

RESEARCH OPPORTUNITIES ALERT!

Issue 8: Volume 1 (Research Grants)

A Compilation by the

**Research Services Unit
Office of Research, Innovation and Development (ORID)**

February 2012

**Description:**

The Aaron Diamond Aids Research Center invites applications for its Aids scholars programme. Funding supports future leaders in the area of HIV/Aids research, and is ideal for postdoctoral scientists who are preparing to make the transition into faculty positions at academic institutions. Scholars will be provided with laboratory space, resources and salary support at the junior faculty level for up to three years. Successful candidates will have completed an advanced degree and have demonstrated excellence in their chosen field of research based on a publication record and letters of support.

INNOVATIONS IN GENDER EQUALITY TO PROMOTE HOUSEHOLD FOOD SECURITY

Agency for International Development (USAID)

Description:

The Agency for International Development invites applications under its innovations in gender equality to promote household food security programme. This programme solicits innovative ideas to promote gender equality and women's empowerment in the agricultural sector, and seeks to expand the knowledge base and evidence for greater

gender integration in food security programming. The main goals are:

- promotion of women's leadership in agriculture;
- development, dissemination and adoption of new agricultural technology aimed at increasing productivity in ways that reduce

women's unpaid work and enhance their productive activity;

- improving nutrition outcomes;
- policy changes that promote gender equality and impact evaluation and research to document how reduction of gender gaps and promotion of women's empowerment affects household outcomes and larger-scale agricultural productivity and growth.

Registered US and non-US non-governmental organisations, not-for-profit organisations and for-profit organisations may apply. The budget for this call is \$5 million. The maximum award is \$1.5m. USAID expects to make up to 9 awards. APS-OAA-11-000003

Closing date: 06 Apr 12

INVESTIGATOR-INITIATED RESEARCH GRANT PROGRAM

ALS Association

Description:

The Amyotrophic Lateral Sclerosis Association invites requests for abstracts for its investigator-initiated research grant program. The association invites innovative research abstracts of high scientific merit and of ALS relevance. The following grants are offered:

- multi-year grants for up to three years research at a maximum of \$80,000 per year;

- starter grants for one-year projects to investigators entering the field of ALS research or one-year pilot studies submitted by established investigators. These will not exceed \$40,000.

Closing date: 02 Mar 12

Deadline information: Deadline: abstracts due January 6, 2012, 12am EST; full applications due March 2, 2012, 12am EST. This call is repeated 2 times a year.

Posted date: 07 Dec 11
Award type: Directed grants for individual investigators, Innovation grants

P **ILOT PROJECT GRANTS**
Alzheimer's Research UK

Description:

The Alzheimer's Research Trust invites applications for its pilot project grants. These provide up to £30,000 for small innovative research projects and pilot studies. For projects involving inherently expensive techniques, such as imaging, it may be possible to apply for up to £50,000. Lead applicants must be based at a UK research institution, such as a university or hospital department, or a Research Council-funded institute. Companies, including SMEs, are not eligible to apply as lead applicants, but can be co-applicants. The maximum grant duration is 24 months.

Closing date: 17 Apr 12
Deadline information: This call is repeated 2 times a year.

CHRETIEN INTERNATIONAL RESEARCH GRANTS

American Astronomical Society

Description:

The American Astronomical Society is inviting applications for the Chretien international research grants. These grants are intended to further international collaborative projects in observational astronomy. The emphasis is on long-term international visits and the development of close working relationships with astronomers in other countries. Preference will be given to individuals of high promise who are otherwise unfunded. Innovative technical approaches including the development and use of new optics, new devices and new techniques will count heavily in the applicant's favor.

Astronomers with a PhD or equivalent may apply; graduate students are not eligible. Up to \$20,000 will be awarded to one or more individuals or groups to be used for the support of international observational astronomy. The awards are open to astronomers throughout the world.

Closing date: 31 Mar 12 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. This call is repeated once a year.

NATHAN R BREWER SCIENTIFIC ACHIEVEMENT AWARD
American Association for Laboratory Animal Science

Description:

The American Association for Laboratory Animal Science invites nominations for the Nathan R Brewer scientific achievement award. The award recognises research relevant to laboratory animal science and comparative medicine that advances current knowledge and contributes to the existing literature in those fields and is directly applicable to a variety of research settings. Candidates must have made major and repeated scientific contributions to laboratory animal science/medicine or comparative medicine. The award is open to all members of professional scientific societies, who are over 40 years of age. The award includes a \$2,000 honorarium.

RESearch GRANTS
American Massage Therapy Association Foundation

Description:

The American Massage Therapy Association Foundation invites applications for its research grants. These awards support high

quality, independent research which contributes significantly and directly to the basic knowledge of massage therapy or its application, including applied research

investigating massage therapy as a health or mental health treatment or prevention modality.

The research grant is available to investigators who have experience in the relevant field of research, and are presently associated with or have secured the cooperation of a university, independent research organisation, or other institution qualified and willing to function as a sponsoring organisation for the purpose of this project.

The normal award for 12 months is worth between \$1,000 and \$30,000.

Closing date: 01 Mar 12

Deadline information: Deadline time: 12am CST. This call is repeated once a year.

LERNER-GRAY GRANT FOR MARINE RESEARCH

American Museum of Natural History

Description:

The American Museum of Natural History invites applications for the Lerner-Gray grants for marine research. This grant supports projects in marine zoology with emphasis on systematics, evolution, ecology, and field-oriented behavioral studies of marine animals. However, it does not support marine botany and biochemistry.

Advanced students, postdoctoral trainees, and scientific researchers are eligible to apply.

Awards range between \$500 and \$2,000.

CAREER DEVELOPMENT BURSARY
Antarctic Science Ltd

Description:

Antarctic Science Ltd invites applications for its career development bursaries. These are awards of up to £5,000, made annually to support the development of the careers of promising young scientists, working in any field of Antarctic science. The purpose of the award is to broaden the scope of an existing research project, especially for postdoctoral studies, through funding extra field or laboratory work, purchasing/contributing towards the cost of a key piece of equipment, or funding international collaboration. Applicants should be at least postgraduate, or preferably postdoctoral, and if the latter, should be no more than 10 years from the start of their PhD.

Closing date: 31 Mar 12

Deadline information: This call is repeated once a year.

P **AGE/JOHNSON LEGACY SCHOLARS GRANTS** *Arthur W Page Center*

Description:

The Arthur W Page Center invites applications for the Page/Johnson legacy scholars grants, a program supported by funds from the Robert Wood Johnson

Foundation. The aim of these grants is to support scholars and professionals making important contributions to the knowledge, practice or public understanding of ethics and responsibility in public communication.

In this year's call, proposals are sought on the following themes:

- ethics in public communication;
- ethics of environmental communication;
- the role of public relations in fostering corporate responsibility;
- how company credos and codes of ethics affect corporate behavior;
- curriculum development in and pedagogical approaches to ethics in public relations;
- other areas of Page's legacy, including political communication, public opinion formation and attitude change, history of public relations, health communication and international broadcasting.

Applications are welcomed from practitioners of public communication such as editors, journalists as well as from doctoral candidates and researchers working either independently, with a think-tank, or within a university.

The center will make awards of between \$1,000 and \$25,000 from a total fund of \$75,000 for a duration of one year.

Closing date: 05 Mar 12 (Forecast)

R ESearch INTO NEUROMUSCULAR SYSTEM
Association Française contre les Myopathies

Description:

Association Française contre les Myopathies invites grant applications for research into the neuromuscular system. Projects will address the following areas:

- fundamental research and physiopathology of diseases of the neuromuscular system;

- development of therapeutic approaches for rare diseases;
- clinical and care management.

Awards include: trampoline grants, available to early career investigators and established investigators proposing innovative projects, worth €50,000 each over one year; research projects, available for up to two years; PhD fellowships, available for up to three years; and postdoctoral fellowships, available for up to two years. French and foreign groups may apply.

