUND
Society for Underwater Technology

Description:
The Society for Underwater Technology invites applications for its educational support fund. This supports high calibre postgraduate students who are either starting or continuing a degree related to one area of marine science, underwater technology or offshore engineering. Master’s students who have been accepted on a one-year course of study related to the society’s area of interest may apply. MRes course students may also apply but must prove they are not being fully funded by an EPSRC grant. Students based anywhere in the world may apply for study at any course in the world approved by the society. PhD studies are not eligible. Awards are worth up to £4,000 for a full academic year.

Closing date: 31 Jul 15
Deadline information: Applications due by 12 midnight UK time. This call is repeated once a year.

Description:
The Universe Foundation invites proposals for its research grants. These support research that contributes to the enhancement of social welfare in an ageing society with falling birthrates and depopulating society. Proposals may address the following topics:
• social security system and policy, including pension insurance and benefits, health insurance and long-term care insurance, social welfare and advocacy;
• family ties, including soul and health of the elderly, dementia care and giving, emotions and minds of children, depression and domestic violence;
• community roles, including community based welfare, civilian activities, social participation of elderly in society, education, intergenerational communication and supporting caregivers.
Applicants must be engaged in research activities at a university, research laboratory, research institution or an educational organization. Applicants who are enrolled in a master’s course or the first half of a doctoral course must have an advisor to be eligible.
Grants will cover personal costs, travel expenses, equipment, commissioned research, rental fees, meeting expenses, research materials, printing expenses, correspondence expenses and supplies. Grants are worth up to ¥1 million over one year.

Closing date: 31 Jul 15 (Forecast)
Deadline information: Call has not yet been announced by funder, but this is the approximate deadline we expect. Proposals due by 5pm Japan time. This call is repeated once a year.

RESEARCH GRANTS
Harry Frank Guggenheim Foundation

Description:
The Harry Frank Guggenheim Foundation invites applications for its research grants. These support research on violence and aggression in relation to social change, intergroup conflict, war, terrorism, crime, and family relationships. Proposals are welcomed from any of the natural and social sciences and the humanities. Priority is given to research that can increase understanding and amelioration of urgent problems of violence and aggression in the modern world and to areas and methodologies not receiving adequate attention and support from other funding sources. Grants usually range from US$15,000 to US$40,000 per year for periods of one or two years. Applications for larger amounts and longer durations must be very strongly justified.

Closing date: 01 Aug 15 (Forecast)
Deadline information: Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

COLLABORATIVE RESEARCH GRANTS

American Academy of Religion

Description:
The American Academy of Religion invites applications for its collaborative research grants. These aim to encourage cooperative research among scholars with a focus on a clearly identified research project. Grants may also be used for interdisciplinary work with scholars outside the field of religion. The applicant must hold a PhD and must not have received an AAR research award in the past five years. Groups must apply through an AAR member designated as the project director who must have been a member of the society for at least three years.

Awards are worth between US$500 and US$5,000 each and can provide funding for networking and communication, or small research conferences if these are designed primarily to advance research.

Closing date: 01 Aug 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Online submission is open between 1 May and 1 August, annually.

BRIAN D NOVIS RESEARCH AWARD: SENIOR GRANT

International Myeloma Foundation

Description:
The International Myeloma Foundation invites applications for the Brian D Novis senior research award for research in the field of multiple myeloma. These support doctors and established investigators with a track record in multiple myeloma or related disorders, and are designed for projects which represent a different focus, direction or area of research from those in which they are currently funded. In most cases, these awards will be for pilot projects to obtain sufficient funding for larger applications from NIH or similar larger funding agencies.
The grant is worth US$80,000. Institutional overheads must not exceed 10 per cent of the total grant amount.

Closing date: 01 Aug 15 (Forecast)
Deadline information: Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

IEE FOUNDATION GRANTS PROGRAMME
IEEE

Description:
The IEEE invites applications for its IEEE foundation grants programme. This aims to increase the understanding of technology and its critical role in meeting global challenges and improving the human condition. Proposals are invited for projects that inform the public about technical issues such as energy, healthcare, cyber security, internet governance, environmental change, for the purpose of fostering balanced factual discussion and understanding of a current public issue. Projects must result in the creation of materials and activities such as presentations or simulations that are suitable for one or more of the following audiences: secondary school and college students, secondary school teachers, IEEE groups, local community groups, and technology policy makers. IEEE units and charitable organizations are eligible to apply. Grants ranging from US$5,000 to US$100,000 will be awarded for projects lasting no longer than 12 months.

Closing date: 01 Aug 15
Deadline information: Applications due by 11.59pm ET. This call is repeated once a year.

OMING SOON: RESEARCH AND EDUCATION GRANTS
MedEvac Foundation International

Description:
The MedEvac Foundation International will shortly be inviting applications for its research and education grants. The call will open in March 2015 with an anticipated deadline on 1 August 2015. The following information is subject to change.***

These grants support the development of research and education in air medical and critical care transport. For the 2015 cycle, the following areas are prioritised:

• safety in critical care transport, examination of adverse events data and development of practical solutions to overcome identified deficiencies;
• efficacious onboard patient management involving time sensitive care, including treatment and transport of patients involving time critical diagnoses;
• efficient utilisation of transport and effects on reduction in mortality and morbidity, rehabilitation and cost or productivity of survival;
• educational techniques and technologies aimed at improving patient care, critical decision making, safety or other areas pertinent to transport medicine;
• evaluation of the validity of accrediting agency standards that are relevant to transport medicine;
• studies that promote collaboration at the national or international level to complete the study or those that propose a meta-analysis of salient work in a priority.

Any person qualified to conduct research in the critical care transport industry for the proposed funding year worldwide may apply. Principal applicants must demonstrate that they are capable of completing the project.

A maximum of 50 per cent may be used for salary support of the primary applicant. Funds cannot be used for capital equipment purchases, publication costs or institutional overhead, as well as for salary support of a preceptor or mentor.

Closing date: 01 Aug 15
Deadline information: This call is repeated once a year.

CAPABLE PROGRAMME
Asia-Pacific Network for Global Change Research

Description:
The Asia-Pacific Network for Global Change Research invites applications for its CAPaBLE programme. Proposals may address global change and sustainable development with a specific emphasis on scientific capacity development, science-policy interfacing or awareness raising and dissemination activities.

Applications are invited from members of non-profit institutions based in APN member or approved countries: Australia, Bangladesh, Bhutan, Cambodia, China, Fiji, India, Indonesia, Japan, Laos, Malaysia, Mongolia, Nepal, New Zealand, Pakistan, Philippines, Republic of Korea, Russia, Sri Lanka, Thailand, Vietnam, US, Maldives, Myanmar, Pacific Island countries and Singapore. Activities must take place in at least one developing country. Applicants from non-members or approved states may participate in proposals.

The average grant for a one-year period is worth approximately US$40,000.

Closing date: 03 Aug 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Summary proposals due at 12 midnight JST, 3 August; full proposals due 12 midnight JST, 17 October 2014. This call is repeated once a year.

RESERCH PROGRAMME
Vasculitis Foundation

Description:
The Vasculitis Foundation invites applications for its research programme. This programme aims to provide seed grants to support pilot studies that research the following areas:
• aetiology or pathogenesis, including a broad range of studies of immunity, inflammation or vascular biology;
• epidemiology, including genetics;
• diagnosis, including identification of disease subtypes;
• treatment and management, including therapeutics to treat vasculitis or prevent complications, biomarkers and psychosocial outcomes.

The goal of the programme is to improve the quality of life for patients with vasculitis and find the case and cure for vasculitis. Candidates worldwide are eligible to apply.

Closing date: 04 Aug 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

Posted date: 06 Jun 12

IDRC RESEARCH AWARDS
International Development Research Centre

Description:
The International Development Research Centre invites applications for its research awards. These enable students to undertake a one-year paid programme of research on a specific topic, and receive hands-on experience in research programme management, grant administration, and the creation, dissemination and use of knowledge from an international perspective. Applicants may submit their applications to only one of the following programmes:

- advisory committee on research ethics;
- agriculture and food security;
- climate change and water;
- collaborative adaptation research initiative in Africa and Asia;
- donor partnerships division;
- governance for equity in health systems;
- governance, security and justice;

- IDRC challenge fund;
- information and networks;
- non-communicable disease prevention;
- supporting inclusive growth;
- think tank initiative.

The research must focus on one or more developing countries, but may not involve Cuba, Iran, Iraq, the People’s Democratic Republic of Korea, Somalia, Eastern Europe or Central Asia.

Each applicant must be a citizen or permanent resident of Canada or of a developing country, and they must be pursuing or must have completed master’s or doctoral studies at a recognised university.

The total budget ranges between CA$39,000 and CA$45,000 for a duration of six to 12 months, and is considered as salary for one year. Up to CA$10,000 for travel and research expenses may also be allocated.
MESOTHELIOMA RESEARCH GRANTS
Mesothelioma Applied Research Foundation

Description:
The Mesothelioma Applied Research Foundation invites applications for its mesothelioma research grants. These support projects dedicated to end the suffering caused by mesothelioma. Eligible projects may relate to bench work, translational or clinical research for the treatment of the disease. Encouraged projects include investigations of:

- strategies for early detection and prevention of mesothelioma;
- definition of targetable differences between normal and transformed mesothelium and development of novel strategies for treatment taking advantage of these targets;
- determination of clinical or molecular determinants for prognosis;
- therapeutic intervention.

Projects may be conducted through any not-for-profit academic, medical or research institution. All levels and degrees of scientists are encouraged to apply. Grants are worth up to US$50,000 per year for two years.

Closing date: 07 Aug 15
Deadline information: This call is repeated once a year.

MINOR USE MINOR SPECIES DEVELOPMENT OF DRUGS RESEARCH PROJECT
GRANT (R01)
Food and Drug Administration (FDA)

Description:
The Food and Drug Administration’s Center for Veterinary Medicine invites applications for its minor use minor species development of drugs research project grant (R01) funding opportunity announcement. This announcement supports the development of new animal drugs intended for minor use in major species or intended for use in minor species.

Only companies developing drugs for veterinary use or parties working as research partners with such companies are eligible for grants. US and foreign for-profit and non-profit organizations and public and private organizations are eligible to apply.

The total budget is US$1 million in fiscal year 2015 and will fund up to ten grants. Smaller grants are limited to US$100,000 in total costs per year with a maximum project period of two years for any routine safety or effectiveness study supportive of new animal drug approval or conditional approval of the designated product for the designated intended use. Larger grants are limited to US$150,000 in total costs per year with a maximum project period of three years for necessary studies that are of unusual complexity, duration or size.

SEPMEYER RESEARCH GRANTS PROGRAMME
International Education Research Foundation

Description:
The International Education Research Foundation invites applications for the Sepmeyer research grants. The aim of this programme is to fund research on world education systems and the integration of individuals educated outside of the US into the US educational environment and work force. Projects which address the following criteria are encouraged to apply under this programme:
• supporting research for the evaluation of foreign academic credentials;
• promoting the integration of students, scholars, and professionals holding non-US academic credentials into the US;
• facilitating the publication and dissemination of the results of the research;
• encouraging the exchange of information about educational systems.
Grants are worth up to US$1,000.

2020-DS-2015-1 DIGITAL SECURITY: CYBERSECURITY, PRIVACY AND TRUST
Horizon 2020: Societal Challenges

Description:
The European Commission Horizon 2020: Societal Challenges invites proposals for its H2020-DS-2015-1 digital security: cybersecurity, privacy and trust call. Proposals may address the following topics:
• DS-3-2015 the role of ICT in critical infrastructure protection;
• DS-4-2015 secure information sharing;
• DS-5-2015 trust e-services;
• DS-7-2015 value-sensitive technological innovation in cybersecurity.

Innovation actions, and one coordination and support action for DS-7, are eligible under this call. These require participation by at least three independent legal entities, each established in a different member state or associated country. All H2020 funding calls allow the participation in consortia of third country partners who secure their own funding. The indicative budget for this call in 2015 is €50.21 million.
For DS-3-2015 and DS-5-2015 the successful proposals are expected to receive between €3m and €8m, and for DS-4-2015 between €2m and €5m, although proposals for other amounts will also be considered. Ref: OJ 2013/C 361/06.

Closing date: 27 Aug 15
Deadline information: Proposals due by 5pm Brussels local time.