G RANTS FOR RESEARCH AND STUDY ABROAD

Association for the Promotion of Occupational Health - Työterveyden Edistämisyhdistys ry

Description:

The Association for Promotion of Occupational Health invites applications for its grants for research and study abroad. The grants are awarded for training and further education abroad within the field of occupational health and safety. Long term postdoctoral study and research may be supported as well as shorter term research visits. Additionally, the association accepts applications from researchers and students from less developed countries wishing to travel to Finland to conduct research and study in Finnish institutions. The grant amounts range from €6,000 to €9,000.

INTERNATIONAL ENGAGEMENT BURSARIES

Archives and Records Association UK and Ireland

Description:

The Archives and Records Association UK and Ireland invites applications for its international engagement bursaries. These aim to support the association's strategic propositions through the allocation of bursaries for international activities to archivists, records managers and conservators. Bursaries may support the following activities:

- attendance at international conferences;
- training which will assist members in establishing international networks and enable them to take advantage of the global workplace;
- members carrying out international roles;
- international projects.

Applications for activities that will benefit association members as a whole are particularly encouraged. Full, registered, accredited, affiliated and student members of the association who have not received a bursary in the last three years are eligible to

apply. The association envisages that bursaries will cover only part of the total cost of any event.

Closing date: 31 Mar 12

R ESearch INTO NEUROMUSCULAR SYSTEM Association Française contre les Myopathies

Description:

Association Française contre les Myopathies invites grant applications for research into the neuromuscular system. Projects will address the following areas:

- fundamental research and physiopathology of diseases of the neuromuscular system;
- development of therapeutic approaches for rare diseases;
- clinical and care management.

Awards include: trampoline grants, available to early career investigators and established investigators proposing innovative projects, worth €50,000 each over one year; research projects, available for up to two years; PhD fellowships, available for up to three years; and postdoctoral fellowships, available for up to two years. French and foreign groups may apply.

Closing date: 09 Mar 12

Deadline information:

Posted date: 12 Oct 11

Award type: Innovation grants, Directed grants to institutions, research groups etc

Award amount max: -

Award amount min: -

F RANZ WERFEL GRANT *Austrian Exchange Service*

Description:

The Austrian Exchange Service invites applications for the Franz Werfel grant. This provides up to 18 months' material research support for young university teachers across the world whose work focuses on Austrian literature. Recipients may work as visiting researchers at university departments and carry out specialist studies in libraries, archives or research institutions. Follow-up funding is also available, covering:

- a yearly invitation to a professionally relevant symposium;
- a yearly endowment for the purchase of specialist literature on the occasion of the symposium;
- a one-month research grant every three years;

- a habilitation grant;
- a publication allowance.

Closing date: 01 Mar 12

Deadline information: This call is repeated once a year.

HUMANITIES RESEARCH CENTRE FELLOWSHIPS Australian National University

Description:

The Australian National University invites applications for its Humanities Research Centre fellowships. These support innovative research in the humanities. The theme for 2013 is cities, imaginaries, publics. The following awards are available:

- visiting fellowships with grant. The standard period of tenure for HRC visiting fellowships is 12 weeks. Accommodation is provided. The maximum contribution for travel is \$3,000;
- visiting fellowships with partial grant. These are intended for scholars within Australia and New Zealand who wish to undertake research at the centre. Grants assist with travel expenses;
- visiting fellowships without a grant. These provide access to facilities and collections at the HRC;
- Freilich Foundation fellowship in discrimination research and promotion of tolerance. The standard period of tenure for Freilich visiting fellowships is 12 weeks. Accommodation is provided. The maximum contribution for travel is \$3,000.

Applications are invited from scholars working on urban history, sociology, architecture, public culture, memorialization, and representation of cities in literature, art, film and digital media.

Applicants for fellowships must have at least a higher degree or equivalent professional experience, research and publications. International scholars are strongly encouraged to apply.

Closing date: 15 Mar 12

FROM TARGETS TO NOVEL DRUGS GRANTS

Bayer

Description:

Bayer invites applications for its from targets to novel drugs grants. These support research on novel targets in areas of mutual interest. Focus areas are:

- oncology, particularly anti-proliferative, survival signalling, transcription and chromatin modulation, cell cycle regulation, tumour metabolism, hypoxia, immunotherapy and antibody-drug conjugates;
- gynaecology, particularly endometriosis and uterine fibroids;
- cardiology, particularly chronic or acute pulmonary hypertension, atrial fibrillation, heart failure, acute coronary syndrome, ischemic stroke, peripheral arterial occlusive disease, acute lung injury, or adult respiratory distress syndrome, cardiorenal syndrome and chronic kidney diseases;
- haematology, particularly haemophilia, anaemia and thrombocytopenia.

Researchers from universities, other academic research institutes and start-up companies may apply. Support grants for early stage research are worth €5,000 to €10,000, and focus grants for more mature ideas are worth €10,000 to €125,000.

Closing date: 31 Mar 12

Deadline information: Deadlines on: 31 March 2012, 30 September 2012, and repeated annually.

G **GRADUATE ENGINEER TRAINING SCHEME** Cern (European Organization for Nuclear Research)

Description:

Cern, the European Organization for Nuclear Research, invites applications for its graduate engineering training scheme. This offers an opportunity for training and work experience in engineering fields. Applications are accepted from researchers from Cern member states, but a limited number of positions in the research sector are also available for scientists from non-member states. Applicants must hold a university degree, BSc level or above, or a technical engineering qualification. Recent graduates at bachelor level should not have more than four years of relevant professional experience, whereas candidates with an MSc should have no more than 10 years of professional experience. Each position is granted initially for one year and normally extended for a second year. Extensions for all or part of a third year are granted only in exceptional circumstances. Stipends are calculated individually. Health insurance costs are covered and travel expenses for fellows and their family are granted. An installation grant, family allowance and child allowance can also be awarded.

Closing date: 01 Mar 12

Deadline information: This call is repeated 2 times a year.

V **ALIDATION OF NOVEL THERAPEUTIC TARGETS FOR HUNTINGTON'S DISEASE** **(R01)** NIH: National Institute of Neurological Disorders and Stroke

Description:

The National Institute of Neurological Disorders and Stroke and the CHDI Foundation invite applications for their validation of novel therapeutic targets for Huntington's disease program. Applications are sought from researchers aiming to

validate novel molecular targets for disease-modifying therapeutic intervention in Huntington's disease. Projects should advance the validation of molecular targets through genetic and pharmacological manipulation of the target in rodent or other

in vivo mammalian models of Huntington's disease.

This funding opportunity announcement will utilize the R01 grant mechanism. Approximately \$4.5 million will be used to fund between three and four awards in 2011. The average direct costs per project will be \$250,000 per year over four years. Eligible applicants include domestic and foreign non-profit or for-profit organizations and public or private institutions. PAS-10-183

Closing date: 01 Mar 12 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. Deadline: June 30, 2010 and then every October 5, February 5 and June 5 annually thereafter

R ESearch TECHNICAL ASSISTANCE TO THE MINISTRY OF PUBLIC HEALTH OF HAITI TO SUPPORT POST-EARTHQUAKE RECONSTRUCTION, CHOLERA AND HIV/AIDS RESPONSE

Centers for Disease Control and Prevention (CDC)

Description:

The Centers for Disease Control and Prevention invites applications for the provision of research technical assistance to the Ministry of Public Health of Haiti to support post-earthquake reconstruction, cholera and HIV/Aids response. Funding is available to provide technical assistance and support to Haiti's ministry of health in its post-earthquake and post-cholera response for the implementation of surveillance

surveys and evaluation projects for public health decision-making. Under this call, technical assistance and research activities and evaluations to respond to other diseases that may occur during the project period are also allowed. Eligible applicants include: state governments; county governments; city or township governments; special district governments; independent school districts; public and state-controlled higher education institutions; native American tribal

governments; public/Indian housing authorities; native American tribal organisations; non-profits; private higher education institutions; for-profits; small businesses. Applicants may be based anywhere in the world. The total estimated budget for this programme is \$5 million. The award is worth a minimum of \$100,000 and a maximum of \$1m. RFA-GH-12-003.

DISTRICT HEALTH SYSTEM STRENGTHENING AND QUALITY IMPROVEMENT FOR SERVICE DELIVERY IN MALAWI UNDER THE PRESIDENT'S EMERGENCY PLAN FOR AIDS RELIEF

Centers for Disease Control and Prevention (CDC)

Description:

The Centers for Disease Control and Prevention invite proposals for district health system strengthening and quality improvement for service delivery in Malawi under the President's emergency plan for Aids relief. The purpose of this programme is to reduce overall population morbidity and mortality, with an emphasis on HIV and

tuberculosis, mother-to-child transmission of HIV, and maternal and child health. This reduction will be realised through increasing the effectiveness, sustainability, equity and efficiency of district-based planning, budgeting and implementation processes in selected districts in Malawi, and supporting evidence-based prevention, care and treatment interventions at the facility level.

This will be supported by capacity building, including both clinical and health systems mentorship and coaching. Applicants should place a clear emphasis on developing local indigenous capacity to deliver HIV/Aids-related services to the Malawian population. Capacity-building plans should address systems, policy, organisational and workforce requirements for strengthening sustainable indigenous capacity to respond to the epidemic. Organisations and institutions in the US and overseas may apply. The total budget for this programme is approximately \$46 million. Grants are worth a minimum of \$250,000 and a maximum of \$6m over 12 months. CDC-RFA-GH12-1248.

ENHANCEMENT OF PUBLIC, PRIVATE AND FAITH-BASED HEALTH LABORATORY CAPACITY TO SUPPORT HIV/AIDS PREVENTION, CARE AND TREATMENT IN THE UNITED REPUBLIC OF TANZANIA UNDER THE PRESIDENT’S EMERGENCY PLAN FOR AIDS RELIEF

Centers for Disease Control and Prevention (CDC)

Description:

The Centers for Disease Control and Prevention invite proposals for the enhancement of public, private and faith-based health laboratory capacity to support

HIV/Aids prevention, care and treatment in the United Republic of Tanzania under the President’s emergency plan for Aids relief. The purpose of this programme is to progressively build an indigenous,

sustainable response to the national HIV epidemic in Tanzania by supplementing laboratory capacity. Successful applicants will provide technical assistance to the MOHSW, district CHMTs and RHMTs in both mainland Tanzania and Zanzibar, in the following areas:

- training local laboratory directors and managers to provide leadership and guidance on HIV/Aids laboratory services;
- training local laboratory specialists, scientists, technologists and technicians to perform essential HIV screening and confirmatory tests;
- training healthcare workers in CD4 tests for disease staging, and basic chemistry and haematology tests to monitor therapy;
- training non-laboratory staff involved in confidential HIV counselling and testing, the prevention of mother-to-child transmission, the treatment of tuberculosis and HIV co-infection, and rapid HIV testing and screening for blood safety programmes.

Organisations and institutions in the US and overseas may apply. The total budget for this programme is \$2.3 million. Grants are worth up to \$300,000 each. CDC-RFA-GH12-1237.

BUILDING THE INSTITUTIONAL CAPACITY OF LOCAL INDIGENOUS ORGANISATIONS IMPLEMENTING COMPREHENSIVE CLINICAL AND LABORATORY SERVICES TO SUSTAIN AND ENHANCE THE PREVENTION, CARE AND TREATMENT OF HIV/AIDS IN THE FEDERAL REPUBLIC OF NIGERIA UNDER PEPFAR

Centers for Disease Control and Prevention (CDC)

Description:

The Centers for Disease Control and Prevention invite proposals for building the institutional capacity of local indigenous organisations implementing comprehensive clinical and laboratory services to sustain and enhance the prevention, care and treatment of HIV/Aids in the Federal Republic of Nigeria under PEPFAR. The aim of this programme is to build and strengthen the capacity of local and indigenous organisations in Nigeria to develop, implement, monitor and manage HIV/Aids clinical and laboratory services and strategic information management activities that adhere to Nigerian national policy. Applicants should address one of the following areas:

- strengthening systems for sustainable comprehensive HIV/Aids prevention, care and support, and treatment programmes;
- strengthening laboratory systems for sustainable HIV/Aids programmes.

Awardees are expected to progressively strengthen and institutionalise capacity within assigned local and indigenous organisations in a sustainable manner through strategic mentoring relationships. Funding may not be used to deliver clinical or laboratory services and is intended to cover the costs of travel and accommodation for awardees' staff. US and non-US organisations and institutions may apply. The total budget for this programme is approximately \$45 million over five years. Awards are worth between \$100,000 and \$500,000 in the first year. CDC-RFA-GH12-1230.

IMPLEMENTING EVIDENCE-BASED PREVENTION INTERVENTIONS TO PREVENT NEW HIV INFECTIONS IN THE UNITED REPUBLIC OF TANZANIA UNDER THE PRESIDENT'S EMERGENCY PLAN FOR AIDS RELIEF

Centers for Disease Control and Prevention (CDC)

Description:

The Centers for Disease Control and Prevention invite proposals for implementing evidence-based prevention interventions to prevent new HIV infections in the United Republic of Tanzania under the President's emergency plan for Aids relief. This programme will provide an opportunity for local indigenous organisations to adapt and implement effective prevention interventions at national, regional or local levels, to reduce the spread of HIV and to promote healthy and health-seeking behaviours. The programme aims to increase access to prioritised and evidence-based HIV prevention interventions that focus on addressing behavioural and biomedical drivers of the epidemic and underlying structural factors that influence HIV transmission and vulnerability in Tanzania. Activities for this programme are:

- conduct formative assessment and programme baseline evaluation to collect data that will be used as a benchmark and will facilitate programme evaluation over time;
- implement curriculum- and community-based activities that reduce high-risk behaviours among people targeted by the proposed programme or intervention;
- conduct health promotion activities to promote the optimal use of available preventive HIV and other relevant services and products among the population targeted by the proposed programme or intervention;
- implement community-based activities that focus on increasing individual family and community awareness on gender dynamics impacting health status and facilitate the adoption of positive gender norms;

- establish a quality monitoring and evaluation framework to demonstrate programme effectiveness and inform programme improvements over time.

US and non-US organisations and institutions may apply. The total budget for this programme is approximately \$10 million over five years. Awards are worth up to \$540,000 in the first year, and up to \$2m in each consecutive year. The maximum project period is five years. CDC-RFA-GH12-1236.

Closing date: 27 Mar 12

Deadline information: Deadline time: 5pm EST.

CONDUCTING RESEARCH ON MODERATE ACUTE MALNUTRITION IN HUMANITARIAN EMERGENCIES Centers for Disease Control and Prevention (CDC)

Description:

Centers for Disease Control and Prevention invites applications for conducting research on moderate acute malnutrition in humanitarian emergencies. Funding is available for projects that have the potential to yield high impact public health results contributing to population health improvements on a large scale. The objectives of this programme are:

- to conduct field research on moderate acute malnutrition in humanitarian emergencies, with an emphasis on programme design, detection and prevention activities or programme monitoring and evaluation;
- to incorporate the results of research into operational nutrition programmes in humanitarian emergencies and ensure the sharing of expertise and research findings with other non-governmental agencies, donor institutions and UN agencies.

Eligibility is limited to foreign entities located in any country affected by humanitarian emergencies or protracted conflict. The following organisations are eligible to apply: public/state-controlled/private higher education institutions; non-US entities; UN

agencies. Applicant organisations must provide documentation of a presence in at least five countries and at least five years of demonstrable experience in nutrition in humanitarian emergencies. Projects may last for up to five years. The total estimated budget for this programme is \$10 million. Awards are worth a minimum of \$100,000 and a maximum of \$2m. RFA-GH-12-006.

Closing date: 29 Mar 12

Deadline information: Deadline: letters of intent 5pm EST 1 March 2012; applications 5pm EST 29 March 2012.