2020-BES-2015 BORDER SECURITY AND EXTERNAL SECURITY
Horizon 2020: Societal Challenges

Description:
The European Commission Horizon 2020: Societal Challenges invites proposals for its H2020-BES-2015 border security and external security call. Proposals may address the following topics:

- maritime border security, including BES-01-2015 radar systems for the surveillance of coastal and pre-frontier areas and in support of search and rescue operations, BES-02-2015 affordable and easily deployable technologies for EU coastal border surveillance with reduced impact on the environment, BES-03-2015 light optionally piloted vehicles for maritime surveillance, BES-04-2015 detection of low flying aircraft at near shore air space;
- supply chain security, including BES-08-2015 development of an enhanced non-intrusive scanner;

Proposals may take the form of coordination and support actions, research and innovation actions or PCP cofund actions. PCP cofund actions require participation by at least three legal entities, each established in a different member state or associated country and must include at least two public procurers. Coordination and support actions require participation by at least one legal entity established in a different member state or associated country. Research and innovation actions require participation by at least three legal entities, each established in a different EU member state or associated country. All H2020 funding calls allow the participation in consortia of third country partners who secure their own funding.
The indicative budget for this call is €42.17 million.

Ref: OJ 2013/C 361/06.

Closing date: 27 Aug 15
Deadline information: Proposals are invited between 25 March and 5pm Brussels local time, 27 August 2015.
Posted date: 28 Jul 14
Award type: Directed grants to institutions, research groups etc. Innovation grants, Networking/collaboration
Award budget total: €42,170,000

2020-DRS-2015 DISASTER RESILIENCE: SAFEGUARDING AND SECURING SOCIETY, INCLUDING ADAPTING TO CLIMATE CHANGE
Horizon 2020: Societal Challenges

Description:
The European Commission Horizon 2020: Societal Challenges invites proposals for its H2020-DRS-2015 disaster resilience: safeguarding and securing society, including adapting to climate change call. Proposals may address the following topics:

• crisis management, including DRS-01-2015 potential of current and new measures and technologies to respond to extreme weather and climate events, DRS-03-2015 demonstration activity on large scale disasters and crisis management and resilience of EU external assets against major identified threats or causes of crisis, DRS-06-2015 addressing standardisation opportunities in support of increasing disaster resilience;
• disaster resilience and climate change, including DRS-09-2015 science and innovation for adaptation to climate change: from assessing costs, risks and opportunities to demonstration of options and practices, DRS-10-2015 natural hazards: towards risk reduction science and innovation plans at national and European level, DRS-11-2015 mitigating the impacts of climate change and natural hazards on cultural heritage sites, structures and artefacts;
• communication technologies and interoperability, including DRS-18-2015 interoperable next generation of
broadband radio communication system for public safety and security;
• ethical and societal dimension, including DRS-22-2015 impact of climate change in third countries on Europe's security.

Research and innovation actions, innovation actions and coordination and support actions are eligible under the call. Research and innovation actions as well as innovation actions require participation by at least three independent legal entities, each established in a different member state or associated country. Coordination and support actions require participation by at least one independent legal entity, established in a member state or associated country. All H2020 funding calls allow the participation in consortia of third-country partners securing their own funding. The indicative budget for this call is €82.33 million.
Ref: OJ 2013/C 361/06.

Closing date: 27 Aug 15
Deadline information: Proposals invited between 25 March and 5pm Brussels local time, 27 August 2015.

2020-FCT-2015 FIGHT AGAINST CRIME AND TERRORISM
Horizon 2020: Societal Challenges

Description:
The European Commission Horizon 2020: Societal Challenges invites proposals for its call H2020-FCT-2015 fight against crime and terrorism call. Proposals may address the following topics: forensics, including FCT-01-2015 tools and infrastructure for the extraction, fusion, exchange and analysis of big data including cyber-offenses generated data for forensic investigation, FCT-02-2015 advanced easy to use in-situ forensic tools at the scene of crime, FCT-03-2015 mobile, remotely controlled technologies to examine a crime scene in case of an accident or a terrorist attack involving national strategy for chemical, biological, radiological, nuclear, and explosives materials, FCT-04-2015 internet forensics to combat organised crime;
• law enforcement capabilities, including FCT-06-2015 detection and analysis of terrorist-related content on the internet, FCT-09-2015 identity management;
• ethical and societal dimension, including FCT-15-2015 better understanding the role of new social media networks and their use for
Public security purposes, FCT-16-2015 investigating the role of social, psychological and economic aspects of the processes that lead to organised crime and terrorist networks and their impact on social cohesion. Research and innovation actions, innovation actions and coordination and support actions are eligible under the call. Research and innovation actions as well as innovation actions require participation by at least three independent legal entities, each established in a different member state or associated country. Coordination and support actions require participation by at least one independent legal entity, established in a member state or associated country. All H2020 funding calls allow the participation in consortia of third-country partners securing their own funding. The indicative budget for this call is €42.16 million.

Ref: OJ 2013/C 361/06.

Closing date: 27 Aug 15
Deadline information: Proposals invited between 25 March and 5pm Brussels local time, 27 August 2015.

POSTPONED: SOFT FRUITS RESEARCH AND DEVELOPMENT
Agriculture and Horticulture Development Board

Description:
The Horticultural Development Company will not be inviting applications for its soft fruits research and development strategy. With the emphasis on calls for tender there will not be a call for concept notes and potentially subsequent proposals during 2014. However, concept notes addressing unforeseen emergency issues will be considered.***

This scheme aims to commission R&D projects and associated communications activities on strawberries, raspberries, blackcurrants, blueberries, rhubarb and all other ribes and rubus species. The soft fruit sector strategy objectives are:
• to improve productivity and cost management;
• to prevent and manage disease;
• to improve crop quality and supply;
• to develop integrated management of pests, diseases and weeds;
• to improve efficiency and minimise costs.
The strategy has five themes such as crop protection, genetics and varietal development,
crop production systems, resource use and
phenology and quality.
The project further aims to identify key
challenges facing Horticultural Development
Company’s levy payers which can be
ameliorated through research and its
translation into practice on farms.
Projects must be led, managed and delivered
by skilled teams from institutions able to
commit a long term programme of work. In
addition, collaboration between research
providers is expected and encouraged.

Closing date: 28 Aug 15 (Forecast)
Deadline information: !! Call has not yet
been announced by funder, but this is the
approximate deadline we expect. This call is
repeated once a year.

SUPPORT FOR KOREAN STUDIES CENTRES AND ASSOCIATIONS
Korea Foundation

Description:
The Korea Foundation invites applications for its support for Korean studies centres and associations. This provides support for academic activities conducted by Korean studies centres and academic associations dedicated to research on Korean language or other Korea-related areas of study. Support is granted for the organization of public lectures, academic conferences, workshops and other activities promoting Korean studies. Korean studies centres in overseas universities and academic associations may apply.
The programme covers personnel expenses and other costs directly related to the organization of the events. Funding may be granted for between one and three years.

Closing date: 31 Aug 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.
Posted date: 11 Jul 14

GRANTS FOR TARGETS
Bayer

Description:
Bayer invites applications for its grants for targets initiative. The initiative aims to encourage research on novel targets and disease-related biomarkers in the fields of oncology, gynecology, cardiology, hematology and ophthalmology. The following different types of grants, depending on the specifics of the target and its development phase will be awarded:
• support grants worth between €5,000 and €10,000 will be awarded to advance research on targets that are at a very early stage of discovery;
• focus grants worth between €10,000 and €125,000 will be awarded for more mature ideas, such as addressing specific aspects of a target as a first step towards transferring it to the drug discovery process.
Researchers from universities, other academic research institutes and start-up companies from all over the world are welcome to apply.

Closing date: 31 Aug 15
Deadline information: Deadlines on: 31 August 2015, 31 March 2016, and repeated annually.
Posted date: 29 Aug 14
Award type: Directed grants to institutions, research groups etc, Academic-Industry links, Networking/collaboration
Award amount max: €125,000

Research Grants
Certified Practising Accountants Australia

Description:
Certified Practising Accountants Australia invites proposals for its research grants. These support innovative research worldwide that is relevant to the association’s membership, the profession and the global business community. The focus areas for research include:

SCIENCE GRANTS
Alfred Kordelin Foundation - Alfred Kordelinin Yleinen Edistys- ja Sivistysrahasto

Description:
The Alfred Kordelin Foundation invites applications for its science grants. These enable Finnish citizens or permanent residents to undertake scientific research projects. International applications are invited, but projects must be related to Finland or Finnish culture. The following grants are available:
• the yearlong thesis grant, worth €24,000, supports the completion of a doctoral thesis, with priority on subject areas with limited government funding and research areas that cannot be linked to larger programmes or joint ventures;
• the six-month grant, worth €12,000, for finalising doctoral theses in six months;
• the yearlong research grant, worth up to €28,000, for postdoctoral research for one to three years;
• travel grants to conferences for those presenting their thesis or to those presenting their papers or posters, provided that the candidates are doctorates or employees of a university or a research centre.
In 2014, 52 grants were awarded with a total award budget of approximately €1.1 million.

Closing date: 31 Aug 15
Deadline information: Applications are invited between 1 August and 12 midnight, 31 August 2015. This call is repeated once a year.

OPPORTUNITIES FOR SEPTEMBER 2015

Research Project Grants
Nordic Culture Fund – Nordisk Kulturfond

Description:
The Nordic Culture Fund invites applications for its research project grants. These aim to further cultural cooperation between Denmark, Finland, Iceland, Norway and Sweden as well as the self governing areas of Åland, Greenland and the Faroe Islands. Projects should stimulate networking within arts and culture, communicate Nordic arts and culture both within the Nordic region and abroad and create opportunities for cultural exchange and meetings between the different parts of the Nordic region.

Anybody is eligible to apply including operators from outside the Nordic region, but projects must involve at least three Nordic countries or autonomous areas and have a clear Nordic focus.

Projects can apply for grants in two categories: under DK300,000 or over DK300,000

EPIDERMOLYSIS BULLOSA RESEARCH GRANTS
DEBRA International

Description:
The Dystrophic Epidermolysis Bullosa Research Association invites applications for its research grants. These support proposals that lies within DEBRA’s current research priorities, which are:
• biology and genetics of all forms of EB, as better understanding can lead to new approaches to treat EB;
• development of therapies, including possible gene, cell, drug or protein therapies;
• wound healing and skin cancer in EB;
• clinical care research to improve management of EB through symptom relief.
DEBRA welcomes proposals for co-funding with other organizations, including government, academia, industry or other charities.
Funding is granted for projects lasting between six months and three years with a maximum of €80,000 per year.

IDEA GRANTS
Barth Syndrome Foundation

Description:
The Barth Syndrome Foundation invites proposals for its idea grants. These support basic science and clinical research on the natural history, biochemical basis and treatment of Barth syndrome.

Funding is available as seed grants for testing initial hypotheses and the collection of preliminary data that may lead to successful long-term funding by major granting institutions. Young, non-tenured investigators are allowed to include up to 75 per cent of the
direct costs as principal investigator salary while experienced investigators may only include up to 10 per cent for this purpose. Idea grants are worth up to US$50,000 over one to two years. Indirect costs are limited to 10 per cent of the direct costs. An additional US$20,000 may be available for clinically-oriented applications to support the travel of research volunteers to specific clinical research sites.

Closing date: 01 Sep 15 (Forecast)
Deadline information: Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

PROJECT RESEARCH GRANTS
Wings for Life Spinal Cord Research Foundation

Description:
The Wings for Life Spinal Cord Research Foundation invites applications for its project research grants. These support basic and clinical research projects, translational studies and early stage clinical trials related to spinal cord injury. Projects may address all aspects of spinal cord lesions, nerve regeneration, trophic support of lesioned neurons and functional changes induced by lesions preferentially in mammals. Proposals should have a view to translation from laboratory to clinical setting and clinical research projects can be in the fields of diagnosis, acute lesion management including surgery, neurology, urology, rehabilitation or other areas related to paraplegia.

The grants are intended to cover the costs of personnel, equipment and consumables.