OPERATIONS RESEARCH (IMPLEMENTATION SCIENCE) FOR STRENGTHENING PROGRAM IMPLEMENTATION THROUGH THE PRESIDENT’S EMERGENCY PLAN FOR AIDS RELIEF

Centers for Disease Control and Prevention (CDC)

Description:

The Centers for Disease Control and Prevention invites applications under its operations research (implementation science) for strengthening program implementation through the President’s Emergency Plan for Aids Relief call. The overall purpose of these research activities is to yield knowledge that will help to optimise the delivery of services and maximise the population-level impact of HIV/Aids prevention, care and treatment services provided in PEPFAR-supported countries. This programme addresses the ‘Healthy People 2020’ focus area of global health by improving public health and strengthen US national security through global disease detection, response, prevention and control strategies. The applicant my propose an implementation science research project focusing on one of the following topics:

- increasing the proportion of persons who know their HIV status and are

linked to appropriate HIV prevention services;

- evaluating the implementation of male circumcision on HIV prevention;
- linkages required for combination HIV prevention and treatment as prevention;
- HIV prevention in high-risk marginalised populations;
- improving access to care, prevention of mother-to-child HIV transmission coverage and integrated service delivery;
- PMTCT services - implications of new approaches in 2010 WHO guidelines, elimination of mother-to-child transmission and treatment for prevention;
- TB-HIV services;
- adult care and support;
- adult HIV treatment;
- paediatric HIV care and treatment;

- HIV drug resistance and molecular epidemiology;
- assessing feasibility of innovation strategies for paediatric HIV surveillance;
- assessing the feasibility of innovative strategies for measuring mortality;
- economics and finance;
- human resources for health;
- health information systems.

Investigators who submit applications for topics outside of these areas of emphasis should demonstrate the importance of their research and how results will inform delivery of HIV prevention, care and treatment in PEPFAR-funding sites.

PEPFAR local partners in countries with CDC GAP offices and CDC GAP-supported projects are eligible to apply. Approximate total funding is \$10 million, individual awards will range between \$200,000 and \$500,000 per year. The total project period is two years.

Closing date: 29 Mar 12

Deadline information: Deadline: letters of intent by 5pm EST 1 March 2012; full applications by 5pm EST 29 March 2012.

OPENLAB SUMMER STUDENTS

Cern (European Organization for Nuclear Research)

Description:

Cern invites applications for its openlab summer students 2012. This allows students from member and non-member states to spend eight weeks from June to September 2012 at Cern. Students will attend lectures and will be able to visit the accelerators and other experimental areas and laboratories that are part of the programme. BSc, MSc or PhD students in computer science or physics, interested in working on advanced IT projects, may apply. The stipend for a two-month internship is CHF5,000 for travel, accommodation and living costs. SUM-OPENLAB-2012.

SPECIAL GRANTS FOR CIVIL SOCIETY ORGANISATIONS AND COMMONWEALTH ASSOCIATIONS Commonwealth Foundation

Description:

The Commonwealth Foundation invites applications for its special grants for civil society organisations and Commonwealth associations. These provide financial assistance to undertake strategic and innovative projects that will promote the Commonwealth theme for 2012: Connecting Cultures. Applications should address the following criteria to be considered for a grant:

- exploring the connections between diaspora groups across a number of different countries. Groups must originate from commonwealth countries and the majority of the connections must be with residents of commonwealth countries;
- applications must explain how this activity connects to wider initiatives and what plans there are to ensure sustainability of the project;
- the direct participants of the project must include at least 50 per cent women and youth of under 35 years old.

Applicant organisations must be registered or incorporated as a non-profit civil society organisation or Commonwealth Association in a Commonwealth Foundation member country. Priority will be given to applications from the Pacific and the Caribbean, from youth-led organisations and to projects which make innovative use of the latest digital technology as a means of connecting cultures and sharing the outcomes of activities. The total budget for this call is £100,000 from which four projects will receive funding worth up to £25,000.

P **ILOT AND FEASIBILITY AWARDS**
Cystic Fibrosis Foundation

Description:

The Cystic Fibrosis Foundation invites letters of intent for its pilot and feasibility awards. These grants are for developing and testing new hypotheses or new methods, and to support promising new investigators as they establish themselves in research areas relevant to cystic fibrosis. Proposed work must be hypothesis driven and must reflect innovative approaches to critical questions in CF research. Up to \$40,000 per year for two years may be requested.

Closing date: 31 Mar 12 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. Deadline time: 5pm EDT. This call is repeated once a year.

R **ESearch GRANTS**
Cystic Fibrosis Foundation

Description:

The Cystic Fibrosis Foundation invites letters of intent for its research grants. The grants aim to encourage the development of new information that contributes to the understanding of the basic etiology and pathogenesis of cystic fibrosis. Consideration will also be given to projects providing insight into the development of information that may contribute to the development of new therapies for CF. All proposals must be hypothesis driven, and sufficient preliminary

data must be provided to justify CF foundation support. Information derived from such study will hopefully lead to submission to other funding agencies, such as the National Institutes of Health. Annual funding of \$90,000 is available for two years, after which a grant may be renewed for another year.

Closing date: 31 Mar 12 (Forecast)

INDIRECT ACTIONS UNDER THE MULTI-ANNUAL COMMUNITY PROGRAMME ON PROTECTING CHILDREN USING THE INTERNET AND OTHER COMMUNICATION TECHNOLOGIES - SAFER INTERNET

Directorate-General for Information Society and Media

Description:

The Directorate-General for Information Society and Media invites proposals for indirect actions under the multi-annual community programme on protecting children using the internet and other communication technologies - safer internet. Projects will address the following topics:

- ensuring public awareness, specifically integrated networks of safer internet centres;
- fighting against illegal content and tackling harmful conduct online, specifically targeted projects on enhancing law enforcement agencies' identification and analysis of child pornography;
- promoting a safer online environment, specifically thematic networks on promoting positive

online experiences for young children;

- establishing a knowledge base, specifically knowledge enhancement projects investigating the impact on young people of the convergence of technology and identifying child-friendly search and browser tools, respectively.

Proposals may be submitted by all legal entities established in EU member states and Norway, Iceland and Liechtenstein. Legal entities in non-EU and non-EFTA countries may participate at their own expense. Legal entities in Russia may take part in projects establishing safer internet centres. The indicative budget for this call is €13.42 million. Funding will cover 100 per cent of costs, except in the cases of actions one and two, where up to 50 per cent of costs may be covered, or a maximum of 75 per cent for

public bodies, SMEs and non-profit organisations. OJ 2012/C 27/04.

Closing date: 29 Mar 12

PROPOSALS FOR NON-PROPRIETARY RESEARCH *Diamond Light Source*

Description:

The Diamond Light Source solicits proposals for nonproprietary research. Under this programme, beam time will be free at the point of use for all non-proprietary research. The following beam lines are available:

- I02/I03/I04 – macromolecular crystallography;
- I06 – nanoscience (including branchline);
- I15 – extreme conditions;

- I16 – magnetism and materials;
- I18 – microfocus spectroscopy;
- I22 – non-crystalline diffraction;
- B16 – test beamline;
- I11 - high resolution powder diffraction;
- I19 – small molecule single crystal diffraction;
- B23 – circular dichroism.

Proposals are welcome from scientists and engineers from academia, research councils

and charitable institutions and from commercial organisations.

Travel and subsistence costs during beam time for up to three users will be provided for UK academics.

POPULATION, REPRODUCTIVE HEALTH AND ECONOMIC DEVELOPMENT - **POPDEV** *Population Reference Bureau*

Description:

The Population Reference Bureau, in collaboration with the Economic and Social Research Council, the William and Flora Hewlett Foundation, the Netherlands Organisation for Scientific Research WOTRO Science for Global Development (NWO WOTRO) and the Research Council of Norway, invites pre-proposals for the PopDev call on population, reproductive health and economic development. Proposals may address:

- the impact of reproductive health on women's economic empowerment, particularly as measured by economic outcomes at the household and individual levels;

- relationships between reproductive health and family planning, including population policies and dynamics, and macroeconomic outcomes in countries.

Applications may be submitted by partnerships consisting of one or more participating countries (Netherlands, UK, Norway, USA) and researchers from developing countries, with priority given to sub-Saharan Africa. NWO WOTRO will provide up to €320,000 to a maximum of two projects, ESRC will provide up to €300,000 (excluding indirect and estate costs) for one project, RCN will provide approximately €500,000 for one to two projects and PRB will provide approximately €245,000 for a maximum of two projects. Multilateral

projects may apply for bonus funding worth up to €100,000 over two years. Research may take place in low- or middle-income countries, with preference given to sub-Saharan Africa.

E SRC/HMRC/HMT COLLABORATIVE TAX ADMINISTRATION RESEARCH CENTRE Economic and Social Research Council (ESRC)

Description:

The Economic and Social Research Council, together with HM Revenue and Customs and HM Treasury, invites outline proposals for the establishment of an independent centre for research on tax administration. The aim of the centre will be to support high-quality research and related activities on tax administration to strengthen the theoretical and empirical understanding of the delivery and design of tax operations and policies. The main focus for the centre will be tax administration, but it will also develop models used in forecasting to assess revenue sustainability and ex-post evaluation methods. Key research challenges are: increasing voluntary compliance; reducing undesirable behaviours; the role of intermediaries and networks; tax gap analysis; the relationship between tax design and efficient tax operations; measuring the efficiency and effectiveness of tax process and operations and their impact on tax payers, especially SMEs.

Proposals are invited from UK research organisations eligible for ESRC funding, in partnership with other organisations. Leading multidisciplinary research teams, either at a single organisation or from a consortium of a small number of organisations, are eligible to submit a proposal. The inclusion of international co-investigators in proposals is possible, as well as UK based co-investigators. Any academic researcher (at PhD or equivalent status) from an established overseas research organisation will be eligible to be listed as an international co-investigator. International collaboration is not limited to co-investigators on applications; such partnerships could also develop international datasets and evidence bases on key topics.

Proposals are invited for a five-year period with funding of up to £2 million at 80 per cent full economic cost.

Closing date: 22 Mar 12

Deadline information: Deadline time: 4pm.

NEW THERAPY - COMMERCIALIZATION GRANTS Epilepsy Therapy Project (Epilepsy Research Foundation)

Description:

The Epilepsy Therapy Project and the Epilepsy Foundation invite applications for their new therapy - commercialization grants. The goal of the program is to drive the development of new therapies for epilepsy, accelerating the advancement of research from the laboratory to the patient. The program seeks to advance the development of new therapies including medicines, biologics or devices. The project also encourages 1:1 matching grants to academic and commercial entities to support the commercialization of novel approaches to the treatment of epilepsy. Areas of interest include:

- novel approaches to treatment;
- platform technology to advance screening techniques that can be utilized by multiple laboratories, including utility of techniques for early proof-of-concept trials;
- adaptation of treatment in development for another therapeutic areas to assess utility for epilepsy.

Proposals for research originating from outside the US are welcome. Preference will be given to proposals that already have a commercial partner engaged to assist with development, and to proposals that have committed or matched funding from the sponsoring institution, commercial partner or other third party source.

\$500,000 is available for funding for the spring 2012 grants cycle. ETP and EF encourage proposals ranging from \$50,000 to \$500,000 and anticipates average awards of \$100,000.

Closing date: 01 Mar 12

Deadline information: Deadline: letters of intent 11.59pm ET March 1; invited full proposals 11.59pm ET April 12, 2012.

Posted date: 31 Jan 12

NEW THERAPY GRANTS Epilepsy Therapy Project (Epilepsy Research Foundation)

Description:

The Epilepsy Therapy Project invites applications for its new therapy grants. The purpose is to advance the development of new therapies including new medicines, biologics and therapeutic devices. All proposals must demonstrate a clear path from the lab to the patient. Areas of interest include:

- novel approaches to treatment;
- platform technology to advance screening techniques that can be utilized by multiple laboratories, including utility of techniques for early proof-of-concept trials
- adaptation of treatment in development for another therapeutic area to assess utility for epilepsy (while maintaining patent protection).

Preference will be given to proposals that already have a commercial partner engaged to assist with development, and to proposals that have committed or matched funding from the sponsoring institution, commercial partner or other third party source. Proposals from outside the US are welcome.

Closing date: 03 Mar 12 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. Deadline: letters of intent 11:59pm ET September 2; - invited full proposal 11:59pm October 7, 2011. This call is repeated 2 times a year.

F **FP7-ENERGY-2012-2** European Commission Framework Programme 7: Cooperation

Description:

The European Commission Framework Programme 7: Cooperation invites proposals for its FP7-ENERGY-2012-2 call. Proposals may address:

- activity renewable energy generation: area energy.2.1: photovoltaics, including the topic energy.2012.2.1-2: demonstration of smart multi-functional PV modules; area energy .2.3: wind, including the topic energy.2012.2.1-2: demonstration of innovative designs to reduce fatigue loads and improve reliability of multi-MW turbines; area energy.2.6:ocean, including the topic energy.2012.2.6-1: demonstration of first ocean energy farms. The indicative budget for renewable energy generation is €24 million;
- activity renewable fuel production: area energy.3.2: second generation fuel from biomass, including the topic energy.2012.3.2.3: pre-commercial industrial scale demonstration plant on lignocellulosic ethanol. The indicative budget for renewable fuel production is €35m;
- cross-cutting actions between activities: areas Energy.5 and Energy.6 Energy.5&6.1 power generation technologies for integrated zero emission solutions, including the topics energy.2012.5&6.1-1: pilot plant -scale demonstration of advanced post-combustion CO₂ capture processes with a view to integration in fossil fuel power plants, and energy.2012.5&6.1-2: pilot plant -scale demonstration and integration of emerging and new combustion technologies. The indicative budget for cross-cutting actions is €22m.

The projects require collaboration between at least three independent legal entities, no two

of which are established in the same EU member state or FP7 associated country. Projects should develop demonstrations in the areas of renewable energy generation, renewable fuel production and zero emission solutions. Legal entities from the other third countries and international organisations are eligible for funding under the conditions laid down in Art 29 (2) of the Rules for Participation. The indicative overall budget for this project is €81m. FP7-ENERGY-2012-2. OJ 2011/C 213/09.

Closing date: 08 Mar 12

Deadline information: Deadline time: 5pm Brussels local time.

Posted date: 22 Jul 11

F **FP7 ERC ADVANCED INVESTIGATOR GRANTS - LIFE SCIENCES (ERC-2012-ADG)** *European Commission Framework Programme 7: European Research Council/Ideas*

Description:

The European Commission Framework Programme 7: Ideas invites proposals for its ERC advanced investigator grants for life sciences. Grants encourage substantial advances at the frontier of knowledge by supporting advanced investigators to pursue ground breaking, high-risk/high gain research. Projects must include at least one independent legal entity established in an EU member state or associated country. ERC actions are open to researchers of any nationality who intend to establish and conduct their research activity in any Member State or associated country. Principal investigators may be of any age and nationality and may reside in any country at the time of the application. The indicative budget for this call is 39 per cent of €679.95 million. FP7 ERC-2012-AdG.

F **FP7-AAT-2012-RTD-L0** *European Commission Framework Programme 7: Cooperation*

Description:

The European Commission Framework Programme 7: Cooperation invites proposals

for its FP7-AAT-2012-RTD-L0 pioneering the air transport of the future research and

technology development project. Projects may address:

- AAT.2012.6.3-1. Breakthrough and emerging technologies projects may apply for a maximum amount of €600,000;
- AAT.2012.6.3-2. Radical new concepts for air transport projects may apply for a maximum amount of €600,000.

The indicative budget for this call is €5 million.