Closing date: 01 Sep 15 (Forecast)
Deadline information: Call has not yet been announced by funder, but this is the approximate deadline we expect. Executive summaries due by 1 September; full grant applications due by 3 November 2014. This call is repeated once a year.
Posted date: 16 May 14

INDIVIDUAL RESEARCH GRANTS
Wings for Life Spinal Cord Research Foundation

Description:
The Wings for Life Spinal Cord Research Foundation invites applications for its individual research grants. These encourage new investigators’ work on regeneration and recovery processes and well-established researchers’ work to develop new ideas or transfer their efforts of other areas into spinal cord research. The aim is to promote basic and clinical research related to spinal cord injury. Projects may address all aspects of spinal cord lesions, nerve regeneration, trophic support of lesioned neurons and functional changes induced by lesions preferentially in mammals. Proposals should have a view to translation from laboratory to clinical setting and clinical research projects can be in the fields of diagnosis, acute lesion management including surgery, neurology, urology, rehabilitation or other areas related to paraplegia. The grants are intended to cover the salary of the applicant.

Closing date: 01 Sep 15 (Forecast)

PAGE AND JOHNSON LEGACY SCHOLARS GRANTS

Arthur W Page Center

Description:
The Arthur W Page Center invites applications for the Page and Johnson legacy scholars grants. These support scholars and professionals making important contributions to knowledge, practice or public understanding of ethics and responsibility in public communication. The competition includes a special call on ethical stakeholder engagement, which supports proposals that deepen the field’s understanding of the issues with a focus on real-world solutions for practitioners.

Applications are welcomed from scholars and practitioners, doctoral candidates at the dissertation-writing stage and practitioners of public communications. Women and minorities are especially encouraged to apply. Joint applications and collaborative projects are also encouraged.

Each grant is worth between US$1,000 and US$5,000.

Closing date: 01 Sep 15 (Forecast)

**RETURN HOME FUNDING PROGRAMME**

**International Brain Research Organization**

**Description:**
The International Brain Research Organization invites applications for its return home programme. This enables researchers from developing countries who were trained overseas to return home in order to improve opportunities there for productive neuroscience research. Applicants may be:

• postdoctoral fellows who have finished training in neurosciences in a centre of excellence in a developed country;
• research students who have been trained in a centre of excellence in brain research;
• scientists who are developing a successful basic or clinical research career in a developed country and wish to return to their country of origin, or to a less developed country, for personal or cultural reasons.
Funding is worth up to €20,000.

Closing date: 01 Sep 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect.
Applications are invited between 1 August and 12 midnight CET, 1 September. This call is repeated once a year.

STUDENT RESEARCH GRANTS
American Hemerocallis Society

Description:
The American Hemerocallis Society invites applications for its student research grants. The grants support graduate or undergraduate students or faculty/staff using daylilies (plant genus Hemerocallis) as experimental organisms in original research projects. Fundamental areas of investigation are encouraged, such as:
• banded chromosome preparations;
• gene mapping;
• fine structural studies of vegetative or reproductive parts;
• microscopic analysis of the ontogeny of flower scapes in the crown;
• effect of various hormones on plant growth and formation of proliferations on scapes.
Practical areas of study are encouraged, such as:
• hardness of various cultivars in different climatic zones;
• use of microtubule degradants (eg, trifluralin, oryzalin, amiprophosmethyl) to produce polyploids;
• seed dormancy factors;
• pests and diseases (eg, crown rot, spring sickness, bulb mites, gall midge, daylily rust).
The grants are up to $3,000 per year. Grants are renewable for a total of three years.

Closing date: 01 Sep 15
Deadline information: Deadlines on: 1 September 2015, 1 April 2016, and repeated annually.

EXPERIMENT - IN SEARCH OF BOLD RESEARCH IDEAS
VolkswagenStiftung – Volkswagen Foundation

Description:
The VolkswagenStiftung invites applications for the Experiment - in search of bold research ideas initiative. This aims to support daring new research concepts in science, engineering, behavioural- and life sciences, disregarding the project risk and perhaps the vagueness of a successful outcome.
Applicants must have completed their doctorate or have superior academic qualifications. They can be of any nationality, but must have active integration within a university or extra-mural research institution in Germany at latest at the start of the project. Collaboration with institutes abroad is possible and these collaborators can receive funds through their German partner.

Approximately 15 exploratory projects will be granted per year, worth €100,000 each for a period of 18 months. The funds may be flexibly utilised for all personal and non-personal costs.

Closing date: 01 Sep 15
Deadline information:
Posted date: 02 Sep 14
Award type: Hosting visits, Travel to conferences, meetings etc., Travel for research purposes, Directed grants for individual investigators, Directed grants to institutions, research groups etc, Innovation grants, Networking/collaboration
Award amount max: €100,000

GLOBAL INNOVATION PROGRAMMES TO HELP THE HUMANITARIAN COMMUNITY BETTER RESPOND TO REFUGEES OUTSIDE OF CAMPS
Department of State

Description:
The Department of State invites concept notes for its global innovation programmes to help the humanitarian community better respond to refugees outside of camps. These programmes support the development of new approaches and tools to strengthen humanitarian response to urban and other non-camp refugees. Applicants must develop and pilot new tools and models of assistance that will enable the humanitarian community to address the challenges unique to urban and non-camp settings.

Any African organization may apply.
Up to US$1 million is available for programmes lasting 12 or 24 months.
Ref: PRM-PRMOAPGL-16-001.

Closing date: 01 Sep 15
Deadline information: Concept notes due by 12 noon EDT/EST. Deadlines on: 1 September 2015, 1 March 2016.
QUALITY OF LIFE GRANTS PROGRAM
Christopher and Dana Reeve Foundation

Description:
The Christopher and Dana Reeve Foundation is expected to offer quality of life grants for research that develops treatments and cures for paralysis caused by spinal cord injury and other central nervous system disorders. Quality of life grants offer support to nonprofit organizations that address the needs of persons living with paralysis (particularly spinal cord injury), their families and caregivers. Funding is awarded in 13 categories, including: accessibility, advocacy, arts, assistive technology, children, counseling, education, employment, health promotion, independent living, practical service, sports and recreation, and therapeutic riding. Except for the health promotion category, the primary focus of the grants is paralysis caused by spinal cord injury. Funding is awarded for up to $25,000 for each grant. Grants will only be awarded to nonprofit organizations. Applications are accepted from organizations based outside of the US, although priority is given to those with an international scope.

Closing date: 03 Sep 15 (Forecast)
Deadline information: Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated 2 times a year.

OMING SOON: CALL FOR SEA TIME

Commonwealth Scientific and Industrial Research Organization

Description:
The Commonwealth Scientific and Industrial Research Organization will shortly be inviting applications for sea time under its Marine National Facility programme. The next call for applications will be made in July 2015 for the 2017-18 research schedule. The following information is subject to change. ***

This programme enables Australian researchers and their international collaborators to carry out research in Australia’s regional seas and oceans in the following disciplines:
• oceanography and climatology;
• fisheries and marine ecosystems;
• marine environmental research;
• marine geosciences.

All researchers employed by an Australian research agency, based in Australia, are eligible to apply for time on the research vessel. Australian research agencies include universities, Australian government research agencies, cooperative research centres, museums, and state and territory research organizations. An applicant will be one of the principal investigators associated with the proposed work. Other principal investigators named in the application can be from overseas research organizations or work overseas for Australian research organizations. The sponsoring organization of each PI must be able to commit the resources, including people, equipment and finances, to carry out the work as proposed in the application. Multi-year applications for sea time of up to three years will be considered. The research vessel can carry up to 35 scientists and stay at sea for up to 60 days.

Closing date: 03 Sep 15 (Forecast)
Deadline information: Call has not yet been announced by funder, but this is the approximate deadline we expect.

DEVELOPMENT RESEARCH GRANTS
Udenrigsministeriet – Ministry of Foreign Affairs of Denmark

Description:
The Ministry of Foreign Affairs invites applications for its development research grants. These support strategic research cooperation projects which will generate new knowledge relevant to the needs and strategies of priority countries and to Denmark’s development cooperation, and contribute to strengthening research capacity in developing countries. Applications for south driven projects must address one of the following themes:
• for Ghana: natural resource management, climate-smart agriculture, environmentally sustainable solutions; economic development and poverty reduction, role of the informal sector; right to health, health care, determinants of health;
• for Tanzania: good governance; economic development and poverty reduction, green growth, natural resource management; right to health, health care, determinants of health;
• for Nepal: economic development and poverty reduction, green growth; fragility, stability and rights.
Applications for north driven projects must address one of the following themes:
• conflict and fragility;
• new development actors and changing partnerships;
• ICT for development.
Applications can be submitted by institutions such as private-sector enterprises, governmental institutions or private organizations in Denmark for the north driven development research grants while institutions in Ghana, Tanzania and Nepal may apply for the south driven development research grants. The main applicant must hold a PhD or equivalent qualifications and demonstrate relevant scientific merits within the research topic applied for. North-driven applications must list partners in Danida priority countries and possible international partners, while South-driven applications must list partners in Denmark. Research institutions outside the Danida priority countries can only be included as secondary partners.
The total budget for this call is DKK135 million. Each grant is worth up to DKK10m for up to five years. Co-funding is expected. Funding may be used for salaries, travel and fieldwork, publication and dissemination, and equipment.

Closing date: 04 Sep 15
Deadline information: Pre-proposals due by 12 noon Danish time. This call is repeated once a year.

PROJECT GRANTS
European Society of Anaesthesiology

Description:
The European Society of Anaesthesiology
invites applications for its project grants.
These promote anaesthesia related research in
Europe and encourage anaesthesiologists to
extend the frontiers of their practice.
Proposals may address clinical or
translational research, experimental research,
patient safety and research on education or
training of anaesthesiologists. Priority will be
given to topics that have no alternative
sources of funding.
Anybody may apply, but in the case of
experimental research, the applicant must be
an ESA active member. Successful applicants
must become a member in order to receive
funding. Any qualified member of an
institution in a European country represented
in the ESA council or from which the national
society is a member of ESA may apply.
Two grants, worth up to €60,000, are
available.

Closing date: 04 Sep 15
Deadline information: Applications are
invited between 22 May and 11.59pm CET, 4
September 2015. This call is repeated once a
year.

RESEARCH GRANTS IN BASIC AND CLINICAL SCIENCE
Tourette Syndrome Association

Description:
The Tourette Syndrome Association invites applications for its research grants in basic and clinical sciences. Grants are available for research into any area that has the potential to contribute to the understanding of Tourette syndrome. Candidates must have a PhD, MD or equivalent and experience in the field of movement disorders. They may come from outside the US, and be part of non-profit or for-profit organizations. Grants are worth up to US$75,000 per year for up to two years. Postdoctoral fellowships worth up to US$40,000 for one year.

Closing date: 06 Sep 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Pre-proposals due by 6 September; full proposals due by 15 November 2013. This call is repeated once a year.

CAREER DEVELOPMENT PROGRAMME
Leukemia and Lymphoma Society

Description:
The Leukemia and Lymphoma Society invites applications for its career development programme. This enables researchers to undertake basic, clinical or translational research related to leukaemia, lymphoma and myeloma. Applicants must have received a PhD, MD or DVM degree at the time of review. The following award categories are available:
• scholar award, available for a period of five years and worth US$110,000 per year, for scholars conducting original investigation in the field of hematologic malignancies who hold an independent faculty-level or equivalent position and have obtained substantial support from a national agency;
• scholar in clinical research award, available for a period of five years and worth US$110,000 per year, for scholars who hold an independent faculty-level appointment and are conducting original, independent, applied research often involving early-stage clinical trials that will advance the prevention, diagnosis or treatment of hematologic malignancies;
• special fellow award, available for a period of two to three years and worth US$65,000 per year, for an investigator with at least two and a maximum of four and a half years of postdoctoral research training;
• special fellow in clinical research award, available for a period of two to three years and worth US$65,000 per year, for a researcher who holds a PhD, MD or equivalent degree and has completed between two and four and a half years of clinical haematology, oncology or hematopathology training, or postdoctoral research training in a clinical discipline;
• fellow award, worth US$55,000 per year for a period of three years, for a promising investigator with under two years of postdoctoral research training.

Closing date: 08 Sep 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Letters of intent due 3pm ET, 8 September; full proposal due 3pm ET, 1 October 2014. This call is repeated once a year.