Applications may be submitted for collaboration projects between at least three independent legal entities, each of which is established in a different EU member state or FP7-associated country. Legal entities from the other third countries and international organisations are eligible for funding under the conditions laid down in Art 29 (2) of the Rules for Participation. Applications will be evaluated on scientific and technological excellence, implementation and potential impact. FP7-AAT-2012-RTD-L0

Closing date: 15 Mar 12

TEA 2 PROJECTS

Eureka

Description:

Eureka, through the programme Information Technology for European Advancement, invites applications for its seventh call for projects. Grants stimulate and coordinate industry-driven, pre-competitive research and development in software-intensive systems and services by bringing together partners from industry, universities and research institutes in strategic projects. Projects must involve a minimum of two different organisations in at least two different Eureka countries. Projects will involve between 40 and 300 person-years, and typically last for up to three years. Associated countries may participate where companies from at least two Eureka member countries are participating. Non-Eureka member countries may participate where at least two Eureka member country organisations are involved, and must secure their own funding.

Closing date: 30 Mar 12

Deadline information: Deadline: project outlines 30 March; letters of intent 7 April; full proposals 28 September 2012. This call is repeated once a year.

NEW INVESTIGATOR AWARDS IN BIOMEDICAL SCIENCE *Wellcome Trust*

Description:

The Wellcome Trust invites applications for its new investigator awards in biomedical science. These will provide support that is flexible and at a level and length sufficient to enable exceptional researchers to address the most important questions about health and disease. Awards will support world-class researchers who are no more than five years from appointment to their first academic position, but who can already show that they have the ability to innovate and drive advances in their field of study. They should be able to articulate a compelling long-term vision for their research and demonstrate the talent, track record and originality to achieve it. Applicants based in the UK or a low- or middle-income country must have an established academic post at an eligible higher education or research institution. Applicants based in low- or middle-income countries, except India, are also eligible to apply if they are carrying out research in the fields of public health and tropical medicine aimed at understanding and controlling human and animal diseases of local, national or global health importance. Awards are worth between £100,000 and £425,000 per year for a period of up to seven years, and cover research expenses, overseas allowances, travel and subsistence.

Closing date: 02 Mar 12

Deadline information: Deadlines on: 2 March 2012, 20 July 2012.

Description:

The International Association for the Study of Pain invites proposals for its collaborative research grants. The purpose of these grants is to support multidisciplinary collaborative research in pain research between two or more research groups located in different countries. Priority will be given to collaborations between basic science and clinical research groups.

The principal investigator in charge of the overall project must be a member of IASP of at least one year's standing. The maximum grant awarded will be worth \$15,000. The grants will cover travel and accommodation costs to support collaborative research by two or more research groups located in different countries. All applications must be submitted in English.

Closing date: 15 Mar 12

Deadline information: This call is repeated once a year.

IEEE FOUNDATION GRANTS PROGRAM

Institute of Electrical and Electronics Engineers

Description:

The Institute of Electrical and Electronics Engineers invites applications for its foundation grants program. The foundation provides seed money to IEEE units and charitable organizations for innovative projects that further the scientific and educational purposes of IEEE. Focus areas include:

- education, supporting projects that expand and enhance engineering, science and technology education opportunities;
- history of technology, supporting projects to increase awareness of the impact and influence of early technology on the present and future among the general public;
- applying technology for humanitarian causes, supporting projects that implement or disseminate replicable, sustainable, technology-based solutions for humanitarian issues in underserved and underprivileged areas.

The foundation does not provide funds for overhead expenses nor for those costs that can be associated with the regular, ongoing business of the institute or the applying entity.

Closing date: 16 Mar 12

TEA 2 PROJECTS

Eureka

Description:

Eureka, through the programme Information Technology for European Advancement, invites applications for its seventh call for projects. Grants stimulate and coordinate industry-driven, pre-competitive research and development in software-intensive systems and services by bringing together partners from industry, universities and research institutes in strategic projects. Projects must involve a minimum of two different organisations in at least two different Eureka countries. Projects will involve between 40 and 300 person-years, and typically last for up to three years. Associated countries may participate where companies from at least two Eureka member countries are participating. Non-Eureka member countries may participate where at least two Eureka member country organisations are involved, and must secure their own funding.

Closing date: 30 Mar 12

Deadline information: Deadline: project outlines 30 March; letters of intent 7 April; full proposals 28 September 2012. This call is repeated once a year.

CAAT GRANTS PROGRAM *Johns Hopkins University*

Description:

The Johns Hopkins Center for Alternatives to Animal Testing is soliciting projects for its grant program. The program supports the development of new methods that refine scientific tests by minimizing animal pain or distress, reduce animal usage, or replace whole animal tests. Proposals are sought in the following areas:

- refinement. These grants should focus specifically on the issues of alleviating pain or distress in laboratory

protocols. The aim is the development of better methods for pain assessment, alleviation, elimination and prevention of pain in animal experiments. The maximum grant is \$25,000 per year;

- proposals relating to toxicology. These grants should be developed to provide understanding of mechanisms/ mode of action and to consider how one would be able to translate the mechanism to a method

that can be used to evaluate/predict health consequences. The maximum grant is \$25,000 per year.

- developmental toxicology. These grants should focus on developmental toxicology and developmental neurotoxicology. These studies can be either in vitro, involve embryonic stem cells, or involving species such as *caenorhabditis elegans* or zebrafish. The maximum grant is \$50,000 per year.

Closing date: 01 Mar 12 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. This call is repeated once a year.

21ST CENTURY RESEARCH AWARDS

James S McDonnell Foundation

Description:

The James S McDonnell Foundation invites applications for its 21st century research awards. The purpose is to support research projects with a high probability of generating new knowledge and insights. Proposal projects should be at an early, even preliminary stage of development, and should be intended to break new ground or to challenge commonly-held assumptions. Proposals should also be sufficiently novel, cross-disciplinary, or heterodox so that they have a strong likelihood of influencing the development of new ways of thinking about important problems. All projects must qualify for the program area of brain cancer research.

Applicants must have completed academic training and hold a position compatible with the pursuit of independent research at the assistant professor level and above. JSMF funds internationally. Applications must be sponsored by a nonprofit institution. Awards are worth up to \$450,000 for a period of three to six years.

Closing date: 14 Mar 12

Deadline information: Deadline: 3:59pm CDT. This call is repeated once a year.

Posted date: 13 Jan 12

Award type: Directed grants for individual investigators, Directed grants to institutions, research groups etc

*Jerico***Description:**

Jerico invites proposals for its transnational access call. This enables user groups from EU member states and associated countries to access Jerico's European coastal observatories and calibration facilities. Facilities include:

- ferrybox lines in the Baltic Sea, North Sea and Atlantic Ocean;
- network of fixed platforms and other single fixed point installations in the Baltic, North, Irish and Mediterranean Seas;
- four glider fleets based in the Irish Sea, North Sea and Western Mediterranean;
- four calibration laboratories.

Applicants who reside outside EU member and associated states may participate, provide they represent a minority in the group and are not the principal applicant. The group leader and majority of users must work in a country other than the one in which the Jerico facility is based. As well as free access, including logistical, technical, scientific and training assistance, Jerico will also cover travel and subsistence costs relating to visits by users,

where necessary. Up to two travel grants will be assigned to each user group, depending on the length of stay requested.

R RESEARCH GRANTS

Jérôme Lejeune Foundation - Fondation Jérôme Lejeune

Description:

The Jérôme Lejeune Foundation invites applications for its research grants. These support fundamental or clinical research projects on the discovery of treatments for genetic diseases and mental deficiencies apparent from childhood, in particular trisomy 21, but also including: fragile X syndrome, cri du chat syndrome, rare chromosomal abnormalities, Rett, Williams Beuren, Willi Prader and Angelman syndromes. Projects from interested teams and individual researchers can submit proposals for programmes on genetics, molecular biology, neurosciences, therapeutics, behaviour, and adult or cord blood stem cells. The Foundation also provides support for the organisation of congresses or courses. Funding is worth between €20,000 and €40,000 over two years, but can be higher for therapeutic projects, to which preference is given.

Closing date: 25 Mar 12

Deadline information: Deadline: applications are accepted between 9 January and 25 March 2012.

**Description:**

The Skoll Foundation invites applications for its awards for social entrepreneurship. The awards include a core support grant to an organization, to be paid over three years, and a noncash award to the social entrepreneur representing the organization, presented at the Skoll World Forum on Social Entrepreneurship every spring. Applicants should have a tested and proven social innovation that addresses an issue of critical importance and is positioned for large-scale impact, in order to be considered for the awards.

The foundation focuses on the following issue areas:

- economic and social equity;
- environmental sustainability;
- health;
- institutional responsibility;
- peace and security;
- tolerance, justice and human rights.

While the awards do not have an absolute budget threshold for eligibility, organizations with annual revenues below \$2.5 million that have activities primarily in the developed countries and below \$1M that have activities primarily in developing countries tend to be at a disadvantage in the selection process. The selection process prioritizes organizations based on readiness to expand impact significantly and/or scale up solutions and favors organizations within these budget thresholds.

NEW INVESTIGATOR AWARDS IN BIOMEDICAL SCIENCE Wellcome Trust

Description:

The Wellcome Trust invites applications for its new investigator awards in biomedical science. These will provide support that is flexible and at a level and length sufficient to enable exceptional researchers to address the most important questions about health and disease. Awards will support world-class researchers who are no more than five years from appointment to their first academic position, but who can already show that they have the ability to innovate and drive advances in their field of study. They should be able to articulate a compelling long-term vision for their research and demonstrate the talent, track record and originality to achieve it. Applicants based in the UK or a low- or middle-income country must have an established academic post at an eligible higher education or research institution. Applicants based in low- or middle-income countries, except India, are also eligible to apply if they are carrying out research in the fields of public health and tropical medicine aimed at understanding and controlling human and animal diseases of local, national or global health importance. Awards are worth between £100,000 and £425,000 per year for a period of up to seven years, and cover research expenses, overseas allowances, travel and subsistence.

Closing date: 02 Mar 12

Deadline information: Deadlines on: 2 March 2012, 20 July 2012.

PATTERSON MEMORIAL GRANT *Society of Vertebrate Paleontology*

Description:

The Society of Vertebrate Paleontology invites applications for the Patterson memorial grant. The purpose of this award is to support student field work in vertebrate paleontology. Proposals must be for field work, and particular consideration will be given to proposals for field work that is innovative, venturesome and unusual.

In 2011, a grant of \$2,700 will be awarded.

Both undergraduate and graduate students are eligible to apply. Applicants and their sponsors must be SVP members or pending members.

Closing date: 10 Mar 12 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. Deadline: email application by March 3 and postal application postmarked by March 10. This call is repeated once a year.

P ILOT AWARD

Society for Pediatric Radiology Research and Education Foundation

Description:

The Society for Pediatric Radiology Research and Education Foundation invites applications for its pilot award. This award aims to provide a higher level of support for pediatric radiology-related projects of merit. The grant can be used to fund protected time. Applications should endeavor to focus on unique aspects of imaging or image-guided therapy/intervention in children, promote the importance of imaging or imaging expertise in improving health care in children, embrace broader cross boundary impact, including public policy or translational medicine, cultivate multidisciplinary cooperation, and provide opportunities for additional funding.

The award is worth up to \$50,000. Applications are welcome from individuals who hold a full-time faculty position in an educational institution at the time the award commences. Applicants must be in a department of diagnostic radiology, radiation oncology or nuclear medicine and have completed all advanced training. In addition, the principle investigator must be an SPR member.

Closing date: 14 Mar 12 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the

A STANLEY RAND FELLOWSHIP PROGRAM

Smithsonian Institution

Description:

The Smithsonian Institution's Tropical Research Institute invites applications for the

A Stanley Rand fellowship program. Projects should focus on animal behavior, natural history, evolutionary biology, plant and

animal ecology and environmental monitoring. Proposals for smaller projects that are part of a larger thesis or dissertation are encouraged, in which case the specific proposal should briefly sketch how the research project fits into the broader study. Projects may last for up to three months. Fellowships provide \$800 per month in living expenses while at STRI, a research allowance worth a maximum of \$2,000 and round-trip coach airfare.

Closing date: 15 Mar 12

B AIRD SOCIETY RESIDENT SCHOLARS *Smithsonian Institution*

Description:

The Smithsonian Institution Libraries invites applications for the Baird Society resident scholar program. This program awards stipends of \$3,500 per month for up to six months for individuals working on a topic relating to the holdings of Smithsonian Institution Libraries' special collections. Historians, librarians, doctoral students and postdoctoral scholars are welcome to apply. Scholars must be in residence at the Smithsonian during the award period.

Scholars will carry out research in SIL's special collections located in Washington, DC and New York City. These special collections include:

- printed materials on world's fairs;
- manufacturer's commercial trade catalogues used to study American industrialisation, mass production and consumerism;
- air and space history (ballooning, rocketry and aviation); =
- European and American decorative arts, architecture and design;

- history of art and artists, exhibition catalogs, catalogues raisonné, serials, and dissertations concentrated in the area on American art, history, biography and artists' ephemera.

DIBNER LIBRARY RESIDENT SCHOLARS *Smithsonian Institution*

Description:

The Smithsonian Institution Libraries invite applications for their Dibner Library of the History of Science and Technology resident scholar program. This program, supported by The Dibner Fund, awards stipends of \$3,500 per month for up to six months for individuals working on a topic relating to the history of science and technology who can make substantial use of collections in the Dibner Library. Historians, librarians, doctoral students and postdoctoral scholars are welcome to apply. Scholars must be in residence at the Dibner Library during the award period.

The strengths of the collection are in the fields of mathematics, astronomy, classical natural philosophy, theoretical physics (up to the early twentieth century), experimental physics (especially electricity and magnetism), engineering technology (from the Renaissance to the late nineteenth century), and scientific apparatus and instruments.

JOHN DORST-FELIX FLEISCHNER SEED GRANT IN PEDIATRIC THORACIC RADIOLOGY

Society for Pediatric Radiology Research and Education Foundation

Description:

The Society for Pediatric Radiology Research and Education Foundation invites applications for the John Dorst-Felix Fleischner seed grant in pediatric thoracic radiology. The aim of the foundation's seed grant program is to assist investigators in defining objectives and testing hypotheses before they apply for major grants from corporations, foundations or government agencies.

Applications are welcome from SPR members who hold a full-time faculty position in an educational institution at the time the award commences. Applicants must also be in a department of diagnostic radiology, radiation oncology or nuclear medicine and have completed all advanced training.

The grant provides up to \$10,000 for a funding period of one year.

Closing date: 15 Mar 12

Deadline information: Deadlines on: 15 March 2012, 15 October 2012, and repeated annually.

CLINIC ON THE MEANINGFUL MODELLING OF EPIDEMIOLOGICAL DATA Stellenbosch University

Description:

The South African Centre for Epidemiological Modelling and Analysis, in collaboration with the African Institute for Mathematical Sciences, invites applications for participation in its clinic on the meaningful modelling of epidemiological data. This two-week clinic on the use of data in understanding infectious diseases will bring together graduate and postdoctoral students and researchers from Canada, the US and Africa to engage in epidemiological modelling projects that use real data to grapple with practical questions in a meaningful way. The clinic, to be held in Cape Town from 27 May to 8 June 2012, will consist of a series of discussions and tutorials that will guide participants through the process of data-based epidemiological modelling. Participants are encouraged to begin collaborative research projects with each other or with the organisers and to continue these projects after the clinic at their home institutions. The clinic is targeted at students and researchers with prior knowledge of mathematical epidemiology who have yet to establish themselves in the field. Preference will be given to applicants who will gain the most from participation in the clinic. Funding is available to cover food and lodging for the duration of the clinic, with the expectation that travel support will also be available for a limited number of African participants.