ECOLOGISTS IN AFRICA
British Ecological Society

Description:
The British Ecological Society invites applications for its grants for ecologists in Africa. These grants provide support for ecologists in Africa to carry out innovative ecological research. Grantees will have the opportunity to develop their skills, experience and knowledge base, and to make connections with ecologists in the developed world. Scientists resident in any African country or associated island who hold at least an MSc or equivalent degree are eligible to apply. Applicants should be working for a university or research institution in Africa. The proposed research must be carried out in a country in Africa or an associated island.
The maximum duration is 18 months. Grants are worth up to £8,000 for research, with an additional £2,000 in travel funds available for grantees to spend time working with ecologists in developed countries. The grant can be used to pay for basic tools needed to conduct the research project, travel and in some cases part of the applicant's salary. It cannot be used for tuition fees. Successful applicants will also receive two years' free membership of the society and free online access to its journals.

Closing date: 08 Sep 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

COMING SOON: PLANNING GRANTS
Barncancerfonden – Swedish Childhood Cancer Foundation

Description:
The Swedish Children’s Cancer Foundation will shortly be inviting applications for its planning grant. The closing date for applications is expected to be on 9 September
2015. The following call details are subject to change.***

These grants aim to contribute to the development of improved treatment protocols in the field of paediatric cancer, and to promote equal treatment and rehabilitation across the country.

Grants support projects that are carried out by health care planning groups where proposals should be connected directly or indirectly to the field of paediatric cancer, and may include areas such as development of care and treatment approaches, quality assurance and coordination of basic research and treatment studies.

Individual postdoctoral applicants professionally based in Sweden, including doctors, researchers, counselors, psychologists, nurses and others who are active in paediatric cancer, are eligible to apply. Funding for Nordic or international projects may be granted under the prerequisite that the main applicant is situated in Sweden.

The grants are block grants and may be used for all costs related to the projects, including salary costs. Funding can be granted for one to three years.

Closing date: 09 Sep 15
Deadline information: Applications are invited between 8 July and 11:59pm, 9 September 2015. This call is repeated once a year.

STRATEGIC MOBILITY – GRANT FOR PERSONAL MOBILITY BETWEEN ACADEMIA AND INDUSTRY
Stiftelsen för Strategisk Forskning – Swedish Foundation for Strategic Research

Description:
The Swedish Foundation for Strategic Research invites proposals for its strategic mobility grant for personal mobility between academia and industry. This aims to increase personal mobility and cross-fertilisation between academia and industry. The guest researcher may carry out research, research-based activities or technical development within one of the foundation’s spheres of
A compilation of the Research Services of the Office of Research, Innovation & Development (ORID)
international activities within the area. All new energy technologies will be supported, especially those aiming at more efficient use of energy as well as all kinds of renewable energy and technologies for conversion and storage of energy. EUDP projects must support the Danish energy-policy objectives with respect to climate and energy policy and have clear commercial potentials. The first round also welcomes applications concerning the development and demonstration of wave power, and renewable energy for district heating. The programme will supply funding to research if this prepares or directly supports demonstration activities.

Public and private enterprises or knowledge institutions may apply, including universities and approved technological service institutes. However, the programme can co-fund foreign participants in projects which contribute to advancing technological development in Denmark as long as the commitment holding company is registered in Denmark.

The total budget for this round is DKK250 million, whereof DKK10.1m will be allocated to development and demonstration of wave power projects and DKK12m for renewable energy for district heating projects.

Closing date: 10 Sep 15
Deadline information: Applications due by 12 noon CET. This call is repeated 2 times a year.

Z/JSPS JOINT RESEARCH PROJECT PROGRAMME
Royal Society of New Zealand

Description:
The Ministry of Business, Innovation and Employment, through the Royal Society of New Zealand, and the Japan Society for the Promotion of Science invite applications for their joint research project programme. This
Aims to strengthen cooperation in science and technology between Japan and New Zealand, and to facilitate bilateral research by supporting New Zealand researchers to travel to Japan and work on joint research projects. Research projects can range from basic-targeted to applied research, and the priority areas of focus for the projects should be within social, natural, physical and medical sciences. MBIE has identified the following as common areas of interest with Japan:

- Advanced technologies;
- Disaster mitigation;
- Environment;
- Health and biomedical sciences;
- Marine research.

Applicants must be resident researchers in New Zealand. The research team must comprise two or more participating researchers. The team leader must hold a full-time position at a higher education institution or research organization in New Zealand and must have a collaboration partner in Japan. The New Zealand principal investigator and the Japanese PI must collaborate and submit jointly linked applications to their respective administrators in both Japan and New Zealand. Researchers from countries other than Japan or New Zealand may participate, but must cover their own expenses. New Zealand researchers from industry may also be eligible provided their organization's primary purpose is research as opposed to commercial activity.

Funding is worth up to NZ$30,000 per project per year, for projects lasting up to two years. Up to four joint projects may be funded in this round. Funding may be used to cover travel and local costs, expenses for holding symposiums, seminars and meetings, and expenses for research activities.

Closing date: 10 Sep 15 (Forecast)
Deadline information: Call has not yet been announced by funder, but this is the approximate deadline we expect. Applications due by 5pm NZST. This call is repeated once a year.

H 2020-MSCA-IF-2015 MARIE SKLODOWSKA-CURIE INDIVIDUAL FELLOWSHIPS
Horizon 2020: Excellent Science

Description:
The European Commission Horizon 2020: Excellent Science invites proposals for its H2020-MSCA-IF-2015 Marie Sklodowska-Curie individual fellowships call. This aims to enhance the creative and innovative potential of experienced researchers wishing to diversify their individual competence in terms of skill acquisition through advanced training, international and intersectoral mobility. Support will be granted for individual, transnational fellowships awarded to the best or most promising researchers for employment in member states or associated countries, based on an application made jointly by the researcher and host organization. There are two different mobility types:
• MSCA-IF-2015-EF European fellowships: these are held in EU member states or associated countries and are open to researchers either coming to Europe or moving within Europe;
• MSCA-IF-2015-GF global fellowships: these are based on a secondment to a third country and a mandatory 12 month return period to a European host.
The beneficiary shall be a participant located in a member state or associated country and employing the researcher during the project. The indicative budget is €215 million. Ref: OJ 2013/C 361/06.

Closing date: 10 Sep 15
Deadline information: Applications invited between 12 March 2015 and 5pm Brussels local time, 10 September 2015.

RESEARCH GRANTS
United Mitochondrial Disease Foundation

Description:
The United Mitochondrial Disease Foundation invites proposals for its research grants. These support projects that forward the cause of research into mitochondrial diseases, with the aim of finding cures for mitochondrial illness. Research priorities include basic science and research, clinical research, treatment, or diagnosis. Priority may be given to proposals that include postdoctoral fellowships, seed money for new researchers, and new area of research for experienced investigators. In addition, private funds of up to US$100,000 are available for a creatine-focused project, while up to US$25,000 is awarded for a small clinical study or project.
All applicants must register with the foundation.
Each grant supports a period between one and three years.

Closing date: 13 Sep 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

STUDY BURSARIES
Bournemouth University

Description:
Postgrad Solutions, through Bournemouth University, invites applications for its study bursaries. These support students who are starting a postgraduate course in the academic year 2015-16. The following bursaries are available:
• general UK: two bursaries are available to students starting any UK postgraduate course;
• general European: four bursaries are available to students starting any European postgraduate course taught in English;
• engineering: one bursary is available to a student starting a UK engineering postgraduate course;
• computer science or IT: one bursary is available to students starting a UK computer science or IT postgraduate course;
• distance learning: one bursary is available to a student starting a UK distance learning postgraduate course;
• English language: one bursary is available to a student who has taken an IELTS English language test and is applying for a UK postgraduate course;
• PhD or research: one bursary is available to a student starting a UK PhD or research programme;
• business masters: two bursaries are available to students starting any pre-experience postgraduate business course at any registered institution in the UK or continental Europe;
• global and US LLM: one bursary is available to a student starting any master of law course at any registered institution in any country, and one bursary is open to a student starting a master of law course at any registered institution in the US. Students from anywhere in the world may apply. Applicants must show proof that they have accepted an offer of a place at their chosen institutions.

A total of 15 bursaries, worth £500 each, are available.

Closing date: 14 Sep 15

GRANTS-IN-AID OF RESEARCH
Sigma Xi, The Scientific Research Society

Description:
Sigma Xi is inviting applications under its grants-in-aid of research programme. The programme awards grants of US$1,000 or less to students to support scientific investigation in any field. Designated funds from the National Academy of Sciences allow for grants of up to US$5,000 for astronomy research and US$2,500 for vision related research. Students can use the funding to pay for travel expenses to and from a research site, or for purchase of non-standard laboratory equipment necessary to complete a specific research project. Only undergraduate and graduate students currently enrolled in degree seeking programs may apply.
International students and non-US citizens are encouraged to apply.

Closing date: 15 Sep 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated 2 times a year.

Tinker Foundation

Description:
The Tinker Foundation invites applications for its institutional grants. These aim to support the creation of effective policy changes to improve the lives of Latin Americans.
Proposals should address one of the following areas of interest:
• democratic governance;
• education;
• sustainable resource management;
• US policy toward Latin America;
• Antarctica science and policy.
The organizational entity needs to hold a 501(c)3 charitable status or its equivalent if based outside the United States. Projects should have a strong public policy component, offer innovative solutions to problems facing these regions, and incorporate new mechanisms for addressing these programmatic areas. Collaboration between organizations in the United States and Latin America is encouraged, and funding preference is given to those institutions actively engaged with external stakeholders in addressing an issue of concern.

Closing date: 15 Sep 15
Deadline information: Letters of inquiry should be sent at least four weeks in advance of the deadline. Deadlines on: 15
September 2015, 1 March 2016, and repeated annually.
Posted date: 15 Jan 15
Award type: Hosting visits, Hosting conferences, Travel to conferences, meetings etc., Directed grants to institutions, research groups etc

LIBRARY AND INFORMATION SCIENCE RESEARCH GRANTS
Online Computer Library Center

Description:
The Online Computer Library Center, Incorporated and OCLC Research, in collaboration with the Association for Library and Information Science Education, invites applications for its library and information science research grants. These support independent research that helps integrate new technologies offering innovative approaches and contributing to a better understanding of the information environment and user expectations and behaviours. Research related to the following areas is encouraged:
• impact of digital technology on libraries, museums and archives;
• social media, learning, and information-seeking behaviour;
• new developments in knowledge organization.
Grants are worth up to US$15,000 and are open to full-time academic faculty in schools of library and information science. International proposals and collaborative projects are encouraged. Priority will be given to junior faculty and applicants who have not previously received LISRGP funds.

Closing date: 15 Sep 15 (Forecast)
Deadline information: Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.
Posted date: 13 Apr 11
Award type: Travel for research purposes, Directed grants for individual investigators, Directed grants to institutions, research groups etc, Equipment and materials
Award amount max: $15,000

SIGMA THETA TAU INTERNATIONAL/ONCOLOGY NURSING SOCIETY GRANT

Sigma Theta Tau International

Description:
Sigma Theta Tau International and the Oncology Nursing Society invite applications for their grant. This aims to stimulate clinically related oncology nursing research. Applicants must hold a master’s degree and be registered nurses actively involved in some aspect of cancer patient care, education or research. Preference is given to Sigma Theta Tau International members, other qualifications being equal. One grant, worth up to US$25,000, is available.

Closing date: 15 Sep 15
Deadline information: Letters of intent due by 1 September; applications due by 15 September 2015. This call is repeated once a year.
Posted date: 20 Oct 14

Award type: Directed grants for individual investigators

Contact Details
ONF
125 Enterprise Drive
Pittsburgh, PA 15275-1214
Tel: +1 412 859 6298
Description:
The Royal Society of Edinburgh invites applications for its research networks in the arts and humanities. These are designed to create or consolidate collaborative partnerships over a two-year period, between higher education institutions in different disciplines or between higher education institutions and Scottish cultural institutions. The award may be used to expand the activities of existing research workshops, or to initiate new projects, however evidence of previous successful collaborative work is an advantage.

The following are eligible to apply:
• full or part-time academics in the arts and humanities employed by HEIs in Scotland;
• full or part-time practitioners in the creative, visual or performing arts contracted to HEIs or SCIs in Scotland;
• retired academics in the arts and humanities who retain demonstrable links with HEIs or SCIs in Scotland;
• full or part-time research active members of staff in SCIs.

Although the principal investigator must be based in Scotland, applications for collaborations between HEIs and cultural institutions throughout the UK and overseas will be accepted, provided the key principals of the award scheme are recognised.

Funding for each network is a maximum of £20,000 for two years, and may be used to cover related travel expenses to archives, libraries, performances, exhibitions and conferences.

Closing date: 15 Sep 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.
Posted date: 01 Aug 14
RESEARCH WORKSHOPS IN THE ARTS AND HUMANITIES
Royal Society of Edinburgh

Description:
The Royal Society of Edinburgh invites applications for its research workshops in the arts and humanities. These awards are designed to encourage collaborative investigation into a research proposition that is at an early stage of its development. Funding encourages and supports a range of seminars, colloquia, workshops and lectures which will advance the exploration of the topic, theme or issue and hopefully lead to long-term research projects in the area explored. Workshops are intended to facilitate intellectual and creative interaction between researchers from different disciplines and from a range of institutions within the academic community, the public and private sectors, the Scottish government and the third sector. Principal investigators can be:
• full or part-time academics in the arts and humanities employed by HEIs in Scotland;
• full or part-time practitioners in the creative, visual or performing arts contracted to HEIs or SCIs in Scotland;
• retired academics in the arts and humanities who retain demonstrable links with HEIs or SCIs in Scotland;
• full or part-time research active members of staff in SCIs.
Funding of up to £10,000 is available per workshop for the duration of one year, and may also cover travel and administration costs, and dissemination of the outcomes.

Closing date: 15 Sep 15 (Forecast)
Deadline information: Call has not yet been announced by funder, but this is the approximate deadline we expect. Applications due by 5pm. This call is repeated once a year.

MALL RESEARCH GRANTS IN THE ARTS AND HUMANITIES
Royal Society of Edinburgh

Description:
The Royal Society of Edinburgh invites applications for its small grants in the arts and humanities. These are designed to support personally conducted research in the arts and humanities and promote research of the individual scholar whilst ensuring the high quality of research is maintained and advanced.
The following are eligible to apply:
• full or part-time academics in the arts and humanities employed by HEIs in Scotland;
• full or part-time practitioners in the creative, visual or performing arts contracted to HEIs or SCIs in Scotland;
• retired academics in the arts and humanities who retain demonstrable links with HEIs or SCIs in Scotland;
• full or part-time research active members of staff in SCIs.
Grants from £500 and up to £7,500 are available for the duration of one year to cover costs of travel to libraries, archives or other repositories of primary resources related to the project, attendance at academic conferences, colloquia or workshops which will further or disseminate research outcomes, assistance with publication costs, visits to or by scholars and knowledge exchange programmes are supported.

Closing date: 15 Sep 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect.

POSTGRADUATE BURSARY PROGRAMME - PHD AND MSC BURSARIES  
South African National Research Foundation

Description:
The South African National Research Foundation invites applications for PhD and MSc bursaries through the square kilometre array postgraduate bursary programme. This supports students who wish to pursue postgraduate research in radio astronomy or in relevant fields of engineering. There are three categories of bursaries available:
• scholarships for South African citizens and permanent residents who wish to complete an MSc or PhD at a South African university;
• scholarships for citizens of Botswana, Ghana, Kenya, Madagascar, Mauritius, Mozambique, Namibia or Zambia who wish to complete an MSc or PhD at a South African university;
• scholarships for citizens of Botswana, Ghana, Kenya, Madagascar, Mauritius, Mozambique, South Africa or Zambia who wish to complete an MSc or PhD at a university in one of the following SKA partner countries: Botswana, Ghana, Kenya, Madagascar, Mauritius, Mozambique, Namibia and Zambia.
The areas of research that will be considered are:
• observational and computational radio astronomy – epoch of reionisation; radio pulsars and transients; cosmology and galaxy evolution;
• radio astronomy engineering and techniques – interferometric data processing; real-time signal processing for radio astronomy; mid-frequency aperture array technology; wide-band single-pixel receivers; DOME-relevant research; radio frequency interference measurement, monitoring, mitigation and excision.

PhD bursaries are tenable for a maximum of three years, while MSc bursaries are tenable for a maximum of two years, subject to satisfactory progress.

PhD bursaries are worth up to ZAR117,000 per year, and also include an annual travel grant worth up to ZAR21,000 and a maximum equipment grant for the duration of the bursary worth up to ZAR30,000. MSc bursaries are worth up to ZAR92,000 per year, and also include an annual travel grant worth up to ZAR16,000 and a maximum equipment grant for the duration of the bursary worth up to ZAR20,000. Non-South Africans who apply to study at a South African university may also receive a home travel grant, repatriation fee and emergency medical insurance.

FRANZ WERFEL GRANT
Austrian Exchange Service

Description:
The Austrian Exchange Service (OAED) invites applications for the Franz Werfel grant. This provides up to 18 months’ material research support for young university teachers across the world whose work focuses on Austrian literature. Recipients may work as visiting researchers at university departments and carry out specialist studies in libraries, archives or research institutions. Follow-up funding is also available, covering:
• a yearly invitation to a professionally relevant symposium;
• a yearly endowment for the purchase of specialist literature on the occasion of the symposium;
• a one-month research grant every three years;
• a habilitation grant;
• a publication allowance.

**RICHARD PLASCHKA GRANT**

*Ostrian Exchange Service*

**Description:**
The Austrian Exchange Service (OEAD) invites proposals for the Richard Plaschka grant. These enable university history lecturers whose main focus is Austrian history to carry out specialist studies in libraries, archives or at research institutions over a maximum of 18 months. Researchers may work as visiting researchers at university departments. Recipients should emphasise cross-border collaboration in their scientific activities.

Follow-up funding is also available for recipients who have completed at least 12 scholarship months, covering:
- a yearly invitation to a professionally relevant symposium;
- a yearly endowment for the purchase of specialist literature on the occasion of the symposium;
- a one-month research grant every three years;
- subscription to a journal on history topics;
- a habilitation grant;
- a publication allowance.

**Closing date:** 15 Sep 15

STANDARD GRANTS
International Visegrad Fund

Description:
The International Visegrad Fund invites applications for its standard grants. These support projects in the following fields: cultural cooperation, scientific exchange and research, education; youth exchange, cross-border cooperation and promotion of tourism. Any organization or natural person in the world may apply, though projects must include entities from at least three, and preferably four, V4 countries (Czech Republic, Hungary, Poland and Slovakia). Cross-border projects may involve a minimum of two different V4 countries. Most recipients are non-governmental organizations, municipalities, schools or other public institutions.
The annual budget for this is €2.2 million. Funding is worth a minimum of €6,001 per project, and will cover a maximum of 80 per cent of eligible costs. The average grant is worth between €10,000 and €15,000 over a maximum of one year.

Closing date: 15 Sep 15
Deadline information: Applications due by 11.59am CET. Deadlines on: 15 September 2015, 15 March 2016, and repeated annually.

IRREGULAR MIGRATION RESEARCH GRANTS
Australian Department of Immigration and Border Protection

Description:
The Australian Government Department of Immigration and Border Protection invites applications for its irregular migration research programme. This aims to develop an evidence base on the drivers, determinants and decision-making of irregular migration. Proposals should address the following research topics:
• transit migration
• citizenship-specific insights;
• intricacies of decision-making;
• irregular and regular migrant decision-making.
Research proposals which fall outside these categories will be considered provided they relate to irregular migration and migrant decision-making.
Applicants must apply through an administering institution or organization, either within the public or private sector. Organizations must be either incorporated or not-for-profit or an accredited university.
Funding is worth up to AU$500,000 per project.

Closing date: 15 Sep 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect.

Applications are due by 2pm AEST. This call is repeated once a year.

A RESEARCH AND DEVELOPMENT GRANTS TO INDIVIDUALS
Graham Foundation for Advanced Studies in the Fine Arts

Description:
The Graham Foundation for Advanced Studies in the Fine Arts invites applications for its research and development grants to individuals. These provide opportunities to create, develop, and communicate a project about architecture and the designed environment that will contribute to creative,
intellectual, and professional growth at crucial or potentially transformative stages in the individuals career. Grants also aim to support efforts to take positions, develop new forms of expression, and engage debate and help to communicate their work in the public realm and reach new and wider audiences.

Focus is on individuals in the US but a small amount of international grants are made to individuals or collaborative projects by individuals. First-time applicants are given priority.

Grants are worth up to US$10,000 for one year.

**Closing date: 15 Sep 15**

**Deadline information:** Applications are invited between 15 July and 15 September 2015. This call is repeated once a year.

**CLINICAL RESEARCH PROPOSALS**

*ResMed Foundation*

**Description:**
The ResMed Foundation invites proposals for its clinical research grants. These support novel research, and physician and public awareness of sleep-disordered breathing, with a primary focus on positive airway pressure therapies and ventilation treatments. Other areas of interest include: cardiovascular disease; metabolic syndrome, diabetes; morbid obesity, hypertension, coronary artery disease, heart failure; atrial fibrillation; occupational health and safety; asthma; anaesthesiology; chronic obstructive pulmonary disease; pregnancy and preeclampsia.

Each recipient must have tax-exempt status in their country, and must be a not-for-profit organization and a legitimate research institution.

Grants are typically limited to US$250,000.

**Closing date: 15 Sep 15**

**Deadline information:** Deadlines on: 15 September 2015, 15 March 2016, and repeated annually.

ULTIVATE – CREATIVE DEVELOPMENT GRANTS
Canada Council for the Arts – Conseil des Arts du Canada

Description:
The Canada Council for the Arts invites applications for its creative development grants under its cultivate programme. These enable individual artists who are deaf, have disabilities or who are living with a mental illness, to pursue research, creation and production projects in dance, inter-arts, media arts, music, theatre, visual arts or writing and literary arts, leading to a new artistic work or body of work intended for public presentation, exhibition, publication or distribution. There are two categories of support:  
• research and creation grants, which provide artists the time and resources to explore, develop and create a new artistic work or body of work, including the research and development of ideas, concepts, themes or techniques;  
• production grants, which support the production of a new work or body of work and must include a public presentation or exhibition of the work or, in the case of a sound recording, film, video, audio or new media production, include a concrete dissemination plan.  
Applicants must be Canadian citizens or permanent residents who identify as an artist who is deaf, has a disability or who is living with a mental illness. They must have completed their basic training and have maintained a professional artistic practice for at least one year before the application deadline. They need not be resident in Canada at the time of application.  
Grants are worth up to CA$7,000 each for research and creation projects, and up to CA$10,000 each for production projects.

Application form:
NGLO-AUSTRALIAN TELESCOPE OBSERVING TIME
Australian Astronomical Observatory

Description:
The Anglo-Australian Observatory invites applications for observing time on the Anglo-Australian Telescope. This scheme allows for observing time on the telescope, providing access to and use of the facilities and instruments at the observatory. The following instruments are available for the 2015B round:
- AAOmega and 2dF MOS;
- AAOmega and KOALA IFU;
- HERMES and 2dF MOS;
- IRIS2;
- UCLES, including CYCLOPS2.

AAO and the National Optical Astronomy Observatory’s division Cerro Tololo Inter-American Observatory have initiated a time-swap arrangement, to allow their respective communities access to a broader range of facilities. In semester 15B there will be five nights available to the Australian community to apply for CTIO time.

Proposals must require more than six hours of observing time. Applicants must add on a 33 per cent allowance for bad weather to the total estimated time. No special consideration is given to proposals involving PhD students, except when attempting to schedule proposals near the cut-off.

For each run involving Australian-based observers, the AAO will normally pay one astronomer and one student a fixed amount for travel to the telescope or to North Ryde, as well as Coonabarabran or Sydney accommodation costs for the length of the run plus one night.

Closing date: 16 Sep 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Proposals due by 5pm AEDT.

**2020-GERI-2015-1 CALL FOR PROMOTING GENDER EQUALITY IN RESEARCH AND INNOVATION**

*Horizon 2020: Science With and For Society*

**Description:**
The European Commission Horizon 2020: Science with and for Society invites proposals for its H2020-GERI-2015-1 call for promoting gender equality in research and innovation. Proposals may address the following topics:

- GERI-3-2015 evaluation of initiatives to promote gender equality in research policy and research organizations;
- GERI-4-2015 support to research organizations to implement gender equality plans.