Closing date: 16 Mar 12

SIGMA THETA TAU INTERNATIONAL/ASSOCIATION OF NURSES IN AIDS CARE GRANT *Sigma Theta Tau International*

Description:

Sigma Theta Tau International and the Association of Nurses in Aids Care invite applications for their research grant. The purpose of the grant is to encourage research career development of nurses through support of clinically oriented HIV/Aids research and increase the number of HIV studies being done by nurses. This includes studies focused on HIV prevention, symptom management, promotion of self-care and adherence. Proposals for pilot or developmental research may be submitted for the grant.

Applicants must be registered nurses with a current license and must also have a master's degree or be enrolled in a doctoral program. Membership in one organization is required, and preference will be given to STTI and ANAC members.

Funding of up to \$2,500 is available.

Closing date: 31 Mar 12 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. This call is repeated once a year.

DUBAI INTERNATIONAL AWARD FOR BEST PRACTICES United Nations Human Settlements Programme

Description:

The United Nations Human Settlements Programme invites applications for the Dubai international award for best practices. This recognises best practices that have a positive impact on improving living environments, the sustainable development of human settlements and the protection of the environment on the basis of international cooperation. Each application should include a partnership between at least two eligible actors. The following entities may apply: government organisations or agencies; national habitat committees or focal points; multilateral agencies; cities, local authorities or their associations; non-governmental or community-based organisations; private sector; research and academic institutions; media; public or private foundations; individuals. 12 awards, worth \$30,000 each, are available.

**Description:**

The Waterloo Foundation invites applications for its child development grants for research related to autism. These support research into the psychological and behavioural development of children, and into certain neuro-developmental conditions and the factors that influence them. The foundation is particularly interested in autistic spectrum disorders, as well as other conditions that often occur together, including ADHD, dyslexia, rolandic epilepsy, development coordination disorder and trauma. The focus is on factors which may alleviate these conditions, and particularly those which are under the families' control, such as diet and sleep. The foundations funds both pure and applied research topics, prioritising those benefiting patients directly.

Applications are welcome from registered charities and organisations with projects that have a recognisable charitable purpose. Organisations based outside the UK will need to provide a reference, preferably from a UK-registered entity. Grants are unlikely to exceed £100,000 each per year.

NEW INVESTIGATOR AWARDS IN BIOMEDICAL SCIENCE Wellcome Trust

Description:

The Wellcome Trust invites applications for its new investigator awards in biomedical science. These will provide support that is flexible and at a level and length sufficient to enable exceptional researchers to address the most important questions about health and disease. Awards will support world-class researchers who are no more than five years from appointment to their first academic position, but who can already show that they have the ability to innovate and drive advances in their field of study. They should be able to articulate a compelling long-term vision for their research and demonstrate the talent, track record and originality to achieve it. Applicants based in the UK or a low- or middle-income country must have an established academic post at an eligible higher education or research institution. Applicants based in low- or middle-income countries, except India, are also eligible to apply if they are carrying out research in the fields of public health and tropical medicine aimed at understanding and controlling human and animal diseases of local, national or global health importance. Awards are worth between £100,000 and £425,000 per year for a period of up to seven years, and cover research expenses, overseas allowances, travel and subsistence.

Closing date: 02 Mar 12

Deadline information: Deadlines on: 2 March 2012, 20 July 2012.

Posted date: 21 Dec 11

INTERMEDIATE FELLOWSHIPS IN PUBLIC HEALTH AND TROPICAL MEDICINE

Wellcome Trust

Description:

The Wellcome Trust invites applications for its intermediate fellowships in public health and tropical medicine. These enable high-calibre, mid-career researchers from low- and middle-income countries to establish an independent research programme. Research projects must be in the area of public health or tropical medicine, aimed at understanding and controlling human and animal diseases of local, national or global health importance. This can include laboratory-based molecular analysis of field or clinical samples, but projects focused solely on in-vitro or animal model studies will not normally be considered under this scheme.

Applicants must be nationals or legal residents of a low- and middle-income country and should be graduates in a subject relevant to public health or tropical medicines with a PhD, or medical graduates with a higher qualification equivalent to membership of the UK Royal Colleges of Physicians or recognised as specialists within a relevant research area. Three to six years' postdoctoral or research experience is required.

Fellows must be based at an eligible sponsoring institution in a low- and middle-income country that will administer the fellowship, and must have an appropriate sponsor who holds an established post for the duration of the award.

Fellowships last for up to five years and include basic salary, research expenses, training costs, funding allowance and travel to meetings. Research-dedicated costs may be up to £60,000 per year.

Closing date: 05 Mar 12

Deadline information: **Deadline:**
preliminary applications 5 March 2012;
invited full applications 28 May 2012. This call is repeated 2 times a year.

POPULATION, REPRODUCTIVE HEALTH AND ECONOMIC DEVELOPMENT - POPDEV

Population Reference Bureau

Description:

The Population Reference Bureau, in collaboration with the Economic and Social Research Council, the William and Flora Hewlett Foundation, the Netherlands Organisation for Scientific Research WOTRO Science for Global Development (NWO WOTRO) and the Research Council of Norway, invites pre-proposals for the PopDev call on population, reproductive health and economic development. Proposals may address:

- the impact of reproductive health on women's economic empowerment, particularly as measured by economic outcomes at the household and individual levels;
- relationships between reproductive health and family planning, including population policies and dynamics, and macroeconomic outcomes in countries.

Applications may be submitted by partnerships consisting of one or more participating countries (Netherlands, UK, Norway, USA) and researchers from developing countries, with priority given to sub-Saharan Africa. NWO WOTRO will provide up to €320,000 to a maximum of two projects, ESRC will provide up to €300,000 (excluding indirect and estate costs) for one

project, RCN will provide approximately €500,000 for one to two projects and PRB will provide approximately €245,000 for a maximum of two projects. Multilateral projects may apply for bonus funding worth up to €100,000 over two years. Research may take place in low- or middle-income countries, with preference given to sub-Saharan Africa.

Description:

The World Anti-Doping Agency invites applications for its social science research grant programme. This programme encourages research in the social sciences to obtain information which will enable more efficient doping prevention strategies. Projects must address one of the following research priority areas:

- increasing knowledge of causes of doping behaviour and influences that affect such behaviour;
- evaluating anti-doping intervention;
- improving social science research on doping prevention.

WADA awards research grants to organisations of all types, including universities, colleges, small businesses, for-profit and not-for-profit organisations.

Description:

terinary Medical Foundation and the Winn Feline Foundation invite application for their cat health network grants. The goal of the network is to improve feline health and welfare by funding focused feline health studies. Eligible proposals require utilization of feline SNP chip arrays with a particular interest in projects addressing feline cancer, chronic renal disease, diabetes mellitus, feline lower urinary tract disease and pain management. Projects related to nondomestic felids are acceptable if they also address issues of high significance to domestic cats. Biomedical investigators whose proposals relate to genome-wide association studies targeting monogenic and complex genetic feline hereditary diseases and genetic risk factors are encouraged to apply. Proposals from institutions offering matching grants will be given higher priority. Consortium and collaboration amongst research institutions and investigators is encouraged. The total budget is worth approximately \$100,000.

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. This call is repeated once a year.

PROVOST'S GRANT FOR LIBRARY RESEARCH
Wake Forest University

Description:

The Z Smith Reynolds Library, at Wake Forest University, invites applications for the Provost's grant for library research. These short-term library research grants support scholarly use of the special collections divisions at the library. The grant provides support for travel and living expenses for scholars. The libraries special collections include:

- rare books;
- manuscripts;
- university archives;
- the North Carolina baptist historical collection.

Awards range from \$500 to \$2500, depending on the nature of the research project and the distance traveled. Grants are available to scholars at any level who reside more than 90 miles away from the university, and who are conducting research directly related to materials in the library's special collections. Preference will be given to projects which represent a significant scholarly contribution to their fields and to projects with a high probability of eventual publication or other public dissemination.

Closing date: 30 Mar 12 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. This call is repeated once a year.

Posted date: 09 Feb 11

Award type: Access to libraries, Directed grants for individual investigators