Research and innovation actions and coordination and support actions are eligible under this call. Research and innovation actions require participation by at least three independent legal entities, while coordination and support actions require participation by at least one independent legal entity. Each independent legal entity must be established in a different member state or associated country. All H2020 funding calls allow the participation in consortia of third country partners who secure their own funding.

The indicative budget for this call in 2015 is €9 million. Successful proposals are expected to receive between between €1.5m - €2.3m, although proposals for other amounts will also be considered.

Ref: OJ 2013/C 361/06.

**Closing date:** 16 Sep 15
**Deadline information:** Proposals due by 5pm Brussels time.
**Posted date:** 01 Apr 14
**Award type:** Directed grants to institutions, research groups etc, Innovation grants, Networking/collaboration
**Award budget total:** €9,000,000

**Eligibility profile**

*Country of applicant institution:* EU (European Union), EU Associated Countries, EU All International Cooperation Partner countries (ICPC), Overseas Countries and Territories

*Country of applicant institution:* Any

**VINNMER MARIE CURIE INCOMING – CALL FOR PROPOSALS**

*Vinnova Verket för Innovationssystem – Swedish Governmental Agency for Innovation Systems*

**Description:**
The Swedish Governmental Agency for Innovation Systems (Vinnova) and Marie Curie Action invite applications for its VINNMER Marie Curie incoming call, under the Mobility for Growth programme. This aims to strengthen qualification opportunities for international researchers through increased mobility opportunities, by visiting and working in Swedish host organizations.
The overall objective is to contribute significantly to private-public or public-public sector collaboration and mobility as well as career development for highly qualified future leaders, in all sectors of the economy, with innovation skills in applied and needs-driven research.

This call is aimed at the following two categories of researchers:
- internationally experienced researchers with four or more years of research experience;
- highly experienced researchers with 10 or more years of research experience.

Applicants should be based outside of Sweden at the time of application and spend at least 67 per cent of the project duration in Sweden. Mobility actions are open to all nationals and relate only to transnational movement of researchers with strong support from their host organizations. Applicants must be employed by one or more Swedish host organizations and have one or more cooperating international organizations supporting the structural impacts. However, for highly experienced researchers cooperation with international organizations is optional.

The total budget is worth up to SEK130 million, and includes a co-financing budget from applicants ranging in size from SEK100m to SEK150m. Projects may last between one and three years with incoming phases of about eight to 36 months. At least 50 per cent of the total salary costs for the project leader should be guaranteed by the applying Swedish organization for the duration of the project.

Closing date: 16 Sep 15
Deadline information: Applications due by 2pm CET.
Posted date: 18 Mar 15
Award type: Travel for research purposes, Directed grants for individual investigators, Academic-Industry links, Networking/collaboration

2020-ISSI-2015-1 CALL FOR INTEGRATING SOCIETY IN SCIENCE AND INNOVATION
Horizon 2020: Science With and For Society

Description:
The European Commission Horizon 2020: Science with and for Society invites proposals for its H2020-ISSI-2015-1 call for integrating society in science and innovation. Proposals may address the following topics:
- ISSI-1-2015 pan-European public outreach – exhibitions and science cafés engaging citizens in science;
• ISSI-3-2015 knowledge sharing platform;
• ISSI-4-2015 on-line mechanisms for knowledge-based policy advice;
• ISSI-5-2015 supporting structural change in research organizations to promote responsible research and innovation. Proposals may take the form of research and innovation actions or coordination and support actions, depending on which topic is addressed. Research and innovation actions require participation by at least three independent legal entities, while coordination and support actions require participation by at least one independent legal entity. Each independent legal entity must be established in a different member state or associated country. All H2020 funding calls allow the participation in consortia of third country partners who secure their own funding. Proposals for ISSI-5-2015 should include an international dimension in particular with Brazil, Republic of South Africa, India, Canada, Australia, Russia, US, Japan or China. The indicative budget for this call in 2015 is €22 million. Successful proposals are expected to receive between €2m and €4m, although proposals for other amounts will also be considered.

H2020-SEAC-2015-1 CALL FOR MAKING SCIENCE EDUCATION AND CAREERS ATTRACTIVE FOR YOUNG PEOPLE
Horizon 2020: Science With and For Society

Description:
The European Commission Horizon 2020: Science with and for Society invites proposals for its H2020-SEAC-2015-1 call for making science education and careers attractive for young people. Proposals may address the following topics:
• SEAC-1-2015 innovative ways to make science education and scientific careers attractive to young people;
• SEAC-4-2015 EURAXESS outreach to industry.
Research and innovation actions and coordination and support actions are eligible under this call. Research and innovation actions require participation by at least three independent legal entities, while coordination and support actions require participation by at least one independent legal entity. Each independent legal entity must be established
in a different member state or associated country. All H2020 funding calls allow the participation in consortia of third country partners who secure their own funding. The indicative budget for this call in 2015 is €8.9 million. Each successful proposal is expected to receive between €500,000 and €1.8m, although proposals for other amounts will also be considered. Ref: OJ 2013/C 361/06.

H 2020-GARRI-2015-1 CALL FOR DEVELOPING GOVERNANCE FOR THE ADVANCEMENT OF RESPONSIBLE RESEARCH AND INNOVATION
Horizon 2020: Science With and For Society

Description:
The European Commission Horizon 2020: Science with and for Society invites proposals for its H2020-GARRI-2015-1 call for developing governance for the advancement of responsible research and innovation call. Proposals may address the following topics:
• GARRI-2-2015 responsible research and innovation in industrial context;
• GARRI-4-2015 innovative approach to release and disseminate research results and measure their impact;
• GARRI-9-2015 estimating the costs of research misconduct and the socio-economic benefit of research integrity.
Coordination and support actions are eligible under this call.
This requires participation by at least one independent legal entity established in a member state or associated country.

All H2020 funding calls allow the participation in consortia of third country partners who secure their own funding. The indicative budget for this call in 2015 is €5.5 million. Each successful proposal is expected to receive between €1m and €2m, although proposals for other amounts may also be considered. Ref: OJ 2013/C 361/06.

EUROSTARS PROGRAMME
EUREKA

Description:
EUREKA invites applications for the Eurostars programme. This funds collaborative innovation projects that will be rapidly commercialised. It encourages and assists the development of new products, processes and services by offering support and funding to help innovations to access regional, national and international markets. Projects can address any technological area for any market, but must have a civilian purpose.

Any type of organization can be part of a Eurostars project consortium, but the consortia leader must be an R&D-performing small or medium-sized enterprise. Consortia must include at least two participants from two different Eurostars countries. Eurostars countries participating in this call include Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Hungary, Iceland, Ireland, Israel, Italy, Greece, Portugal, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Romania, Slovak Republic, Slovenia, Spain, Sweden, Switzerland, Turkey, South Korea and the UK. A Eurostars project should have a maximum duration of three years. Within two years of project completion, the product of the research should be ready for launch onto the market. At least 50 per cent of the project’s core activity should be carried out by SMEs. Funding for Eurostars participants is provided on a country by country basis. The average project include three to four participants from two to three countries over a duration of 29 months with a project budget of €1.4 million.

Strategic Knowledge Enhancement
KK-Stiftelsen – Knowledge Foundation

Description:
The Knowledge Foundation invites applications for its strategic knowledge enhancement programme. This aims to help new universities establish ties with strategically important persons who contribute towards further development of the research environment and the higher education institution. In addition, it aims to strengthen the capacity to conduct research in co-production with the business sector and also increase expertise in the business sector. The programme comprises the following fellowships:
• adjunct professors or senior lectures from the business sector – fellowships may range from 20 to 50 per cent for a period of one to three years;
• international visiting professors – for a three months to one year stay at a Swedish HEI to cover a fellowship level of 50 to 100 per cent;
• research directors – the grant covers funding for employment of professors to cover a 100 per cent fellowship level for up to two years, where after two years candidates may apply for an additional two years funding.
New Swedish HEIs may apply. Individuals whose primary activities are located outside of Sweden are eligible as visiting professors.
The maximum total contribution per fellowship, excluding overhead costs, is SEK1.2 million per year for a maximum of one year for international visiting professors, SEK1.2m per year for two years for research directors, and a total of SEK1.1m for the period covered in the application for adjunct professors or senior lectures. In regards to the programme components, adjunct professors or senior lecturers and international visiting professors the HEI must contribute resources to the project corresponding to 10 per cent of the direct costs. Regarding research directors the HEI must co-finance 30 per cent of the direct costs in the project.

FRAMWORK GRANTS FOR RESEARCH ON SMART SYSTEMS
Stiftelsen för Strategisk Forskning – Swedish Foundation for Strategic Research

Description:
The Swedish Foundation for Strategic Research invites proposals for its framework grants for research on smart systems. These stimulate collaborative and interdisciplinary research projects within the area of smart systems that are of relevance to present or future Swedish-based industry and society. Proposals must address the following research areas:
• cyber physical systems;
• integrated systems;
• systems of systems;
• automation;
• autonomous systems;
• artificial intelligence-based information systems.
Projects should be collaborative between, typically, two to four applicants with different kinds of relevant complementary scientific expertise, either from one or different research groups that are not necessarily co-localised. The main applicant must be a researcher prepared to assume responsibility for the project throughout the grant period. They must be employed by a Swedish university, university college, university hospital, or by a public or private non-profit research institute. At least one of the applicants must be employed by a university or university college. Project participation from industry, public authorities or other relevant organizations is prioritised, however, they must participate on their own budget. International scientists working outside Sweden may also participate on their own budget, unless the project plan itself includes activities such as visits by foreign-based scientists to an applicant working in Sweden. The budget is worth SEK300 million. Grants are worth between SEK4m and SEK7m each per year for five years, and cover salaries, research tools and running costs. Funding for the last two years is contingent upon a successful midterm evaluation. Projects may start from 1 July 2016.

RESEARCH GRANT
Alpha-1 Foundation

Description:
The Alpha-1 Foundation invites applications for its research grant. This encourages the development of new information that contributes to the understanding of the basic biology of alpha-1 antitrypsin expression, and the pathogenesis or management of AAT deficiency. In addition, consideration will be given to those projects that provide insight into the development of information that may contribute to new therapies for AAT deficiency.
All proposals must be hypothesis generating or hypothesis testing and provide sufficient preliminary data to justify the Alpha-1 Foundation’s support.
A maximum of US$100,000 per year may be requested for up to two years.

Closing date: 20 Sep 15 (Forecast)

Deadline information: Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.
Posted date: 16 Jul 13
Award type: Directed grants for individual investigators, Directed grants to institutions, research groups etc

PRIMATE RESEARCH GRANTS
Primate Conservation

Description:
Primate Conservation invites applications for its research grants. These provide support for original research that can be used to formulate and to implement conservation plans for the species studied. Priority will be given to projects that study the least known and most endangered species in their natural habitat. Grants are awarded to graduate students, qualified conservationists and primatologists to support field research into endangered primates. The involvement of citizens from the country in which the primates are found is encouraged.
Funding of approximately US$2,500 is provided on average, with a maximum grant of US$5,000.

Closing date: 20 Sep 15

**BRIDGE GRANT**  
*Alpha-1 Foundation*

**Description:**
The Alpha-1 Foundation invites applications for its bridge grant. This supports alpha-1 antitrypsin-related research projects that have been approved by the National Institutes of Health but cannot be supported by the institutes’ funds. The grant should lead to the development of sufficient preliminary data to make AAT-related applications highly competitive in the NIH review process. The grant is worth up to US$25,000 over a maximum period of one year.

**Closing date:** 20 Sep 15 (Forecast)

**OINT GLOBAL HEALTH TRIALS SCHEME**  
*Medical Research Council*

**Description:**
The Medical Research Council, the Department for International Development and the Wellcome Trust invite proposals for their joint global health trials scheme. This funds global health trials to generate new knowledge about interventions that will contribute to the improvement of health in low- and middle-income countries. The focus is primarily on late-stage clinical and health intervention trials evaluating efficacy and effectiveness. The scheme is aimed at funding randomised controlled trials, although other types of methodologies may be used alongside to explore implementation and operational issues. Phase IIb trials of major relevance may also be considered. Proposals for research into chronic non-communicable diseases and reproductive, maternal and newborn health are particularly welcomed.
The scope encompasses interventions of all kinds, including behavioural and complex interventions, disease management, drugs, vaccines, hygiene and diagnostic strategies. The scheme is open to principal investigators based in low- or middle-income economies at higher education institutions and non-profit research institutions, and PIs based in UK HEIs, research council institutes and eligible independent research organizations. A total of £20 million is available; this amount is expected to fund several awards. Around £1m is expected to fund trial development grants.

Closing date: 25 Sep 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Proposals due by 4pm BST. This call is repeated once a year.

PHD STUDENTS RESEARCH GRANTS
International Olympic Committee

Description:
The International Olympic Committee invites proposals for its PhD students research grants. These encourage PhD students to undertake doctoral research with a humanities or social sciences perspective on the Olympic phenomenon, and facilitate access to IOC historical archives, library collections and image archives. Applicants may apply for one of the following categories:
• category A – open subject, on any aspect of the Olympic movement;
• category B – national olympic committees’ policy priority, on topics of interest to the National Olympic Committees of their country.
All current postgraduate students enrolled on a PhD degree programme may apply. Applicants must be fluent in French or English.
Funding is worth up to CHF8,000.

HIP-TIME PROGRAMME – TARGETED RESEARCH SURVEYS
Irish Marine Institute

Description:
The Irish Marine Institute invites applications for its ship-time programme for targeted research surveys. This enables teams to conduct ship-based research activity on the research vessel (RV) Celtic Explorer and RV Celtic Voyager within targeted calls for research. Projects may address one of the following calls:
• a targeted slot onboard the RV Celtic Explorer for a period of 14 days, incorporating a transatlantic crossing to complete research in the north Atlantic in April 2015, which aims to stimulate future trans-Atlantic cooperative research and strongly encourages international collaboration with Canadian organizations;
• surveys led by early-stage emerging marine researchers and scientists for a total of 30 days in mid-summer 2015 on the RV Celtic Voyager, to enable them to pursue research in their area of speciality, and to gain experience in managing a scientific survey;
• testing of innovative marine technology for a total of eight days on either of the RVs, for which the Marine Institute will provide engineering support for marinisation of the equipment, if required, and installation and testing of the technology on the vessel.

Applications are open to research performing organizations, such as higher education institutions, public research bodies and industry, within the island of Ireland. Applications led by industry or public research bodies must partner a researcher or research group from one or more HEIs; applications led by HEIs or public research bodies may include one or more industry participants as members of the survey team. Such participation must be of a specific focused nature, with the principal benefits of the survey accruing to the non-industry partners.

The maximum funding available for the RV Celtic Voyager is €8,000 per day; the maximum funding available for the RV Celtic Explorer is €18,000 per day, with an...
additional €6,000 for a one-day mobilisation at the start of the survey and €15,000 for a one-day demobilisation at the end of the survey. Funding covers 100 per cent of ship-time costs for HEIs and public bodies, 50 per cent for small or medium-sized enterprises, and 40 per cent for large enterprises.

Closing date: 26 Sep 15 (Forecast)
Deadline information: Call has not yet been announced by funder, but this is the approximate deadline we expect.
Applications due by 2pm.

Research Grants
British Ecological Society

Description:
The British Ecological Society invites applications for its research grants. These support innovative ecological research and pump-priming projects, and help early-career ecologists to establish an independent research career. Two types of funding are available:
- small project grants worth up to £5,000 each;
- early-career ecologists grants, worth between £5,000 and £20,000 each, for which each applicant should be within five years of having obtained their PhD or DPhil, or should have submitted a thesis for examination prior to the closing date for applications.
There are no restrictions on nationality but all applicants must be members of the society. Applications for projects based outside the UK should demonstrate liaison with collaborating organizations, local environmental agencies NGOs or communities. Grants may be used for the employment of casual or short-term assistance, to purchase small items of equipment, and for consumables, travel or recurrent costs.
Description:
The British Society for Geomorphology invites applications for its research grants. These support scientific excellence in geomorphology. Grants are available for the following purposes:
• to contribute towards specific research costs, such as travel for research, consumables and small pilot projects;
• to establish fixed-term working groups to discuss and take forward specific developments or topic areas within geomorphology;
• to set up and maintain long-term geomorphological monitoring;
• to establish working groups to undertake the preliminary work required to develop proposals for research council thematic programmes or responsive-mode grants.
It is expected that the majority of awards will not exceed £1,000.

PUBLIC ENGAGEMENT GRANT
Society for Applied Microbiology

Description:
The Society for Applied Microbiology invites applications for its public engagement grant. This supports events where aspects of microbiology are promoted to the general public and other relevant stakeholders.

Applications are open to members and non-members of the society. Members should have no funding from any additional source. In addition, expert public engagement specialists or science communicators are eligible to apply.
The grant is worth up to £3,000.

Closing date: 27 Sep 15 (Forecast)
Deadline information: Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated 2 times a year.
Posted date: 25 Feb 15
Award type: Hosting conferences, Directed grants for individual investigators, Directed grants to institutions, research groups etc, Publish, edit, translate, disseminate
Award amount max: £3,000

H2020-FETOPEN-2014-2015-RIA NOVEL IDEAS FOR RADICALLY NEW TECHNOLOGIES
Horizon 2020: Excellent Science

Description:
The European Commission Horizon 2020: Excellent Science invites proposals for its H2020-FETOPEN-2014-2015-RIA call on novel ideas for radically new technologies. This aims to support early stage, high risk visionary science and technology collaborative research projects for the successful exploration of new foundations for radically new future technologies. Proposals may address the following topics:
• initiating a radically new line of technology by establishing proof-of-principle of a new technological possibility and its new scientific underpinning;
• kick-starting an emerging innovation ecosystem of high potential actors around a solid baseline of feasibility and potential for a new technological option, ready for early take-up.

Proposals may take the form of research and innovation actions. Research and innovation actions require participation by at least three independent legal entities, each established in a different member state or associated country.

Each successful proposal is expected to receive between €2 million and €4m, although proposals requesting other amounts will also be considered. Funding will cover 100 per cent of eligible costs. The overall indicative budget for 2014-2015 is €154m.

All H2020 funding calls allow the participation in consortia of third country partners who secure their own funding.

Ref: OJ 2013/C 361/06.

Closing date: 29 Sep 15
Deadline information: Proposals due by 5pm Brussels time.
Posted date: 11 Dec 13
Award type: Prototypes and demonstrations, Technology innovation/development, Directed grants to institutions, research groups etc, Innovation grants, Networking/collaboration
Award budget total: €154,000,000

H2020-FETOPEN-2015-CSA NOVEL IDEAS FOR RADICALLY NEW TECHNOLOGIES
Horizon 2020: Excellent Science

Description:
Proposals may take the form of coordination and support actions which require participation by at least one independent legal entity, established in a member state or associated country.
The indicative budget for this call in 2015 is €3 million. Each successful proposal is expected to receive between €300,000 and €500,000, although proposals for other amounts will also be considered. All H2020 funding calls allow the participation in consortia of third country partners who secure their own funding.

POLICY-ORIENTED RESEARCH ON KOREA GRANTS
Korea Foundation

Description:
The Korea Foundation invites applications for its policy-oriented research on Korea grants. These support in-depth analyses and policy recommendations on Korea, including political, social and economic issues. Projects are required to hold at least one related event, such as a workshop or conference for dissemination of the research results. Public policy-oriented research institutes are eligible to apply. Priority is given to proposals with Korea-based collaborative partners. Personnel expenses and other costs directly related to the research activities are subsidised. The foundation will support indirect costs amounting to 10 per cent or less of the total grant amount. While the foundation’s grant period is normally one year, projects lasting up to three years may be considered.

Closing date: 30 Sep 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

**&R&D PROJECTS**

*Dairy Australia*

Description:
Dairy Australia invites applications for its R&D project funding. Applications are welcomed from individuals and organizations worldwide for projects addressing:
- increasing farm productivity;
- maintaining and developing high-margin markets, channels and products;
- promoting and protecting the unique benefits of dairy
Proposals are judged on the perceived benefits to the Australian dairy industry. Most projects last for one to three years, though extended project may be considered.

Closing date: 30 Sep 15 (Forecast)
Deadline information: Call has not yet been announced by funder, but this is the approximate deadline we expect. Preliminary applications accepted between 1 August and 30 September annually. This call is repeated once a year.

IRDFAIR/RSPB RESEARCH FUND FOR ENDANGERED BIRDS
Royal Society for the Protection of Birds

Description:
Birdfair and the Royal Society for the Protection of Birds invite applications for their research fund for endangered birds. These grants enable researchers to undertake key projects on birds listed by the International Union for Conservation of Nature and Natural Resources as endangered, critically endangered or data-deficient. Projects that may qualify include searches for species with no or few currently known occupied sites, ecological research on poorly known species, and work that clarifies the taxonomic or conservation status of threatened species. Priority is given to researchers working in their own country, particularly where they are working for or in collaboration with the local BirdLife partner, and to researchers addressing research requirements identified as priorities by BirdLife International. BirdLife Partners and BirdLife Species Guardians are encouraged to apply. Grants of up to US$2,000 are available.

Closing date: 30 Sep 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

POSTPONED: AUSTRALIAN MARINE MAMMAL CENTRE GRANTS
Australian Department of the Environment

Description:
The Department of the Environment Australian Antarctic Division’s Australian Marine Mammal Centre grants are temporarily closed for applications. The following information is in relation to the 2014 grants and is provided as background information.***

These grants support research related to marine mammals’ interaction with humans in the Australian region, with the aim of identifying and managing those interactions that may require some alterations to human activities. Projects must be completed by 30 April 2015 and must focus on whales, dolphins, seals, sea lions and dugongs. Applications are encouraged that:
- support actions in marine mammal recovery plans, conservation management plans or recommendations from associated workshops;
- address the analysis and publication of existing datasets;
- preparation and submission of marine mammal datasets into a national repository.

Funding is open to public, private and governmental bodies as well as to individuals. Overseas researchers and organizations are eligible if their project is related to Australian marine mammals. Commonwealth bodies are eligible only under the Commonwealth Authorities and Companies Act 1997. Postgraduate students can apply as chief investigators only provided they have a supervisor as a primary chief investigator.

The allocated budget is AU$866,333 for the year 2013-14 and AU$1 million for the year 2014-15. Funding for individual projects is based on quality and not limited to a specific amount.

Closing date: 30 Sep 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect.

RESEARCHER AND PROJECT GRANTS IN HUMANITIES, SOCIAL SCIENCES AND ENVIRONMENTAL AND ARTISTIC RESEARCH
Kone Foundation – Koneen Säätiö

Description:
The Kone Foundation invites applications for its researcher and project grants. These support research in the fields of humanities, social sciences, and environmental and artistic research, although they are generally not available for research in the fields of education, psychology, theology, law or economics without a cross-disciplinary dimension. The following grants are available to support fulltime work:
• project grants support one or more investigators and their supervisor with projects of several years’ duration;
• doctoral researcher grants, worth €2,300 per month for up to four years, with priority given to candidates whose research fields have no PhD programmes in Finland;
• postdoctoral research grants, worth €2,600 per month for up to three years
• experienced researcher grants, worth €3,500 per month for up to three years, for researchers with significant amount of publications in addition to the doctoral thesis.
Applicants must have completed a master’s degree. Priority is given to multi- and interdisciplinary and marginal fields of research. Internationality is valued, therefore Finnish applicants completing their studies abroad and foreign applicants completing their degree in Finland are also given priority. Geographically, the foundation focuses on the Baltic region.
Successful researcher grant applicants may also request travel grants abroad.

Closing date: 30 Sep 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. Applications due by 6pm Finnish time. This call is repeated once a year.

RETREATS AT THE BERGMAN ESTATE ON FÅRÖ
Stiftelsen Bergmångårdarna på Fårö - The Bergman Estate on Fårö

Description:
The Bergman Estate on Fårö invites applications for visits to its retreat estate. This enables candidates to conduct research in an environment intended to nurture contemplative and creative work in any discipline. The Bergman Estate is to be an international arena and particularly welcomes applicants who wish to cast a non-Western view across the Baltic Sea. Artists, scholars and journalists from around the world, as well as people dedicated to democracy and freedom of speech issues, may apply.
Applicants must be able to document professional accomplishments and output, provide a description of the project they intend to work with on Fårö, the size of their party, and the intended length of their stay. Additionally, applicants must specify how they intend to reimburse the community in the form of a cultural event. This event may also be outlined in consultation with the Artistic Director. Day care can be provided to parents of small children. Applicants with
special needs can apply for travel grants. Group applicants are advised to focus on the beginning and end of the season, that is November and March.

Free accommodation for a work period of no less than three weeks and at the most three months is offered.

Closing date: 30 Sep 15
Deadline information: Deadlines on: 30 September 2015, 28 February 2016, and repeated annually.
Posted date: 05 Nov 14
Award type: Directed grants for individual investigators, Retreats

SUPPORT OF PROJECTS
Fritz Thyssen Stiftung – Fritz Thyssen Foundation

Description:
The Fritz Thyssen Foundation invites applications for grants in support of projects. These encourage research in the humanities, social science and biomedicine fields. Applications are open within the following areas of support:
• history, language and culture;
• the interdisciplinary field ‘image and imagery’;
• state, economy and society;
• the interdisciplinary field ‘international relations’;
• medicine and the natural sciences.

Interdisciplinary projects are also welcomed. Applications may be submitted from a university or other non-profit research institution. Applicants must have completed a doctoral or post doctoral degree. Young academics can apply for their own post within the framework of a project. The applicant must be actively involved in the research work plan for the project.

Grants cover personnel costs, travel expenses and one-time expenditures for equipment and materials for a period of up to three years.

Closing date: 30 Sep 15

COMING SOON: ICYS RESEARCHER POSITIONS

National Institute for Materials Science

Description:
The National Institute for Materials Science invites nominations for its researcher positions at the International Centre for Young Scientists. The next round is scheduled from 1 March to 30 March 2015. The following information is subject to change.***
These positions enable young scientists to pursue innovative research on broad aspects of materials science using the most advanced facilities in NIMS. Researchers may be located at several stations, including the ICYS sites in Sengen and Namiki, ICYS-MANA, ICYS-ESICMM or ICYS-GREEN.
Applicants must have obtained a PhD degree within the last ten years. Proficiency in English is required, as all management and scientific discussions will be conducted in English.
The earliest start date is 1 September 2015 and the latest start date is 1 March 2016. Funding is worth between ¥5.03 million and ¥5.35m per year for a period of up to three years. A research grant of ¥2m per year will also be supplied.
Closing date: 30 Sep 15 (Forecast)
Deadline information: Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated 2 times a year.

GRANTS TO PROMOTE RESEARCH ON FORECASTING
International Institute of Forecasters

Description:
The International Institute of Forecasters invites applications for its grants to promote research on forecasting. These grants support research that aims to improve the state of the art in forecasting methods and business forecasting applications. Two grants are available:
• the methodology grant will be directed to studies that assess the value of new or untested forecasting methods or principles;
• the application grant will be directed to studies on the application of forecasting principles to business decision processes.
Each grant is worth US$5,000.

Closing date: 30 Sep 15 (Forecast)
Deadline information: !! Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

DOCTORAL GRANTS
Institut Pasteur

Description:
The Institut Pasteur International Network invites applications for its doctoral grants. These support the completion of doctoral theses within the network’s Calmette and Yersin programme. The research topic can be related to any theme developed in laboratories within the International Network Institutes. The goal is to promote mobility opportunities for young scientists and for that reason should the internships be completed outside the applicants’ home country or the country where they attended university.

Applicants must hold a master’s degree or equivalent diploma and be enrolled at the doctoral school to which the host laboratory is affiliated. Candidates who have already started their thesis cannot apply. The program is open to all nationalities.

Funding is available for three years and covers living and insurance expenses worth €1,400 per month, and one return air fare.

Closing date: 30 Sep 15
Deadline information: Applications are invited between late March and 30 September. This call is repeated once a year.

Award type: Thesis/Dissertation funding, Travel for research purposes, Directed grants for individual investigators

EDUCATIONAL RESOURCE DEVELOPMENT GRANTS
Society for Radiological Protection

Description:
The Society for Radiological Protection invites applications for its educational resource development grants. These support the development of educational resources in the field of radiological protection. The developed educational resources must relate to part of or a full academic course leading to a qualifying recognised qualification in the UK or overseas within the geographical remit of the society within the International Radiation Protection Association with a clear component in the broad area of radiological protection. Grants typically range from a few £100s up to £3,000, though higher amounts may be considered on merit.

Closing date: 30 Sep 15
Deadline information: Deadlines on: 30 September 2015, 31 March 2016, and repeated annually.

US ARMY MEDICAL RESEARCH AND MATERIEL COMMAND BROAD AGENCY
ANNOUNCEMENT FOR EXTRAMURAL MEDICAL RESEARCH
US Department of Defense (DoD)

Description:
The US Department of Defense invites applications for the US army medical research and materiel command broad agency announcement for extramural medical research grants. These aim to provide solutions to medical problems of importance to the American service members at home and abroad, as well as to the general public at large. Research areas of interest include the following:
•military infectious diseases research programme, which focuses on vaccines, anti-parasitic drugs, deployable field clinical diagnostics, prophylactics and novel therapeutics to treat multidrug-resistant organisms in combat wound infections, as well as vector control pertinent to naturally occurring endemic diseases with demonstrated or potential capability to decrease military operational effectiveness;
•combat casualty care research programme, which provides integrated capabilities for forward medical care to reduce the mortality and morbidity associated with major combat-related trauma across the spectrum of combat casualty care;
•military operational medicine research programme, which aims to develop effective countermeasures against stressors and to maximise health, performance and fitness to protect the whole service member at home and on the battlefield;
•clinical and rehabilitative medicine research programme, which focuses on the innovations required to reset the wounded service members, both in terms of duty performance and quality of life;
•medical biological defence research programme, which provides medical countermeasures for biological welfare agents.
•medical chemical defence research programme, which seeks to preserve combat effectiveness by timely provision of medical
countermeasures in response to joint service chemical warfare defence requirements;
• medical simulation and information sciences research programme, which aims to explore the implications of models and technology for medical education and for the provision, management and support of health services in the military;
• radiation health effects research programme, which focuses on developing medical countermeasures for acute ionising radiation injury;
• special investment areas and innovation funding programme, which seeks new and innovative science that promises benefit to military health and medicine.
Applicants must be international, for-profit, non-profit and private organizations.
A specific amount of funding has not been set aside for this programme. The total project period may be up to five years.
Ref: DoD W81XWH-BAA-15-1.

Closing date: 30 Sep 15
Deadline information: Applications due by 11.59pm ET.
Posted date: 01 Oct 14
Award type: Directed grants to institutions, research groups etc, Innovation grants

COMING SOON: ICYS RESEARCHER POSITIONS
National Institute for Materials Science

Description:
The National Institute for Materials Science invites nominations for its researcher positions at the International Centre for Young Scientists. The next round is scheduled from 1 March to 30 March 2015. The following information is subject to change. *** These positions enable young scientists to pursue innovative research on broad aspects of materials science using the most advanced facilities in NIMS. Researchers may be located at several stations, including the ICYS sites in Sengen and Namiki, ICYS-MANA, ICYS-ESICMM or ICYS-GREEN.
Applicants must have obtained a PhD degree within the last ten years. Proficiency in English is required, as all management and scientific discussions will be conducted in English.
The earliest start date is 1 September 2015 and the latest start date is 1 March 2016. Funding is worth between ¥5.03 million and ¥5.35m per year for a period of up to three years. A research grant of ¥2m per year will also be supplied.

Closing date: 30 Sep 15 (Forecast)
Deadline information: Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated 2 times a year.
Posted date: 20 Feb 15
Award type: Young investigator awards, Directed grants for individual investigators
Award amount max: ¥22,050,000
Award amount min: ¥14,060,000

**GRANTS TO PROMOTE RESEARCH ON FORECASTING**

*International Institute of Forecasters*

**Description:**
The International Institute of Forecasters invites applications for its grants to promote research on forecasting. These grants support research that aims to improve the state of the art in forecasting methods and business forecasting applications. Two grants are available:

- the methodology grant will be directed to studies that assess the value of new or untested forecasting methods or principles;
- the application grant will be directed to studies on the application of forecasting principles to business decision processes.

Each grant is worth US$5,000.

Closing date: 30 Sep 15 (Forecast)
Deadline information: Call has not yet been announced by funder, but this is the approximate deadline we expect. This call is repeated once a year.

Posted date: 26 Mar 13
Award type: Directed grants for individual investigators
Award amount max: $5,000
Award budget total: $10,000

Country of applicant institution: Any

Disciplines

Business & Management Studies, Numerical Analysis, Research Methods in Sociology, Natural Hazards & Disasters, Climatology, Data Analysis, Econometrics, Economic Models & Forecasting, Clinical Psychology, Environmental Science, Pure Mathematics,
DOCTORAL GRANTS
Institut Pasteur

Description:
The Institut Pasteur International Network invites applications for its doctoral grants. These support the completion of doctoral theses within the network’s Calmette and Yersin programme. The research topic can be related to any theme developed in laboratories within the International Network Institutes. The goal is to promote mobility opportunities for young scientists and for that reason should the internships be completed outside the applicants’ home country or the country where they attended university.
Applicants must hold a master’s degree or equivalent diploma and be enrolled at the doctoral school to which the host laboratory is affiliated. Candidates who have already started their thesis cannot apply. The program is open to all nationalities.
Funding is available for three years and covers living and insurance expenses worth €1,400 per month, and one return air fare.

Closing date: 30 Sep 15
Deadline information: Applications are invited between late March and 30 September. This call is repeated once a year.
Posted date: 23 Feb 15
Award type: Thesis/Dissertation funding, Travel for research purposes, Directed grants for individual investigators

EDUCATIONAL RESOURCE DEVELOPMENT GRANTS
Society for Radiological Protection

Description:
The Society for Radiological Protection invites applications for its educational resource development grants. These support the development of educational resources in the field of radiological protection.
The developed educational resources must relate to part of or a full academic course leading to a qualifying recognised qualification in the UK or overseas within the geographical remit of the society within the International Radiation Protection Association with a clear component in the broad area of radiological protection.
Grants typically range from a few £100s up to £3,000, though higher amounts may be considered on merit.

Closing date: 30 Sep 15
Deadline information: Deadlines on: 30 September 2015, 31 March 2016, and repeated annually.
Posted date: 21 Jun 13
Award type: Institutional development, Directed grants to institutions, research groups etc
Award amount max: £3,000

US ARMY MEDICAL RESEARCH AND MATERIEL COMMAND BROAD AGENCY ANNOUNCEMENT FOR EXTRAMURAL MEDICAL RESEARCH
US Department of Defense (DoD)

Description:
The US Department of Defense invites applications for the US army medical research and materiel command broad agency announcement for extramural medical research grants. These aim to provide solutions to medical problems of importance to the American service members at home and abroad, as well as to the general public at large. Research areas of interest include the following:
• military infectious diseases research programme, which focuses on vaccines, anti-parasitic drugs, deployable field clinical
diagnostics, prophylactics and novel therapeutics to treat multidrug-resistant organisms in combat wound infections, as well as vector control pertinent to naturally occurring endemic diseases with demonstrated or potential capability to decrease military operational effectiveness;

• combat casualty care research programme, which provides integrated capabilities for forward medical care to reduce the mortality and morbidity associated with major combat-related trauma across the spectrum of combat casualty care;

• military operational medicine research programme, which aims to develop effective countermeasures against stressors and to maximise health, performance and fitness to protect the whole service member at home and on the battlefield;

• clinical and rehabilitative medicine research programme, which focuses on the innovations required to reset the wounded service members, both in terms of duty performance and quality of life;

• medical biological defence research programme, which provides medical countermeasures for biological welfare agents.

• medical chemical defence research programme, which seeks to preserve combat effectiveness by timely provision of medical countermeasures in response to joint service chemical warfare defence requirements;

• medical simulation and information sciences research programme, which aims to explore the implications of models and technology for medical education and for the provision, management and support of health services in the military;

• radiation health effects research programme, which focuses on developing medical countermeasures for acute ionising radiation injury;

• special investment areas and innovation funding programme, which seeks new and innovative science that promises benefit to military health and medicine.

Applicants must be international, for-profit, non-profit and private organizations. A specific amount of funding has not been set aside for this programme. The total project period may be up to five years. Ref: DoD W81XWH-BAA-15-1.
